American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, January 5, 1861.

Western (Mass.) Railroad.

The earnings of this road for the company's fiscal year ending November 30, 1860, were:

From passengers		$ 690,992 00
From freight		1,101,118 72
From mails		54,900 00
From miscellaneous sources		54,340 00
		$1,881,350 72
And the expenses were		993,096 30
Leaving net receipts		$888,254 42
Dividend 8 per cent	$412,000	
Interest and exchange	348,223	
Sinking fund	50,000	
		810,223 00
Surplus		$78,031 42

—which added to the previous surplus, makes the present total of nominal cash profits on hand $400,664.

Compared with the previous year, the

gross nearnings show an increase of	$114,282 59
With an increase in expenses of	56,176 18
Making the increase in net earnings	$58,106 41

The present value of the sinking funds, intended to exhaust the funded debts of $6,269,520 when due, is $2,281,633. The total cost of the road, including the Hudson branch, and their equipment is $11,029,079, and the corporation has assets other than this to the net amount of $331,506. The funded debt has been increased within the year from $6,125,520 to $6,269,520, while the floating debt of $208,725 has been paid off entirely. Among the expenditures of the last year, were $273,696 for maintenance and improvement of the road, $192,976 for cars and locomotives. For the first time in its lease, the Pittsfield and North Adams road has paid a direct profit to the Western; the amount of its business over expenses and interest being $769 20.

Mines and Mining Companies of Arizona.

We find in a late number of the *Mesilla Miner* the following resume of the mines and mining companies in Arizona:

1st. Fort Fillmore Silver Mining Company, Capital stock $1,000,000, in $20 shares. Maj. Jno. J. Sprague, U. S. A., President. Office 34 Pine Street, New York. Mines in Organ Mountains, 15 miles east of, and Smelting Furnace on Rio Grande, 4 miles S. E. of Mesilla. W. H. Ritter, Engineer. Has six fine veins, yielding $200 per ton. Commenced work in December, 1859, employing fifty hands.

2d. Sonora Exploring and Mining Company organized in 1856, under charter from Ohio. Capital $2,000,000, in $100 shares, James P. Kilbreth, President, A. M. Searles, Secretary, Andrew J. Talcott, Superintendent. Leased to Charles D. Poston. Mine in Cerro Colorado Mountains near Tubac, ore silver and copper. First silver reduced July 1858.

Santa Rita Silver Mining Company.—Organized 1858, charter from Ohio. Capital $1,000,000 in $100 shares. Office 167 Walnut street, Cincinnati, Ohio. George Mendenhall, President; Horace C. Grosvenor, Director of Mines, Rephael Pumpelly Metallurgist, Head-Quarters and Mines, Santa Rita Mountains near Tubac. Peons employed 20; first silver reduced May 7th, 1859. Ore silver, copper and lead.

Sopori Mining Company.—Organized August, 1858. Capital $1,000,000, in $100 shares. Office Providence, R. I. Mines near Sopori. W. B. Sayles, Director. Not working the mine.

Patayonia Mining Company.—Private association—Capt. R. S. Ewell, U. S. A., President. Mines near Sonoita Creek, in Santa Cruz Mountains. The Mine is valuable, and has yielded, with very little machinery and poor furnaces, a fine per centage of silver. Ore silver and lead.

Union Mining Company.—Private association—Working Mines near Sonoita Creek; under direction of Col. Titus.

The San Antonio Mining Company of San Francisco—Has suspended operations for the present. Ore silver and lead.

The Cahuabi Mining Company—Private company—H. Ehrenberg, President; William Brown, Director. Mines in Papaqueria—a new company now commencing operations. The mine is said to be very rich. Ore silver and copper.

San Xavier Mining Company—Organized in San Francisco in 1857; mine near Tuscan. Work suspended.

Arizona Land and Mining Company—Capital stock $2,000,000 in $100 shares—organized under charter from Rhode Island. Samuel B. Arnold, President; W. B. Sayles; Director—hot working mines.

The Longorenia Company—Organized to work an old mine near Tubac. The work is progressing. Ore-silver and copper.

COPPER.

Arizona Copper Mining Company—Capital $1,000,000, in $100 shares. Organized 1854, in San Francisco, by E. E. Dunbar, Major R. Allen, U. S. A., President. The company have expended much money, and now have ordered steam wagons to transport the copper to market. The mine is very rich.

The Santa Rita Copper Mines—Worked by Mr. Siqueros & Son. They have not completed their arrangements yet, but are smelting three tons of copper per diem. These mines were worked many years ago, and are rich and profitable. Located 25 miles N. W. of Mowry City on Mimbres River.

The Hanover Copper Mines, six miles from the Santa Rita Mines, were discovered March, 1859, by Mr. S. Harkle. The vein is ten or twelve feet wide. Messrs. Henkle & Thibault are working 500 hands with great profit.

Messrs. Barcla, Daguerre and others have opened a vein one and a half miles from the Hanover Mine, and preparing to work.

A private company have been working on a vein half a mile from the Hanover mine thought to be rich.

A Copper Mine is worked 40 miles above the mouth of the Gila, on the Colorado river, said to be very rich.

GOLD.

Gila Gold Mines.—Much gold has been taken out of these Mines, located twenty miles above the mouth of the Gilra and about two miles from the river. Mines are rich, but too far from water, and the necessaries of life, to include very extensive working.

Brownsville Gold Placers.—Twenty miles N. W. of Mowry City on Mimbres River, are now worked by a company from this place, who have dug a ditch, at considerable cost, one and a half miles long, to throw the water on the placer.

They have been sufficiently tested to show that they are rich.

Col. Snively & Co. have discovered rich gold mines 15 miles north of the Brownsville Mines, and are now working them.

Arizona Exploring and Mining Company—Lately organized, with ample means for prosecuting a geological survey. Richard Jenkins, Superintendent; Mr. Levy, Miner. Head-quarters Mesilla on Rio Grande.

The Mesilla Land Exploring and Mining Company—Capital stock $1,000,000, in $100 shares. L. S. Owings, President. Office Grand Plaza, Mesilla, Arizona. This company have a good quartz lead, thought to be very rich, and a copper vein. They propose keeping an Exploring Company constantly in the field.

Railroads of the United States, Jan. 1, 1861.*

A tabular statement showing the length and cost of each work at the end of the financial year closing nearest to 1st January, 1861.

1. MAINE.

Names of Companies.	Mileage. Total.	Mileage. Completed.	Cost of road and equipment.

Hartford Branch	0.87	0.87	

* In the table above given the several roads are attributed to the States in which the companies owning them are domiciled. The actual mileage in each State is attained, first, by deducting the parts of road located in adjoining States, and then, by adding the mileage attributed to such adjoining States, but actually within the State to which transferred. Where a road is in two or more States, the fact is so stated. The cost of the transferred sections is deduced from the cost per mile of the whole road.

The following table exhibits the progress of railroads for the 30 years ending on the 1st Jan'y, 1861—the figures for each year being the mileage of roads in operation at its commencement:—

1832....	131	1842....	3,877	1852	10,878	
1833....	576	1843....	4,174	1853	13,315	
1834....	762	1844....	4,311	1854	15,511	
1835....	918	1845....	4,522	1855	18,153	
1836....	1,102	1846....	4,870	1856	21,440	
1837....	1,421	1847....	5,336	1857	24,290	
1838....	1,843	1848....	5,682	1858	26,210	
1839....	1,920	1849....	6,350	1859	27,857	
1840....	2,197	1850....	7,475	1860	29,401	
1841....	3,319	1851....	8,856	1861	31,179	

From the above table we deduce the following which exhibits the actual and relative increase of mileage in periods of five years—the length of road in 1831 having been 54 miles.

Five years ending	Miles open Jan.1	Increase each five years. Actual.	Relative.
1836....	1,102	1,048	1,940.74 per cent.
1841....	3,319	2,217	201.18 "
1846....	4,870	1,551	47.21 "
1851....	8,856	3,986	81.85 "
1856....	21,440	12,584	142.09 "
1861....	31,169	9,729	45.37 "

Railroad Bridge Across the Potomac River, alongside the Long Bridge at Washington.

The only gap in the continuous rail line between Philadelphia and Memphis, in a route which passes through seven contignous States, is the break at Washington City; for although the Susquehanna river at Havre-de-Grace is not bridged over, all freight and baggage cars are there ferried across on a powerful boat with a trackway upon its upper deck.

In the Senate of the United States, on Friday, December 21, on motion of Mr. Kennedy, of Maryland, the Senate considered and passed, after debate and amendment, a bill "to authorize the Baltimore and Ohio Railroad Company to extend the Washington branch of their road to the Potomac river, and across the same, by an extension of the present structure known as the Long Bridge, for the purpose of connecting with the Virginia Railroad at that point.

"The bill, as thus passed, authorizes the Baltimore and Ohio Railroad Company to extend the Washington branch from near G street north, passing through First street east to near D street south: thence by a curve crossing New Jersey avenue, south Capitol street and the Canal to E street south, and through the last named street to the Potomac river; and to extend the railroad across the river upon a pile structure alongside the Long Bridge, so as to connect with the Alexandria and Washington Railroad now on the Virginia shore. All proper provision is to be made for draws on the bridge. The extension of the road hereby granted, and the real estate of the Company connected with such extension, are to be subjected to the same taxation by the city of Washington as is levied upon other real estate of individual proprietors. Between C street and New Jersey avenue, on its west side, there shall be a tunnel for the passage of the road, along which steam or locomotive power may be used, subject to the regulation of the Corporate authorities of the city of Washington. A connecting track may be laid from any part of this road to a spot on the river between the Long Bridge and the Navy Yard for the purpose of connecting with the mail steamboats. The Company may connect this track with their present depot, by cars running with horse-power, until the expiration of two years.

"The terms of transportation of freight on this extension shall not exceed twenty-five cents per ton, nor shall the transportation of a passenger exceed twenty-five cents. The company shall be responsible for any damages that may commit to the United States, to the corporation of Washington, or to individuals, as the case may be, and the powers and privileges granted by this act are to be limited, modified, or restrained by Congress. The company is also obliged, if it accepts this bill, to check baggage over all their roads to Washington and Alexandria. The bill also em-

powers the Washington and Alexandria Railroad Company to construct a railroad for local uses from the Long Bridge, by Maryland avenue and Seventh street south, to the south bank of the canal, or else from the Long Bridge, along the Potomac shore, to the south side of the city canal, and thence east as far as Sixth street west, the said Company to pay the Baltimore Company fair rates for the transportation of passengers and merchandise across the bridge.

Newaygo and Traverse Bay Railroad.

The Commissioners of the Newaygo and Northport State road have made a contract with Messrs. Ortons, of Newaygo, for the completion of the road, through to Traverse City. The contractors are said to be reponsible men, and the work will be well and promptly executed.—*Grand Rapids Eagle.*

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending December 14, 1860:

Passengers	$19,917 38
Freight and live stock	25,376 77
Mails and sundries	1,367 08
Total	$40,661 23
Corresponding week of last year	35,829 24
Increase	$4,831 99

The receipts of the Grand Trunk Railway of Canada for the week ending Dec. 15,

were	$66,681 35
Week ending Dec. 17, 1859	57,945 26
Increase in 1860	$8,736 09
Total traffic from July 1st, 1860	$1,663,178 04
Corresponding week 1859	1,251,220 07
Increase	$411,957 97

The earnings of the Pacific Railroad for November, 1860, were:—

MAIN LINE.

	1859. (168 miles.)	1860. (176 miles.)
Freight	$32,718 35	$41,619 65
Passengers	24,097 18	19,845 25
Mails	2,100 00	2,211 50
	$58,915 53	$63,676 40
Increase		$4,760 87

SOUTHWEST BRANCH.

	(18 miles.)	(71 miles.)
Freight	$862 68	$4,309 50
Passengers	494 70	2,231 90
Mails		295 81
	$1,257 38	$6,837 21
Increase		5,479 85

The receipts of the Grand Trunk Railway of Canada for the week ending December 22, 1860,

were	$62,197 15
Corresponding week, 1859	57,466 13
Increase	$4,731 02
Tot. traffic from July 1, 1860, to date,	$1,725,375 19
Corresponding period, 1859	1,308,686 20
Increase	$416,688 99

The traffic of the Great Western Railway of Canada for the week ending Dec. 21, 1860, was as follows:

Passengers	$15,528 96
Freight and live stock	19,879 94
Mails and sundries	1,453 17
Total	$36,862 08
Corresponding week last year	36,566 04
Increase	$297 04

The nineteenth report of the Receiver of the Cincinnati, Wilmington and Zanesville Railroad, has been filed with the Clerk of the United States District Court:

GROSS EARNINGS.

Through passengers		$10 72
Local passengers		4,913 20
Mail		850 95
Express		414 80
		$6,198 67
Through freight business	$398 91	
Local freight business	9,873 46	
		10,272 37
Total gross earnings		$16,471 04

EXPENSES.

Total ordinary expenses	$12,623 59
Total extraordinary expenses	4,412 04
Total capital account	164 16
Grand total	$17,199 79
Received during November	$14,624 40
On hand November 1st	25,704 61
	$40,329 01

Harrisburg, Portsmouth, Mount Joy and Lancaster Railroad.

A meeting of the Stockholders of this Company was held at Philadelphia, Dec. 27, to take action on the acceptance or rejection of a contract for a more permanent lease of their road to the Pennsylvania Railroad Company.

Mr. M. V. Baker, the President of the Company, read the contract made with the Pennsylvania Railroad Company for the renewal of the lease of the Harrisburg and Lancaster Railroad to the Pennsylvania Railroad. The substance of the contract is that the organization of the Harrisburg Company shall be maintained, and the lease be made for 999 years; the Pennsylvania Railroad Company maintaining the road and paying the interest on the funded debt, and seven per cent. per annum on the stock. As the cost of the Harrisburg Railroad is some $95,000 greater than the amount represented by the existing number of shares, the Harrisburg Railroad Company is to be allowed to issue 1,900 shares of new stock, thus making the number of shares equal the cost of the work, and on this increased capital, the Pennsylvania Railroad Company will pay 7 per cent., which is equal to about seven and six-tenths per cent. per annum, on the present number of shares. The new stock to be issued is a fraction less than one to eleven. The profits since the last dividend in October are to be divided among Stockholders, and the dividend periods, hereafter, are to be in January and July instead of April and October. Attached to the contract was a resolution authorizing the Board of Directors to consummate the contract and the lease to the Pennsylvania Railroad Company. A motion was made that the resolution be adopted.

Mr. Baker spoke in advocacy of the contract. The advantages of the arrangement was mutual. If the Pennsylvania Railroad were to choose to get a charter and construct a road from Lancaster to Harrisburg, our line would not be worth the bonds. They have us in their power in a great measure, and the lease is, under the circumstances, the best that could be made for the Lancaster and Harrisburg Railroad Company. The stockholders are guaranteed the payment of 7 6-10 per cent. interest on their stock, and this is the best price the Pennsylvania Railroad Company will pay at any future time.

On ratifying the contract the vote stood, yeas 12,035, nays 550. Majority, 11,485. The whole number of shares of stock issued to date September 1, 1860, was 21,742, which, by the issue of 1,900 shares authorized by the new lease, will be increased to 23,642 shares. From this it will be seen that the contract was ratified by a majority of the whole number of shares issued and to be issued.

Connecticut River Railroad.

The income of this company from operations of their road, for the fiscal year ending 30th Nov.,

were	$297,096
And the operating expenses	143,637
Making the net earnings	$153,459
Add profits on investments	9,168
Add surplus Dec. 1, 1859	84,664
Total	$247,291
Against which there has been charged for interest on funded debt	$14,065
For 8 per cent. dividends on all the stock	137,288
For rent of Ashuelot road	30,000
	181,353
Leaving a cash balance of	$65,938

The funded debt of the company is $242,000. The preferred stock of the road and the lease of the Ashuelot road have both now expired—so that henceforth the company will pay with certainty, at least six per cent. to its stockholders.

Coal--Its Mechanical Powers.

It is stated by Prof. Rogers, that each acre of a coal seam in England, four feet in thickness, and yielding one yard net of pure fuel, is equivalent to about 5,000 tons, and possesses, therefore, a reserve of mechanical strength in its fuel equal to the life-labor of more than 1,600 men. Each square mile of one such single coal bed contains eight million tons of fuel, equivalent to one million of men laboring through twenty years of their ripe strength. Assuming, for calculation, that ten million tons out of the present annual products of the British coal mines—namely, sixty-five millions—are applied to the production of mechanical power, then England annually summons to her aid 3,300,000 fresh men, pledged to exert their fullest strength for twenty years. Her actual annual expenditure of power, then, is represented by 66,000,000 of able-bodied laborers.

Little Miami Railroad.

The annual meeting of the Stockholders of this Company was held in Cincinnati on the 25th ult. and the following gentlemen elected Directors for the ensuing year:

Nathaniel Wright, Henry Hanna, John Bacon, Larz Anderson, Alphonso Taft, Abraham Hivling, John H. Groesbeck, Charles H. Kilgour, Joseph C. Butler, James Hicks Jr., Joseph R. Swan, William H. Clement.

At a subsequent meeting of the Board, the following officers were re-elected:

Wm. H. Clement, President; D. G. A. Davenport, Auditor; Chas. H. Kilgour, Secretary; S. E. Wright, Treasurer; E. W. Woodward Superintendent.

The Illinois Central Railroad to be Extended into Wisconsin.

The Grant county, (Wis.) *Herald*, says that the Illinois Central Railroad is to be extended next summer from Dunleith to La Crosse, taking the routes of the Mineral Point and the Viroqua and Muscoda road. It says the iron and stock are ready on hand, and the work will be pushed forward rapidly.

Pacific Railroad Interest.

We are authorized to state that the interest on all bonds issued for the construction of the Southwest Branch of the Pacific Railroad, has been through the efforts of President George R. Taylor, and the Board of Directors, fully provided for.—*St. Louis Democrat.*

Dividends and Interest.

The New York, Providence and Boston (Stonington) Railroad Company have declared a semi-annual dividend of 2½ per cent., payable Jan. 3.

The Buffalo and State Line Railroad Company have declared a dividend of 5 per cent.

The Connecticut River Railroad Company have declared a dividend of 3 per cent., payable Feb. 1.

The Terre Haute and Richmond Railroad Company have declared a dividend of 5 per cent., payable on the 8th inst., at the Farmers' Loan and Trust Company.

The Paterson and Ramapo Railroad Company have declared a dividend of 3½ per cent.; and the Paterson and Hudson River Railroad Company a dividend of 4 per cent.; both payble at the office of the Rogers' Locomotive and Machine Works, 44 Exchange Place, on the 5th inst.

Messrs. Duncan Sherman & Co. pay the following coupons, due Jan. 1, 1861: Chicago City Municipal, Chicago City Water Loan, Buffalo City, Albany City, Leavenworth City, Hannibal and St. Joseph Railroad, Mobile and Ohio Railroad, Buffalo and State Line Railroad, Detroit and Pontiac Railroad, Atlantic and Great Western Railway, guarantied by the Bank of London; also principal and interest on New York State Loan, 5½ per cent. issued to the Auburn and Rochester Railroad; and interest on New York State 5 per cent. stock, issued to Tonawanda Railroad; New York State 6 per cent. stock, issued to the Schenectady and Troy Railroad.

Messrs. Winslow, Lanier & Co. pay the coupons due Jan. 1, on Indiana State Bank Bonds; City of Chillicothe, Ohio, issued to the Marietta and Cincinnati Railroad Company; Ross County, Ohio, issued to railroads, City of Marietta, Ohio; Town of Harmar, Ohio; Indiana Central Railroad Company; Washington County, Ohio, issued to Marietta and Cincinnati Railroad Company.

Messrs. Ketchum, Son & Co. pay the coupons of the Housatonic Railroad Bonds, due Jan. 1st.

The interest on the Bonds of the Long Island Railroad Company will be paid at the City Bank of Brooklyn.

The interest coupons on the debt of the City of Brooklyn, due 1st of January, and the principal of the loan of 1846, will be paid at the Long Island Bank on January 2nd.

The interest coupons, due Jan. 1, on the bonds of Belmont County, Muskingum County, and City of Zanesville, Ohio, will be paid at the Nassau Bank.

M. K. Jesup & Co. pay the interest coupons on the bonds of Green County, Ill., due 1st January. Also the interest, due 1st January, on the bonds of the Jolet and Chicago Road.

The interest on Fayette County, Ohio, Bonds to C. W. & Z. R. R., due 1st January, will be paid at Fayette County Bank, Washington, C. H., Ohio, in exchange on New York City.

The coupons, due 1st January, on $400,000 first mortgage bonds of the Sacramento Valley Railroad will be paid by Schuchardt & Gebhard.

The coupons of the Champaign County (Ohio) Bonds will be paid by Read Brothers & Co.

The coupons due January 1st, of the Pittsburg, Fort Wayne and Chicago Railroad Company, covered by the Haight mortgage, will be paid on presentation at the office of Gilead A. Smith, 207 Broadway

The January interest on the Coupon Bonds of the State of Virginia will be paid by the Bank of the State of New York. The January Coupons on the Public Debt of Tennessee by the Merchants' Bank. On the North Carolina and Georgia Debt, by the Bank of the Republic. On the Illinois Debt, by the American Exchange Bank. On the Missouri Debt, by the Bank of Commerce. The Bankers for the State of New York for the payment of principal and interest due 1st of January are the Manhattan Company.

The January interest on the Public Debt of the United States will be be paid at the Sub-Treasury in this City.

The Park Bank has declared a semi-annual dividend of 4 per cent. 10th. The Phoenix Bank 3½ per cent. 2d. The Commonwealth Bank 3½ per cent. 7th. The Continental Bank 3 per cent. The Mechanics and Traders Bank of Jersey City 4 per cent. The Farmers Loan and Trust Co., 4 per cent. The Hanover Bank 3½ per cent. 8th. The Manufacturers Bank of Brooklyn 5 per cent. The North River Bank 3½ per cent. 10th. The Bank of Commerce 3 per cent. 7th. The New York Exchange Bank 2 per cent. 7th. The Bank of Albany 3½ per cent. 2d. The Irving Bank 3 per cent. 7th.

The Commercial Fire Insurance Company has declared a semi-annual dividend of 8 per cent. payable on demand. The Citizens' Fire Insurance Company a dividend of 10 per cent. payable on demand. The Clinton Fire Insurance Company a semi-annual dividend of 7 per cent. payable on demand. The Mechanics' and Traders' Fire Insurance Company a semi-annual dividend of 10 per cent. payable on the 10th inst. The Hanover Fire Insurance Company, 6 per cent. payable on demand. The Mechanics' Fire Insurance Company of Brooklyn, a semi-annual dividend of 7 per cent. payable on demand. The Anchor Insurance Company 3½ per cent. payable 15th of January. The National Fire Insurance Company a dividend of 10 per cent. payable on the 9th instant.

Madras Railway.

The half yearly meeting of this Company was held in London the 16th of November. The report stated that during the past half-year the operations had been vigorously pursued on the several lines in course of construction. Several additional sections of the main or S. W. line had been opened, and the remainder brought near to completion. The works on the Bangalore line had gone actively forward. Considerable progress had been made on the Bellary or N. W. line, and its first section of 17 miles is now about to open for traffic. On the main line the section from Goriattum to Amboor 17 miles, was opened January 16th, to Variembody 10 miles more, on the 1st February, and to Tripatore 14 miles on the 23rd of May, making 137 miles open from Madras. The terminal buildings at Beypoor were sufficiently advanced to cause no delay in opening the line when ready. By the end of this year very little would remain to be done for the completion of the railway between Madras and Beypoor a distance of 400 miles from coast to coast of the Peninsula. The Bangalore branch 84 miles in length had been divided into four districts and the progress of the work had been beyond the expectation of the engineer. The board attached great importance to the completion of this line. The first 17 miles of the Bellary branch from Arconum to Naggery would be opened in the course of this month, giving a continous railway communication from Madras towards Cuddapa of nearly sixty miles, from which a considerable traffic is expected, The total number of passengers carried in the six months was 450,224, being nearly three times the number carried in the corresponding half of 1859. The receipts exceeded by 63½ per cent. those of the corresponding period of last year. The amount of goods traffic carried exceeded that of the corresponding half of 1859 by 62¾ per cent., and the receipts by 54¾ per cent. those of that period, the quantity carried being 34,461 tons against 21,168 tons, and the receipts £10,564 against £6,823. The gross traffic for the half-year ending the 30th June last amounted to £35,598 against £23,783 for the corresponding period, and the expenses to £17,551, or 49.30 per cent., against £9,208, or 38.71 per cent. The receipts for carriage of permanent way materials amounted to 11 per cent. of the gross receipts.

The CHAIRMAN explained the state of the works on different portions of the Company's lines. The progress had been satisfactory, and it was expected that the main line from Madras to Beypoor upwards of 400 miles in length would be opened in the course of next year, and to Salem 205 miles from Madras in January next, being half the way to Beypoor, and soon after from Salem to Coimbatore. The Bangalore branch, 84 miles in length, would be completed and opened as soon as possible, and from which they expected a considerable traffic. They had opened 41 miles of line in the course of the past half-year.

A short discussion ensued, in the course of which it was stated that the cost of the line already executed had been £7,000 a mile, exclusive of rolling stock, and they had no reason to suppose that that rate would be exceeded on the whole of the Company's lines. The fares and rates were merely experimental with a view to attract the traffic from the road to the railway. The first class were 1½d. per mile, the second ¾d. per mile, and the third ⅜d. per mile.—*Herapath.*

On the Comparative Tensile Strength, &c., of Steel and Wrought Iron.

A short time since we observed a remark in a contemporary Engineering Journal, stating that a "bar of Lowmoor iron bore 67,876 lbs., per sq. inch."

We do not dispute the truth of this statement, but only desire to put the matter in its correct position, by stating that it was a *forged* bar, not a *rolled* one, a very important difference by the way and one which makes it needful to correct the idea it might encourage, namely, that it was an ordinary rolled bar.

In examining the elaborate and carefully drawn up results of the valuable experiments on the strength of iron and steel, carried out for Messrs. Robert Napier and Sons, by Mr. David Kirkaldy, in our January number we, find in table B, giving the strength of iron bars, in which the bars experimented upon, were taken *promiscously* from engineer's or merchant's stores (*a very important consideration*) and not sent as samples by the makers; that a rolled, inch, round bar of Lowmoor iron, gave as the result of four experiments, a mean breaking weight of 61,798lbs. per square inch; that a rolled, inch, round bar of Bowling iron, gave as the result of four experiments, a mean of 62,404lbs. per square inch; and that a rolled, inch, round bar of Farnley iron, gave as the result of four experiments, a mean of 62,886lbs. per square inch.

The bar of Lowmoor iron from which the result given by our contemporary was taken, was forged from a "1¼ in. round bar," and was the *highest* result of the four experiments, the mean being for bars of that description 66,392lbs. and this forged style of Lowmoor bars was the only one tried, no other of any other makers being mentioned.

We see in these experiments, that the Farnley iron exhibited a considerable superiority in its strength, or resistance to a breaking strain, over both the Lowmoor and the Bowling, and this superiority becomes more manifest in the case of plates, as shown in table D of the same experi-

ments, where the plates also were taken *promiscously* from engineers' or merchants' stores, and the following extract of the three sorts of iron taken from that table, will show it in a plain and satisfactory manner.

A strip of Lowmoor iron .312 of an inch thick, or $\frac{5}{16}$, gave as a mean of five experiments, 52,000 lbs. as the longitudinal strength, and 50,515 as the mean of five experiments crossways of the grain, or an average strength of 51,257lbs.

Strips of Bowling iron, varying from.325 of an inch to .400, gave in five experiments, a mean of 52,235lbs., as the strength lengthways, and in five experiments, a mean of 46,441 crossways, or an average strength of 49,338lbs.

A strip of Farnley iron, .375 of an inch thick, gave as the mean of four experiments, an average of 56,005lbs., longitudinal strength, and in four experiments crossways of the grain, a mean of 46,221lbs. or an average strength of 51,113lbs.

Strips of the same iron, varying from .230 to .259 of an inch thick, gave as a mean of three experiments longitudinally, an average of 58,478lbs. and in six experiments crossways, an average of 54,098, or an average total strength of 56,292lbs.

The respective strengths or values of these irons stand thus: for bars, Farnley, 62,886—Bowling, 62,404—Lowmoor, 61,798. For plates, Farnley, 56,292 and 51,113—Lowmoor, 51,257—Bowling, 49,338.

We find that Farnley plates are now in great repute for locomotive and other high-pressure boilers, also for the furnaces and parts directly exposed to the heat of the fire in other boilers, and from the results of Mr. Kirkaldy's experiments, there can be little doubt of their superiority in strength and fitness for this purpose.—*London Artizan.*

Pittsburg and Connellsville Railroad.

The report of the Baltimore and Ohio, which we have recently received in pamphlet form, contains a letter from Benj. H. Latrobe, Esq., President of the Pittsburg and Connellsville Railroad Company, which gives a complete statement of the condition of that road, and from which we make the following extract:

As the annual reports of this Company have informed you, there were 48 miles of the road opened in January, 1857, extending from Connellsville to Turtle Creek, where a junction was then made with the Pennsylvania Central Railroad, 12 miles from Pittsburg. This is still the entire extent of road in use, the gross revenue from which was, for the years ending November 1st, 1857-8-9, $45,586, $48,887, and $57,838, respectively. For the present year now just expiring, it will be about $80,000. The increase of income, you will thus perceive, is encouraging, and has accelerated from year to year, as the improving influence of the road, upon the country intersected by it, is more and more felt. It would, however, have been much larger, but for the check upon its expansion by the depressed state of trade since the crisis of 1857, and from which the country is but now beginning, decidedly, to recover. Another serious restriction upon the development of the business of the road, has been experienced in the want of an independent line into Pittsburg. Although the joint operations of the two roads have been carried on under an arrangement fair to both parties, and free from official embarrassments, yet for several reasons, the connection has operated greatly to the disadvantage of the Pittsburg and Connellsville Railroad. It being impossible, as you are well aware, in the state of feeling among capitalists toward railroad securities during the last three or four years, to command the means to carry the road through to Cumberland, the company have confined their efforts to its extension into Pittsburg, which is now on the eve of being effected, and by which two and a-half miles of distance will be saved, the high grades of the corresponding part of the Pennsylvania Railroad avoided, detention from missing train connections obviated, and a great and rapid expansion of the business and revenue of the Pittsburg and Connellsville Railroad realized. The means of constructing this 10½ miles of new road, have been obtained by the disposal of the company's first mortgage bonds, specifically secured upon this part of the road, and issued in conformity with an ordinance of the city of Baltimore, waiving her prior lien thereon. When this work is completed, which is expected during the coming winter, (as the whole road is now nearly ready for the rails, for the supply of which, favorable terms have been made,) the length of road in use will be 58½ miles, from Pittsburg to Connellsville—to which may be added a branch of 15½ miles to Uniontown, built under another charter, by the citizens of that borough and its vicinity, making 71 miles in all, and commanding the trade and travel of one of the most fertile and improving parts of Western Pennsylvania. As a local road terminating in Pittsburg, it would in time, no doubt, pay a fair net return upon its cost; but this prospect is principally encouraging, in view of its bearing upon the ability of the company to procure the means of extending their line Eastward from Connellsville to Cumberland. The distance is 91 miles, or, if connection be made with the Mount Savage Railroad, 4 mile west of Cumberland—87 miles. Upon this part of the route, which embraces the whole mountain region, there has been no work done except the careful location of the road, and the expenditure of about $200,000 at the Summit Tunnel, 33 miles from Cumberland. This Tunnel and its approaches are the only really heavy works upon the whole line; and all the difficulties are here already overcome, as the Tunnel heading, 4,650 feet long in all, was within 250 feet of completion when the work had to be suspended in October, 1857. There are but two other short tunnels, making, on the whole line of 149 miles, only three in all, showing significantly the easy character of this route, across the the Alleghanies, and which is equally distinguishable by the superiority of its grades and curvatures.

As the Company expect to finish their road into Pittsburg this winter, and thus to add an important and profitable link to their chain, from which an immediate increase of their revenue and resources will arise, so their views are to take active steps next Spring or Summer, to invite, by loan, the capital with which to complete the remainder of their line to Cumberland. This they hope to do by an issue of first mortgage bonds, the city of Baltimore having given the company the right to make a lien upon the road prior to her existing mortgage,—the Commissioners of Finance to be first satisfied that the loan, if so effected, will finish the entire road. A successful appeal to capitalists may, it is hoped, be then made, sustained by the various interests concerned, including the local ones along the route, which are extremely anxious for the prosecution of the work, upon which the development of the vast mineral and agricultural wealth of the region traversed depends, and the inflow of which, into Baltimore, over the Baltimore and Ohio Railroad, will be greatly beneficial to that road and city. The Pittsburg and Connellsville Railroad, in its present position, would *appear* to lead the trade of the Pennsylvania counties west of the mountains,—and formerly coming to Baltimore over the National Turnpike—away from Baltimore, first to Pittsburg, and ultimately to Philadelphia. This prevailing impression is not well founded, as the Pittsburg and Connellsville Road, as a local road, simply carries the trade of the counties to the Pennsylvania Railroad, whence it can more cheaply reach Baltimore over that road and the Northern Central, than across the mountains over the National Turnpike. Even, however, if the public impressions should be right upon this point, there is all the more occasion to put an end to that state of things by the completion of the Pittsburg and Conellsville Railroad to Cumberland, by which the old course of trade will be re-established, and Baltimore be once more in the enjoyment of the commerce of that rich region. By the opening of the road from Pittsburg to Cumberland also, a full share of the immense local and through trade and travel of that great commercial and manufacturing centre will be brought to Baltimore, and over a better line, and one under her own control, instead of that of a rival. It is only necessary to compare the trade between Pittsburg and Baltimore, as shown by the Report of the Pennsylvania Railroad Company, to be satisfied that, by the present route via Harrisburg, Baltimore does not get her due share. The results of the opening of this new and direct route, free from the restrictions and embarrassments of the existing one, will clearly show why Baltimore has always set so high a value upon a direct connection with Pittsburg, as to have made the latter, in the estimation of many of her citizens, the preferable western terminus of her own road, which will at least be certainly better able to compete with her Northern rivals, when she has this arm added to the two by which she strikes the Ohio lower down.

Baltimore and her road have the partialities of every class in Pittsburg enlisted in their favor; and this, in all probability, permanently, as the system of discrimination against Pittsburg, which has made the Pennsylvania Railroad so unpopular there, seems to be the necessary result of her competition with the New York and Virginia routes to the West for the trade of Ohio and the States beyond, and to which system the Pittsburg and Connellsville Railroad will have no occasion to resort. I need not, however, argue the importance of the line from Cumberland to Pittsburg to one so familiar with all its recommendations as yourself. With proper encouragement from its friends, the Pittsburg and Connellsville Railroad Company will be enabled to accomplish this work within a reasonable time. There is a stock basis, which, together with the release of the prior lien of Baltimore, will make upwards of $2,500,000, and should be sufficient to support a loan large enough to finish the 91 miles of road remaining to be built, and which will not exceed $3,500,000, including an ample equipment. The Company's finances are in an improved and improving condition, as will be seen by this, that in 1856 their floating debt was $788,863, in 1857 $513,403, in 1858, $211,729, in 1859 $175,550, which last amount will show a reduction this year of upwards of $100,000, the remainder being covered by collateral securities sufficient to extinguish it probably within the year. The only creditors then left will be the City of Pittsburg and the county of Alleghany for arrears of interest on their stock, and the city of Baltimore for its loan and back interest, the latter debt being protected by a mortgage, which places the control of the work in the hands of Baltimore,—a power which that City has thus far used with a wise leniency, as her true interests require that she should leave the Company free to complete the road, if that can be effected in the manner above indicated and contemplated by her own Ordinance of 1856, in which she waives her priority of lien with a view to the accomplishment of that object.

The Public Works of Virginia.

The latter part of last week there was a a Convention of Contractors on the Covington and Ohio Railroad in this city, to consider the question of whether they would go on with their contracts under the present low price of State stock or not. The subject was considered most earnestly, Mr. Fisk, the accomplished Engineer of the road, being present to aid the meeting in its deliberations. It was finally determined that, without some aid from the board of Public Works or the Legislature, the work must be suspended. Application it was determined, should at once be made to the Board, and if unsuccessful, to the Legislature when it meets. It is to be hoped that measures will be taken to prevent the stoppage of the work. The sufferings of the laborers will be most severe should they be thrown out of employment, and the road, left in its present state, would be liable to damage that would cause severe loss to the State.—*Richmond Dispatch, Dec. 24.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, January 5, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Railway and Financial Review of 1860.

The most eventful year in our history as a nation has just closed. It has been marked alike by the most extraordinary commercial as well as political movements. It was a year of abundant crops succeeding to several deficient ones. At its commencement the disasters of 1857 had well nigh been forgotten, and its losses mainly restored by the accumulating wealth of the country. The increasing abundance of money, and the prospect of plentiful harvests again turned attention to railroad securities, which under large present and prospective increase of traffic grew rapidly into favor. An extraordinary advance followed, carrying up the market value of many securities several hundred per cent. The advance in Erie shares which, during the year, went from 5 to over 40 per cent. may be taken as a good illustration of the general improvement of the market. For a long time the utmost confidence prevailed based upon the material interests of the country, which were never in a more promising condition. The general election followed, and developed the extraordinary and unexpected fact that one of the States, at least, was determined to make it the occasion to withdraw from the Union. The apprehension and alarm created was excessive, completely paralyzing all the operations of society. In a few weeks the greater part of the improvement in the share market was lost, and, in many cases, prices went to the lowest point reached in 1857. The gulf of anarchy and disunion, which yawned before us, threatened for a time to swallow up all the material interests of the country. Civil war appeared inevitable. Universal terror

seized the public mind, as imbecility and treachery seemed to forbid all hope of relief from any quarter.

But the year did not come quite to a close without some token of returning confidence and order. The first few days of the NEW YEAR mark an extraordinary improvement. The period of terror, because the future was a blank has passed. South Carolina has taken the overt step, and, at the same time, our own Government appears to have broken its compact which bound it a long time to the secessionists, and is asserting freedom of action and its own dignity. The changes made in the cabinet are all in favor of maintaining order and efficient action. The matter of secession is, at last, taken vigorously in hand, and a path entered upon, which must bring matters to an issue—we trust and believe a pacific one. At any rate, we are now on the right road to a speedy solution of our difficulties. If we are to have dissolution the sooner it comes the better. If not, we cannot allow the threat of it longer to to destroy the peace and disturb the material interests of the country. Enough has already been suffered. The seceding States have taken their first lesson and have, undoubtedly, proved to their own satisfaction that secession and anarchy is not the high road to wealth and prosperity. We doubt whether in the whole period of their existence they have suffered so much distress in so short a time. When they go far enough to see that secession is utter ruin, they will begin to pause. That in their opinion it is equal ruin to the Northern States, will not alleviate their condition, nor make it any more tolerable.

In the department of railroads fair progress has been made in the construction of these works. The whole number of miles in operation in the United States, at the close of the year, was 31,168—showing an increased mileage during the year of 1,778 miles. This increase is, of course, chiefly in the Western and Southwestern States. The total length of line on which more or less work has been done, is 17,080 miles. A part of the mileage put down in progress must be regarded as only projected. Still, with an absence of political agitation, there can be no doubt that rapid progress will be made till the total mileage in the United States reaches 50,000. Railroads are certain to be constructed till every section of the conntry is well supplied with them.

The total cost of our railroads up to the present time, has been $1,177,993,818, being an increase of $9,073,000 over 1859. The increased investment would have been considerably larger but for the reduced capital of many of the companies consequent upon a reorganization of their affairs.

We cannot give with the same accuracy the earnings of the roads. The aggregate has been about $140,000,000, or 12 per cent. on their cost. The net earnings have been about $60,000,000, or 5 per cent. on their cost. Only a comparatively small portion of this amount has been realized in dividends. The accruing interest on the debts of the companies absorbing, probably, one-half of this aamount. A considerable portion of the balance has been used by them upon their roads, and in the discharge of floating liabilities.

In the traffic of the roads, there has been a very large gain over 1859, equal in many cases to 50 per cent. The year was one of extraordinary abundance. Throughout all the Northern and Northwestern States, and our roads were getting up to the earnings of their best days. Political agitations are the only things that stand in the way of a very large traffic the coming year.

Progress of Railroads in the United States, for 10 years.

In the decade just closed, there have been constructed in the United States 22,323 miles of railroad—the number of miles in operation, January 1st, 1851, being 8,856, and on the 1st of January, 1861, 31,168. The average number of miles annually constructed has been about 2,200—the total amount expended on our roads within the ten years has been very nearly $1,000,000,000, or $100,000,000 annually. These sums will give a good idea of the material progress of the country within the period named.

TABLE *showing the increase of railroads from 1st January*, 1851 *to 1st January*, 1861.

Nashville and Chattanooga Railroad.

At a meeting of the stockholders of this Company at Murfreesboro', on the 12th ult., the old Board of Directors was re-elected, except Alfred Miller, and J. M. Murrell, who declined a re-election, and in whose stead Col. E. A. Keeble, of Murfreesboro', and N. E. Alloway, Esq., of Nashville, were chosen. The former officers were re-elected.

Journal of Railroad Law.

TITLE TO LAND BY ADVERSE PROFESSION FOR TWENTY-ONE YEARS: SUBSEQUENT NEGLECT TO KEEP POSSESSION DOES NOT DEFEAT THE TITLE EVEN AS AGAINST BONA FIDE PURCHASERS.

The President and Directors of the Williams Valley Railroad Company brought an action of ejectment against one John Schall and Andrew Jones, for a tract of 144 acres of land in Lower Mahantongo township, Schuylkill County. The land was granted by the Commonwealth to one John Lesher, by warrant dated November 3, 1784, for 170 acres, including an improvement on the Broad Top Mountain, and upon this warrant a survey was made of 144 acres on the 5th of May, 1785. The plaintiffs claimed title to the land, and in support of their claim exhibited an unbroken chain of written conveyances from this John Lesher to themselves.

The defendants did not show any title from the Commonwealth, nor any conveyance of title acquired by the Lesher warrant; but claimed title under the statute of limitations by virtue of actual profession, by residence and clearing, and cultivation of the land, for a period of twenty-one years by themselves and those under whom they claimed. They also exhibited a deed dated Aug. 3, 1801, from one John Myer to Christian Bartche for 400 acres, surveyed to John Witman on warrant dated July 1793. This Witman tract lay near to the Lesher survey, and although there was no evidence of the purchase of the Lesher tract by Bartche, yet the evidence tended to show that he claimed it some way, either by color of title or as an intruder. He put his parents upon this tract to live, and when his property was afterwards sold by the Sheriff to William Green, and conveyed by deed it was described as 700 acres. Green sold to one Joseph Keffer, in whose hands the property was levied upon for Keffer's default in payment of taxes, and surveyed by the Sheriff in which it is described as 200 acres more or less, to one John Hammer. Hammer conveyed it to the County Commissioners, and the Commissioners conveyed it to the defendants.

The defendants showed a possession which was commenced in 1805 and continued down to about 1833, when they deserted the premises and one George Danbert entered as an intruder. The plaintiffs contended that even if the defendants title was perfected by possession up till 1833, the possession was then abandoned, and the plaintiffs being *bona fide* purchasers without notice, they could not be affected by the defendant's title under the statute.

At the trial the Court submitted the question as to which party's negligence had most contributed to the difficulty, making the case turn upon the question of negligence. The jury returned a verdict for the plaintiffs, from which the defendant appealed, and moved for a new trial. The motion was overruled by the Common Pleas, and the defendant again appealed to the Supreme Court. The following is the opinion of the Appellate Court.

WOODWARD J. All the material facts of this case lie within a narrow compass. The plaintiffs showed a perfect paper title to the land in controversy from John Lesher, the original warrantee of the Commonwealth. Deriving their title through Schwartz and Snaverly, they showed that when the latter purchased there was no inconsist-

ent title to record, and no possession to give notice of an adverse right. Daubert who was on the ground at the time was a mere intruder and claimed under neither title that is in question here. The plaintiffs claimed, therefore, to be *bona fide* purchasers, without notice of the title of the defendant.

The defendants claimed under the statute of limitations. They showed a possession commenced in 1805, and continued down to about 1833, when the tenants of the then owners deserted the premises, and George Daubert entered as an intruder. This title, transferred several times, and twice by public sales, was duly vested in the defendants. As the case is prosecuted on the record, we are obliged to consider every fact necessary to complete a title under the statute, so proved that the jury would have found it had it been submitted. In other words we assume that the plaintiffs have a perfect paper title, and the defendants a perfect title under the statute of limitations—but that when Snaverly bought the title under which the plaintiffs claim, the defendants had lost the possession, though the statutary period of twenty-one years had run out in favor of their right long before.

The learned judge declined to affirm the main position assumed by the defendants, that a title once perfected by twenty-one years possession, cannot be lost by neglecting to keep up the possession after that period, and that nothing short of twenty-one years adverse possession will bar it.

An unrecorded paper title does not effect a purchaser without actual notice, and the learned judge pronounced a title by the statute of limitations, if unaccompanied by a continued possession as no morn than an unrecorded paper title. If this be sound doctrine, then the claimant under the statute, however he may have perfected his right, must keep his flag flying forever, and the statute ceases to be a statute of limitations.

The first observation we have to make on this ruling is that titles matured under the statute of limitations are not within the recording acts. However expedient it might be to require some public record of such titles to be kept, and however inconvenient it may be to purchasers to ascertain what titles of that sort are outstanding, still we have not as yet any legislation on the subject, and it is not competent for a judicial decision to force upon them consequences drawn from the recording acts. Those acts relate exclusively to written titles. Possessory titles have always been favorites of Pennsylvania Legislation, and it would ill become the judiciary to clog them with conditions and disabilities which the law making power has not prescribed, nor even suggested. * *

If the operation of the statute be such as the cases teach—if it takes away the title of the real owner and transfers it, not in form indeed, but in legal effect to the adverse occupier, is it not manifest that when Snaverly bought the recorded title of Schwartz, in 1837, he bought a title which, by operation of law was fairly vested in these defendants? Whatever merit that title possessed, by reason of being on record, must be regarded as belonging to the defendants. In a word, whatever title was outstanding from the Commonwealth to this land, they had acquired, and had acquired it too, under a statute which gave them no facilities, and laid upon them no obligation to make a record of it. This view of the effect of the statute verifies Judge Huston's words in Leeds *vs.* Bender, that "it gives as perfect a title, if not a more perfect title, than any known to the law." That experienced Judge told us in the same case, that he had attended to the operation of the statute almost half a century, and that he did not know any more beneficial, and in its general operation, more just law.

But when Snaverly bought, he had no notice that the title he was purchasing had been transferred to the defendants, and it is argued that secret titles and liens are to discouraged. Undoubtedly, yet how can the title of the defendants be regarded as secret? It had come down through two public sales that were on record, and it was proclaimed by whatever marks on the ground a possession of nearly 30 years had left there. There were besides the traditions of the neighborhood, anciently the only legal evidence of the transfers of land to guide a diligent enquirer to the truth. If these were incufficient circumstances to effect a purchaser with notice, then it must be remembered that a title under the statute cannot be spread upon the registry of deeds. The law has created the title but has provided no way of recording it, shall the law for that reason destroy it? This would be to charge the law with folly.

We think the court erred in submitting the case to the jury as a question of negligence, and that they should have affirmed the defendants proposition, that a title perfected under the statute of limitations is not lost by neglecting to keep up the possession. The judgment is reversed, and a new trial is ordered.

Debt of California.

The last California mail brought the following notice in regard to the unprovided claims in the State of California.

STATE OF CALIFORNIA—EXECUTIVE DEPARTMENT.

Notice is hereby given that the general election held on the 6th day of November, A. D., 1860, an act entitled "An act to provide for paying certain equitable claims against the State of California, and to contract a Funded Debt for that purpose," approved April 30, 1860, was submitted to the qualified voters of the State for their ratification or rejection, by having the words "Pay the debt" or "Repudiate the debt" printed on the ballots. And it is certified to me by the Secretary of State that a majority of all the ballots cast at such election was in favor of "Pay the debt."

Now, therefore, by virtue of the authority vested in me by said Act, I do hereby make proclamation of the same to all to whom it may concern; and that the following specified claims are entitled to be received and funded under the provisions of the act aforesaid, to wit:

First—Civil bonds of the State issued under the Funding Acts passed in the years one thousand eight hundred and fifty-one, one thousand eight hundred and fifty-two, one thousand eight hundred and fifty-three, one thousand eight hundred and fifty-five, and one thousand eight hundred and fifty-six, which are now outstanding, with interest due on the same, when presented, as appears by the coupons.

Second—Controller's warrants, drawn under sanction of the law, for civil expenses, prior to January first, A. D. one thousand eight hundred and fifty-seven, and now outstanding and unpaid. But the provisions of this Act shall not authorize the funding of any of these warrants the registration and indorsement of which were canceled by the provisions of "An Act to cancel the registration and indorsement of certain warrants, and prohibiting a payment of the same," approved January thirteenth, A. D. one thousand eight hundred and fifty-six, or warrants which have been specially adjudged illegal by any court; and all said warrants specified in the last mentioned Act, are hereby expressly excluded from all benefits and provisions of this act.

Third—Just or legal claims against the State accrued prior to Jan. 1, 1857, and which has been or may be allowed and audited by act of the Legislature.

In testimony whereof, I have hereunto
L. S. set my hand and caused the great seal of State to be affixed, at Sacramento, this fifth day of December, 1860.

JOHN D. DOWNEY, Governor.

Attest: JOHNSON PRICE, Secretary of State.

The Pacific Railroad.

The last rail between Smithton and Sedalia on the Pacific Railroad has been laid, and the road will, in a few days, be opened to the latter point—a distance of 190 miles from St. Louis.

DUBUQUE & SIOUX CITY R. R. CO.
ELECTION NOTICE.

THE first election of directors of said company will be held at their office in Dubuque, Iowa, on Monday the 11th of February, 1861.

4t2 JAMES M. M'KINLAY, Secretary.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL, September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11¼ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11¼ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. Abont 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.

ANDREW ELLISON, Jr., Eng'r in Chief.

LAND AND SUBMARINE BLASTING,

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c each; **or** the whole, handsomely bound in cloth, in one volume, **for $7.50.**

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and

WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor

F. S. PEASE, 61 Main st., BUFFALO.

Reliable orders filled for any part of the United States or Europe.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r.
Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON,
Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r,
WM. KELLOG, Master of Repairs,
Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r,
Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO.,
HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W. and J. F STARR, Camden, N J.
MORRIS, TASKER & CO.,
MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84; Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 48 Pine st., New York City.

ROOFING.

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person,* at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

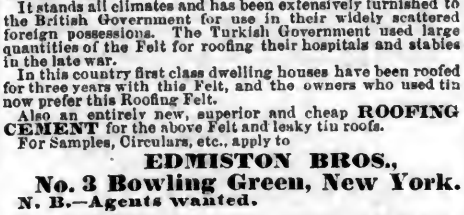
JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.



It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States. **DITTO, PORTER & CO.,**
Successors to JOSEPH DITTO & CO.,

New York, Saturday, January 12, 1861.

Boston and Lowell Railroad.

The annual meeting of the stockholders of this company was held in Boston on the 2d inst. The report of the directors for the fiscal year ending September 30, 1860 was read. From this we learn that the receipts were:

From passengers		$210,026 84
" freight		320,539 57
" mails and express		13,130 37
" rents		1,185 43
		$544,882 21

And the expenses have been:

Repairs of road	$70,767 54	
" engines	23,605 76	
" cars	24,439 00	
" bridges	16,463 28	
" depots, etc.	19,691 44	
Merchandise expenses	33,712 82	
Wages	48,819 30	
Taxes, insurances, etc	11,778 60	
Fuel	35,305 06	
Rents to other roads	39,316 20	
Miscellaneous	35,367 81	
		360,266 81
Net earnings		$184,615 40
Balance interest account		25,847 02
Net income		$158,768 38

The obligations of the Corporation to the holders of its Bonds, which will be payable in 1873, have been performed by the deposits of $18,300 with the Trustee of the sinking fund, in accordance with the terms of the contract with them.

The present amount of that fund is $89,550 41; to which will be added on the 31st December, a semi-annual deposit of $9,150 and one year's accumulation of deposits.

The balance to credit of profit and loss 30th September, 1859, was		$354,239 00
The net receipts from the traffic of the year, have been		184,280 09
The net receipts from other sources, have been		1,185 43
		$539,704 52
During the year that account has been charged with am't of two dividends	$137,259 00	
Balance of interest acc't.	25,847 02	
Settlement with Concord and Montreal R. R. Co.	850 12	
		$163,947 14
Leaving present balance to that acc't.		$375,757 38
From which is to be deducted the amount of dividend payable on the first day of January, 1861		73,200 00
Surplus		$302,557 38

The whole debt of the Corporation on the 30th September, 1860, was as follows:

Bonds maturing in 1873	$440,000 00
Unclaimed dividends, &c., &c.	3,863 50
	$443,863 50

The whole cost of the construction and equipment of Railroad has been $2,428,592 79

Viz: Road	$ 925,702 38
Rail iron	266,308 46
Woburn Branch	39,365 50
Depots	1,004,578 20
Engines and cars	192,638 25
	$2,428,592 79

Since the last annual report, the directors have ordered two dividends of four per cent. each, one of which was paid in July last: the other of which will be payable on January 1, 1861.

The condition of the Corporation is as follows:

ASSETS.

Cost of road, depots and equipment	$2,428,592 79
Trustee of sinking fund	89,550 41
Notes receivable	3,688 87

Treasurer—J. THOMAS STEVENSON.

Manager—GEO. STARK.

Superintendent—J. B. WINSLOW.

Grain Trade of Chicago.

From the elaborate annual review of the *Chicago Press*, we take the following, showing the imports and exports of Grain at that port during the last four years:

The total receipts of Flour and Grain during the past year, as will be seen from the tables which follow, amount to 36,504,772 bushels. The Grain alone foots up 33,004,742 bushels, which is more than double the receipts of 1859, and ten millions more that was ever received in this city in any previous year of our history.

The shipments during the past year amount in bushels to 31,459,697 bushels, of which 27,599,002 bushels were of Grain alone.

The following tables show the items separately, as compared with the figures of former years:

TOTAL RECEIPTS OF FLOUR AND GRAIN FOR FOUR YEARS.

	1857.	1858.
Wheat, bush	10,554,761	9,761,326
Corn, bush.	7,409,130	8,260,033
Oats, bush.	1,707,245	2,295,322
Rye, bush.	87,911	70,031
Barley, bush.	127,689	411,421
Total	19,886 536	20,798,233
Flour into wheat	1,969,679	2,624,757
Total	21,856,206	23,422,708
	1859.	1860.
Wheat, bush.	8,184,746	14,568,429
Corn, bush.	5,410,003	15,487,966
Oats, bush.	1,813,048	2,029,906
Rye, bush.	228,179	295,436
Barley, bush.	662,187	623,005
Total.	16,298,163	33,004,742
Flour into wheat.	3,710,060	3,500,088
Total	20,008,223	36,504,772

SHIPMENTS OF ALL KINDS OF GRAIN FOR THE PAST FOUR YEARS.

	1857.	1858.
Wheat, bush	9,485,052	8,727,838
Corn, bush	6,814,615	7,498,212
Oats, bush	416,778	1,498,134

Total	16,734,438	17,853,761
Flour into wheat	1,298,240	2,181,405
Total	18,032,678	20,035,166

	1858.	1860.
Wheat, bush	7,266,553	12,487,687
Corn, bush	4,127,654	13,943,172
Oats, bush	1,174,177	1,039,779
Rye, bush	131,449	129,156
Barley, bush	478,162	260,211
Total	13,178,995	27,890,002
Flour into wheat	3,484,800	3,566,695
Total	16,663,795	31,456,697

New York State Banks.

The following table, from the report of the Superintendent of the Bank Department of this State, exhibits the amount of outstanding circulation issued to banking associations and individual bankers, and the amount and character of the securities deposited and held in trust for its redemption on the 30th day of September, 1860:

Outstanding circulation		$28,841,416 00
SECURITIES.		
Bonds and mortgages		$5,851,463 79
New York State stock—		
4½ per cent.	$134,400 00	
5 do.	7,431,969 01	
5½ do.	987,000 00	
6 do.	12,051,052 92	
		20,554,421 93
U. S. stock, 5 per ct.	$2,919,000 00	
Do. 6 do.	201,600 00	
		3,120,600 00
Arkansas State stock, 6 per cent.		142,000 00
Illinois State stock, 6 per cent.		410,250 00
Michigan State stock, 6 per cent.		41,000 00
Cash		75,726 40
Total		$30,195,462 12
Aggregate of the securities held in trust for banking associations and individual bankers, Sept. 30th, 1859	$28,068,336 92	
Increase during the year, 1860	2,127,125 20	
		30,195,462 12
Amount of circulation outstanding Sept. 30, 1860		$28,841,416 00
Am't of circulation Sept. 30, 1859,		26,490,632 00
Increase for the year ending Sept. 30, 1860		$2,350,784 90
The increase in the securities above noted, viz		$2,127,125 20
has been in the following:		
New York State stock,	$1,292,886 00	
U. S. stock	1,256,500 00	
	$2,548,886 00	
Less decrease in the following:		
Bonds and mortg's.	$325,449 00	
Arkans. St. stock	20,000 00	
Illinois St. stock	73,483 34	
Cash	2,828 46	
	421,760 80	
		2,127,125 20

The aggregate amount of securities held for the circulating notes issued to the free banks of this State, including cash, is $30,195,462 12; upon which currency has been issued amounting to $28,841,416. The Superintendent has no hesitation in saying that the currency of the free banks and bankers of this State never was better secured than at the present time, in the kind of securities held by the Department. The amount of bonds and mortgages held by the Bank Department on the 1st October, 1857, was $7,856,231 59, while the amount on the 1st of October, 1860, was $5,851,463 79, showing a decrease in that peculiar security of $2,004,767 80. The Superintendent also holds in trust for the Buffalo Trust Company, $100,000 in bonds and mortgages, and for the U. S. Trust Company, New York, $100,000 in Auburn City stock, making the total amount of securities held in the Bank Department, on the 30th Sept., 1860, for all purposes, $30,481,813.33, being an increase during the last fiscal year of $2,156,110 38. The number of banks, banking associations, and individual bankers, actually doing business in this State on the 30th day of September last, was 306, and 37 were either closing their own affairs, or are insolvent, and their business is being closed by this Department, leaving 343 open bank accounts upon the books of this office. The entire emission of bank notes from the Bank Department, included that of incorporated banks, banking associations and individual bankers, is $38,034,800, against $36,581,276 in 1859, being an increase during the past fiscal year of $1,453,524.

The absolute increase of the currency in actual circulation, of the banks of this State during the past fiscal year, has been $3,788,159.

The total outstanding circulation of the expired incorporated banks, on the 30th of September, 1859, was	$1,805,922
On the 30th September, 1860	1,563,595
Returned and destroyed during the year.	$242,327

The Superintendent expresses his confidence in the Banking law as it now stands, and states that it needs no amendment.

Railroad Business at Detroit.

The aggregate earnings of the five Railroads centering in Detroit for two years, were as follows:

	1859-60.	1858-59.
Michigan Central RR.	$2,029,070.62	$1,753,580.67
Mi'h.South.&N.I.RR.	2,148,363.04	1,728,302.92
Detroit & Mil'kee RR.	675,083.30	540,939.11
Great Western Railw.	2,112,100.80	1,897,659.78
Grand Trunk Railw'y.	3,288,850.15	2,395,861.75
Total	$10,253,467.91	$8,316,344.18
Increase	$1,937,123.73	
Per cent. of increase	23.15	

United States Mint.

The coinage of the Mint and Branch Mints of the United States for the last fiscal year is thus reported:

	Gold.	Silver.	Cents.	Total.
Phila.	$4,354,577	$857,076	$342,000	$553,653
Branches:				
N. O.	169,000	1,598,422	.....	1,767,422
S. Fra.	11,889,000	572,912	.....	12,461,912
Dah'a.	69,477	.....	.....	69,477
Char'e	133,697	.....	.....	133,697
N.Y.	6,831,532	222,226	.....	7,053,758
Total.	$23,447,282	3,250,636	342,000	27,039,919

The entire coinage and deposits have been as follows:

Dep'ts.	22,673,102	3,152,437	.....	25,825,639
Coin'e	16,445,476	2,769,920	342,000	27,039,919
Bars.	7,001,875	480,716	.....	

Toledo and Wabash Railroad.

The income of this road for the fiscal year ending Aug. 31, 1860, were:

From passengers		$233,545 82
" freight		568,070 53
" mail		24,200 00
" express		15,773 62
" rent of cars and engines		6,579 59
" miscellaneous collections		811 87
Received on acc't of freight and mail transportation of previous year		12,741 01
		$861,722 44
Transportation expenses.	$406,939 01	
Salaries of clerks	16,652 02	
Taxes and insurance	17,185 68	
Advertising and agencies.	14,183 41	
Legal expenses	6,644 17	
Rent of cars and engines.	7,484 94	
Discount and exchange	4,787 05	
Commissioners	4,087 07	
Miscellaneous expenses	9,987 08	
		487,950 43
Net income		$373,772 01
The earnings this year were		$848,981 43
Last year they were		762,508 24
An increase of		$86,473 19
The expen'es this year were.	$487,950 43	
Last year they were	438,711 07	
		49,239 36
Making the increase of net earnings		$37,233 83

The present capital of the Toledo and Wabash Railway Company, combining the general and preferred stock, the funded and other permanent obligations, and which primarily represent the cost of the railway and equipment of the company, amounts to $8,019,539 37. The general stock consists of 26,629 shares of $50 each, amounting to $1,331,450, and the preferred stock consists of 15,841 shares of $50 each, amounting to $972,050, making the aggregate of stock capital $2,128,500. The funded obligations of the company consist of $3,400,000 First Mortgage Bonds and $2,500,000 Second Mortgage Bonds, both of which issues are secured by mortgages executed in accordance with the laws of the State of Ohio and Indiana, into or through which the road extends, and under whose laws the company derive their corporate franchises, and they constitute the only mortgage liens now existing upon the road.

The remaining element of capital liability comprises the funded and unfunded coupons, numbers eight and nine originally attached to the First Mortgage Bonds. These coupons matured prior to the inception of this company, but it was provided and made a condition precedent to its organization that they should be redeemed and permanently merged into the funded notes of the company, and accordingly the liability so created has become an integral part of the capital of the company. The notes issued for the redemption and funding of these coupons bear dates Nov. 1, 1858, and March 1, 1859, bearing 7 per cent. interest, and the principal thereof is made payable in the city of New York in five equal instalments, commencing on the 1st day of November, 1860. The total amount of these funded notes thus far issued is $96,049 88, leaving of said coupons still outstanding and unredeemed with interest, $52,389 49.

A summary of the foregoing liabilities amounting in the aggregate to $8,019,539 37, and constituting the total capital of the company, is given in the annexed balance sheet.

During the fiscal year there have been transported over the road 3,000,000 bushels of grain and 114,000 barrels of flour, as against 687,000 bushels of grain and 82,000 barrels of flour for the preceding year.

RESIDUARY INCOME BALANCE—*Construction, Equipment, and Interest Department for fiscal year ending Aug.* 31, 1860.

	Dr.
To interest account	$388,641 61
To land and damages	4,856 36

Total		$8,498,947 70

Debt of Pennsylvania.

The funded debt of Pennsylvania on the first day of December, 1860, was $37,849,125, which, with $120,721 of unfunded debt, makes the entire public debt of Pennsylvania at this time $37,969,847, against $38,638,961 at the beginning of the last fiscal year—showing a reduction of 669,114. The direct reduction of public debt during the three years of Gov. Packer's administration $1,911,890. The balance in the Treasury on the first of December, was $681,433, an excess of the balance at the beginning of the fiscal year 1857 of $153,326. If to this sum is added $171,664 paid on account of claims growing out of the construction and maintenance of the public improvements, we have an aggregate of $324,991, which, if added to the payments on account of the public debt, makes a diminution of actual indebtedness during the three years of $2,236,890. Beside the ordinary sources of revenue, the Commonwealth holds in the bonds of the Pennsylvania Railroad Company $7,200,000; of the Sunbury and Erie Railroad Company $3,500,000, and of the Wyoming Canal Company $281,000—making an aggregate of $10,981,000, which, deducted from the public debt, reduces it to about $27,000,000. The interest on the Sunbury and Erie bonds is unpaid.

Journal of Railroad Law.

COLLISION: INEVITABLE ACCIDENT: RUNNING OF VESSELS IN FOGS.

The case of the Amoskeag Manufacturing Co. *vs.* The Steam Ferry Boat John Adams, has been recently decided by the United States Circuit Court, Massachusetts. The learned Justice, in the opinion, goes quite at length in the consideration of the mutual duties required of vessels navigating in foggy weather; and also into what constitutes an inevitable accident, that in the eye of the law will exonorate parties frome blame and liability for injuries that may be sustained from them.

The libel sets forth that in January 1859, the ship Aldenah, ladened with 960 bales of cotton, was lying properly moored at Battery wharf Boston, where she was carelessly run into by the ferry boat John Adams, and among other damages the stern post of the ship was started and the wood ends forced open, causing her to leak to such an extent that the cotton on board belonging to the libellants was wet and thereby greatly damaged, for which the libellants claim that the respondents should indemnify them.

The respondents denied that the ship was properly moored, admitted that during a dense fog the steamer did run into a ship lying at said wharf, but expressly denied that it was the result of any carelessness or negligence on their part. They also claimed that they exercised proper precautions such as sounding their whistle, proceeding at a slow rate and with great care, stopping, placing a man on the look-out, &c. They also avered that at the time of the collision they were lost in the fog, and had been carried from their course by the tide during their stoppage, that at the time of the collision they were borne chiefly by the force of the tide which was running very rapidly, their machinery not being in motion, and that therefore they should not be held liable for an accident which was inevitable.

Upon this state of facts the Court decided that the libellants were entitled to recover. The following is the opinion of the Court upon the question as to whether or not the accident was inevitable.

CLIFFORD, J.—The main ground of defence in this case is that the accident was inevitable. The fact, time, place, and substantially the manner of the collision are not controverted. According to the testimony she was properly and securely moored and fastened to the wharf. The steamer left the slip on the eastern side at about 8 o'clock A. M.

At the time of starting the fog did not rest upon the water by 6 or 8 feet, but very soon after she left it shut down and became exceedingly dense. Orders were then given to "slow," and when about half way across, to reverse the engines so as to stop; and the steamer was stopped. After remaining stationary some three or four minutes, she was started again under a slow bell, and after the engine had made some three or four revolutions the signal was again given to stop, and almost immediately after to reverse, but before a single reverse revolution could be made the collision occurred. During this time the master was in the pilot house, 28 feet above the level of the water, and so dense was the fog that he could only see the "glimmer" of men on the deck of the steamer. The whole crew consisted of the master, engineer, firemen and two deck hands. One deck hand was stationed forward as a look-out, and was assisted by many of the passengers who stood forward. Very discrepant estimates are made by different witnesses as to the distance at which objects were visible through the fog—the estimates varying from 5 or 6 to 150 or 200 feet. It is worthy of remark that the witnesses for the respondents testify that they did not see the ship until the steamer was within from 6 to 20 feet of her, while witnesses for the libellants testify that they did see the approaching steamer at a distance of from 150 to 200 feet. Greater weight should certainly be given to the positive knowledge of some witnesses than to the mere opinion of others.

At all events I am of the opinion, after a careful review of the evidence, that the density of the fog was not such that the collision might not have been prevented if the look-out of the steamer had performed his duty. Very little reliance is to be placed in passengers as look-outs, and they cannot be regarded as answering the requirements of a look-out under the maritime law. Every steamer traveling in the thoroughfares of commerce ought to have a constant and trustworthy look-out. According to his own statement the look-out of this steamer did not see the ship until within 5 or 6 feet of her. The owners of the steamer are equally liable, whether his failure to perform his duty arose from inattention or incompetency. The whole testimony goes to show that the master exercised less care than he ought to have done.

The speed of the steamer is also variously estimated at from 1 to 4 miles per hour.

The consequences of the disaster go very far to show that the latter is the correct estimate. The steamer cannot be excused on the ground of inevitable accident, which the evidence falls so far short of establishing that it is hardly worth while to consider the law upon that subject. According to Dr. Lushington, strictly inevitable accidents seldom occur, and the word inevitable is to be construed reasonably and according to the circumstances of the case; an inevitable accident means a collision which occurs when both parties have endeavored by every means in their power with due care and caution and a proper display of nautical skill to prevent the accident, and he held it to be clear that *prima facie* the *onus probandi* is on the owners of the moving vessel, and they can only exonerate themselves by showing that the blame did not lay at all with the vessel or rested solely on the pilot. Even though a vessel were at anchor or moored in an improper place, every possible precaution, consistent with its own safety, must be taken by the moving vessel to avoid collision. The libellants having shown that their vessel was in a proper place and the fact of a collision, the burden of proof is on the respondents to show that it was not their fault or was the fault of the complainants. Ferry boats crossing the harbor of a commercial port in a dense fog by day, or in the darkness of night, should proceed with the greatest care, and if they lose their bearings, they should come to anchor,

and if they rashly advance, the owners must take the consequences of accidents. Three or four knots per hour was too rapid motion under such circumstances as these. The steamer had no right to proceed at such a rate as to endanger the property of others. The defence of inevitable accident is, therefore, not sustained.

Panama Railroad.

Below we give the statement of this company of its operations for the year ending December 31, 1860.

The receipts for the year, compared with those for 1859, have been as follows:

	1860.	1859.
For passengers	$688,379	$1,068,832
For freight, merchandise (including baggage)	618,578	656,641
For freight treasure	128,946	153,877
For mail transportation	50,000	100,000
For miscellaneous, wharfage, light money, interest, etc.	14,273	6,095
For earnings uncollected or for which returns have not been received, estimated	50,000	40,000
Balances from previous years	517,919	535,109
Totals	2,068,792	$2,460,554

The net earnings have been applied as follows:

Interest on sterling bonds (£540,000) with exchange and commission		$186,468 45
Interest on convertible bonds, $24,000 at 7 per cent.		1,680 00
Running expenses, including materials, repairs, subsistences, labor, etc.		406,050 55
Equipment account—		
New cars, etc.	$17,019 32	
Permanent improvements, paid for out of income acc'nt, construction being closed.		
New wharves	$20,072 13	
Water works	15,204 16	
Dredging machine	18,489 96	
Stone breakers and engines	5,000 00	
		76,785 57
Office expenses		22,904 73
New Granadian Government—Proportion mail receipts		10,000 00
Total		$702,889 00
Balance applicable to dividends		$1,365,902 00
which has been applied as follows:		
Dividend, No. 16, paid July 2, 1860, 6 per cent.		$298,560 00
Dividend, No. 17, payable Jan. 2d, 1861, 6 per cent.		298,560 00
New-Granadian Government		17,973 60
Paid Trustees sinking fund		100,000 06
Total		$715,093 60
Surplus remaining		650,809 20

The gross and net earnings and dividends paid by this company since the opening of its road have been as follows:

	Gross receipts.	Net receipts.	Dividends.	Rates.
1852	$298,629	$224,636	$151,175	10
1853	416,598	302,648	210,928	8½
1854	545,928	429,386	205,306	7
1855	1,112,747	819,673	496,500	12
1856	1,439,976	1,083,922	585,060	12
1857	1,377,363	906,726	594,331	12
1858	1,524,704	1,052,196	611,202	12
1859	1,971,873	1,479,847	614,292	12
1860	1,550,876	1,036,131	615,093	12
Total	$10,232,694	$7,335,163	$4,083,887	

This exhibit which covers the whole period of the operations of the company is certainly a favorable one.

		1,199,208 00
		$9,412,335 56
Payments for 1860 am't to about	$1,185,000 00	
Receipts for 1860 am't to about	1,015,000 00	
Deficit	$170,000 00	

The estimated expenses of the ensuing year will be considerably less than the present, and unless some extraordinary emergency arises, the revenue will more nearly equal the expenditures.

Expenditures for 1861, estimate	$870,000 00
Revenue, including unpaid tax 1860	760,000 00
Deficit, 1860	$110,000 00
Deficit previous years	267,000 00
To be provi'd for by tax or otherwise.	$377,000 00

The fiscal year closes on the 31st of December, and therefore the statements given are only an approximation to the actual results, which may vary somewhat the above.

The Valuation of the Commonwealth.

The Legislative Committee appointed to compute the valuation of the Commonwealth as a basis for State taxation during the next ten years, has recently concluded its labors after a session which was protracted to a length of more than a hundred days, beginning September 5, 1860, and ending January 1, 1861, at a cost of $13,191 50 for the pay of its members, and $6,322 for contingent expenses. The aggregate valuation of taxable property is computed at the sum of $897,795,326, which is $299,858,330 more than the State valuation of 1850, exhibiting an increase of about 50 per cent. in the wealth of the State during the last ten years. When it is remembered that considerable sums (in the hands especially of small property holders, of which deposits in the Savings Banks, not exceeding $500 each, may be taken as an illustration) have been omitted from the assessments, the result discloses that the wealth of the people of Massachusetts averages not less than $750 to each inhabitant, irrespective of age or sex. The proportionate distribution of this wealth among the people is illustrated by the fact that

the amount of deposits in the Savings Institutions in the Commonwealth on the fourth Saturday of October last, as shown by the annual report of the Bank Commissioners, was $45,054,235, although these institutions are prohibited by statute from holding at the same time more than $1,000 of one depositor other than a religious or charitable corporation; and these deposits represent only a fraction of the savings from the daily industry of the working classes. The policy of encouraging families to become land owners, by exempting their homesteads to the value of $800 from seizure on execution, has helped to preserve their accumulation; and the numerous modes in which small savings are invested by private loans and friendly accommodation, help largely to increase and to preserve their aggregate.

The industrial statistics of the Commonwealth are compiled but once in ten years. The last compilation was in 1855, when it appeared that the annual production irom the industry of Massachusetts amounted to $295,820,681, which was an increase of 138 per cent. over the amount exhibited by the last previous compilation; nor can it be doubted that the productive capacity of our people since 1855 has keep pace with the gratifying increase of their capital. A Commonwealth of 1,231,535 persons, or an area of only 7,800 square miles, with a property of nearly $900,000,000, whose people are all free, and whose poorest child may be educated in the free schools of the State, is a noble monument of the triumphs of intelligence and liberty.

In this connection I respectfully recommend to the General Court to provide some less expensive and cumbrous method for ascertaining the valuation of the State, than that which has hitherto been pursued. The details of a more economical and efficient plan will be suggested if it shall be deemed desirable.

Railroad Earnings.

The receipts of the Toledo and Wabash Railroad for December were:

	1859.	1860.
Passengers	$17,165 57	$16,986 35
Freight	28,929 53	34,309 05
Total	$46,095 10	$51,295 40

The earnings for the four months ending Dec. 31st show the following result:

	1859.	1860.
Passengers	$80,527 57	$91,127 02
Freight	196,988 44	268,894 88
Total	$297,316 01	$360,021 90
Increase		$82,705 89

The earnings of the St. Louis, Alton and Chicago Railroad in December were:—

Passengers	$25,516 10
Freight	36,166 92
Mails and express	3,343 33
Total	$65,026 35
Corresponding period in 1859	61,051 00
Increase in 1860	$3,975 35

The Michigan Central Railroad earned in December, 1859 $132,948 84
1860 129,022 26
Decrease $8,926 58

The earnings of the Hudson River Railroad for December, 1860, were $220,817 19
December, 1859 232,032 64
Decrease $11,662 45

Navigation remained open five days longer this year than last. The December earnings for three years were:

1858 $197,980 14
1859 232,032 64
1860 220,370 19

The earnings of the Illinois Central Railroad for December were $227,309 99, against $198,285 35; the sales of land, $151,114 12; the cash collected, $80,976 07. For the last quarter of 1859 and 1860 the comparative statement is:

	1859.	1860.
Traffic	$632,919 04	$791,198 52
Sales of land	77,394 24	632,049 05
Cash collected	172,027 38	321,279 12
Total	$932,340 66	$1,744,526 69
Increase		$812,186 03

The earnings of the New York Central Railroad for December, 1860, were $522,918 85
1859 520,396 27
Increase $2,522 58

The eighth monthly report of the Receiver of the Ohio and Mississippi Railroad Company, for November, 1860, is as follows:

Balance from October $17,487 26

RECEIPTS.

From express freight of Oct.	$2,075 45	
" passengers prior to Nov.	5,278 16	
" freight " "	4,477 40	
		11,831 01
" pass'gers on Nov. acc't.	34,195 94	
" freigt " "	26,985 41	
		61,181 35
Other sources		3,649 43
		$94,149 05

DISBURSEMENTS.

Paid charges advanced in account with other roads	$5,434 10	
Paid interest and discounts.	565 76	
Paid office and other expenses	427 60	
Paid first mortgage coupons, due July 1, 1858	70 00	
Paid first mortgage coupons, due Jan. 1, 1859	70 00	
Paid first mortgage coupons, due July 1, 1859	70 00	
Paid first mortgage coupons, due July 1, 1860	12,005 00	
Paid on account of November current expenses	3,074 55	
Paid on account of former arrearages	4,902 13	
Paid on account of October current expenses and construction work	63,202 61	
		89,821 75
Balance carried to December account		$4,327 30

The receipts of the Grand Trunk Railway of Canada for the week ending Dec. 29, were $60,805 49
Week ending Dec. 31, 1859 53,777 11
Increase in 1860 $7,028 38
Total traffic from July 1st, 1860 $1,786,180 68
Corresponding week 1859 1,362,463 31
Increase $423,717 37

The receipts of the Chicago and Northwestern Railroad in December, 1860, were $56,888 33
December, 1859 42,061 59
Increase $14,826 74

The earnings of the Chicago, Burlington and Quincy Railroad Line in the month of December were:

	1859.	1860.
Freight	$79,044 09	$79,230 00
Passengers	38,781 95	35,336 05
Mails, etc.	10,209 49	3,041 67
Total	$128,035 53	$117,607 72
Decrease		$10,427 81

The following is the Illinois Central Railroad Company's statement for December, 1860:

Land Department.

11,070.85 acres sold for		$151,168 12
71,287.22 do.	during year,	1,137,547 40
1,237,260.55 do.	previously	15,735,837 02
1,308,547.77	Total	16,873,384 42

Construction Bonds canceled in December, 1860	$44,500 00
Construction Bonds canceled previously	1,727,000 00
Total bonds canceled	$1,771,500 00
Total cash receipts in December	84,331 30
Total cash and bonds received during year	780,097 37
Total cash and bonds received to Dec. 31, 1860	4,195,398 02

Traffic Department.

Total receipts for December, 1860	$227,858 24
Do. do. 1859	198,285 35
Increase	$29,572 89
Traffic for year 1860	$2,725,939 35
Do. 1859	2,114,448 98
Increase	$611,490 37

The earnings of the Buffalo, New York and Erie Railroad (Corning to Buffalo), for December, 1860, were $37,520 23
December, 1859 45,221 29
Decrease $7,701 06

The Cleveland and Toledo Railroad earned in December, 1859 $82,219
1860 82,589
Increase $370

The earnings of the Galena and Chicago Railroad for December, 1860, were $89,770 06
Same month, 1859 89,343 61
Increase $426 45

Delaware, Lackawanna and Western R. R.

Annexed is a statement of the Coal business of the Delaware, Lackawanna and Western Railroad for the year 1860:

	1860.	1859.
Sent north	$252,273 01	$197,354 18
Sent south	827,954 09	632,079 16
Total	$1,080,227 10	$829,424 14
Increase in 1860.	250,792 16	

The Coal as above was distributed to the following points:

Scranton and on line of north'n divis'n.	$29,344 00
Binghamton and for Chenango Canal shipments	65,948 00
Syracuse and for shipment	114,761 07
Ithaca and for shipment	31,837 19
On line of N. Y. and Erie and connecting roads	10,334 15
Elizabethport	646,155 00
Line of Central Railroad of New Jersey	15,730 18
Washington and for shipment on Morris Canal	142,961 15
Southern Division D. L. and W. R. R.	23,106 16
Total	$1,080,227 10

Pondrous Iron Beams.

The machinery of the Phœnix Iron Company is now so powerful that they can roll the largest beams ever made in the United States. They have already rolled a number for the West Point Foundry Company, each beam being twelve inches deep, four inches wide on the top and bottom flanges, weighing 120 pounds to the yard, and being 21 feet long. Lengths of 40 feet may, however be made with the same facility.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

Years ending.	Railroad. Main Line.	Railroad. Lateral and Branch Lines.	Railroad. 2nd Track and Sidelings.	Road in progress or projected.	Equipment. Engines.	Equipment. Cars. Passenger.	Equipment. American Railroad Journal.

Saturday, January 12, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The share market, after showing a very considerable recovery, has again fallen off within a few days under the less favorable aspects of the question of *secession*. No solution of it is apparent to the public mind, and the action of several other States, in imitation of South Carolina, has added to the magnitude of the crisis. The movement now appears to be beyond the control, even of the leading actors in it; and we can hardly expect to see a turn in the tide till the commercial and monetary effect of secession is fully seen.

This, we are confident, will produce a very vigorous reaction, but whether of sufficient force to restore anything like the previous *status* is altogether problematical.

The effect of secession must, as a matter of course, be an immediate and excessive commercial revulsion and disaster. The injury and loss to the seceding State must be severe and permanent. We do not say that the others will not be equal sufferers, but as they are not the movers, their case does not call for comment. The effect of the first step will be to cut the delinquents off from the use and benefit of the capital of the world, which in times of peace permeates and sustains each member of the great family. Thus far the South has depended upon the North—the North upon the old world. Up to the present time, the latter could not be rudely cut off from the use of foreign capital without suffering almost complete commercial annihilation. It would recover to be sure, and go on again adjusting its operations to its means. But the process it would have to go through, would to all parties engaged in business, be a fatal one.

The seceding States propose to brave such a result, to cut themselves off not only from the North, but from the Old World. Bankruptcy is the alternative. This will be soon experienced. With this experience the South will begin to revise their notions of political economy which have been greatly instrumental in urging them on. A person or community that produces cotton, is no more potential than those who produce food, gold and silver, or manufactures. The cotton States assumed a vantage in their favor which they did not possess. They are just as obliged to sell their products, and more so, than other parties are to purchase it. When this matter is fully understood, very different notions will prevail as to the value and commercial effect of the secession movement.

With regard to all our great staples favorable advices continue to be received from abroad, which will continue to give activity to our internal and export trade, and ensure an easy money market. The balance of trade is more decidedly in our favor then it has ever been. The imports into the City of New York for the year ending Dec. 31st, 1860, was $237,397,000, against $245,165,000 in 1859. The exports for 1860, were $145,682,000, against $137,695,000 in 1859.

Cleveland and Pittsburg Railroad.

At the annual meeting of this company recently held in Pittsburg, the following gentlemen were elected directors for the ensuing year:

Jas. Farmer, Jas. F. Clark, H. W. Clark, Cleveland; D. C. List, Wheeling; W. W. Holloway, Bridgeport; J. Pennock, J. H. Shoenberger, B. Preston, Pittsburg; H. C. Kingsley, New Haven; J. N. McCullough, Wellsville; J. Atwater, Jr., Catskill, N. Y.; B. P. Drennen, Steubenville.

From the report of the Directors which was presented we obtain the following statement of the earnings and expenses for 1860.

Receipts for 1860	$1,020,637 82
Operating expenses	564,497 14
Net earnings	456,140 68

—being 45⅔ per cent of the gross.

A comparison of the gross earnings during the past three years, shows as follows:

Total receipts for 1858	$772,093 53
" " 1859	906,710 03
" " 1860	1,020,637 82

The increase of last year's earnings over those of 1859, was about 12½ per cent., and over 1858, 32 per cent.

Steady progress has been made in the work of reducing the indebtedness of the Company as will be seen by the following figures:

Indebtedness reduced in 1858	$165,861 45
" " 1859	157,863 33
" " 1860	260,700 39

The judicious movements made with regard to the re-construction of the financial affairs of the Company, promise well for the interests of all concerned. The Report says:

The operating expenses were abont 55⅓ per cent. of gross receipts. In looking at this percentage, low as it is, it must be borne in mind that the road has suffered a succession of disastrous casualties during the past year. In the month of April the unparalleled flood undermined and swept away large portions of the river division, causing the stoppage of business for some time. The actual cost for repairing this damage was between thirty and forty thousand dollars. In October, the machine shop at Manchester was destroyed by an incendiary fire, causing a loss in the buildings and machinery, of about $15,000—the numerous bridges on the main line have nearly all been replaced by new ones, at a cost of over $11,000. All these are extraordinary expenses, but are included in the statement of operating expenses for the year.—The track has been extensively repaired, about sixteen miles of new rails having been laid down and new ties placed wherever required. The economical, and at the same time efficient management of the line, reflects great credit on President McCullough and Assistant Superintendent C. E. Gorham.

Little Rock Railroad.

This road is going forward very rapidly. Hands are at work on it at every available place, and there seems to be a laudible a determination on the part of the officers to put it through. The piers of the bridge are very nearly finished, and they are beginning to put the timbers upon the middle one. It is to be completed, we understand, by the first of February; and, in anticipation of it, the company is preparing to raise the track on the other side of the river to a level with it.—*Madison, Ark., Review.*

Texas Railroads.

We learn that the various railroads of this State are progressing with unabated energy. About three hundred hands are steadily employed on that section of the Harrisburg Railroad, between Columbus and La Grange, while it is said that equal or even larger numbers of laborers are engaged on the Houston and New Orleans and the Eastern Texas Railroad, nor can we learn that there has been any interruption in the work on the several other railroads of the State, all of which it is believed, will be able to meet the requirements of their respective charters to entitle them to the lands donated by the State.—*Galveston News.*

Baltimore and Ohio Railroad.

The following is a general statement of the liabilities and assets of the Baltimore and Ohio Railroad Company, on the 30th September, 1860.

LIABILITIES.

Stock held by individuals	$5,427,300 00
Do. the City of Wheeling	500,000 00
Do. do. Baltimore	3,500,000 00
Do. the State of Maryland	685,000 00
	$10,112,900 00
Stock scrip not funded	6,002 00
Preferred stock (State 5 per cent. sterling bonds)	3,000,000 00
Loan redeemable in 1867, interest payable quarterly	1,000,000 00
Mortgage bonds given for iron (this entire amount is held in sinking fund for redemption of mortgage debts)	453,333 32
Loan redeemable in 1875, with conpons, interest semi-annually, in January and July	1,128,500 00
Loan redeemable in 1880, with coupons, interest semi-annually, in January and July	700,000 00
Loan redeemable in 1885, with coupons, interest semi-annually, in April and October	2,500,000 00
City loan	5,000,000 00
Dividend, declared 17th Dec., 1856, of portion of surplus fund, in certificates of indebtedness, to be converted into stock on the 1st of June, 1862	3,033,060 00
Interest unpaid on the dividend bonds of 1862	312,831 00
Open accounts	7,299 24
Unclaimed dues	20,258 43
Washington Branch road	225,681 44
Profit and loss	3,741,146 36
	$31,241,011 79

ASSETS.

Cost of road		$18,511,515 29
Second track		1,549,559 63
Rolling power		3,604,731 03
Real estate		1,252,968 59
Bonds of the Central Ohio R. R. Co.		400,000 00
Central Ohio Railroad Co.		41,371 48
Stock of the Pittsburg & Connellsville Railroad Co.		35,000 00

Bills receivable, notes of Northwestern Virginia Railroad Co. for loans, etc.		476,982 42
Wellersburg & West Newton Plank Road Co.		6,050 00
Stock of the Washington Branch		1,016,800 00
Sinking fund—For the redemption of the five million loan		712,846 36
Do. for the redemption of mortgage debts		568,555 06
Do. for the redemption of ground rents on Camden station		74,969 93
Bills receivable		80,919 40
P. O. Depart. for mail service to Sept. 30, 1860		33,561 08
Cash in the hands of officers for disbursements		2,054 75
Outstanding dues		96,368 80
Uncollected revenue		370,225 62
Materials on hand in machinery department	$119,542 70	
Less fund reserved for renewal & improvement of machinery.	36,522 29	
		83,020 41
Road department—materials on hand		168,941 44
Treasurer—balance in treasury after payment of $75,000—interest on City Loan—and of $90,000, for interest on the mortg. bonds of the company, which matures on the 1st proximo, of which balance $312,831 is held for the payment of the remainder of interest on the dividend bonds of 1862		550,867 12
		$31,241,011 79

The Law of Patents in the British Provinces.

By T. D. Stetson.

A single patent may now cover Great Britain and Ireland, but such parchment has no effect whatever in any of the British Colonies. Each of the latter regulates by its own Legislation all the points pertaining to subjects of this character. Victoria (Australia) grants patents of fourteen years duration to either the inventor or any other person who may be the first to introduce or make known the invention there, the fees being heavy and payable as in Great Britain in instalments during nearly the whole lifetime of the patent. The North American Provinces, are from their proximity to us of more interest than any of the eastern colonies. Canada still persists in issuing patents only to her own citizens, and the patentee there must in all cases be the original and first inventor. The only legitimate and proper manner in which an American may secure his invention in the Canadas, involves an imperative necessity for a residence for one year in the province, before making the application for a patent. Whenever the United States shall see fit to repeal its discriminating tariff and allow foreigners to patent at the same rate as citizens, Canada will "reciprocate" by allowing Americans to patent there. A bill making such provisions has been before the Canadian Parliament, and has been printed, and it is generally understood by those best informed, that the action of the Parliament thereon, depends

mainly, if not entirely on the "reciprocal" action in the United States Congress.

New Brunswick and Nova Scotia are more liberal. New Brunswick has elaborate and well devised laws granting patents to her own citizens and to all British subjects, for a period of ten years, at a merely nominal fee compared with the tax in Great Britain, and to foreigners for a like period, or receipt of a double fee, the total Government charge to a Briton being but five pounds, and to a foreigner ten pounds. Any proper invention may be secured in that Province even after it has been known and patented for years elsewhere, provided it has not been introduced or published in the Province. No one can obtain a patent except the original inventor—or rather, as in this country, none other can *sustain* such if granted. McCallum's Railroad Bridge and several other important inventions originating in the United States, have been patented there with success, but always necessarily in the name of the American Patentee. No such patent endures after the expiration of the United States term.

Nova Scotia has a law apparently less liberal in its provisions, because making no provisions for patents by foreigners, but this is practically overcome in cases of importance by the passage of special acts putting the foreign inventors in those specific cases on a par with the native. The patent endures fourteen years and is subject to a Government tax of but one pound.

Finances of Missouri.

The following statement of the finances of this state is furnished by the Auditor of public accounts.

Amount of revenue received in the year ending Sept. 30, 1859	$823,360 11
Add proceeds of 400 revenue bonds sold to pay interest on Railroad bonds	382,238 00
Add amount received from General Government on account of Osage war	19,227 21
Total first year	$1,229,885 32
Amount of revenue received in the year ending Sept. 30, 1860	932,027 33
Total amount of revenue received in two years, ending Sept. 30, 1860	2,161,852 65
Amount of revenue expended in the year ending Sept. 30, 1859	$667,745 46
Amount of revenue expended in the year ending Sept. 30, 1860	523,297 18
	$1,191,042 64
The balance of revenue in the Treasury, Oct. 1st, 1860, is	$620,719 87

This balance, however, is mostly absorbed by the payment of coupons, on bonds issued to the Pacific, North Missouri, St. Louis and Iron Mountain, and Cairo and Fulton Railroad Companies, which coupons are now in possession of the State Treasurer.

The estimated receipts for revenue purposes in the two years ending Sept. 30, 1862, are	$1,760,000 00
And the ordinary expenditures during the same period	700,000 00
Leaving a balance in Treasury, Oct. 1st, 1862	$1,060,000 00

This balance of $1,060,000 is subject to a deduction of twenty-five per centum, each year, of the revenue receipts for school purposes, amounting to 440,000; and also to such appropriations as may be made by the General Assembly for extraordinary purposes.

The estimated amount of receipts on account of State interest Fund, for the two years ending Sept. 30, 1860, is $862,167 56.

These estimates are based upon the present valuation of property, and do not exceed the actual receipts into the Treasury during the last two years, so far as they relate to ordinary revenue purposes. Heretofore it has been found safe to estimate an annual increase of 15 to 20 per cent. The present gloomy aspect of National affairs is the reason why it has not been done in this instance. If the dangers which now threaten us should be averted, and our difficulties soon become amicably and permanently adjusted, restoring quiet to the country, and reinstating the confidence of our commercial relations so indispensable to activity and prosperity in all our industrial pursuits, these estimates will fall considerably short of the revenue we may reasonably anticipate.

THREE PER CENT. FUND.

It will be remembered that under a special law of the State, John W. Reid, of Jackson county, was appointed as Commissioner to obtain from the General Government a sum of money due to Missouri on account of the sales of the public lands in the State. The commission was faithfully, ably and successfully executed. The claim has been allowed and adjusted, and the money paid into the State Treasury. It remains for the General Assembly to authorize the just compensation for his services.

RAILROADS.

Among our State interests, the largest, financially considered, and therefore most deserving of your early profound and patient consideration, is that our railroads, and the obligations of the State incurred in their behalf. As is known to those who have given the subject any attention, no aid has been granted to our railroad companies within the last two years. The only changes, therefore, that will appear in an exhibit now, compared with that made in the last biennial message, are in the amounts issued and represented as due; a part of the latter, however, being in a condition of forfeiture. The figures are again presented in tabular form, as follows:

Name of Company.	*Amount. author'd.*	*Amount. issued*	*Amount. due.*
Han. and St. Joseph	$3,000,000	$3,000,000	.....
Pacific—Main Line	7,000,000	7,000,000	.....

Amount of Revenue Bonds issued in 1859 and due on June 1st, 1861 ..... $400,000

The $1,150,000 represented as due to the North Missouri Railroad Company, and $99,000 to the St. Louis and Iron Mountain Company, have been forfeited by the failure of said companies to pay the interest accruing upon bonds already issued to them. They do not, therefore, now constitute in law, and without further legislation are not to be reckoned as any part of the contingent obligation of the State. The only bonds authorized and yet liable to be issued, are the $600,000 due the South-west Branch of the Pacific Railroad, which, with the whole amount issued, make an aggregate of $23,701,000, or, adding the four hundred revenue bonds, (due next July,) the proceeds of which were devoted to the payment of interest, the aggregate is $24,101,000; $849,000 less than the aggregate amount authorized. The interest due on January 1, 1861, has been met without any increase of the public debt; but this cannot be done next July under the existing laws affecting the public revenue. How the necessary means shall be provided, is a question deserving the special attention of the General Assembly. Unless a general distrust and monetary panic pervades financial circles, by reason of political troubles, I believe there will be no necessity of devoting to this use any portion of the public revenue now specially devoted to other purposes.

Grain Trade of Lake Michigan.

The following table shows the total shipments of flour and grain from Lake Michigan ports during the year 1860:

	Flour, bush.	Wheat, bush.	Corn, bush.	Oats, bush.	Rye, bush.	Barley, bush.	Flour and Grain, Total in bush.
Chicago	718,839	12,487,694	13,948,172	1,089,779	129,146	290,211	31,456,697
Milwaukee	285,612	8,161,982	114,444	161,965	35,785	108,793	10,000,369

Green Bay	36,187	109,941	.....	.....	.....	.....	290,876
Total	1,088,146	22,226,923	14,067,616	1,216,734	164,891	399,004	48,405,898

Debt of Boston.

The Mayor of Boston in his annual message thus states the debt of that city on the 1st instant:

Whole amount of debt	$9,392,799 77
Deduct the net water debt	6,243,680 00
City debt proper	$3,149,199 77
Deduct cash, in sinking fund	736,623 91
Debt for all city purposes except water	$2,412,575 86
Do. in 1851	1,845,927 84
Actual increase from Jan. 1, 1851, to Jan. 1, 1861	$566,648 02

A Horse Railway in Persia.

There is some talk, according to the Russian journals, of a horse-traction railway in Persia, from Teheran to Tauris, to facilitate the means of transport for passengers and merchandise toward the Black sea, with extension to Trebizond, or by Elivand Tiflis to Poli.

Columbus and Xenia Railroad

At the annual meeting of this road the following gentlemen were re elected Directors for the ensuing year: Wm. Dennison Jr., Robert Neil, D. W. Deshler, L. Goodale, Wm. B. Hubbard, Joseph R. Swan, Geo. M. Parsons, of Columbus; W. H. Clement, Larz Anderson, Henry Hanna, of Cincinnati; Abraham Hivling, of Xenia, and Simon Gebhart, of Dayton.

At a subsequent meeting of the Board, the following officers were elected: Joseph R. Swan, President; W. H. Clement, Vice-President; E. W.

Woodward, Superintendant; Cyrus Fay, Secretary and Treasurer.

Texas and New Orleans Railroad.

We learn from the Houston *Telegraph*, that this road is being pushed rapidly ahead. The bridge across the Trinity at Liberty is nearly completed, and the iron is being laid upon it. The road is all graded between Liberty and Houston, and the iron is to be laid down by the 15th of January. The rails are laid the balance of the distance to the Sabine. The East Texas Railroad, from Sabine Pass, is graded to Beaumont, and the iron is being laid. It is expected that this will be done by the 15th also; so that the promise now is to have communication between New Orleans and Houston shortened by the middle of February, by an average of at least twelve hours.

DUBUQUE & SIOUX CITY R. R. CO.
ELECTION NOTICE.

THE first election of directors of said company will be held at their office in Dubuque, Iowa, on Monday the 11th of February, 1861. The stock-books will be closed on the evening of 31st of January, until after the election.

4t2 JAMES M. M'KINLAY, Secretary.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL, September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11½ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11½ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.
ANDREW ELLISON, Jr., Eng'r in Chief.

12.	" 18 "	1 to 1	24.	" 32 "	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for $7.50.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price $1.

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.

By HENRY V. POOR, Esq.,
Editor of the AMERICAN RAILROAD JOURNAL

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental Iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W. and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this **ECONOMICAL and SUPERIOR FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred **FERTILIZERS**, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 3, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the **SAME QUANTITY** as I use Peruvian Guano. I can confidently **recommend** it as in every respect equal to Peruvian Guano for sugar cane.

L. H. MATTISON,

MANUFACTURER OF

PLATED WARE,

239 PEARL STREET,

NEW YORK.

LAND AND SUBMARINE BLASTING,

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes, "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling. The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 41 Pine st., New York City.

ROOFING.

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person,* at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to

EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, January 19, 1861.

Terre Haute and Richmond Railroad.

The earnings of this company during the fiscal year ending November 30, 1860, were:

From passengers	$172,804 34
" freight	199,302 81
" coal	13,137 00
" mail, express, etc.	19,355 46
	$404,599 61

And the expenditures were:—

Main expenses	$33,620 36	
Fuel	17,128 12	
Repairs of road	35,561 18	
" buildings, etc.	5,105 70	
" rolling stock	44,026 06	
Depot expenses	17,059 98	
Salaries of officers	5,700 00	
Foreign agencies	4,062 22	
Miscellaneous	9,563 00	
		171,826 62
		$232,772 99
New cars	$5,459 08	
Rebuilding bridges	7,433 38	
New station buildings, etc.	2,498 98	
		15,361 44
Net earnings		$217,381 55
Taxes	$5,738 87	
Interest and exchange	18,244 81	
		23,983 68
		$193,397 87

The gross earnings have increased $47,301 76
with an increase in expenses of 12,075 07

Making the increase of net earnings over last year $35,226 69

During the past year the company have paid two dividends of 5 per cent. each, amounting in the whole to $138,192.

We make the following extracts from the report of the President.

In October last, in connection with the Terre Haute, Alton and St. Louis, the Bellefontaine, and the Indiana Central Railroads, we put in operation a freight line, composed of cars built on compromise gauge. These cars can be loaded at Buffalo, Dunkirk, Pittsburg and Wheeling, and transported through to St. Louis, without being unloaded at each break of gauge, as has been the case heretofore, thus avoiding the delays of unloading and the risk of injury by frequent handling.

The road-bed and track are in perfect condition, and all the bridges safe and durable. The rolling stock and equipment has been maintained in excellent condition, and at an economical cost of repairs.

At a meeting of the Board of Directors, held May 9, 1860, the following order was passed:

"In consideration of the increase of business that would be given to the Terre Haute and Richmond Railroad by the continuation of the Evansville and Crawfordsville Railroad from Terre Haute to Rockville, in Parke County, it is ordered, that when the Board of Directors of the Evansville and Crawfordsville Railroad Company have a sufficient amount of stock subscribed, or other provision made, to complete the bridging and grading to Rockville, that this Company will furnish the iron for the track of said Extension, provided the cost of the iron does not exceed the sum of one hundred thousand dollars, delivered at Terre Haute, and provided further, that the Evansville and Crawfordsville Railroad pledge that Company to appropriate the income, above the necessary operation expenses of the Extension of said Evansville and Crawfordsville Railroad, from Terre Haute to Rockville, to the payment of the interest on the bonds, ($150,000,) being less than $6,000 per mile, which the Evansville and Crawfordsville Railroad Company propose to issue for the construction of said Extension."

An agreement was made with the Evansville and Crawfordsville Railroad Company as required by this order, and in compliance therewith, there has been furnished to the Evansville and Crawfordsville Railroad Company, the sum of $94,540 13, and we have received from the Evansville and Crawfordsville Railroad Company $100,000 of their seven per cent. bonds, interest payable semi-annually, and the payment of the bonds, secured by mortgage on that part of said Evansville and Crawfordsville Railroad Extension, from Terre Haute to Rockville, and including all fixtures, franchises and property attached to that part of said road.

The bonds were taken as directed by the Board at 90 cents on the dollar.

The laying of the track of the Extension of the Evansville and Crawfordsville Railroad to Rockville has been completed, and trains are now running on said Extension, and it will doubtless prove a valuable tributary to the business of this Company.

To the improved condition of the Terre Haute, Alton and St. Louis Railway, our important connecting line on the West, we are in a measure indebted to the successful business of the year. With that Company, as with all our connecting lines, our business relations are of the most friendly character.

LEDGER BALANCE.

	Dr.

Delaware and Hudson Canal Coal Tonnage.

The following are the shipments of coal to Honesdale, over the railroad of the Delaware and Hudson Canal Company, for year 1860:

	Tons.		Tons.
Mines of the Co.	290,357	Richmond Co.	20,895
Eaton Co.	78,290	Offeman Co.	8,859
Jones & Co.	60,781	Brennau	4,492
Hosie & Co.	10,054	Vonstorch, (A. E. Al't)	7,274
Birdseye	32,111		
Chittenden	12,916		
Total tons			526,480
Shipped from Honesdale by canal			499,568
Shipped from Hawley, for Pennsylvania Coal Company			701,523
Tot. shipm'ts by Del. & Huds. Canal .		'60.	1,201,091
Do. do. do.		'59.	1,279,693
Do. do. do.		'58.	979,047

Delaware, Lackawanna and Western R. R. Coal Trade.

Coal business during the years—

	1860 Tons.	and 1859. Tons.
Shipped North	252,273	197,355
" South	827,954	632,079
Total	1,080,227	829,434
Increase in 1860	250,793	

The coal shipped in 1860 was distributed to the following points:

	Tons.
Scranton and on line of Northern Division.	29,344
Binghamton and for Chenango Canal shipments	65,948
Syracuse and for shipment	114,761
Ithaca " "	31,838
On line of N. Y. and Erie and connecting roads	10,382
Elizabethport	646,155
Line of Central Railroad of New Jersey	15,731
Washington and for shipment on Morris Canal	142,961
Southern Division Del., Lack. and Western Railroad	23,107
Total	1,080,227

The coal shipped as above was received from the following mines:

	Tons.		Tons.
Diamond	212,426	National Anthr.	85,538
Bellevue.	112,037	Stafford Brook	87,366
Hampton	129,196	Pine Brook	15,945
Scrant. Coal Co.,	50,993	Spencer's	33,106
Boston	66,032	Hyde Park	51,195
Clark's	71,190	Old Forge	5,628
Swetl.d (H.&Co.)	81,326	Greenwood	27,197
N. Y. & Penna..	51,017	Continental	34

Total by Del., Lack. and Western R. R.. 1,080,227
Coal mined and used by Lack. Iron and Coal Co. from their own mines, not mentioned in foregoing statement.... 79,645
Total 1,159,872

Yearly shipments of tons from time of opening railroad:

1851	6,000	1856	296,232
1852	67,487	1857	490,023
1853	97,358	1858	683,411
1854	133,964	1859	829,435
1855	188,865	1860	1,080,228
Total			3,873,003

The foregoing is the entire coal business of the Company, including that mined and used by the Lackawanna Iron and Coal Company for 1860.

Delaware Division Canal Coal Tonnage.

The quantity of anthracite coal cleared from Easton—where the Delaware Division Canal connects with the Lehigh Canal—

1860	639,323	tons.
1859	606,506	"
Increase	32,817	"

Lehigh Canal Coal Tonnage.

The quantity of coal cleared from the different places of shipment on the Lehigh Canal, for the season of 1860, and for the seasons of 1859 and 1858, was in these proportions, to wit:

From	1860. Tons.	1859. Tons.	1858. Tons.
Mauch Chunk	474,084	490,611	393,167
East Mauch Chunk.	163,499	150,407	179,204
Penn Haven	248,823	236,391	199,867
Rockport	104,349	101,851	67,118
White Haven	100,277	71,399	69,643
Total	1,091,032	1,050,659	908,999
Increase	40,373	61,660	

Delaware and Raritan Canal Coal Tonnage.

The Delaware and Raritan Canal, which is the intermediate navigation between tide-water on the Delaware river at Bordentown, and on the Raritan river at New Brunswick, 43 miles, with a feeder into which there is an inlet-lock at Lambertville, 15 miles above Trenton, is the *second* in rank among the coal carriers, being only exceeded in coal tonnage by the Philadelphia and Reading Railroad. Here are the figures:

	Tons.
Consumed on line of canal from Lehigh, by outlet	27,580
Consumed on line of canal from Schuylkill and Cumberland	16,656
Shipped from Trenton (from Bel. Del. R. R. 1860)	73,100
Shipped from Trenton (from Bel. Del. R. R. 1859)	396— 73,496
Through from Lehigh by outlet	314,237
" " " Bristol	1,059
" " Schuylkill, by Schuylkill Navigation	694,334
Through from Schuylkill, and beyond, by Reading Railroad	246,424
Through from Cumberland	27,210
Total in 1860	1,400,996

Lehigh Valley Railroad Coal Tonnage.

Names of the mines from which the coal tonnage of the Lehigh Valley Railroad was supplied for the years named:

	1860. Tons.	1859. Tons.	1858. Tons.
Hazleton	132,411	101,988	85,114
East Sugar Loaf.	126,855	105,303	85,322
Council Ridge	87,183	68,386	55,987
Mount Pleasant.	7,347	12,019	4,604
Spring Mountain	90,357	118,234	98,786

Jeddo	28,503	.....	.....
Big Black Creek	37,377	1,189	.....
Ger'n. Pa. Coal Co	30,585	10,892	4,172
Other shippers	7,294	6,241	380
Total for 1860	730,642	577,652	471,929
Increase	152,990	105,723	52,694

Schuylkill and Susquehanna Railroad Coal Tonnage.

Quantity of coal transported over the Schuylkill and Susquehanna Railroad, in both directions, since 1855 inclusive; the road was opened to Auburn in 1854:

	Eastward. Tons.	Westward. Tons.	Total. Tons.
1860	94,973	14,719	109,962
1859	81,600	19,857	101,457
1858	60,435	43,493	103,928
1857	44,801	37,484	82,285
1856	42,393	34,914	77,307
1855	34,731	17,763	52,494

Schuylkill Canal Coal Tonnage.

Quantity of coal cleared from the several points of shipment on the Schuylkill Navigation, for the season of 1860, and also for two preceding years:

From	1860. Tons.	1859. Tons.	1858. Tons.
Port Carbon	310,519	348,973	349,290
Mount Carbon	77,897	65,706	72,972
Schuylkill Haven	902,184	881,194	788,683
Port Clinton	66,087	76,148	112,859
Total	1,356,687	1,372,021	1,323,804
Increase	.....	48,217	47,815
Decrease	15,333	.....	.....
The shipm'ts for the se'n of 1857, were			1,275,988

During the season of 1860, very unusual suspensions of navigation occurred, from accident and flood.

Mine Hill and Schuylkill Haven Railroad Coal Tonnage.

Quantity of coal transported over the main road and branches of the Mine Hill and Schuylkill Haven Railroad Company's Railroad, for 1860, and also for the two preceding years:

From	1860—tons.	1859—tons.	1858—tons.
Ashland	517,792	442 086	278,119
Main road	389,671	392,527	395,847

Total 1858	417,726	122,923	540,649
Inc. 1860	206,205	80,182	286,388
Inc. 1859	37,955	60,752	98,706

Coal Trade of Boston.

The imports of coals into the port of Boston, for the last two years, was from the sources named, in the proportions given, to wit:

	1860—Tons.	1859—Tons.
From Great Britain	22,556	26,407
" British Provinces	116,339	83,803
" Philadelphia	380,902	370,827
" Alexandria	47,651	47,044
" Baltimore	44,527	44,851
" other sources	111,328	107,603
Grand total	723,303	680,535
Total, foreign	138,895	110,210
Total, domestic	584,408	570,325

Belvidere Delaware Railroad Coal Tonnage in 1860.

Consumed on line of road	16,174 tons.
" at Trenton	31,548 "
Sent forward on the Camden and Amboy Railroad	25,486 "
Shipped to the eastward from Trenton	73,100 "
Total tonnage for 1860, all from the Lehigh	146,308 "

Quantity of coal transported over the Belvidere Delaware Railroad, received from Lehigh Valley Railroad at Easton and delivered at Trenton, or on the line of the road, in previous years.

	Through.	Way.	Total–Tons.
1859	121,774	13,431	135,205
1858	87,529	11,560	99,090
1857	112,720	10,528	123,248
1856	46,168	6,326	52,484

Erie (Penna.) Canal Coal Tonnage.

The coal tonnage of the Erie (Penna.) Canal for 1860, was 129,807 tons.

Same Company carried during the season 43,577 tons 1,796 lbs. iron ore.

Shamokin Valley and Pottsville Railroad Coal Trade.

The Quantity of Coal transported over Shamokin Valley and Pottsville Railroad for the

	Tons.
Year ending December 31, 1860	120,108
" " " 31, 1859	189,753
Increase	29,355

Philadelphia and Reading Railroad Coal Tonnage.

Amount of coal transported on the Philadelphia and Reading Railroad, during the fiscal years ending, respectively, Nov. 30, 1860, 1859, and 1858:

	1860.	1859.	1858.
Port Carbon	492,111	455,268	418,009
Mount Carbon	116,407	114,762	97,314
Schuylkill Haven	927,673	707,265	677,774
Auburn	94,027	77,513	55,478
Port Clinton	247,638	278,163	294,054
Total	1,878,156	1,632,931	1,542,645
Increase	245,224	90,285	.....

Chesapeake and Delaware Canal Coal Tonnage.

The quantity of coal which passed through the Delaware and Chesapeake Canal, from January 1 to Decembeer 31, 1860, was: Eastward, 152,371 tons; Westward, 70,068 tons; total, 222,439 tons.

The official year of this Company ends May, 30; for the last three official years, beginning, respectively, June 1, the following is the quantity of coal which passed through this inter-bay canal, whereby Schuykill coal is passed south to Baltimore; and Cumberland, and Susquehanna, and Broad Top coals are passed north to Philadelphia and New York:

	1860.	1859.	1858.
Eastward	137,494	129,485	122,060
Westward	55,910	45,659	55,802
Total tons	193,404	175,144	177,862

Susquehanna and Tidewater Canal Coal Tonnage.

The quantity of coal shipped down the Susquehanna and Tidewater Canals, from Wrightsville, in 1860, was 229,292 tons.

Total coal tonnage for year 1859 .... 198,180 tons
" " " 1858 .... 191,537 tons

Frostburg (Md.) Mining Region.

For the year ending Monday, December 31st, 1860, (says the *Frostburg Gazette* of January 5,) the following amounts of coal were shipped over the named railroads from the Frostburg mining region. Shipped over the George's Creek Coal and Iron Company's Railroad for the same period.

	Tons.		Tons.
Franklin	109,139	Piedm't (Pickell) Ca'l	20,721
Potomac	4,301	" " by G.C.R.	12,866
Barton	18,829	" American	85,348
Swanton	39,890	" Detmold	44,418
		George's Creek	94,305
Total			429,816

From Hampshire mines were shipped during the year 52,386

Cumberland Valley Railroad.

The receipts of this company for the years ending Sept. 30, 1859 and 1860, were:

	1859.	1860.
From Passengers	$67,886 34	$70,177 48
" Freight	96,099 63	107,296 09
" Mails	5,200 00	5,200 00
	$169,125 97	$182,673 57
Expenses	62,049 08	65,851 40
	$107,076 89	$116,822 08
The increase of gross receipts was		$13,547 60
" expenses "		3,802 41
" net earnings "		$9,745 19

The report says:—

The organization of this Company, the nature of its business, and the principles upon which its accounts are kept, are not likely to produce any remarkable results in its annual operations. We have always anticipated an increase of receipts, graduated by an increase in the improvements, and general advancement of the agricultural interests of our valley; and in the five and twenty years of our operations, we have never been disappointed, except by some accidentally occurring circumstance, which did but temporarily interfere between the intimate connection which exists with our population, the fruits of its industry, and the success of our road.

The right to convert the preferred stocks of the Company into their bonds, has been continued at each annual meeting; and at the last, the time was extended until December, 1861. It will be seen that in the last year there has been $17,500 of the first, and $6,500 of the second preferred converted; but for the last ten months there has not been a single instance of conversion of stock into bonds.

During the last year there has been 118 tons of new iron, and about 7,000 new white oak sills put into the road, the cost of which is all estimated in the ordinary expenses. Every year's experience serves to convince us more fully, that it is true economy in our management, to withhold no expense necessary to keep our road and rolling tock at all times in the best possible order: hence it will be seen that the per centage of the gross receipts expended, in view of the amount of business done, is as low as any other road in the country; and now, all our motive power is in good condition, and the road itself well prepared for the approaching winter's business. The iron roofing of the bridge across the Susquehanna at Harrisburg, has proved to answer all the purposes which were anticipated from it.

Since our last annual report, the Franklin Railroad from Chambersburg to Hagerstown has been completed in the most substantial manner, and we have been running the road, by contract with that company. Like all local roads, it will require time to develope the business of the country through which it passes; hence it will be seen, that the business upon it has gradually increased ever since it was opened, and doubtless will continue to increase for many years, until, it is believed, it will amply remunerate its enterprising owners.

The receipts of the company from all sources during the year were as follows:

Cash and cash items, Oct. 1, 1859	$59,663 78
Receipts from tolls	182,673 57
Rent and interest	1,558 43
Share of receipts on Franklin R. R.	6,250 83
Assets and materials sold	2,114 75
	$252,261 36

And the expenditures were:

Dividends on stock	$62,432 00
Interest on bonds	20,640 00
State tax on stocks and dividends	3,340 35
Ordinary expenses	65,851 49
Covering Harrisburg bridge	4,950 57
Expenses of Franklin R. R.	3,119 08
Increase of assets	1,042 83
Tolls due	12,528 38
Old claims	631 50
Sinking fund	33,860 66
Cash on hand Oct. 1, 1860	43,864 50
	$352,261 36

The Franklin Railroad was opened for business from Greencastle to Chambersburg on the 6th of February, and from Hagerstown to Chambersburg on the 29th of February last. The receipts have been:

From passengers	$8,190 64
" freight	4,311 04
	$12,501 68

GENERAL STATEMENT.

Cost of road and equipment	$192,111 06
Materials for use	10,339 90

New York Canals.

The subjoined table exhibits the quantity and estimated value of each class, and of the property arriving at tide-water by the Erie and Champlain Canals during the season of 1860. The exhibit gives the total quantity of every article passing over the various Canals in this State, and coming into Hudson river. The past has been by far the most satisfactory and successful season to all interested in the navigation of the Canals.

The total value of produce brought to tide water last year was $52,175,312. The increase, consequently, has been something over 50 percent. The values coming to tide water were larger the past year than in any previous,—those for 1856 reaching $74,877,937.

Orange and Alexandria Railroad.

We have received the report of this company for the fiscal year ending September 30, 1860, from which we learn that the revenue earned during that time was:

From passengers		$281,248 91
" mail		24,137 50
" freight		105,043 97
" Adam's express		8,352 97
" Manassas Gap Railroad		31,643 54
		$450,426 89
And the expenses were:		
Maintenance of road	$73,383 98	
" motive pow'r	53,800 97	
" cars	10,863 37	
Transportation expenses	57,176 43	
Use of Virginia Cent'l ro'd.	12,763 86	
Salaries, rent, taxes, etc.	20,224 94	
		228,212 16
Net revenue		$222,213 73

—or 49⅓ per cent. of the gross revenue.

Compared with the previous year the gross earnings show an increase of	$161,630
With an increase in expenses of	196,987
Making the decrease in net earning	$35,357

The President in his report says:

Considering that the receipts have been drawn upon the entire line of road only during a part of the year, and then only from passengers, and the further fact that the westward bound tonnage is nearly double the amount coming east, showing a heavy falling off in the production of the country from Gordonsville to Alexandria the past season, the result can not be regarded as otherwise than favorable, and is indicative of a large future increase when the whole work shall receive its legitimate trade and business, which hereafter it will be prepared to accommodate. The receipts of the road for the last six months, inclusive of the month of October, reaches nearly in the aggregate three hundred thousand dollars, and approximates an average of fifty thousand dollars a month. There is no reason to infer that the monthly receipts will hereafter fall below this average unless a permanent suspension of communication and of all relations of business should take place between the North and South. On the contrary, the prospect is very favorable to a large future increase in the business and receipts of the road. So far the local trade along the line of the extension has not been developed for want of proper accommodation—and owing to the imperfect condition of the connection at Lynchburg and the heavy cost of transhipment at that point the road has been deprived of its legitimate share of through freights. From both sources a valuable business ought hereafter to be derived.

In reference to the Extension to Lynchburg the report says:

In the report made to the last annual meeting the completion of the track to the north bank of James River was anticipated to take place by the middle of December, at which time the road could be operated with the aid of a line of Omnibus, and baggage wagons in the transportation of passengers and the mails. Owing to the unfavorable condition of the weather some further delay ensued, and the result was not attained as above until about the middle of January. In April last the bridge across James River, was finished, and the track laid down to the north bank of the James River and Kanawha Canal, and a passenger connection, formed thence with Lynchburg by a packetboat. Another expensive bridge was required at this last named point, which has since been completed, and the track laid to the depot of the company at Lynchburg, and the connection effected by rail with the Virginia and Tennessee Railroad. An unfinished cut at Bobb's creek, in Nelson, remains to be removed which is now in progress of execution, and will be completed, according to report of the Chief Engineer in the course of next winter. No obstacle to the present working of the road arises from this source as the difficulty has been obviated by the construction of a temporary track.

The precise cost of the extension has not yet been stated, and indeed, cannot be made out until the construction account has been closed. All the several items of expenditure will be found specially stated in the reports of the Treasurer under their respective heads. The total aggregate cost will amount to three millions of dollars, and may exceed that sum, when the final interest account and cost of equipment shall have been properly apportioned. The line of this road necessarily involved from its physical formation great difficulty and expense of construction. The work however has been executed in the most substantial and durable style, and will thereby require less annual outlay hereafter, for reconstruction, and repairs. The depot houses have been erected for the accommodation of the local business along the line, and the only additional expenditure now needed will be represented in the comparatively small amount required to build a suitable Station house at Lynchburg, and in finishing the remaining work at Bobb's Creek.

The length of the road and side track is 162 miles—making the average cost per mile for maintenance of road $452 98. The number of miles run by locomotives of this company was 270,846; by those of the Manassas Gap Railroad Co. 15,884—equal to 286,730 miles run—making the expenses of maintenance of road per mile run 25.4 cents.

The number of passengers carried on the trains during the year was 101,237, against 87,370 the year before; and 34,000 tons of freight, against 29,300 the previous year.

Some extraordinary expenses for repair both of track and bridge have been incurred during this year. It is believed that the expenditure for this purpose will be relatively diminished another year. New rails have been laid to Springfield Station, 7¾ miles from Alexandria. Nearly all the bridges between Alexandria and Culpeper, C. H. have been entirely removed or strengthened. Thirty thousand cross-ties have been put in the road, which with the extra labor and spikes, have tended to increase the repairs of road considerably over the average of past years. One freight and four passenger engines, six passenger, four baggage and ten freight cars have been purchased, and thirty freight and six ballast cars built at the company's shops. The equipment now consists of 16 locomotives, all but two which are in good order; 16 passenger, 4 mail, 6 baggage, 150 freight, and 15 construction cars. The complement is considered sufficient for a largely increased business. The extension to the machine shop at Alexandria has been completed by an addition for car building and repairs. A store house is now being constructed, and a building for the shelter and repairs of engines is in contemplation.

STATEMENT OF FINANCES.

The general financial condition of the Company, may be stated as follows, viz:

Receipts from commencement	$7,236,776 04
Disbursements from commencement	7,182,012 88
Receipts for the past fiscal year	1,415,387 01
Disbursements for the past fiscal year	1,342,414 01
Floating debt paid in the present year	295,100 56
Floating debt of the present year	590,056 89
Total indebtedness to October 1st, 1860, including accounts to Contractors, temporary loans, &c.	631,756 98

RESOURCES ON HAND AND AVAILABLE.

Due on stock subscription to Lynchburg Extension		24,055 70
Stock held by Company		69,515 00
Freight and other bills due		18,209 24
Material at shops and wood on line of road		45,514 64
Cash in Banks and available		9,249 12
		$166,543 70
Bonds of second issue 6 per cent.	$63,500	
Bonds of third issue 8 per ct.	19,000	82,500 00
		$249,043 70

The above is subject to a deduction on the bonds between their par value, and their market rates. These bonds are hypothecated to secure payments of existing obligations included in the foregoing statement of indebtedness.

The following is a statement of the stock in full, showing the amount subscribed, and how much remains due and unpaid.

Stock subscribed on road to Gordonsville		$1,357,500 00
Stock subscribed to Warrenton Br'ch		100,000 00
Capital stock to Gordonsville and all paid in		1,457,500 00
Subscribed by State of Virginia	874,500 00	
Subscribed by Corporations and individuals	583,000 00	

LYNCHBURG EXTENSION.

Capital stock		$1,500,000 00
Subscribed and paid by individuals	532,103 73	
Subscribed by Amherst County	50,000 00	
Due on individuals subscriptions	24,055 70	606,155 43
Stock unsubscribed and on hand		$893,840 57

Statement of Bond Account of the several issues, with the amount issued and on hand, October 1st, 1860:

First issue on Road to Gordonsville, dated November 1st, 1851, to run 15 years—matures November 1st, 1866, all issued		$400,000 00
Second issue, and 1st on Lynchburg Extension account, dated 1st of January, 1855, to run 20 years—matures 1st of January, 1875	$1,200,000 00	
Issued to 1st October, 1860	1,136,500 00	
Bonds on hand of this issue		$63,500 00
Third issue—8 per ct. Bonds and second on Lynchburg Extension, dated 1st May, 1858, to run 15 years—matures May 1st, 1873	$600,000 00	
Issued to 1st of October, 1860	581,000 00	
Bonds on hand of this issue		$19,000 00
Due State of Virginia for loan in 1858 and 1859, of		$400,000 00

This loan is on a yearly interest of 7 per cent. for thirty-four years, when the debt is extinguished.

In reference to the existing indebtedness of the Company, and the importance of making early provision for its payment, the report says:

The net earnings of the road will doubtless enable the Company to meet all its engagements if sufficient extensions could be had of its creditors. The length of time required, however, for the purpose, and the embarrassed present financial state of the country render this mode of relief objectionable. To fund the debt in some convenient form would be far more desirable and satisfactory both to the company and to its creditors. It is therefore recommended that authority be conferred upon the board of Directors to issue bonds to a limited extent for this object, to be secured by a further mortgage of the property of the Company, to run at long or short dates, as may be deemed most expedient. The basis of the present net receipts of the road will demonstrate the ability of the Company to pay the additional interest which will accrue upon the proposed issue of bonds by the Company. If the road in its imperfectly developed condition is now yielding an average of $50,000 per month, when all its connections are made, probable and prospective business realized, it is fair to assume that the amount will be increased to at least $60,000 per month. The annual interest now paid upon all the funded or mortgage debt of the Company is $172,000. Add $42,000 for interest on bonds now proposed to be issued to pay off floating debt;—this makes the sum of $214,000 of interest accruing annually. Allow $300,000 as necessary to pay working expenses, and leave, if the sum of $60,000 per month, or $720,000 per annum be assumed as the aggregate of gross receipts, $206,000 to be applied as a dividend upon the stock, and to provide a sinking fund for the ultimate redemption of the mortgage debt of the Company.

If it be decided as the policy of the Company to appropriate the net earning of the road in payment of dividends upon its stock to take effect as soon as practicable, and to be regularly maintained from year to year, it will become necessary in making the new issue of bonds to have regard to the payment of the mortgage for $400,000 maturing in November 1866, and to allow a margin for that purpose. The mortgage itself might specify that a certain amount of the bonds should be reserved to pay in part or whole the debt aforesaid. In this mode the financial condition of the company would be systematized, all its accruing interest provided for, a dividend of six per cent. per annum declared upon the whole capital stock, and the sum of $80,000 left to be applied as a fund to sink the permanent debt as it gradually matured. Of course the estimates submitted are predicated upon a permanent continuance of the existing political and commercial relations of the country.

The completion of this road marks quite an era in the history of the public improvements of Virginia. It gives a direct line of some 370 miles diagonally through the State, and completes the great interior from Baltimore to Memphis and New Orleans. Every year must add to the importance by this route and the value of its traffic.

President—J. S. BARBOUR.
Chief Eng'r and Sup't—H. W. VANDERIFT.
Treasurer—JAMES H. REID.

Finances of Ohio.

The Message of Gov. DENNISON thus states the Public debt of Ohio:

Foreign debt	$13,973,023
Domestic debt	277,210
Irreducable debt	2,677,600
Total debt	$16,927,834

The foreign debt is composed of the following items:

6 per cents. due in 1860		$6,413,325
6 " " 1870		2,183,531
6 " " 1875		1,600,000
6 " " 1886		2,400,000
6 " " 1861 (temp'y loan).		350,000
5 " " 1865		1,025,000
Stocks due in 1856, not bearing Interest		1,166
Total foreign debt		$13,973,023

The Governor remarks on this subject:

"The levy for the year 1861 for the payment of the interest and the gradual reduction of the public debt is one and four-tenths of the dollar. The same levy continued would result in the reduction of the public debt, in January 1871, to the sum of 11,670,392 20. The amount to be raised in the meantime to meet the accruing interest and principal of the debt by taxation—all the other sources of the sinking fund being nearly exhausted—would be $9,760,093 54, making the sums paid to Jan. 1, 1871, and to be paid thereafter on the principal of the debt, $21,430,465 74,

Instead of adhering to this mode of paying the public debt the Auditor proposes an addition of six-tenths of a mill on the dollar, to the present levy, making the entire levy two mills on the dollar, which will provide a sufficient sum to meet the accruing interest, and those portions of the principal of the debt maturing prior to, and on the first day of January, 1871, leaving then only $4,000,000 of the debt unpaid.

Under this plan the amount of principal paid from Jan. 1, 1861, to Jan. 1, 1871, would be	$9,897,241 20
The interest paid during the same period would be	5,676,233 50
Making a total paid on principal and interest	$15,573,474 70
Adding to this the principal of the debt remaining unpaid January 1871	4,000,000 00
And the total amount paid to January, 1871, and to be paid thereafter would be	$19,573,474 70

This is $1,856,991 94 less than would have to be paid under the present system prior to, and on the first of January, 1871.

American Railroad Journal.

Saturday, January 19, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The market for the past week has been characterized by a greater steadiness, with some improvement in prices. The progress of events does not indicate any adjustment of our political difficulties, but as we are becoming accustomed to them, the public mind is recovering tone. Dissolution is accomplished on paper, and we can hardly expect to see the immediate return of the seceding members of the confederacy. There is an almost universal desire to avoid hostilities, and this may secure a peaceable separation should this be inevitable. The commercial relations of the two sections are so intimate and important, that every effort will be made to preserve these. The example of the relations between the United States and Canada, proves that similar relations may be sustained on the other side of us, could the gordian knot be fairly untied.

But for our political troubles the present year would have been the most active and prosperous ever witnessed in this country. The internal trade of this country is still very active. Large quantities of produce are coming forward, and the earnings of the Railroads in the Northern States, particularly, are well maintained. The foreign demands is active for all our staples, and will probably continue till the new crops is raised.

Philadelphia and Reading Railroad.

We have received the report of this company, but too late for insertion this week. The total receipts for the past year was $3,312,546; expenses $1,686,561; net earnings, $1,625,984. The interest on the funded debt was $731,121, leaving a dividend fund of $839,863. Out of this was paid

the bonus for extension bonds $385,531. The excess of gross earnings over 1859, were $588,253; net $380,169. We shall give the report next week.

Anthracite Coal Trade of the U. S. for 1860.

We give elsewhere full statements of the anthracite coal trade of the United States for 1860, for which we are indebted to the *U. S. Railroad and Mining Register.*

Boston and Providence Railroad.

At the Annual meeting of this Company held on the 9th inst., the following gentlemen were elected Directors for the ensuing year, viz: C. H. Warren, Joseph Grinnell, John Barstow, George W. Hallet, Samuel T. Dana, J. Huntington Wolcott Christopher C. Chadwick.

The annual report of the fiscal year ending December 1, 1860, was presented from which we learn that the gross earnings during that time were:

From Passengers	$338,547 26
" Freight	306,515 28
" Rents	9,712 76
" Express	7,494 96
" Mails	7,850 00
" Interest on loans of cash	9,910 60
" Dividend on stocks	5,600 00
	$685,630 86

And the expenses were:

Coal, Wood and Water	$37,763 64	
Repairs of road	36,000 00	
" Engines	24,000 00	
" Cars	26,500 00	
" Stat'a & fixtures	24,000 00	
" Bridges	9,000 00	
" Fences	3,000 00	
Oil and water	6,761 53	
Taxes and Insurance	9,087 98	
Transportation expenses.	93,416 30	
New Iron and sleepers	28,000 00	
All other expenses	28,378 43	
Total inclu'g ren'l fund	$325,907 88	
Interest paid on bonds.	10,236 12	336,144 00
Net earnings		$349,486 86

Compared with the previous year the gross earnings show an increase of $30,957 33
With an increase in expenses of 8,564 16

Making the increase in net earnings $22,393 17

The actual expenses were less than those charged by the sum of $16,066,34 which was carried to the several renewal funds. There is also added to the expense account the cost of one new locomotive, two passenger cars, and thirteen cars which more than covers the depreciation of the rolling stock. During the year another track has been laid from Readville to Sharon, 10 miles, thus completing the double track between Boston and Mansfield. The cost of this new track was $73,188 98. A purchase of 384,175 feet of land adjoining the Company's premises in Boston, has been made at a cost of $132,657 80. The cost of the new track and land has been paid in cash. During the year the funded debt was reduced by the sum of $11,500; and on the 1st January, 1861, another payment of $30,000 was made, leaving still due the sum of $132,750, payable at different periods before 1869.

The cost of road and equipment November 30, 1859, was	$3,569,066 24
Do. November 30, 1860	3,160,000 00
Amount of reduction	$409,066 24

—of which, the reduction on the cost of the road was charged to the surplus earnings, and the reduction on cars and engines to expenses of each year.

General Balance Sheet.

Construction, including iron		$3,057,900 00
Equipment		102,100 00

Cash "		46,553 47
Total		$336,873 35

Accounted for as follows, viz:

Dividend paid Jan. and July, 1860	$108,188 00
Bonds paid Aug. 4, 1860	100,000 00
Land purchased	732 48
Materials on hand Nov. 30, 1860	33,461 07
Notes	5,746 00
Cash and cash items	88,745 80
Total	$336,873 35

The company have largely increased their business the past year, particularly in freight. In the matter of repairs, six miles of track has been laid with new iron. The company have also expended about $20,000 in constructing and repairing cars, all of which has been charged to current expenses.

In August last, the bonds of the road, amounting to $300,000, became due. Of these, $50,000 were paid from the earnings of the year, and $50,000 more from a sale of 500 shares of the stock, making the capital stock $1,600,000, instead of $1,550,000, as per last report. The remaining bond debt of $200,000 was extended, payable in sums of $25,000 every six months. $80,000 of this having the longest time to run, was sold at a small premium, and the balance was continued at six per cent. interest, with the option to pay the whole or any part, on giving to the holders six months notice; in pursance of which, notice has already been given to take up $25,000 in February next, and a further sum of $25,000 in May next.

The road is in first rate condition and has come to be one of the best investments of the kind. Dividends for the past 5 years having averaged 7 per cent. It traverses one of the finest manufacturing districts in New England having a rapid development. A steady increase of earnings is thus secured for the future.

Norwich and Worcester Railroad.

At the annual meeting of the stockholders held at Norwich on the 9th inst., the following named gentlemen were chosen directors for the ensuing year: Augustus Brewster, Charles Johnson, Jedediah Huntington, John A. Rockwell, J. Newton Perkins, Norwich, Conn.; John T. Wait, Moses Pierce, Norwichtown; Robert Bayard, John A. Weeks, New York; Alex. DeWitt, Oxford, Mass.; A. D. Lockwood, Killingly, Conn.; Henry K. Horton, Boston; Francis H. Dewey, Worcester, Mass.; Vachel Worthington, Cincinnati, Ohio. At a subsequent meeting of the directors, Augustus Brewster was chosen President; George L. Perkins, Treasurer.

The City of Boston, one of the new boats to run between Allyn's Point and New York, in connection with this road, has just been launched

from the yard of Sneeden & Co., at Greenpoint, Long Island. She will be completed in season to take her place on the line in May next. The other new boat, the City of New York, will be ready for service at nearly the same time.

Journal of Railroad Law.

SAILING OF VESSELS; WATCH TO BE KEPT; NEGLIGENCE IN DISCOVERING INJURIES; CONDITION OF VESSELS IN PORT.

We reported last week the case of the Amoskeag Manufacturing Co., *vs.* the Steam Ferry-Boat John Adams, and after stating the facts we gave so much of the opinion as bore upon the defence set up by the defendants that the accident was inevitable.

There were other defences set up which we think would be of interest to our readers and which we now propose to give. For the second defence, it was insisted on the part of the defendants that a ship situated as the plaintiff's vessel was is bound to keep a watch; for a third defence, that the master was guilty of gross negligence for the reason that he did not earlier ascertain that there was a leak in the vessel, and commence to move his cargo; and for a fourth defence it was insisted that the ship was unsound or the force of the collision would not have been sufficient to produce the injury complained of.

No rules of law are more important than those which govern the sailing of vessels upon the high ways of the nations, and they are obviously necessary to those to whom is assigned the conduct and care of the property transported by all classes of vessels. Employees are apt to be careless, and when they add to carelessness ignorance they make up the sum of incompetency. For whether an accident be the result of carelessness or ignorance the party at whose door the charge is proved must bear the loss. It is also true that oftentimes it is a delicate subject to determine, in the variety of circumstances which arise exactly what one's whole duty is, and we have only to resort to the tribunals where such cases arise, their merits considered and a decision rendered, to guide us in the determinating of our proper cause when we ourselves may be called upon to act.

It will be remembered that on the 20th of January 1859, the ship Aldenah, laden with nine hundred and sixty bales of cotton, was lying moored at Battery wharf, in Boston, where she was run into by the ferry-boat John Adams, and among other damages the stern post of the ship was started, and her wood ends forced open, causing her to leak to such an extent that the cotton on board, belonging to the libellants, was wet and damaged, for which the libellants claimed that the respondents should indemnify them. The ferry-boat was at the time of the collision lost in a fog and had been carried from its course by the tide during a stoppage; and was borne chiefly by the force of the tide, which was running very rapidly, the machinery not being in motion. At the time the master was in the pilot-house, twenty-eight feet above the level of the water, and so dense was the fog that he could only see the "glimmer of men on the deck of the steamer. The whole crew consisted of the master, engineer, firemen, and two deck hands. One deck hand was stationed forward as a look-out, and was assisted by many of the passengers who stood forward. The following is the opinion of the Court upon the points above stated.

Clifford J. Second, It is insisted that the ship was bound to keep a watch under such circumstances. No authority has been cited, and it is believed that none can be cited, to show that a vessel has ever been held in fault, when moored out of the track of a colliding steamer, for not giving a signal to warn off the steamer as she approached. The attempts to show that such is the usage of the port has failed. Even the absence of a light from a barge or vessel at night will not generally excuse a steamer for colliding with such barge or vessel lying at anchor out of the usual track of the steamer; and why should a vessel moored to a wharf, in no manner impeding, obstructing or hindering the passage of other vessels, be required to keep a watch in the daytime? In the absence of any proof of the usage of the port, or of any decided case in the support of the proposition, it must be overruled.

Third; It is insisted that the master of the ship was guilty of gross negligence in not sounding her pumps at once after the collision, and in not sooner discovering the leak, which was not observed until the next morning, when the ship had made some ten feet of water. The libellants deny any negligence. The pumps had been sounded about half an hour before the accident. It was shown that it was not usual to sound the pumps more than once in twenty-four hours, while ying at a wharf discharging cargo, and some estified that they seldom think of sounding at all. Examinations made immediately after the collision indicated that the whole damage done was above the water mark. Experienced ship-carpenters examined the vessel during the day on which the collision occurred, and did not even suggest the trial of the pumps. Active measures were taken to remove the cargo and to pump out the water as soon as the leakage was discovered. In view of all these circumstances, this charge of negligence is not sustained.

Fourth, It is insisted by the respondents that the force of the collision was not sufficient to inflict such a serious injury upon a sound ship. On this point a question of law and a question of fact present themselves. Was the ship well built and the stern post well secured? She had just performed a satisfactory voyage, and was lying moored to a wharf with a cargo of goods free from damage and apparently in a sound and seaworthy condition. The presumption then is in favor of the libellants, and the respondents must establish the theory of fact on which their proposition rests. Looking at the whole of the very conflicting evidence, in connection with other circumstances, the theory of the respondents seems not to be well founded. Assuming, however, that she was not sufficiently staunch to have performed a new voyage, as is claimed by the respondents, but was strong enough to have enabled her master to have discharged the cargo in safety, the respondents would, even in that case, be just as liable for the damage done as they would have been had the ship been staunch, in good repair, and in all respects seaworthy. Upon the same ground a person accused of wilful homicide might set up that the deceased would have recovered if he had not been in feeble health at the time.

Extreme cases—as of a sinking vessel, or a vessel on fire—might be imagined, when a different rule would possibly apply; but if this vessel was sufficiently sound to accomplish the remaining purposes of the voyage, and was not certainly in a condition of inevitable destruction from natural causes, such a defence cannot prevail. It is no defence to a suit for damages caused by a collision, says Parsons, that no loss would have been sustained if the injured vessel had been stronger. Upon the whole case I am of the opinion that the libellants are entitled to recover, and there must be a decree entered accordingly.

Railroad Earnings.

The net receipts of the Harlem Company for

December, 1859, were	$94,553 65
December, 1860	100,140 90
Increase	$5,587 25

DUBUQUE & SIOUX CITY R. R. CO.
ELECTION NOTICE.

THE first election of directors of said company will be held at their office in Dubuque, Iowa, on Monday the 11th of February, 1861. The stock-books will be closed on the evening of 31st of January, until after the election.

412 JAMES M. M'KINLAY, Secretary.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL, September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11½ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with Iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11½ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.
ANDREW ELLISON, Jr., Eng'r in Chief.

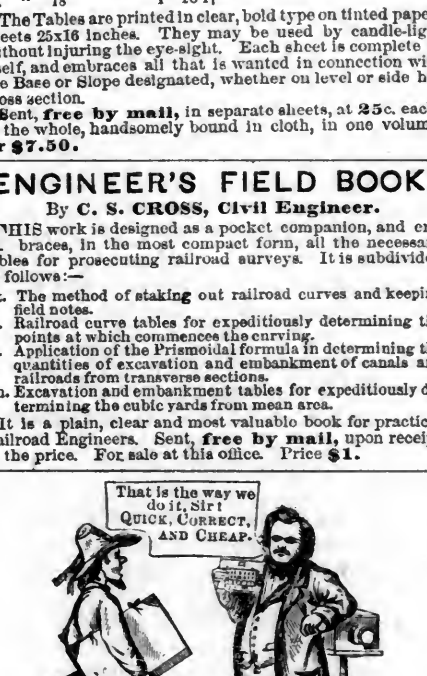
The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.



Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HISTORY
OF THE
RAILROADS
AND
CANALS
OF THE
UNITED STATES
OF AMERICA
EXHIBITING THEIR
Progress, Cost, Revenues, Expenditures
AND
PRESENT CONDITION.

By HENRY V. POOR, Esq.,
Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

OIL! OIL!
PEASE'S
IMPROVED ENGINE and SIGNAL OIL,
FOR
RAILROADS, STEAMERS, PROPELLERS,
AND FOR EVERY CLASS OF
MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning,** and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable,** that will keep bearings **cool,** and
WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor
F. S. PEASE, 61 Main st., BUFFALO.
Reliable orders filled for any part of the United States or Europe.

The best modes furnished for manufacturing, purifying and deodorizing oils from coals, petroleum, and other bituminous substances. Coal Oils tested and purified. Superintendents and skilled workmen furnished to manage Coal Oil Works and Mines. The Kerosene patents from which originated the Coal Oil Business of the United States were granted to Dr. GESNER.
GESNER'S, Chemists & Engineers.

STRATTON & CO.,
COMMISSION MERCHANTS,
No. 1 PINE STREET, N. Y.
AGENTS FOR
Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre, kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa.
A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

LAND AND SUBMARINE BLASTING,

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ.
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE,
Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 48 Pine st., New York City.

ROOFING.

THE Cheapest and most DURABLE **ROOFING** IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, 510 **BROADWAY, N. Y.** (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

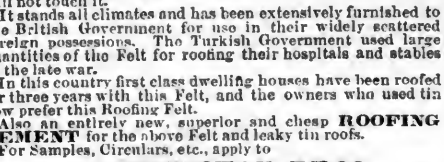
JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a **light, cheap, durable,** and perfectly **Fire** and **Water-proof Roofing** for **Churches, Farm Buildings, Railroad Depots, etc.**

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.



It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap **ROOFING CEMENT** for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—**Agents wanted.**

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—**TIME!**

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States.
DITTO, PORTER & CO.,
Successors to JOSEPH DITTO & Co.,
207 Broadway, cor. of Fulton st., N. Y

GUTTA PERCHA
ROOFING,

IN Rolls which anybody can put on; waterproof, elastic, durable, fire-proof; needs no repairs; costs about half as much as Tin, and **lasts twice as long.**

These Roofs are suitable for any style of building. They can be steep or flat, or of any required inclination. Also,

LIQUID
Gutta Percha Cement,

Preferable to paint for covering Tin Roofs, protecting them for many years from rust, and rendering them water tight.

Samples, Terms, Price, etc., furnished on application.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, January 26, 1861.

Schuylkill Navigation Company.

The annual meeting of this company was held on the 15th. The report shows that the trade for the year 1860 amounted to 1,651,416 tons, of which 1,356,687 tons were of anthracite coal, and 294,729 tons were of miscellaneous articles—a diminution of 47,685 tons as compared with 1859, of which 15,422 tons were of anthracite coal and 32,263 miscellaneous articles. In 1859, however, the miscellaneous articles were computed at 2,000 pounds to the ton, and in 1860 at 2,240 pounds. Making such correction, the tonnage of the year 1860 would, in comparison, stand 33,096 tons, the real deficiency being 12,318 tons. Of the miscellaneous business, 46,289 tons came from the Union Canal, equal to 51,843 tons of 2,000 pounds, while the business from that canal in 1859 was 67,156 tons. The miscellaneous tonnage on the line has, therefore, really increased 18,417 tons.

The income of the year amounts to $1,129,285 53. The payments for the new boat accounts have been:

Notes for boats and cars	$29,556 62
Repairs and alterations of boats	994 94
Total	$30,552 56

The receipts from boatmen for this account, under their lease, have been $20,442 71. During the year the following purchases were made: One steam barge, 50 canal barges, and 5 section barges, and 102 canal cars. The sinking fund remains as last year. The surplus income amounts to $510,008 91; accumulated since December 24, 1856, and the cost of the improved bonds of 1870, $93,970; total, $603,978 91. The balance to the credit of the fund is $440,358 60. The sum of $369,493 43 is at the disposal of the company in such a way as may be deemed proper. There remains a balance of $38,415 84 on hand after payment of the interest, which is not sufficient to pay a dividend in cash. The report of the Chief Engineer shows that the amount expended by him was $165,976 12.

Wilmington and Manchester Railroad.

The thirteenth annual meeting of the stockholders of this company was held at Wilmington, N. C., November 21st, at which the report of the president and directors for the fiscal year ending September 30, 1860, was read and unanimously adopted. The following gentlemen were elected directors for the ensuing year: John Dawson, N. N. Nixon, John A. Taylor, Henry Nutt, O. G. Parsley, E. W. Charles, John B. Moore, Geo. J. W. McCall, J. Eli Gregg and M. P. Mayes. On motion, it was resolved that the board of directors be instructed to take immediate steps for raising a sinking fund to provide for the debt of the company. It was also resolved that in view of the present condition of the company, the shareholders are justly entitled to receive some return in the shape of a dividend on their investments, and that the directors make, at an early day, a dividend of not less than three per cent.

A statement of the earnings and expenditures is given in detail in tables appended to the report of the Superintendent. From them we learn that the receipts during the year were—

From through passengers		$129,861 45
" way "		82,924 33
" freight		200,942 93
" mails		51,291 00
" minor sources		4,438 81
		$469,458 52
Less expenditures, as follows, viz:		
Repairs of road	$71,081 95	
" bridges, etc.	20,120 79	
" stations	17,484 23	
" locomotives	36,638 81	
" cars	28,831 86	
Fuel	13,414 49	
Oil, waste, etc.	4,916 00	
Conductors, engine men, firemen, etc.	32,649 18	
Ferry	4,547 30	
All other expenses	20,185 59	
		249,770 20
Leaving net revenue amounting to		$219,688 32
Add balance from previous year		87,993 01
Increase of capital stock		2,959 49
Amount charged to negro bonds last year, charged to transportation account during the present year		87 50
		$310,728 32
Disbursed as follows:		
Interest and premium on exchange	$73,608 63	
Reduction of debt	101,909 41	
Interest on anticipated payments on capital stock, paid in stock	3,461 19	
Paid on account of construction	31,583 70	
Paid for filling trustle	905 71	
On account of engine Rotunda	14,479 19	
Negro bond for 1860	100 00	
Invested in capital stock of C. F. & O. S. N. Co.	9,750 00	
		235,797 83
Assets on hand Sept. 30, 1860		$74,930 49
The reduction of debt has been made by payments applied as follows, viz:		
To redemption of stock of W. & W. R. R. Co. hypothecated		$15,000 00
To bills payable		84,855 28
To negro and scrip bonds and pay rolls		4,070 25
		$103,925 43
Increase of open accounts		2,016 12
		$101,909 41

The debt of the company is as follows:

First mortgage bonds	$596,000 00
Second " "	200,000 00
Income "	174,000 00
Bonds secured by hypothecation of W. & W. R. R. stock	75,000 00
Bills payable	27,031 02
Other liabilities	24,269 24
Total	$1,096,300 26

Included in the transportation expenses of the past year are two new first class freight engines, thirty new freight cars and one hundred tons of American rails, the aggregate cost of which amounted to $38,000.

A comparison of the business of the past with that of the preceding year, shows an increase in way travel of $7,547 50, in freight, etc., $39,055 91, in mails $6,403 50. The diminution of receipts on through travel was $11,192. The net gain of receipts was $42,414 97. The net earnings have been 8.72 per cent. upon the entire cost of the road. After deducting interest paid upon debt, the net earnings have been 12.92 per cent. upon the capital stock. Without making this deduction they have been 19.43 per cent. These are the largest receipts which the road has ever realized, and the fact that their growth has been attained by the enlargement of domestic business, renders it peculiarly satisfactory as auguring continued increase in the future from this source. The total number of through passengers carried over the road was 25,364—being 3,313 less than the previous year. Of this number, 9,418 came to or left the road at Florence. The number of way passengers was 66,036—being an increase of 6,534 over the preceding year. The way travel exhibits the same relative increase of 10 per cent. as during the previous two years, and nearly counterbalances the loss upon through travel. The gain from freight is also in excess of the gain from that branch of business over that of the preceding year; and for the past two years, taken together, the ratio of increase over the receipts from that source for the year prior thereto, has been equivalent is 59 per cent.

The equipment of the road consists of 11 passenger and 12 freight locomotives; 16 first class and 2 second class passenger coaches; 3 mail, 6 baggage, 64 box, 65 platform, 24 timber and 20 gravel cars.

The operations of the road have been conducted with that regularity and freedom from accidents which has characterized it during the two preceding years. In the roadway department the Superintendent reports a continued and steady improvement. The track has been renewed at several points by the substitution of new rails with approved joint fastenings. Some 60,000 new cross-ties have been used in renewals, and in this respect the track has at no former period been so substantial or secure. A liberal outlay has been continued upon the bridges and trestles. The Little Pee Dee, Brunswick and Alligator bridges have been substantially repaired. The large draw at the Great Pee Dee entirely reconstructed. Brunswick draw was undergoing repairs, and the repairing of the great Pee Dee and Livingstone bridges was in contemplation. The permanent workshops have been completed, and large progress made toward the erection of the engine rotunda for the protection of the locomotive machinery. Improvements in the permanent appointments of the road have also been going on along the line. The cost of the workshops with the necessary tools, together with the rotunda, as far as advanced, has been $69,391 90. There are yet to be erected a suitable warehouse at Wilmington, also a passenger shed and offices. The site for the former has been selected, and contracts for materials and the construction of a large and commodious wharf entered into, and work on the same commenced by an active force. The brick warehouses at Sumter and Marion have been finished, also the joint warehouse at Florence, and neat and substantial wooden warehouses built at Manchester and Mayesville. Some three or four other warehouses and one or two ticket and passenger offices are needed to complete the improvements on the line of the road.

The following is a general statement from the company's ledger, showing the condition of the company from the commencement of the work:

Construction	$2,632,737 12
Wilmington and Weldon R. R. stock	201,500 00
Cheraw and Darlington do.	19,211 22
Cape Fear & Ocean Steam Nav. stock	9,750 00
Wateree and Hamburg R. R. Survey	2,439 07
Negro bonds, 1860	100 00
Cash assets	68,772 21
	$2,934,509 62
Capital stock	$1,130,470 55
First mortgage bonds	596,000 00
Second " "	200,000 00
Income bonds	174,000 00
Bonds secured by W. & W. R. R. stock	75,000 00
Bills payable	27,031 02
Due on negro bonds	3,356 74
" pay rolls	7,754 23
" open accounts	13,158 27
Profit and loss	488,050 49
Net profits past year	219,688 32
	$2,934,509 62

President—THOMAS D. WALKER.
Superintendent—JAMES P. ROBERTSON.
Treasurer—JOSEPH J. LING.
Secretary—WILLIAM A. WALKER.

North Pennsylvania Railroad.

The annual meeting of this company was held in Philadelphia on the 15th inst. The following figures are given in advance of the publication of the report. The financial year closed November 30th.

Earnings from passengers	$140,396 42
" " freight	241,189 80
" " mails, rents, etc.	8,036 01
	$389,622 23
Expenses	176,668 31
Balance	$212,953 92
Interest on bonds, mortgages and floating debt	197,691 04
Leaving a balance of	$15,262 88

The increase in earnings over 1859, have been $42,320; the increase in expenses, $17,764—making the increase in net earnings $24,556. Compared with 1858, the increase in gross earnings has been $92,728; the increase in expenses $41,844—making the increase in net earnings $50,876. During the year $34,199 24 have been expended for new locomotives and cars, for trestle work, stations, car houses, etc. Bills payable have been reduced $58,417 47. The officers and directors for the current year are the same as the last, with one exception, viz: the substitution of Alfred Hunt for Harry Conrad. The following is the list.

President—FRANKLIN A. COMLY.
Directors—John Brock, John Jordan, Jr., Algernon S. Roberts, J. Gillingham Fell, S. Morris Waln, William C. Ludwig, Ellwood Shannon, Edward C. Knight, William L. Hirst, Alfred Hunt.
Eng'r and Sup't—S. W. ROBERTS.
Treasurer—WM. WISTAR.
Secretary—EDWARD ARMSTRONG.

Hackensack Railroad.

The first trip for the accommodation of passengers and freight on the new railroad between Jersey City and Hackensack, a distance of about twelve miles, was run on the 21st inst. The cars are of the wide gauge to fit the New York and Erie track, and run upon the latter road as far as Boiling Springs. From thence a track has been laid about four miles to Hackensack.

Platte County Railroad.

We learn that this road will be finished to Forest City early in February.

Brunswick and Albany Railroad.

We learn from the acting engineer that the work is progressing rapidly, and the road will soon be ready for the locomotive, when the work of tract laying will be commenced laying in good earnest. We also understand that the financial panic will not retard the construction of the road.—*Brunswick Advocate.*

Council Bluffs and St. Joseph Railroad.

We learn from the Council Bluffs *Bugle* that preparations are being made to prosecute the work vigorously upon this road as soon as the Winter is over. The *Bugle* says:

The business of getting out ties, bridge and pile timber is progressing rapidly at this time. A general good feeling is being manifested towards our road, and those who hung back at first, are beginning to see their true interest, and express a willingness to help push the good work along.

Census of North Carolina.

We give the following items of the population of North Carolina by the census of 1860, as compared with that of 1850. We have not got the free colored for 1860: we suppose it is included under the general heading of free:

	Free Pop.	*Slave Pop.*	*F. Col.*	*Total.*	*Fed. Pop.*
1860.	687,330	339,867	.....	1,027,197	891,250
1850.	553,028	288,548	27,463	869,039	753,619

—*Wilmington Journal.*

Sixth Avenue Railroad.

Annexed are the annual figurers of the Sixth Avenue Railroad Company for the year ending 30th September:

Cost of Road and Equipment		$946,960 72
Earnings		369,945 40
Pay'nt—For transport'n.	$261,698 64	
For dividends	90,000 00	
To surplus fund	18,246 76	$369,945 40

Little Schuylkill Railroad.

This Company held their annual meeting on the 14th. From the report we learn that the coal tonnage for the year was 317,906 tons 9 cwt., a falling off from the previous year of 44,195 tons. The lands of the Company furnish 221,970 against 251,990, and colleries belonging to other parties, 95,936, against 110,111 tons in 1859. The net profits realized during the year was $130,859 38, against 132,957 31 in 1859. The company is now free from floating debt. The treasurer's account gives the income at $228,398 69, expenses, $97,548 31; profits $130,859 38. Aggregate of assetts $3,390,209 52. Wm. C.

Patterson was re-elected President, and Wm. Wain, Jr., Secretary and Treasurer.

Philadelphia and Reading Railroad Co.

Below we give the annual statement of this company for the past year.

In obedience to the charter, the managers submit the following Report—showing the receipts and expenditures for the year ending November 30th, 1860, with the Treasurer's general balance sheet, exhibiting the financial condition of the Company at that date. (Here follows a long statement, in great detail, which we condense as follows:)

RECEIPTS OF THE ROAD.

From travel, 385,304, equal to 129,978 through passengers		$332,359 44
From merchandise, 499,727 tons		599,619 88
From coal, 1,878,156, at 1,23.96 cts. per ton		2,328,157 52
From United States mail		19,618 00
From miscellaneous sources		31,791 27
Total		$3,312,546 21

EXPENSES.

Transportation	$971,511 33	
Roadway	239,787 20	
Drawbacks and allowances	242,650 77	
		1,453,949 30
Net profit for the year		$1,858,596 91

INTEREST ON BONDED DEBT.

Conpons to 1st January, 1861	$700,434 00	
Interest on bonds and mortgages	30,687 00	
Total int'st for the year,	$731,121 00	

RENEWAL FUND.

Five cents per 100 tons on 465,224,483 tons transported one mile, during 12 months ending Nov. 30, 1860	232,612 24	
		963,733 24
Dividend fund for the year		$894,863 67

Which has been disposed of as follows, viz:

Sink'g fund loan 1836, '60.	$25,000 00
" " 1849, '70.	75,000 00
" " 1856, '86.	50,000 00
Total	$150,000 00
State tax on capital for 1860	16,828 02
Bonus, etc. on 1860 bonds extended	385,531 83
Dividend on preferred stock, 7 per cent. on $1,551,800	108,626 00
Accrued interest on reserved dividends preferred stock	16,554 60
	677,540 45
Balance of dividend fund 1860	$217,323 22
Add reserved fund of 1859	208,581 64
Total reserved fund	$425,904 86

Prior to the opening of navigation last spring, negotiations were commenced between the parties in interest—miners, carriers and principal dealers—to establish, as near as practicable, the prices of coal, and the charge for transporting it to tide-water, which were so far successful as to nearly equalize, as was desired, the production between the several sources of supply. The opening prices have been maintained, and a moderate increase obtained as the season advanced, which has closed without a large supply on the market.

The accompanying tabular statements in detail for each branch of traffic, show the comparative results with those of the preceding year.

	1859—Passengers.			1860—Passengers.		Increase.
Travel	126,076	$318,846		129,978	$333,359	$14,513— 4.6
	Tons.			Tons.		
Merchandise	334,609	474,888		499,727	599,620	124,732—26.3
Coal	1,632,932	1,883,685		1,878,156	2,328,158	444,473—23.6
Mail	19,618			19,618		
Miscellaneous		27,256			31,791	4,545—16.6
Gross receipts		$2,724,293			$3,312,546	588,253—21.5
Gross expenses		1,478,478			1,686,562	
Net profit		$1,245,815			$1,625,984	$380,169
Gross expenses of 1859 were 54.27 of gross receipts.						
" of 1860 were 50.88 do.—Dec. 3.39.						

The receipts and expenses for each, per passenger and per ton, have been as follows:

	1859. Cost.	Received.	1860. Cost.	Received.
Per passenger	$1 52.7	$2 52.9	$1 38	$2 57.5
Merchandise, per ton	0 74.7	1 41.9	0 53	1 19.9
Coal	1 16.3		0 48.8	1 24.9

A portion of the decrease, both in cost and receipts, per ton of merchandise, is due to a considerably increased quantity of bituminous coal from Broad Top, by the Lebanon Valley Branch, to Port Richmond, included in that account.

The result of the year's business, as condensed from transportation and income account, may be stated thus:

Gross receipts		$3,312,546 21
Deduct working expenses, including renewal fund		1,686,561 54
Profit, or receipts over cost of working the road		$1,625,984 67
From which deduct interest on Bonded debt	$700,434	
Bonds and mortgages	30,687	
		731,121 00
Leaving for net profit or dividend f'd.		$894,863 67
Which sum is reduced this year by the extraordinary expenditures for extending 1860 bonds, amounting to		385,531 83
Thus leaving only		$509,331 84
This has been credited as follows:		
Sinking funds	$150,000 00	
State tax on capital	16,828 02	
Divid'd on preferred stock	108,626 00	
Accrued interest on preferred stock dividends not paid	16,554 60	
		292,008 62
Balance carried to reserved fund, '60.		$217,323 22
Amount to credit of reserved fund, 1859, per report of November 30, 1859	$228,069 03	
Out of which has been paid taxes on real estate, and sundry drawbacks on traffic for 1859	19,487 39	
		208,581 64
Total reserved fund		$425,904 86

It thus appears that, after charging the current business of the year, with all legitimate expenses of working the road, and interest on the bonded debt, there remained surplus net profits $894,863 67, which is 7¾ per cent. on all the outstanding stock, common and preferred. The Managers are gratified in being able to exhibit these evidences of the continued increase of income from each branch of business, and the decreased expenses in each department.

The report of the engineer and superintendent, with accompanying tabular statements appended, will exhibit each of these items more in detail.

The charges during the year to construction or capital account are as follows:

Land damage on Lebanon Valley road	$29,253 08	
Second track ditto	6,610 59	$35,863 67
New passenger depot and real estate at Broad street, Philadelphia		$54,887 79
Real estate at other stations		301 33
Total		$91,052 79

There are still a few unsettled claims for land damages on the Lebanon Valley road.

The enlargement of depot accommodations at Broad street, Philadelphia, rendered necessary by the increase of business, has not only given the additional facilities desired, but has also considerably diminished the expense of conducting the passenger and merchandise traffic at that station. The former depot at Broad and Cherry streets, which was quite inadequate for the business, has been vacated, and leased at an annual rent more than sufficient to pay the interest on the cost of the additional facilities referred to at the new Broad street depot.

A detailed statement of the renewal fund account is appended. It will be observed that the usual deduction from income account for this fund, has been sufficient to maintain the tracks, buildings, bridges, engines, cars, &c., and has an unexpended balance to its credit of $66,102 62 applicable to the same purpose in the future.

The business of the Lebanon Valley branch continues to increase regularly in a very satisfactory ratio, as is more particularly stated in the report of the superintendent. A large portion of the increased revenue of this branch, is derived from the transportation of semi-bituminous coal from Broad Top. This traffic has attained a magnitude sufficient to warrant special arrangements for conducting it. The Managers have, therefore, made an agreement with the Pennsylvania Railroad Company for the construction of 300 eight-wheeled cars, at the joint expense of the two companies, which are to be exclusively appropriated to that trade.

An agreement between this company, the Pennsylvania Railroad Company and Schuylkill and Susquehanna Railroad Company, for the temporary joint use of their respective roads between Dauphin and Harrisburg, has rendered unnecessary the expenditure for extending the road from Harrisburg to Dauphin, as authorized by the stockholders at their last annual meeting.

As it is evidently the interest of all the parties that some such arrangement should be permanently established, the Managers see no good reason why the proposed expenditure may not be entirely avoided.

In November, 1854, the Managers entered into an agreement to lease, with the right to purchase at their original cost, such an additional number of coal cars as the rapidly increasing coal trade then seemed to demand. The parties with whom this agreement was made furnished $149,250, which sum was invested in 610 four-wheeled and 100 eight-wheeled coal cars. They were held by a deed of trust to secure the payment of principal at maturity, and rent, equal to 20 per cent. on their cost, payable 10 per cent. half-yearly. This company was to perpetuate and keep them in repair, reserving the right to pay off the original sum invested at any time before maturity, by giving the loanholders four months' notice of such intention.

In view of the high rent the company was paying for the use of these cars, and its financial condition being such as to enable it with safety and advantage to become the owner, instead of lessee as heretofore, of the cars in question, the requisite

notice to each loanholder was duly given, that this company would pay at its office in this city, on the 5th of January, 1861, the whole amount thus invested in coal cars, with all unpaid accrued rent, and that no rent would be allowed after that date.

In August, 1856, a somewhat similar arrangement was made, whereby $99,900 was invested in 104 box and 75 platform-cars. They were also held by a deed of trust to secure the payment at maturity of the sum named, and rent equal to 15 per cent. per annum thereon, payable 7½ per cent. half-yearly. This principal may be paid off at any time by giving four months notice, in the same manner as the coal-car loan above referred to. This was a joint transaction between the three railroad companies owning and operating the line of road between Philadelphia and Elmira, in the ratio for each as its length bears to the whole distance, 275 miles. The distance from Philadelphia to Port Clinton, where the through line diverges from this company's road, is 78 miles, which gives for its portion of the cost $28,335 27, that being 78,275 of the whole amount.

Notice has been given to the two other parties jointly interested in this transaction, that this company desires to make the payment immediately, and negotiations are now pending for the accomplishment of that object, which, it is believed, will be concluded at an early day. The rent thus payable by this company under both these arrangements, and which has been regularly met, amounts annually for the last mentioned cars to..... $4,250 30
And for the coal-cars to 29,850 00

Total..... $34,100 30

This sum has uniformly been charged to transportation account as an element of expense incident to the current business.

In the last annual report the Managers recommended the extension of the time of payment of the bonds maturing July, 1860, which recommendation was ratified and confirmed by a resolution passed by the stockholders at their annual meeting, held January 9, 1860. Upon January 25, 1860, the Board of Managers, in exercise of this authority, offered a bonus of 10 per cent. to the holders of these bonds for an extension of 20 years.

The holders of the 5 per cent. sterling bonds declined to extend them for twenty years for the same bonus that was offered for extending the 6 per cent., payment of the latter being essentially as well secured as the former.

On being thus informed by the company's agents in London, (where the sterling bonds are mainly held,) the Managers authorized an alteration of the terms of extension of these bonds, by substituting *seven* for twenty years, for a bonus of 10 per cent., and to increase the bonus from 10 to 15 per cent., to those consenting to extend for twenty years. With these modifications, all the outstanding bonds of this class have been extended thus:

Extended for twenty years ..	$192,000	
" seven " ..	436,800	$ 628,800
Purchased for sinking fund, and cancelled		76,800
There have also been extended for twenty years all the 6 per cent sterling bonds, matur'g in 1860, am't'g to.		988,800
And in like manner 6 per cent. dollar bonds		1,683,500
Leaving of the dollar bonds *not extended*, not having been presented for payment or extension		5,500
Total amount outstanding, November 30, 1859, as per last annual report,..		$3,383,400

The cost of extending these bonds, for bonus, commissions, &c., has been $385,531 83, all of which has been paid and charged to income account, which reduces thus much the available net income for the year.

Inasmuch as the extension of the bonds due in 1860 rendered unnecessary the use of those due in 1886, intended and reserved for the purpose of meeting the bonds now extended, and which were intended to be secured by the mortgage made in 1857, a covenant has been executed and recorded, limiting the amount of the bonds secured by the mortgage of 1857 to $3,586,500. All the unissued bonds secured by this mortgage have been cancelled.

The Board of Managers have also executed and recorded the necessary contract for the creation and application of the sinking fund, for which provision was made at the last annual meeting, and in accordance with the express direction of the stockholders then given.

The large bonus paid for extending the bonds due in July last, naturally suggests the inquiry, whether some system cannot be divised by which such losses can be avoided in future.

The existing loans and sinking funds are as follows:

Due July 1.		Interest.	Sinking Fu'd. Per Annum.
1....1867..	$ 438,300,	at 5 per cent.,	$25,000
2....1870.....	3,103,600,	at 6 "	75,000
3....1880.....	192,000.	at 5 "	25,000
4....1880.....	2,676,300,	at 6 "	140,000
5....1886.....	1,500,000,	at 7 "	50,000
6....1886.....	3,586,500,	at 6 "	none, except any surplus that may remain from the sinking fund of $140,000 per annum, after the bonds due in 1880 are liquidated.

By the terms of these sinking funds the bonds, when purchased, are cancelled, and the interest previously paid on them is no longer a charge upon the dividend fund.

The present annual payment of coupons amounts to.	$700,434 00
Same for rent of cars, as before expla'd	34,100 30
Total	$734,534 30

It has already been stated that the cars for which these rents were paid have been in great part, and the remainder will shortly be purchased.

The amount now due to the sinking fund is	$407,501 08
Add the same for 1861.	150,000 00
Total	$557,501 08

At the annual meeting in 1859, it was decided that these investments should be made before further dividends were declared.—The Managers now know of no reason why these purchases of bonds cannot be made during the present year, and this would thereafter largely reduce the annual payment of coupons. If then the present charge for coupons and rent of cars, amounting to $734,534 30 are continued as a fixed and constant charge to income account, the difference between that sum and the future payments of coupons (diminished, as they will be be, by the annual investment of the sinking funds,) with the existing sinking funds will be sufficient to liquidate at maturity the loans due in 1867 and 1870, provided the bonds are purchased at an average of about 90 per cent. The same system continued after 1870, even with a smaller annual appropriation (but this depending upon the price at which the bonds may be purchased,) would liquidate the then outstanding bonds due in 1880 and 1886 at or before maturity.

The managers do not wish to make any estimate of future profits. But if the consumption of anthracite coal continues to increase even in a much less ratio, in the future than in the past, and the profits from other sources enlarge as heretofore, they cannot doubt but that after such an appropriation for the bonds, there will remain for the stockholders a balance of income to be divided in cash, which will be quite satisfactory; they therefore confidently recommend the adoption of this policy.

It will be remembered that the last annual report exhibited liabilities for coupons and interest on real estate bonds due in January last, which, with the interest due in April and July, and the bonus for extending the bonds due in 1860, absorbed all the income to August last. Since that time the notes previously given, together with all current expenses, have been paid in cash from the accruing revenue, leaving the Company substantially free from floating debt, with the following assets in the treasury at the close of the fiscal year:

Cash.....		$474,281 30
Freight and toll bills immediately available		130,337 36
Bills receivable immediately available		8,886 50
Total		$613,505 16
The immediate liabilities were coupons and interest on real estate bonds due Jan. 1, 1861.....	$266,966 08	
Cars purchased, as before stated in January, 1861	149,250 00	
Debts due in current business.....	171,095 16	
Notes payable.....	20,671 90	$607,984 14
Leaving a surplus of.		$5,521 02

To this may be added the profits for December, sufficient to maintain a position of financial independence (there being no other liabilities prior to the April coupons) and to continue the policy of avoiding the issue of notes payable, or otherwise borrowing money, as well as that of paying all current and working expenses in cash.

There is due for arrears of dividends on Preferred stock		$401,090 64
Sinking funds.....		407,501 08
Total.....		$808,591 72
There will be due:		
Dividends on preferred stock in 1861.....$108,626 00		
Sinking fund, 1861.....	150,000 00	
Purchase of cars, before referred to.....	28,335 27	$286,961 27
Total.....		$1,095,552 99

The net income for the past year, after paying all charges applicable to the future, including interest, was $894,863 67, which was $384,868 75 more than in 1859. If it should be again increased to the same extent in the coming year, the fund would be amply sufficient to pay these arrearages, with the accruing similar charges, and after November, 1861, the surplus profits could be divided in cash, as the Managers are not aware of any necessity for material expenditures in the future for construction or capital account. If, however the income should only be the same as last year, about, $200,000 of the profits of 1862 would be required to liquidate these liabilities before dividends can be resumed.

If this policy is continued, and the system suggested of providing a supplementary sinking fund for extinguishing the bonded debt, should be adopted, the company will avoid all further sacrifices to postpone the payment of bonds, and will be placed in a position of permanent financial independence. The importance of attaining this result cannot well be over estimated. The history of the past with this company, as well as that of many others, attests its value. By this policy, the only source of future embarrassment is removed. The stockholder of this company can never receive the full value of his interest, until some permanent arrangement is made, which will prevent the necessity of purchasing time from the bondholder at so great a cost. He can never be perfectly secure that the profits earned will not be required to be appropriated to such a purpose. Once, however, let it be established, as a fixed rule for the government of the company, that a permanent annual sum, no greater than that of the present year, with established sinking funds, is devoted to the payment of the debt, and let it be known, as is the fact, that this sum will meet the principal of every debt at or before maturity, and the bonds and stock of the company will receive the confidence, and command the price which their inherent value justifies.

And as by the distribution of an amount of stock equal to that of the bonds so paid, the debt becomes capitalized, the stock so issued in dividends will permanently increase in value as the debt is diminished. By order of the Board of Managers.

A. WHITNEY, *President.*

Philadelphia, Jan. 9, 1861.

Macon and Western Railroad.

The report of this company for the fiscal year ending November 30, 1860, gives the following statement of the earnings and expenses during that time. The earnings were.

From Passengers		$142,959 59
" Freight		251,528 55
" Mails		10,229 70
		$404,617 84

The expenses were:

Repairs of Road	$46,873 97	
" Locomotives	14,398 53	
" Buildings, etc.	13,933 39	
" Cars	21,709 09	
Fuel	14,721 94	
Oil	2,920 74	
Salaries	8,916 65	
All other expenses	69,467 42	$192,941 73
Net earnings		$212,676 11
To which add interest received		2,726 16
Total		$214,402 27
Add balance from last report		121,695 00
Instalment on New Stock		56,200 00
50 shares stock sold		5,000 00
		$397,297 27

Disbursed as follows, viz:

Dividends, 19 per cent.	$279,492 00	
Bonds paid	23,000 00	
Interest on same	1.295 00	
Cotton burned	6,372 60	
Ac't new freight engine	10,930 00	
Defaulting Agents	13,213 23	
		$334,302 83
Balance of Assets		$62,994 44

The receipt have increased over those of 1859 as follows viz:

Passengers	$11,228 64
Freight	19,455 40
Mail	27 95
Total increase	$30,711 99
With an increase in expeness of	27,495 48
Making the increase in net earnings	3,216 51

The earnings shared in the general prosperity of the country till within the last three months during which shipments of Western produce have kept them nearly equal to those of last year, while the expenses necessarily increasing with the earnings, have also been charged with certain extraordinary expenses, which were requisite for the proper transaction of the Company's business. These expenses are thus briefly stated in the report:

The purchase of two Freight Engines to replace two condemned. The building of two Passenger Cars in the repair shops; and the expenditures made in Macon and Atlanta, for the freighting accommodations at the termini of the road.

These last improvements have been made at considerable expense, and at this point, the heavy produce business of the past three months has clearly shown the absolute necessity of the step. In Atlanta the new transferring tracks and yard room, have been tasked, to properly accommodate this same downward business. The new Freight House has been but partially occupied, owing to the decreased purchase of goods by the merchants, for the Fall trade, but had they equalled those of the Fall of 1859, and the Spring of the present year, its capacity could have been fully tested. In the Spring many of the goods forwarded lay in the cars for days, owing to the want of storage room, and to prevent a recurrence of this, the new house was begun in June, when the growing crop promised fair to rival any yet produced.

The increase in Passenger receipts over those of 1859, which it may be remembered were larger than in any previous year, is chiefly due to through travel passing to and from South-Western Georgia and Tennessee. The freight receipts increased in the earlier part of the year, before the present cotton crop was found to be so materially injured. This important staple in the country through which the road passes is estimated to not exceed the crop of 1856-7, or about one half the average of the past two years. Its early maturity, combined with the almost total failure of the corn and wheat crops which compelled sales on on the part of planters to pay for the heavy shipments of Western produce required by the country for subsistence has alone prevented the freight receipts from even falling below those of 1859. The upward freights, consisting of Northern goods have fallen largely below the usual shipments, and from present indications will continue to decrease till at least the maturity of another crop. This, however, cannot be considered due to any special cause affecting this road, but to the general depression of business affairs.

In the expenditures, as given above, is included extraordinary expenses for passenger cars, buildings and lands, amounting to $18,100. Deduct, ing this last, the sum of $174,841 73 remaining represents operating expenses, and is less relatively to the gross earnings than those of 1859, being but 43 1-5 per cent.

Of the amount reported doubtful and unavailable in the last report, $11,139 83 have been collected. The remaining sum of $13,212 23, consisting of balance due by defaulting agents will in future be charged to profit and loss, to which account any resulting proceeds will be credited.

The total number of passengers arrived in the cars was 63,312, equivalent to 4,227,944 carried one mile each, or 41,048 over the whole line of the road. The number of tons of freight carried one mile was 8,631,827.

The company have 19 locomotives, two of which are new, fourteen in good working order, one has been condemned and two are in shop for repair. The number of miles run by engines has been 226,241, miles run per cord of wood 67.5; per pint of oil 13.7.

GENERAL STATEMENT.

Capital stock		$1,500,000 00
Profit and loss		146,681 77
Earnings		404,617 84
Interest account		2,726 16
Liabilities		9,569 36
		$2,063,595 13
Construction		$1,500,000 00
Expenses		192,941 73

President—ISAAC SCOTT.

Directors—Charles Moran, Drake Mills, Adam Norrie, N. C. Munroe, T. G. Holt, J. B. Rossi Andrew Low, J. C. Levy, E. Padleford, W. A. Ross, H. Varner, S. Mowry, Jr.

Treasurer—J. E. DAY.

Superintendent—ALFRED S. TYLER.

Norwich and Worcester Railroad.

The earnings of this road for the year ending November 30, 1860, were:

From passengers	$121,814 82
" freight	222,516 05
" mail, express, rent, etc	14,031 97
	$358,362 34
The expenses for same time were	199,356 51
Net receipts	$159,005 83
Less interest paid	42,279 97
Net over expenses and interest	$116,725 86

The following is a statement of the debts of the company:

Massachusetts loan, due July 1, 1877, at 6 pr.ct.	$400,000 00	
Less sinking fund, securely invested	66,000 00	$334,000 00
Bonds due and held by Norwich Savings Society, and to be paid in February next		16,300 00
Bonds for dividend scrip at 7 per cent, due in 1864 and 1874		100,000 00
Loans from Norwich Savings Society, $5,000, to be paid annually		95,000 00
Note to Jedediah Huntington		19,300 00
Bills payable		23,000 00
Accrued interest not due		2,209 15
Dividend scrip outstanding, including interest		476 70
Balance due to individuals		300 17
Total debt of the company		$590,586 02

Less assets as follows, viz:

Cash notes, and balances due the company	$50,188 75	
Inventory of wood, iron, rails out of track, and other materials paid for.	29,964 02	
Surplus real estate, not needed for the company's use, cash value	19,674 38	$99,827 17
Balance		$490,758 87

The engines, cars, and machinery owned by this company are valued at $237,171 19.

There has been added during the year to this class of property, new, amounting to $21,891 44, charged in expenses of the year.

The debt of the company has been reduced during the same time $71,913 79; also, a dividend paid in February last of 2½ per cent., amounting to $52,812 50.

In addition to the above debt, bonds were issued to pay for the stock in Boat Company, Aug. 1, 1860, to the amount of $200,000, payable $30,000 in 1863, $25,000 in each year, 1864, '65, '66, '67, '68, '69, and $20,000 in 1870, which bonds have all been contracted for at par, and the sales about closed up. The boats for this line, to which allusion was made in the report to the stockholders on the list of August, 1860, are being rapidly completed, and are expected to be in service on the line early in May next.

Funded Debt of the United States.

Annexed is an official statement of the oustanding Loans of the United States:

	Interest.	Amount.	Due.
Loan of 1842	6 per cent.	$2,883,361	1862
" 1847	6 "	9,413,650	1867
" 1848	6 "	8,908,341	1868
Texas Indemnity	5 "	3,461,000	1865
Loan of 1860	5 "	6,750,000	1871
" 1858	5 "	18,620,000	1874
Total Funded Debt		$50,036,355	

Maryland and Delaware Railroad Company.

This Company was chartered in Maryland in 1854, and in Delaware in 1857, and empowered to construct a railroad from the town of Smyrna, on the Delaware railroad, to Oxford on the Choptank, an arm of the Chesapeake Bay, a distance of 53½ miles. Of the Share Capital which is unlimited in amount, the State of Maryland has subscribed $140,350, being part of the $8,000,000 loan of 1835, and also part of the $745,000 due the Eastern Shore Railroad Company. The State of Delaware has appropriated the sum $114,000 in aid of the Company. The work of Construction was commenced Dec. 27, 1857, and at the close of the Company's financial year Nov. 30, 1859, the graduation and masonry had been completed from Smyrna to Greensboro', a distance of 21 miles.

We have before us the report of the Chief Engineer, Wm. H. Dilworth, Esq., dated Kenton, Del., December 8, 1860, giving a statement of the progress and condition of the work since the renewal of operations under the present contract. He says:

On the 1st of March, 1860, the contractors were notified to commence work at the earliest possible moment, but in consequence of the time occupied in transporting men and teams from their homes in Pennsylvania to the line of the Road, the grading was not begun until the 16th day of April. In the meantime a small corps of engineers had been organized for the purpose of adjusting the old located line, and to cross section and stake out the work as its progress required.

The work having thus been commenced at the time above stated, it has continued to progress without any serious interruption. The time provided in the contract for the completion of the Delaware division was the first of October, 1860, but, owing to the delay occasioned by the refusal of the manufacturers to adopt the rail pattern submitted by the company it was not complied with, and believing the contractors had made a reasonable effort to obtain the iron at the proper season, I felt it my duty to extend the time for the completion of this section to the 15th of January, 1861.

With the exception of shrinkage in embankments the filling and stamping of material around the bridges and culverts, and the excavation of small ditches to drain the road-bed, the whole amount of the grading between the Smyrna Station on the Delaware Railroad and Greensboro'—embracing a distance of twenty-three and two-third miles—has been completed, and is now ready for the reception of the crossties and iron.

Bridges have been erected over all the larger streams on this portion of the road, and timber for the smaller ones delivered along the line wherever needed; and, with a due allowance for the season, you may safely rely upon their being finished by the middle of the present Winter.

Five miles of the track—extending from the connection with the Delaware Railroad to a short distance beyond Kenton—has been laid and ballasted, and is now ready for the cars, and a constant force of about twenty-five men carrying it forward at an average rate of one mile per week.

Assuming that it is put down no faster there will yet be required eighteen and two-thirds weeks, or about four and one half months to complete the road to Greensboro'.

Every dollar for the "right of way" has been paid where the land was not given, and good and sufficient deeds obtained and recorded.

Land at Smyrna Station—the terminus of the road, and where it is necessary to have plenty of room—is now valued at from fifteen hundred to two thousand dollars an acre, but in consequence of negotiations having been entered into at an earlier date, and the deep interest felt by property-holders of the town for the success of the road, five and one-quarter acres have been obtained at a trifling compensation, viz: for seven hundred and twenty-five dollars—five hundred and twenty-five of which was paid in the stock of the company and two hundred in cash.

At Kenton, Slaughter, Stateline, Meredith and Old-Town, where depots have been located, the land has been universally given. And there is every reason to suppose that a similar course will be pursued throughout the entire line of your road.

Interest and Dividends.

The Brooklyn City Railroad Company have declared a dividend of 4 per cent. payable Feb. 2.

The New Jersey Central Railroad have declared a quarterly dividend of 2½ per cent. payable on demand.

The Delaware and Raritan Canal and Camden and Amboy Railroad Companies, have declared a semi-annual dividend of six per cent. payable in cash on the 21st inst. Also, a dividend of twenty-five per cent. out of the accumulated profits, payable in Stock on the 15th of February.

The Michigan Central Company have declared a cash dividend of 3 per cent.

The Norwich and Worcester Road, have declared a dividend of 2 per cent.

The Raleigh and Gaston Railroad Company has declared a semi-annual dividend of four per cent.

The 5½ per cent. dividend of the Cleveland, Columbus and Cincinnati Railroad, is payable on the 1st February.

The Morris Canal Company has declared a semi-annual dividend of 5 per cent. on the preferred stock, and 2 per cent. on the consolidated stock, payable Feb. 5, at the office in Jersey City.

A quarterly dividend of 2 per cent. has been declared by the Second-avenue Railroad Company.

The Hudson River Road will pay the interest upon its first Mortgage Bonds on the 1st of February.

The interest on the stocks of this city due on the 1st of February, will be paid on that day by Daniel Devlin, Esq., City Chamberlain, at the Broadway Bank.

The interest due February 1 on the Northern Indana first Goshen Line, Jackson Branch, and Detroit, Monroe and Toledo bonds of the Michigan Southern and Northern Indiana Railroad Company will be paid at the bank of North America, No. 44 Wall street.

The New York Central Railroad transfer books will be closed at the close of business on Thursday, Jan. 31, and will be re-opened on the morning of Friday, Feb. 22.

Alleghany City Railroad Bonds.

The Supreme Court of the United States, at Washington, has rendered a decision in the case of Amey *vs.* the City of Alleghany, which affirms the validity of the bonds, and the constitutionality of the laws under which the issue was made. We find the decision briefly noted as follows:

Henry Amey, plaintiff, *vs.* The Mayor, Alderman, and Citizens of Alleghany City.—On a certificate of division in opinion between the Judges of the Circuit Court of the United States for the Western District of Pennsylvania. Mr. Justice Wayne delivered the opinion of the Court, that the issue of bonds with coupons in the case stated are not null and void, but that it was done under the authority of constitutional acts of the State of Pennsylvania in the case stated; and, further, that they are not null and void for any irregularity connected with that issue by the city of Alleghany.

New York and New Haven Railroad.

The annual report of the New York and New-Haven Railroad for the year ending Sep. 30, shows the following result:

Capital stock		$3,000,000 00
Funded debt		2,104,000 00
Floating debt		19,888 85
Cost of road and equipment		5,330,486 41
Length of road from Harlem Junction to New Haven, miles.	62.25	
Number of pass'rs carried	1,091,80	
Numb. of tons fre't carried	78,690	
Exp. of main'g the road.	$101,017 85	
" Repairs of mach'y	115,027 50	
" Operat'g the road	333,229 97	
Earnings from passeng's	800,182 18	
" Freight	186,239 66	
" Other sourc's	63,046 54	
		1,049,768 38
Payments for transport'n	549,274 82	
" Interest	145,194 80	
" To Harlem Company's share	37,951 14	
Payments to loss on "Canal road"	16,291 41	
Pay'ts to surplus fund	251,056 21	
		1,049,768 38

Chester Valley Railroad.

The gross earnings of this road for the year ending Dec. 30, 1860, were:

From Passengers	$8,131 84
" Coal	7,682 36
" Merchandise	18,164 86
	$33,979 06

Since Jan'y, 1859, this road has been operated by the Philadelphia and Reading Railroad Company, the latter paying to the former 40 per cent. of the gross earnings for the benefit of the bondholders. The earnings show a slight increase over those of the preceding year. The election for directors resulted in the election of the following gentlemen:

President—John F. Gilpin.

Directors—George W. Carpenter, C. Colket, William H. Holstein, Stephen Coulter, Samuel Hart, Joseph W. Ryerss, L. E. Corson.

Sec'y and Treas'r—Charles O'Neill.

Fitchburg and Worcester Railroad.

The earnings of this road for the year ending November 30, 1860, were

	$52,970 63
Operating expenses	29,132 87
Net	$23,837 76
Dividends and interest	14,659 90
	$9,177 86

During the year the company have put in the road 6,000 new ties and relaid nearly two miles of track with new iron. The debt of the company is stated at $59,259.

Debts of Massachusetts Cities.

From the inaugural addresses of the Mayors, we learn that the debts of the several cities of Massachussetts at the close of the past year were as follows:

Boston (including water debt)	$9,392,799 77
Cambridge	173,639 69
Roxbury	611,000 00
Charlestown	250,000 00
Chelsea (more than)	250,000 00
Newburyport	100,000 00
Lynn	123,100 00
New Bedford	283,280 00
Worcester	110,533 95
Springfield	119,500 00
Lowell	180,000 00
Lawrence	170,000 00

Debt of Virginia.

From the report of the Auditor of Public Accounts we learn that on the first of October last, the close of the fiscal year, the balance in the treasury was $139,305 18. The estimated receipts for the fiscal year 1860–61 were $3,938,476 38, and the estimated disbursements for the same year $3,939,512 81. The estimated balance in the treasury on the first day of October, 1861, is $138,268 75. The total debt outstanding on the first day of January, 1861, was $33,920,721. Of this amount, $23,411,946 has been created since the first day of January, 1852. The debt guaranteed for the James River and Kanawha Company, the Chesapeake and Ohio Canal Company, the City of Petersburg, the Virginia Central Railroad, the Richmond and Danville Railroad, the City of Wheeling, and the Alexandria Canal, amounted, on the first day of January, 1861, to $2,176,575. The interest on the public debt was paid promptly on the 1st of January.

Western North Carolina Railroad.

This road will extend from Salisbury, N. C., to the Tennessee State line, 273½ miles. It will cross the Blue Ridge in a tunnel at an elevation of 3,243 feet above tide, or 600 ft. more than the elevation of the Baltimore and Ohio Railroad summit. The western division of the road, from Asheville to the State line, 135½ miles, has been surveyed by James C. Turner, Esq., Chief Engineer, and its construction through a wild mountainous country, in which are the highest peaks east of the Rocky Mountains, is estimated at $35,971 27 per mile. The report of this survey is of the most interesting character, and comprises a vast amount of topographical and general engineering information. The western division will have 14 tunnels of a total length of 5,977 ft., or over 1⅛ miles. The longest will be 1,750 feet, and the shortest 92 feet long. The road will have 76 miles of straight, and 59⅜ miles of curved line, and 7,859 ft. of rise and fall, equal to an average grade of over 58 ft. per mile, 32¼ miles being on grades of from 100 ft. to 116 ft. per mile. The curvature is 13,889 degrees, or 38½ complete circles. There will be 106 bridges, viaducts, and arched culverts, including 47 spans of from 100 ft. to 200 ft., besides a great number of smaller spans.

In reference to the 116 feet grades adopted for crossing the Blue Ridge, Mr. Turner says:

"An inspection of the profile of our location discloses the fact that we have adopted as a maximum grade for crossing the mountains, 116 feet per mile; and lest some of the uninformed upon this subject may question its propriety, I will state that, without going into a studied disquisition on the subject, experience, that grand regulator of the improvements of the age, justifies its adoption. The evidence of this is found in the working of some of the great lines of railways connecting the Atlantic cities, with the fruitful valleys of the West. The Baltimore and Ohio Railroad has this grade for twenty consecutive miles, over which they successfully travel, with both freight and passenger trains. In Europe, many of the roads have still heavier grades, ranging from 117 to 142 feet per mile, as found on the Birmingham and Gloucester Railway. On the East Lancashire Railroad, the grade is 126.9 feet per mile, yet, upon it a passenger train runs at nearly twenty miles per hour. I, therefore, feel very confident that in the adoption of this grade, with the improvements that have been made, and are still being made, in the locomotive and other rolling stock, that it is the best economy."

Calais and Baring Railroad.

The earnings of this road the past year were:—

From freight		$30,547 04
" passengers		2,150 00
" other sources		1,577 00
Total		$34,274 00
Current expenses of all kinds		15,963 00
Net earnings		$18,311 00

—which have been applied as follows:

Interest on funded debt		$7,050 00
Do. floating debt		92 00
For new locomotive		7,000 00
Dividend		4,000 00
Balance		168 00
Total		$18,310 00
The capital stock of the company paid in		$100,000 00
Funded debt		113,100 00
Floating debt		3,957 09

The company own wharf property not required for its own use which when disposed of will be sufficient to liquidate the floating debt.

Construction account was closed in 1854 at $224,000.

The present equipment of the road is as follows:

4 locomotives, 2 eight-wheel passenger cars, 112 do. lumber cars and 18 other cars.

The net earnings equalled about 8½ per cent. on the entire cost of the road.

The following gentlemen were re elected officers for the ensuing year:

Directors—Jas. Sargent, G. M. Porter, H. N. Hill, E. A. Barnard, John McAdam.

F. K. Swan, Treasurer.

Jas. Sargent, Esq., was elected President, and Mr. W. W. Sawyers, Superintendent.

Cleveland, Columbus and Cincinnati R. R.

The earnings of this road for the eleven months ending Nov. 30, 1860, were:

		$1,011,250 98
December earnings (estimated)		73,441 94
Total for the year		$1,084,692 92
Expenses 11 months	$470,417 96	
December estimated	40,000 00	
		510,417 96
Net earnings 12.1 per cent.		$574,274 96
Dividend paid Aug. 1, 1860, 4½ per cent.	$213,579	
Do. payable Feb. 1, 1861, 5½ per cent.	261,041	
		474,620 00
Surplus earnings for the year		$99,654 96

Eastern Railroad.

The earnings of this road for the year ending Nov. 30, 1860, were:

From Passengers		$534,194
" Freight		147,776
" Mails, rents, etc		37,264
		$719,234
Expenses		352,151
Net earnings		$367,083
Interest		110,427
Balance		$256,656
Carried to renewal account		16,249
		$240,407

The capital paid in is $2,853,400, but the company is authorized to increase it to $4,150,000. The funded debt is $1,955 50.—This was decreased $75,000 last year. The average interest paid last year was five and a quarter per cent.—The total cost of the road and equipment is $4,450,417, and the company has assets or property in addition to the cost of the which are valued at $358,482. The amount expended for keeping the road clear of ice and snow was less than twenty-nine dollars for the year.—A dividend of 2 per cent. has been declared.

Banks and Banking in Wisconsin.

The Bank Comptroller furnishes the figures for the following statement:

Number of Banks January 1, 1860, one hundred and eight, with an aggregate capital of		$7,760,000
Seven new banks organized in 1860, with an aggregate capital of		855,000
Twelve banks have increased their capital by		250,000
Total capital Jan. 1, 1861		$8,865,000
Five banks have relinquished business with an aggregate capital of	$150,000	
Twenty-five banks have reduced capital	978,000	
		1,128,000
Total number of banks in operation January 1, 1861, one hundred and ten, with capital amounting to		$7,287,000
Decrease of banking capital for the past year		$523,000
Whole amount of countersigned notes issued to banks and outstanding Jan. 1, 1861, is		4,580,832
Namely: To banks doing business	$4,537,683	
To banks winding up	43,149	
Total outstanding circulation		$4,580,832
These notes are secured by the deposit of specie and public stocks to the following amount		$5,120,080 00
Specie of organized b'ks.	$45,573 50	
Specie of b'ks winding up	43,152 00	
		88,725 00
Total securities on deposit		$5,208,805 50
The amount of the bank tax due for the past year was		108,807 86
The amount of securities over circulation, January 1, 1860, was		158,445 00
Amount of same January 1, 1861		627,973 00
Excess of margin Jan. 1, 1861		$469,528 00

—*Milwaukee Sentinel.*

Cincinnati and Indianapolis Junction R. R.

The newly finished link between College Corner and Liberty, Union Co., Indiana, was formally opened on the 16th inst. This road branches from the Cincinnati, Hamilton and Dayton Railroad at Hamilton, passing through that town and crossing the Miami river over a permanent deck bridge to West Hamilton, through which it passes over a stone viaduct composed of 17 arches, and over 700 feet in length, at a grade of 27 feet above the streets. The distance from Hamilton to Liberty is 30 miles. It is proposed to make arrangements for the early completion of the road to Connersville, 12 miles beyond its present terminus. But 15,000 cubic yards of grading remains to be done in order to complete the road bed for the iron. For the completion of this portion of the road, the company hold $65,000 in available promisory notes leaving but $35,000 or $40,000 to be raised, which it is expected Connersville and vicinity will subscribe.

Rock Island and Sterling Railroad.

The cars are now making daily trips on this road between Rock Island and Port Byron.

Milwaukee and Mississippi Railroad.

This road was sold on the 18th inst., at Milwaukee by order of the United States District Court. It was purchased by the trustees of the creditors and operating stockholders.

Chemung Railroad.

A correspondent writes us asking the terms of the lease of the Chemung Railroad to the Erie, and the dates of payment of the rent. The road when first constructed, was leased to the Erie at an annual rental of 8 per cent. on its cost. In Jan'y, 1859, a new lease for 20 years was taken at an annual rental of $30,000, payable half-yearly, January and July 1st. The share capital of the Chemung Company is $380,000. Funded debt, 7 per cent. bonds, $70,000—making a total of $450,000. The rental, consequently, is equal to 7 per cent. on the cost of the road, and is, and always has been, regularly paid, as well as dividends on the share capital. These are payable in New York.

Railroad Earnings.

The following shows the business of the Philadelphia and Reading Railroad Company for the month of December, 1860, compared with that of 1859:

	1860.	1859.
Rec'd from coal	$189,607 89	$172,152 99
" " merch'dise	32,359 34	45,172 18
" " travel, etc.	26,564 82	28,651 62
Total	$249,032 05	$245,976 79
Transportation, roadway, dumpage, renewal, fine and all charges	120,619 49	137,671 26
Net profit for the m'th,	$128,412 46	$108,315 53

The receipts of the Grand Trunk Railway of Canada for the week ending January 5th, 1861, were $59,588 37
Corresponding week, 1860 49,332 52
Increase $10,255 85
Tot. traffic from July 1, 1860, to date, $1,845,769 05
Corresponding period, 1859 1,411,795 93
Increase $433,973 12

The traffic of the Great Western Railway of Canada for the week ending Jan'y 18, 1860, was as follows:

Passengers	$12,404 66
Freight and live stock	29,998 30
Mails and sundries	1,276 11
Total	$43,679 08
Corresponding week last year	32,152 01
Increase	$11,527 06

The following is an approximate statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company for the month of December, 1860, compared with the same period of 1859, viz:

	1860.	1859.
From freight	$112,015 46	$108,386 30
" passengers	58,177 22	52,072 99
" express	2,600 00	3,375 00
" mails	7,825 00	7,825 00
" rent of road	7,083 34	5,500 00
" rents and miscell.	3,176 41	2,788 61
Total	$190,877 43	$179,947 90
Increase		$10,929 53
Earnings from Jan. 1, to Dec. 1, 1860	$2,335,093 22	$1,565,987 80
Increase		$369,105 42

The earnings of the Little Miami Railroad for December were:

1859 $99,586 25
1860 80,872 37
Decrease $18,713 88

The earnings of the Norwich and Worcester Railroad for December, 1860, were $21,113 25
December, 1859 25,885 21
Decrease $3,770 96

The earnings of the Erie Railroad for December, 1860, were $412,722 78
December, 1859 409,131 00
Increase $3,591 73

The earnings of the Macon and Western Road for December were:

Passengers $14,297 90
Freight 16,177 68
Mails, etc. 866 45
Total $31,344 03
December, 1859 46,240 40
Decrease $14,896 37

Central Railroad of New Jersey.

In advance of the publication of the annual report, the Directors of the Central Railroad of New Jersey submit the following statement of the result of the year's business:

	1860.	1859.	Increase.
Rece'ts.	$1,185,847	$971,702	$214,145 or 22 p. ct.
Exp.	475,456	385,716	89,740 or 23 p. ct.
N. earn's.	$710,396	$585,986	$124,405 or 21 p. ct.

The following disposition has been made of the net earnings $710,391 40

Inter'st of $2,000,000 b'ds.	$140,000 00	
Interest on balance acc't.	4,203 36	
Interest on above bonds, accrued, not due	47,833 32	
Dividends, 10 per cent	361,460 00	
Taxes for 1860 to State	24,502 07	577,998 76
Balance equal to 3½ per cent, on stock transferred to renewal fund		$132,392 64

This renewal fund has been debited as follows:

Expenditures of year on new track, new buildings, tools, and other property charged off to cover depreciation in these acc'ts.	$22,840 38	
Expenditures of year on construction balanced by an equal amount of discount on second mortgage bonds withdrawn from construction	17,378 21	40,218 58
Balance to credit of renewal fund.		$92,174 05

Florida, Atlantic and Gulf Central Railroad.

We learn that this road, extending from Jacksonville on the St. Johns River, to Tallahassee, has been completed, and that trains are now running regularly between the two places.

Cleveland Zanesville and Cincinnati Railroad.

The following gentlemen have been elected directors of this road for the ensuing year:

Simon Perkins, J. D. Commins, D. L. King, Jno. S. Gilcrist, E. B. Ellsworth, H. K. Enos.

President and Superintendent—Simon Perkins.
Secretary and Treasurer—Edward Mizo.

Memphis and Louisville Railroad.

We learn that the gap in the rails between Paris and the Tennessee River, is now reduced to twelve miles. The whole is expected to be down early in March.

The Franklin Railroad.

This road was opened from Chambersburg to Greencastle on the 6th February, 1860, and to Hagerstown on the 29th February, 1860. Its length is 22 miles. For the eight months ending Sept. 30. the road's earnings were in these amounts, to wit:

February	$472 21	June	$1,246 90
March	1,639 40	July	1,581 59
April	1,529 00	August	2,661 93
May	1,398 15	September	1,972 68

Total earnings for first eight months... $12,501 68

This road is operated by the Cumberland Valley Railroad Company, for one half the gross receipts.

Taxes upon Railroads.

The Michigan Central Railroad paid for taxes in 1860, $72,820 59; the Michigan Southern $27,091 91, with $22,436 68 in arrears, but which the road claims exemption from; the Detroit and Milwaukee, $21,361 16, with $22,900 in arrears; Detroit, Monroe & Toledo, $4,117 15; Grand Trunk, $6,321 24—*Chicago Times.*

Journal of Railroad Law.

LIABILITY OF A CARRIER ON CONTRACTS ENTERED INTO UPON THE SABBATH; THE LAW AS TO BUSINESS PERFORMED ON SUNDAY.

The law, more or less perfectly reflects the moral sentiment of the community. That which would have been regarded as right and fair in other centuries, in the light of the nineteenth, would be regarded as the height of injustice. As the world progresses men become more nice in their discriminations between right and wrong, and the statute book speedily reflects these distinctions. So as the moral attitude of man towards his maker became better understood, the law changed in conformity with the new ideas which governed the conduct of the community. This is illustrated in the history of the common law relative to the observance of the Sabbath throughout our country, a brief sketch of which as applicable to business performed on that day is given in the opinion rendered upon the decision in the case of Merrit *vs.* Earle.

The action was brought by the plaintiff to recover the value of two horses shipped on board of the defendant's steamboat Knickerbocker at Albany to be conveyed to New York, which were lost on the passage. The plaintiff arrived in Albany with his horses, by railroad from the West, on the morning of Sunday, August 31st, 1856 and having ascertained that the defendant's steamboat was to leave in the evening at six or seven o'clock, he put his horses on board in the afternoon, as he was directed to do by those in charge of the vessel, and took passage himself when the vessel left. In the evening while on the passage, he paid the freight of the horses at the office, on the boat, and took a receipt. While the boat was passing through the Highlands, about two or three o'clock on Monday morning, she ran upon the masts of a sunken sloop and was lost.

The defendants contended that they were not liable to the plaintiff for the loss of the horses upon the ground that the contract for the transportation of this property was made and the property delivered upon Sunday, and the voyage of the vessel was to be, and was commenced on that day.

A verdict was entered for the plaintiff at Circuit by the direction of the Court, reserving the de-

fendant's exceptions to be heard at General Term. The following is the decision of the Court upon the point just stated.

Emott, J.—There are, it seems to us, a number of sufficient reasons, why these transactions on Sunday do not constitute any objection to the liability of the defendant as a carrier. It must be remembered that all prohibitions of ordinary business on Sunday, with us, come from the statute. At the common law judicial proceedings only were prohibited on Sunday which is said in the books to be *dies non juridicus*, Even this is not strictly on grounds of morality, or of the Christian religion as recognized by the Common Law, nor was it the original practice of the Christian church. It was introduced like very many other doctrines and practices, some of which are perhaps less commendable, into popular christianity and thence into common law and usage, by the influence of the clergy. It is well known to lawyers at least, that until the year 500, the Christian courts were open, and legal business transacted in the ordinary way on Sundays as on other days. In the year 517 a canon was made forbidding this practice; which canon was subsequently confirmed by an imperial constitution. It was received with other parts of the canon law by the Saxon king of England, and afterwards ratified by William the Conqueror, and Henry II. Thus it comes that judicial proceedings on Sunday are void at Common law.

But all other business transactions are valid, except so far as prohibited by statute, however unbecoming or wrong in morals they may be considered. Our present statute forbids traveling, except in specified cases, servile laboring or working, and the exposure to sale of any wares or merchandise, except certain articles of food at a particular hour of the day. These are unlawful acts by statute, and it may be conceded that a contract for doing them or based upon them would be void. Making a contract or an agreement upon a Sunday, however, is not forbidden. Thus in Boyton *vs.* Page, a sale of a horse, made on Sunday, was upheld, and in the opinion of Judge Sutherland, a number of cases are cited in which transactions on Sunday have been sanctioned.

If the liability of the defendant rested entirely on contract, he could not escape from it, merely because the contract was made on Sunday. The contract was completed by the payment of the money and taking the defendant's receipt on the passage down. It was not, however, a contract for the performance of servile labor on Sunday, even if the business of the defendant is to be considered as coming within this term as used in the statute. It was simply an agreement for the transportation of the plaintiff's horses; and the defendant, if he had chosen to do so, might have detained his boat until midnight, before starting on his voyage, and yet have performed this agreement or any agreement under which the property was received on board of the vessel. It is true that the vessel was advertised to leave on Sunday afternoon, but it is also true that the voyage would and could not be performed before Monday. If her departure on Sunday evening absolved her owners from all liability as carriers, the same principle would discharge the owners of vessels where voyages were completed on Sunday, leaving the port of departure on Saturday and arriving at their destination on Sunday morning. It would also be fatal to the responsibility of the owners of coasting and lake steamers and canal boats, and of the numerous sailing vessels on all our waters whose voyages regularly include a Sunday between their commencement and their conclusion. A rule which would lead to such results cannot easily be admitted. The true rule is that a contract, to be void by the law, must be expressly and altogether for an act which the law forbids; it must be a contract for servile labor to be performed on Sunday exclusively and expressly, and not on any other day. Thus in Watts *vs.* Van Ness, the plaintiff had been allowed to recover a specific sum beyond his compensation for services on week days for work as an office clerk, done on Sundays. The court set aside the report unless the amount of these charges were deducted. Smith *vs.* Wilcox was an action for the price of an advertisement published in a Sunday paper, which, as the Court say, is an article of merchandise distributed and sold only on Sunday. I apprehend that it would not be an objection to a recovery by the printer of a daily paper, for his paper or advertising in it, that he saw fit or was accustomed or even was compelled, in order to accomplish his publication properly to do part of his printing or other work on Sunday.

But the liability of the defendant does not rest upon contract, but his duty as a carrier, as settled and fixed by custom and common law. It is true the complaint states an undertaking and agreement, but it is one which the law imposes without any express contract. So too in this complaint negligence is averred, but it is not necessary to show any positive misconduct to sustain such averment. Any act or omission of the carrier, or anything which may befall his vessel and occasion danger to property is regarded by the law as negligence unless it be the act of God or the public enemies. It was sufficient, therefore, to sustain this action that the plaintiff's horses were received by the defendant's servants on his vessel for transportation; that the defendant was thus transporting them to New York, on Monday morning September 1st, and that they were then lost and not safely delivered. Upon these facts the defendant is liable without any contract and independent of it, as it did not vary the terms of his legal liability.

Population, Production and Wealth of Ohio.

We copy from the Message of the Governor, the following extract, showing the progress of the State of Ohio, in wealth, products and commerce for the period of 10 years just closed.

"The United States Census of the past year, with the report of the Commissioners of Statistics, furnish much interesting information relative to the growth of our State. To these sources, but chiefly to the latter, which will be laid before you in a few days, I am indebted for the following facts, which exhibit, in part, the gratifying progress of the State in its material development, during the past ten years:

	1850.	1860.
Population	1,080,329	2,346,000
Increase		365,671
Increase per cent		18.4
Improved lands, acres	9,851,493	13,105,945
Unimproved " "	15,600,000	12,210,154
Inc. of impro'd lands, acres.		33 per cent.
Number of land o'rs	277,000	810,000
Average quantity of land ow'd by each per'n, acres.	90	84
Average price of land, acre.	$19 90	$21 00

AGRICULTURAL PRODUCTS.

	1850.
Aggregate amount of grain crops.	88,457,124 bush.
Meadow (hay)	1,443,102 tons.
Live stock	7,733,466 num'r.

	1860.
Aggregate am't of grain crops.	133,100,173 bush.
Meadow (hay)	1,806,465 tons.
Live stock	8,213,857 num'r.
Increase of grain crops	50 per cent.
" hay	25 per cent.

MINING.

	1850.
Coal mined	8,000,000 bush.
Iron furnaces	35 num'er.
Iron pig metal made	52,658 tons.
Salt made	550,350 bush.
Value of mining products.	$2,024,700

	1860.
Coal mined	48,000,000 bush.
Iron furances	54 num'er.
Iron pig metal made	106,000 tons.
Salt made	2,000,000 bush.
Value of mining products.	$8,280,000
Increase of coal mined	600 per cent.
" pig iron	100 "
" salt made	300 "
" values	400 "

MANUFACTURES.

	1850.	1860.
Values of manufactures.	$41,124,707	$87,284,785
Aggregate value of manufactur'g, mining, and mechanical industry.	62,674,259	119,962,183
Increase of manufactures, values		112 per cent.
Increase of mechanical and manufacturing industry		90 "

COMMERCE AND NAVIGATION.

	1850.	1860.
Vessels built, number	31	66
Tonnage of vessels built	5,214 tons.	19,521 to's.
Aggregate tonnage	62,460 "	115,294 "
Vessels cleared for foreign States	268	480
Tonnage of vessels cleared for foreign port	83,407 "	61,446 "
Increase of vessels bu't.		100 per cent.
" tonn'e "		260 "
" whole ton'e.		85 "
" for'n trade.		90 "

LOCOMOTION.

	1859.	1860.
Canals	960 miles.	960 miles.
Railroads	380 "	3 084 "
Turnpikes & plank r'ds.	2,000 "	3,100 "
Increase of railroads		700 per cent.
" turnpikes		50 "

The estimated cost of the 2,700 miles built since 1850, is eighty millions of dollars.

PROPERTY AND DEBT.

	1850.	1860.
Cash val. of all prop'y.	$504,726,000	$888,302,601
State debt	15,520,768,000	16,927,834

The aggregate debt of the State, municipalities, bankers, merchants, and individuals, was estimated by the Commissioner of Statistics, in his report of 1859, at $189,592,346, exclusive of railroads, which is a specific pledge on the roads.

Debt due out of the State, $65,000,000, consisting of debt due by the State, municipalities, banks and merchants.

Increase in the value of property .... 75 per cent.
Proportion of debt to value of property. 28 per cent.
" " due out of the State to the whole value of property..... 8 per cent.

The entire debt of the State and of the people of Ohio, is considerably less than the increase in the value of property in the last ten years. Small as is this debt compared with the resources of the State, it is yet a heavy burden on the industry of the people, which can only be lessened, or removed by augmented production and increased economy."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics*."

Years ending.	Railroad. Main Line.	Railroad. Lateral and Branch Lines.	Railroad. 2nd Track and Sidings.	Road in progress or projected.	Equipment. Engines.	Equipment. Cars. Passenger.	Equipment. Cars. Freight, etc.	Companies.	Abstract of Balance Sheet. Property and Assets. Railroad and Appurtenances.	Property and Assets. Rolling-Stock.	Property and Assets. Invested in foreign works.	Liabilities. American Railroad Journal.

Saturday, January 26, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The share market the past week has been one of great activity and fluctuations in prices. From the more favorable aspect of political matters, and the rapid accumulation of money in this city prices received an extraordinary impulse, many of the leading stocks advancing five and six per cent. Chicago and Rock Island went from 56¾ to 62¾: Galena and Chicago from 68 to 74½; Chicago, Burlington and Quincy, from 70 to 79; New York Central from 78¾ to 82, and shares of other roads advanced at very nearly equal rates. The foreign news received on Monday and Tuesday gave an equally rapid downward turn to the market, although prices have not yet receded quite to the figures of a week ago. The foreign news are not favorable, nor is the aspect for the immediate future encouraging. In Europe they are hardly more certain of events than in this country. Political embroilments and hostilities threaten. There is a deficiency of food, which is always a cause of apprehension and disturbance. At this juncture, the balance of trade is in favor of the United States, the great source of supply of breadstuffs, causing extensive shipments of gold to this country. The effect of all these things is to advance in Europe the rates for money, and seriously to interfere with the operations of trade. The falling off of orders for merchandise from this country must be seriously felt, as these are not likely to be renewed to any considerable extent for some time to come. As in 1857 an universal fit of economy has seized our people, and the consumption of articles of luxury of all kinds, will till times change with us, be foregone to a great

extent. The entire stoppage of our railroads has again brought iron to the lowest figures previously recorded. The importations of foreign manufacture have almost entirely ceased, while American rails are considerably lower then ever offered at before.

The earnings of our railroads for the past year, the accounts of the operations of which we are beginning to receive, show a large increase over 1859. The earnings of the Philadelphia and Reading for 1860, were $3,312,536, against $2,724,293 for the previous year, showing a gain of $588,253. The net earnings were $1,625,945; for 1859, $1,245,816; increase $383,129. The company declared no dividend, although the net earnings after the payment of sinking fund dividends on the preferred stock, amounted to $619,408, which is a little more than 6 per cent. on the common shares. The earnings of the Philadelphia, Wilmington and Baltimore Railroad for 1860 were $1,236,597; expenditures of all kinds including interest, $764,885, leaving as net earnings, $471,712, out of which dividends equalling 6½ per cent. amounting to $360,000 were paid. This has now come to be a regular dividend paying road. The company have no floating debt whatever. Its road is in admirable order, and under excellent management. The Michigan Central Railroad has also got back on to the dividend paying list. Its earnings for the 6 months ending November 30th, were $1,176,341; expenses and interest, $868,045, leaving for dividends, for the half year, $308,296, out of which a dividend of 3 per cent., amounting to $181,734 has been paid. The annual report of the Macon and Western Railroad makes its usual favorable showing. The earnings for the past year were $404,617, against $375,250 for 1859; expenses of all kinds were $192,941, leaving $212,676 as net earnings. During the year dividends equalling 19 per cent. were paid out of accumulated earnings. For 10 years past the dividends have averaged 10 per cent. The company have no debt whatever. The earnings of the Wilmington and Manchester Railroad were $469,458, against $427,043 for 1859. The operating expenses were $249,770, leaving as net earnings, $219,688, which is equal to 8.72 per cent. on the whole cost of the road, after the payment of interest. The net earnings have been applied to the payment of the floating debt of the company. The earnings of the Norwich and Worcester Railroad for 1860 were $358,362, against $351,689 for 1859, the current expenses were $199,356; interest $42,279, leaving $116,725, out of which one dividend of 2½ per cent., amounting to $52,812, has been paid. The report of the Central Railroad of New Jersey is a very favorable one. The total receipts for 1860 were $1,185,847, against $971,702 for 1859. The net earnings were $710,396, out of which interest, taxes and two 5 per cent. dividends, the whole amounting to $577,998, were paid, leaving a surplus of $133,393. The North Pennsylvania Railroad earned the past year $389,622, against $347,302 for 1859. The net earnings exceeded the interest on the funded and floating debt by $15,262. The earnings of the Calais and Baring Railroad for the past year were $34,274, against $29,190 for 1859. The net earnings were $18,310, out of which a dividend of 4 per cent. was paid. The returns show an uniform increase, in many cases to a very large amount.

Philadelphia and Reading Railroad.

We give elsewhere the able and interesting report of the President of this company for the past fiscal year. The following statement will show the result of the operations of the road from the date of its opening to the present time:

Year.	Cost of Road, etc.	Mileage.	Gross Earnings—Pass'r.	Freight.	Coal.	Total.	Operating expenses.	Earnings, less exp.	Div.—$	P. c.	Div.—
1843....	$1,119,292	95	$71,895	$37,927	$278,840	$394,318	$214,923	$179,395	nil.		nil.

1859....	24,070,835	152	318,846	474,988	1,883,685	2,724,293	1,478,477	1,245,816	"		
1860....	24,070,835	152	333,359	651,128	2,328,157	3,312,544	1,686,561	1,625,985	"		
	$297,025,473	1,899	$3,739,192	$3,861,008	$35,092,931	$42,993,247	$22,297,917	$20,695,336	$4,689,713	79	

The dividends in the above table are those paid on common stock. Of these, 44 per cent. have been paid in stock, viz., 10 per cent. in 1846, 12 per cent. in 1847, 8 per cent. in 1852, 10 per cent. in 1854, and 4 per cent. in 1855. The "Operating Expenses" include the "Renewal Fund," established in 1848, of 3 cents (increased in 1857, to 5 cents) for every hundred tons carried one mile.

The earnings from transportation of mails and receipts from miscellaneous sources are embraced in the "total earnings."

The total net earnings of the road from the commencement of its operations have equalled almost exactly 7 per cent. The dividends paid however, have equalled only about 4¼ per cent.

The net earnings the past year were nearly up to the average for the whole period. If the company could get its floating debt fairly out of the way, and its funded in a shape to escape excessive charges for extensions, we see no reasons why regular dividends should not be paid on the share capital. The funded debt is at 6 per cent. interest.

New York Central Railroad.

The suit in which the State of New York was plaintiff, against this Company to recover the *canal* tolls remitted by the law of 1851, has just been decided *adversely* to the State. It was claimed that the law remitting the tolls was *unconstitutional*, the same having been previously appropriated by the constitution for other objects for a term of years. We take it that this is the last of the *legal* persecutions to which this Company will be subjected.

Sandusky, Mansfield and Newark Railroad.

At a meeting of the stockholders of this road the following Board of Directors was elected: Wm. Durbin, Wm. P. Chapman, Samuel M. Robinson, Robert McComb, H. P. Warden, James E. Woodbridge, Jerome Buckingham, John W. Sprague, James Lyon.

At a meeting of the directory the following gentlemen were elected officers: Wm. Durbin President, John W. Sprague, Secretary; Wm. P. Chapman, Treasurer; James H. Stewart, Assistant Superintendent; Thomas Hogg, Master Mechanic.

Philadelphia, Wilmington and Baltimore Railroad.

The annual meeting of this company was held in Wilmington, Del., on the 12th. The Twenty-Third Annual Report of the President and Directors was submitted. From this we learn that the earnings of the road for the fiscal year ending Oct. 31, 1860, were:

From passengers	$831,805 71
" freight and express	317,568 87
" rents	15,109 20
" mails and miscellaneous	46,614 77
	$1,210,598 55
To which add earnings of the New Castle and Frenchtown line	25,999 39
Total for both roads	$1,236,597 94
The total expenditures of all kinds on both roads, and loss on Delaware Railroad, was	764,885 75
Leaving net earnings	$471,712 19
Dividends 6½ per cent.	364,000 00
Leaving a surplus of	$107,712 19

From this surplus deduct the appropriation to the sinking fund, which commenced January 1, 1860, and was at the rate of $40,000 per annum. From January 1, 1860, to October 31, 1860, a period of ten months, this would be $33,333 33. On the 20th day of November there was purchased for the sinking fund $40,000 of the bonds of the company, due July 1, 1844. Of these, $33,333 33 was for the year ending October 31, 1860, and the balance on account of the appropriation to be made in 1861. The certificate of the purchase and cancellation is appended to this report, in accordance with the condition of the mortgage. There remains, then, an actual surplus for the year over all expenditures, interest, dividends, loss on Delaware Railroad, and appropriation to sinking fund of $74,378 85.

From the tables showing the number of passengers carried one mile, and the number of tons of freight carried one mile, and from an apportionment of expenditures to each as near as the same may be, it appears that it has cost, including all improvements, one cent to carry each passenger a mile, and 23.10 cents to carry each ton of freight one mile for the last year. These expenditures will vary, however, from year to year as the busi-

ness increases, and as more or less liberal expenditures are made to improve and increase the property of the road.

The items of new work and improvements, over and above operating expenses, for the year are as follows:—New track, bridges and fences, $24,693 90; locomotives, $15,531 25; passenger cars, $15,250; merchandise cars, $35,821 17; stations, &c., $10,181 01; wharf at Wilmington, $3,156 17; making a total of $104,633 50. The number of miles run by passenger trains during the year was 218,677. The earnings per mile apportioned to foreign passenger trains were $3 62; apportioned to freight trains $2 07; the cost per mile for passenger trains was $1 29, and that for freight $1 57; profit per mile run by passenger trains $2 34, and 50 cents by freight.

The whole of the bonded debt due July 1, 1860, of $2,161,775 05 has been exchanged or paid off, excepting certificate of $300, which is held by a party absent from the country, and which for that reason has not been presented for payment. Of the new loan, authorized by the stockholders, of $2,000,000, to pay off the loan due July 1, 1860, and the two improvement loans, one for $144,000, due April 1, 1858, and the other for $119,000, due May 1st, 1863, there has been issued up to the present time $2,342,000, of which $42,000 have been redeemed, leaving outstanding $2,300,000. The company owes no floating debt.

During tha year there has been relaid 12 15-100 miles of track; in relaying which 800 tons of new iron has been used, and there were used in relaying and repairs 59,583 new cross-ties. They have adopted a new rail, weighing 51 pounds per yard. This rail is made of all re-worked and refined iron. The top bar in the pile is of the hardest and densest iron, and is 7½ inches by 2 inches, or of a size sufficient to form the whole head of the rail when rolled out. The neck and web of the rail are fibrous. The height of the rail is 3¾ inches, and the with of the flange the same as the height of the rail.—The height secures vertical strength and stiffness, and the width of flange resistance against lateral preasure. For this improved rail they pay an extra price of five dollars per ton, and from present appearances of its wear, it will prove a profitable investment. They still adhere to their opinion that good quality of iron is better attained by the adoption of a light than a heavy rail, both from experience and observation, and for the reasons expressed in the former reports.

The whole cost of accidents to machinery and track for the year was only $1,110 87. In reference to the use of coal as a fuel for locomotives, the President, Mr. Felton, speaks in the highest terms. Eight coal burning engines were in use, and the average cost of coal for each mile run was six cents, and the average cost for running wood burners was fourteen cents per mile.

New Jersey Railroad and Transportation Company.

The New Jersey Railroad and Transportation Company have declared their usual semi-annual cash dividend of 5 per cent., payable on and after the first of February next. The comparative receipts and expenses, and other statistics for the years closing on the 31st of December, 1859 and 1860, are as follows:

	1859.	1860.
Gross receipts	$1,025,682 65	$1,113,881 76
Expenses	382,072 17	443,161 06
Net earnings	643,610 48	670,720 70
Dividends (10 per ct.)	374,900 00	374,600 00
Surplus	191,383 72	218,248 00
Miles run	447,671	522,731
Running exp's per mile.	86 cents	75 cents.

A stock dividend of 10 per cent has also been declared out of surplus earnings, to all stockholders on the 31st of March next, which apportioned stock is to draw dividends as other stock out of the net earnings from the 1st of January, instant. There is still surplus earnings on hand amounting to $287,569 43, or about 7 per cent. on the capital.

Middleboro' and Taunton Railroad.

The receipts of this road for the years ending Nov. 30, 1859, and 1860, were:

	1859.	1860.
From passengers	$10,077 64	$11,419 91
" freight	15,901 39	15,962 24
" mails	657 50	712 47
Total	$26,636 53	$28,094 62
Expenses	27,231 59	25,892 92
Loss	$596 06	Ga'n $2,201 70
Number of passengers	18,334	20,663
Tons of freight	13,172	12,907

The directors elected for the ensuing year are: J. B. Tobey, E. Tucker, P. Tillinghast, J. S. Tillinghast, W. W. Crocker, C. Robinson, D. Jarvis.

Michigan Central Railroad.

The gross receipts of this company from operations of their road for the six months ending Nov. 30, 1860, were: $1,176,341 80

Operating expenses	$513,004 84	
Interest account	355,040 45	
		868,045 19
Net receipts		$308,296 61
Balance from previous six months		78,205 62
Total		$386,502 23
Payment to trustees of sinking funds		84,500 00
Balance to new account		$302,002 23
Compared with the corresponding period of last year, the gross receipts show an increase of		$117,443 82
With an increase in operating and interest expenses of		53,793 47
Making the net gain over last year		$123,649 95

Out of the surplus a dividend of 3 per cent. has been declared, amounting to $181,731.

Finances of Illinois.

We copy the following statement in reference to the public debt of this State from the late message of the Governor.

During the four years prior to December 1st, 1860, beside paying the accruing interest, as called for semi-annually, the following amount of State indebtedness, principal and interest, has been liquidated:

Amount paid January, 1858	$623,466 21
" " " 1859	31,551 05
Amount purchased with the State debt fund	599,719 58
Amount purchased with the State land fund	56,475 67
Am'nt purchased with the I. C. R. R. fund	215,690 70
Am'nt purchsed with the 3 per cent. school fund	7,038 24
Amount interest stock paid off, Jan'y 10, 1860	600,643 60
Amount interest stock paid August 10th, 1860	98,643 82
	$2,233,228 87
Am'nt paid registered canal bonds, January, 1858	$307,764 15
Amount of registered canal bonds, January, 1859	803,796 86
Am't paid canal bonds, July and Jan., 1860	162,334 45
	773,895 46
	$3,007,124 33
To which may be added amount of principal and interest paid and purchased, January 2, 1861	97,250 60
Making the entire amount liquidated since January, 1857	$3,104,374 93

The condition of the remaining debt, on the 30th November, 1860, was as follows:

Interest stock, payable at the pleasure of the State		$808,896 34
New refunded stock, coupon bonds, payable after 1860		13,000 00
New refunded stock, payable after 1862		902,000 00
Liquidation bonds, payable after 1865	$250,890 21	
New refunded stock, payable after 1865	21,000 00	
		271,890 21
New refunded stock, payable after 1869		215,000 00
New internal improvement stock, payable after 1870	$2,163,617 83	
New refunded stock, payable after 1870	193,000 00	
		2,356,617 83
New refunded stock, payable after 1876		109,000 00
Interest bonds of 1847, payable after 1857	$1,534,925 82	
New refunded stock, payable after 1877	185,000 00	
		1,719,925 82
		$6,395,830 20
Old State Bonds—		
Bank of Illinois bonds, payable after 1860	$31,000	
Int. Imp. bonds, payable after 1870	42,000	
Illinois and Michigan Canal bonds, N. C. R. R., after 1860	4,000	
		77,000 00
Internal improvement scrip		22,671 73
6 certificates for arrears of interest		2,674 53
		$6,498,176 26
Illinois and Michigan Canal bonds, registered	$2,299,095	
Illinois and Mich. Canal bonds, registered	1,479,890	
Of these Canal bonds, more than half are payable after '70, say	2,042,185	
And the balance, payable after 1860	1,736,800	
		3,778,985 00
		$10,277,161 36
Since preparing the above statement of State indebtedness, there has been paid, January 2nd, 1860		$16,614 68
Purchased		80,635 92
Add canal dividend, July, 1860		162,334 45
		$259,585 05

—making our entire debt not far from $10,000,000.

From this sum we may properly deduct the whole amount of the canal debt, that being represented by a permanent and valuable improvement; which would leave the actual debt less than $6,500,000—a gratifying contrast with our exhibit of 10 years since, and indicating a speedy release from all our pecuniary liabilities.

There were December 1, 1858—

Outstanding warrants on revenue fund	$4,269 69
Since issued	850,054 81
	$854,324 50
Amount revenue fund in treasury Dec. 1, 1858	$153,074 13
Receipts to Dec. 1, 1860	690,440 75
	843,514 88
Leaving warrants outstanding	$10,809 62

The entire amount paid into the State Treasury on all accounts, during the last two years, is $3,300,035 54—the more detailed statement of which will be found in the Treasurer's report.

Baltimore and Ohio Railroad Coal Tonnage.

Statement exhibiting the quantity of coal transported on the main stem during the fiscal year ending 30th September, 1860:

DUBUQUE & SIOUX CITY R. R. CO.

ELECTION NOTICE.

THE first election of directors of said company will be held at their office in Dubuque, Iowa, on Monday the 11th of February, 1861. The stock-books will be closed on the evening of 31st of January, until after the election.

4t2 JAMES M. M'KINLAY, Secretary.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	"	¾ to 1	17.	" 25	"	1½ to 1
6.	" 15	"	1 to 1	18.	" 26	"	1½ to 1
7.	" 15	"	1½ to 1	19.	" 28	"	¾ to 1
8.	" 16	"	¾ to 1	20.	" 30	"	1 to 1
9	" 16	"	1 to 1	21.	" 30	"	1¼ to 1
10.	" 18	"	¾ to 1	22.	" 30	"	1½ to 1
11.	" 18	"	¾ to 1	23.	" 32	"	1 to 1
12.	" 18	"	1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, **for $7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

DON PEDRO II. RAILWAY.

RIO DE JANEIRO, BRAZIL,
September 18th, 1860.

PROPOSALS are invited for the Graduation, Masonry, and other items of Construction of 11¼ miles of this work, extending from the western end of the Great Tunnel of the Serra du Mar down the valleys of the Sacra Familia and Pirahy Rivers to the banks of the River Parahyta.

The work is generally heavy, comprising 1,200,000 cubic yards Earth, 250,000 cub. yds. Rock, and 7,500 cub. yds. of Tunnel excavation, 9,000 cub. yds. Bridge, 8,000 cub. yds. Culvert, and 5,000 cub. yds. retaining Wall Masonry, together with Iron Bridge Superstructure, permanent way and stations.

At the Company's office in Rio de Janeiro, may be seen plans, profiles and specifications, where sealed proposals for the whole 11¼ miles, or any portion thereof not less than 4 miles, will be received until February 28th, 1861, at which time they will be opened and the work awarded.

The Directory determine, that the technical direction of the work shall be exclusively in the hands of their own Engineers, but will entertain proposals either with a scale of prices for the various kinds of work, or for the entire construction at a fixed price. In the latter case, the monthly payments will be regulated by a scale of prices.

All payments will be made monthly in cash, a percentage being retained as security for the faithful fulfilment of the contract. This, however, may be dispensed with, in case a deposit is made in money, stocks or bonds approved of by the Directory; in the latter case, the depositor will be entitled to the accruing interest upon said security.

Parties unknown to the undersigned will be expected to present evidence of their ability from officers of works upon which they have recently been engaged.

This work is in a mountainous and perfectly healthy region, within 7 hours' ride of Rio de Janeiro. About 200 additional miles are located and remain to be placed under contract.

C. B. OTTONI, President.
ANDREW ELLISON, Jr., Eng'r in Chief.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large MAPS specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

AGENTS FOR

Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre; kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r. Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel.' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa

A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO., HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W and J. F STARR, Camden, N. J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO., Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84, Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

MANUFACTURER OF

PLATED WARE,

230 PEARL STREET,

NEW YORK.

LAND AND SUBMARINE BLASTING,

Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,

Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your ob't servant,

W. H. BELL, Major of Ordnance.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER, and MARBLE DUST, all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of dry concrete and Underwater Works. Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the Works under Government.

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing 300 lbs. of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), at all seasons of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, Hudson River Cement Company, Jersey City, N. J., or J. H. BUTTS, Secretary.

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We warrant it equal in every respect to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a superior article for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by DELAFIELD & BAXTER, 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

ROSENDALE HYDRAULIC CEMENT.

ROSENDALE AND KINGSTON CEMENT CO. Manufactory at Kingston, N. Y. on the West Bank of the Hudson River. Office 48 Pine st., New York City.

ROOFING.

THE Chespest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel). JOHNS & CROSLEY.

This Roofing can be applied to new and old Roofs of all kinds. It is FIRE and WATER PROOF.

Gutta Percha Cement applied to Tin and other Metal Roofs will render them perfectly and permanently water-tight.

JOHNS & CROSLEY,
Sole Manufacturers,
510 BROADWAY.

PATENT ASPHALTIC
ROOFING FELT.
THE BEST, CHEAPEST AND
MOST DURABLE ROOFING KNOWN.

THE IMPROVED PATENT ROOFING FELT furnished by the Subscribers is entirely free from the objections hitherto urged against articles that have been furnished under similar names by various parties.

It makes a light, cheap, durable, and perfectly Fire and Water-proof Roofing for Churches, Farm Buildings, Railroad Depots, etc.

It forms the best and cheapest lining for Stores, Granaries, Barns and Wooden Buildings, as rats, mice and other vermin will not touch it.

It stands all climates and has been extensively furnished to the British Government for use in their widely scattered foreign possessions. The Turkish Government used large quantities of the Felt for roofing their hospitals and stables in the late war.

In this country first class dwelling houses have been roofed for three years with this Felt, and the owners who used tin now prefer this Roofing Felt.

Also an entirely new, superior and cheap ROOFING CEMENT for the above Felt and leaky tin roofs.

For Samples, Circulars, etc., apply to
EDMISTON BROS.,
No. 3 Bowling Green, New York.
N. B.—Agents wanted.

CEMENT ROOFING.

PATENT MICA
AND
Fibrous Cement Roofing.

IT HAS STOOD THE BEST OF ALL TESTS—TIME!

IT fully sustains the high reputation it has gained, as a PERFECTLY RELIABLE, DURABLE and WATER PROOF ROOFING. It is adapted to every variety of Roof, new or old, and is the best and cheapest Cement in use for repairing OLD LEAKY TIN or other Roofs.

ALL WORK WARRANTED.

Cement for sale by the Barrel, and sent to any part of the Country, with printed instructions for use.

Also, for sale, State and County Rights for a portion of the United States. DITTO, PORTER & CO., Successors to JOSEPH DITTO & Co., 207 Broadway, cor. of Fulton st., N. Y

GUTTA PERCHA
ROOFING,

IN Rolls which anybody can put on; waterproof, elastic, durable, fire-proof; needs no repairs; costs about half as much as Tin, and lasts twice as long.

These Roofs are suitable for any style of building. They can be steep or flat, or of any required inclination. Also,

LIQUID
Gutta Percha Cement,

Preferable to paint for covering Tin Roofs, protecting them for many years from rust, and rendering them water tight.

Samples, Terms, Price, etc., furnished on application.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, February 2, 1861.

Milwaukee and Prairie du Chien Railroad.

This Company is now fully organized, and in possession of the entire property of the late Milwaukee and Mississippi Railroad Company, purchased at the recent sale under a decree of the United States District Court for Wisconsin, at a cost of $7,500,000, and paid for by:

First mort. 7 per cent. 30 year bonds..	$2,556,000
First class preferred 8 per cent. stock .	1,095,400
Second class preferred 7 per cent. stock	1,086,800
Common stock	2,761,800

The officers of the new Company are: President —L. H. MEYER. Vice President—John Catlin. General Manager—James C. Spencer, Superintendent—William Jervis. Secretary and Treasurer—William Taintor. Directors—L. H. Meyer, John Catlin, W. Schall, William P. Lynde, Allan Campbell, John Wilkinson, H. L. Dousman, George Smith, N. A. Cowdrey.

The arrangement reduces the old first mortgages (on the Eastern, Western and South Wisconsin sections,) from 8 to 7 per cent., and converts the other classes of debt into preference shares, leaving the old common stock to come in at a scaled rate of about 60 per cent., to make up the basis of $7,500,000. The selection of Mr. L. H. Meyer, of this city, as President of the new organization, is deemed a fortunate one for all the interests involved.

Virginia Central Railroad.

During the year ending Sept. 30, 1860, the earnings from all sources, including the use of that portion of the road between Gordonsville and Charlottesville, by the trains of the Orange and Alexandria Railroad Company, in hauling materials for the construction of their extension south of Charlottesville, and for passengers, mails and freight carried by their trains on that portion of the road since they commenced running regularly between Alexandria and Lynchburg, have been as follows, viz:

	O. & A. R.R.	Va. Cent. R.R.	Total.
Passengers..	$9,401 23	$272,283 91	$281,685 14
Freight	576 13	317,175 24	317,751 37
Express.....	571 30	7,606 29	8,177 59
Mails.....	1,346 00	21,464 58	22,810 58
Use of road by O. & A. R. R. Co. in hauling materials for the construction of their extension.....			$2,335 40
Miscellaneous sources.....			275 00
Rent of real estate.....			1,048 23
			$634,081 31

The expenses during the same time were:

Train expenses.....	$29,286 72	
Wood and hauling.....	22,660 61	
Oil, waste, etc.....	4,516 70	
Depot expenses.....	38,966 90	
Loss and damage.....	3,627 36	
Repairs of road and bridges.....	81,888 85	
Repairs of depots and water stations.....	5,152 15	
Repairs of locomotives and cars.....	34,722 65	
New rolling stock.....	15,815 37	
Repairs of workshops, tools and machinery...	1,307 06	
Salaries of officers and clerks.....	12,175 50	
Taxes and insurance....	15,305 24	
Miscellaneous.....	9,529 39	
		274,954 10
Leaving net earnings.....		$359,129 21

—being 56.64 per cent. of the gross earnings.

The total amount received from the Orange and Alexandria Railroad Company for the use of the road between Charlottesville and Gordonsville was $14,230 06, being $2,058 40 less than for the previous year, which added to the loss from passenger traffic consequent upon the completion of the extension of that road to Lynchburg, $24,628 11, will make a total decrease of $26,685 41. From this should be deducted the increase in earnings from freight, mails and miscellaneous sources, $8,363 72—making the actual decrease in gross revenue only $18,321 69. The amount charged to transportation expenses is $5,246 09 more than for the previous year, of which $3,490 22 is for an increase of taxes paid to the State in consequence of the law passed at the last session of the Legislature, requiring the payment of a tax upon the amount of freight transported, in addition to the mill tax upon passengers previously paid. There has also been charged to transportation expenses the sum of $15,815 37 paid for new equipment; deducting this sum, the actual expenses for the year will be but 41 per cent. of the gross earnings. Last year there was expended for new equipment the sum of $16,764, making for the two years $32,579 37, which is a much larger amount than was required to cover depreciation. The locomotives and tenders have been maintained in the very best condition; the passenger cars thorongly repaired; and the road kept in excellent order throughout the entire year. Considerable ballasting has been done; new and convenient platforms erected; bridges strengthened; trestle work renewed; wooden culverts replaced with stone; new passenger houses and ticket offices built; new crossties put in the track, etc., etc.

Two new locomotives have been placed upon the road during the year. The equipment now consists of 27 locomotives; 19 passenger cars, 4 mail and smoker's cars, 3 baggage, 3 conductors, 191 freight, stock and hay cars, and 22 gravel and sand cars. The crank and dirt cars used in repairing the road, trucks at depots, and cars used upon the road for hands to live in are not included in the above. A number of cars have been built, and are now building in the company's shops, in addition to doing the ordinary repairs.

The construction and equipment of the road to the date of the report, as per annexed statement was $5,469,286 43. The road is 178 miles in length, taking out the Blue Ridge Road which was built by the State, and its average cost, in-

cluding equipments, was $30,726 32. The net revenue gives 6.56 per cent. on the cost of the road and equipments. The gross receipts per mile of road, including Blue Ridge Road, were $3,251 62; the net receipts, $1,841 68. The current expenses were 43.36 per cent. of the gross receipts.

The net revenue has been applied as follows, viz:

Interest		$91,447 70
Dividends to the State, 2½ per cent.		94,552 96
" City of Richmond		15,000 00
" County of Greenbrier		2,500 00
" " Monroe		2,500 00
" " Augusta		1,000 00
" to individual stockholders		38,051 50
To the sinking fund		23,000 00
The balance has been paid to the State for the use of the Blue Ridge Railroad, for work on the tunnel and road, the purchase of bonds issued to contractors, and for dividends		91,377 05
		$359,129 21
The gross receipts were		$634,083 31
Expenses	$274,954 10	
Tolls to the State	24,006 04	
Interest	91,447 70	
Sinking fund	23,000 00	
Dividends declared	156,565 46	
		569,973 30
		$64,110 01

The whole debt of the company, as compared with last year is as follows:

Total funded debt	$1,254,000 00
Bonds issued for individuals	226,592 00
Floating debt	52,929 48
	$1,533,521 48
Total debt last year	1,528,951 58
Increase	$4,569 90

The number of miles run by passenger trains during the year was 139,250; by freight trains, 75,012; by all other trains, 44,016; by trains of the Orange and Alexandria Railroad Company, 22,660—total miles run, 280,968. The number of passengers carried was 133,310; do. carried one mile 6,754,756. The number of tons of freight carried was 64,588 82; do. carried one mile, 4,960,987. Amount received for transporting one ton one mile, 6.4 cents: do. one passenger one mile 3.88 cents. The aggregate miles run by all passenger and baggage cars was 593,140; do. freight cars 1,033,321. The average weight of passenger trains, including passengers and baggage was 102 tons; do. exclusive of do. 90 tons. The average weight of freight trains, including freight was 310 tons; do. exclusive of freight, 200 tons. The earnings from passenger trains per mile run in cents was 216.41; do freight trains, 424.16—do., from both combined, 284.10. The gross receipts per mile run by all the trains was 239.95; total expenses per mile run, 106.44; net receipts 133.51. The number of miles of road in operation during the year was 195.

The only unopened portion of the Central road is the 10 mile section, immediately *east* of Covington, which will be completed early in 1862. From Covington to the Ohio river, 224 miles, the Covington and Ohio Railroad is being constructed by the State. Toward this work the State has already appropriated $4,800,000. This large appropriation is a good guarantee that this important work will be urged forward by the State with all practicable speed. The eastern portion from Covington to White Sulphur Springs will probably be opened in June 1862.

The report of this company indicates that every department of service is carefully looked after and thoroughly understood by its able and energetic superintendent. All the working details are fully brought out. Such reports are most interesting to railroad men not only for the facts they present in reference to the road to which they relate, but by way of comparison with the results of the workings of other roads. As scientific observations are valuable, and can be carried forward just in proportion to the number and minuteness of the phenomena recorded, so the conditions of all progress in railway economy are full statements of all the elements that go to make up the general results. It is the duty of every company to give these in such a manner that each person employed can readily see and understand them. The full statement by one company induces others to follow the example, and the foundation is thus laid for the construction of a perfect system for the management of our roads.

The following is an abstract from the company's balance sheet, September 30, 1860:

RECEIPTS:

Capital stock subscribed by State		$1,891,670 68
From subscribers other than the State		1,271,183 55
Bonds guarantied by the State, 1880		100,000 03
Coupon bonds, payable in 1872		198,000 00
" " " " 1884		926,000 00
Loan from the State		30,000 00
Bonds issued for dividends, payable in 1865, '66, and '75		226,592 00
Bonds issued for loans		97,335 27
" " to contractors		15,234 57
Interest due on dividend bonds		29,095 39
Dividends uncalled for		16,132 00
Receipts for transportation from commencement		4,593,893 18
Rent of real estate		6,080 45
Due on open accounts		25,605 49
		$9,426,822 58

DISBURSEMENTS:

Construction of road and buildings		$4,927,556 47
Rolling stock, machinery, etc.		511,729 96
Real estate, principally in Richmond		25,196 95
Tolls paid to the State for Blue Ridge Railroad and tunnel		38,895 57
Do. for use of do.		37,794 27
For work done on said road, less paid for use of same		33,947 82
Surveys, stocks in other companies, etc.		16,721 98
Interest, less discount on bonds purchased		656,935 20
Dividends from commencement		661,921 81
Transportation expenses from commencemont		2,353,649 31
State bonds	$33,300 00	
Bills receivable	11,283 53	
Open accounts	65,801 86	
		110,385 39
Cash on hand Sept. 30, 1860		22,087 85
		$9,426,822 58

The office of the company is at Richmond, Va. The officers are:

President—EDMUND FONTAINE.

Directors appointed by the Board of Public Works—Wm. Overton, Jacob Baylor Samuel Carpenter.

Elected by the Stockholders—Nathaniel B. Hill, John R. Woods.

Superintendent—THOS. DODAMEAD.

Treasurer—J. GARRETT.

Chief Engineer—H. D. WHITCOMB.

The Public Lands.

The Commissioner of the General Land Office embodies in his report the following valuable statistics of the area of the several States and Territories of the United States:

States of the Union.	Square miles.	Acres.
Maine	35,000	22,400,000
New Hampshire	9,280	5,939,200
Vermont	10,212	6,535,680
Massachusetts	7,800	4,992,000
Rhode Island	1,306	834,840
Connecticut	4,750	3,040,000
New York	47,000	30,080,000
New Jersey	8,320	5,323,800
Pennsylvania	46,000	29,440,000
Delaware	2,120	1,356,800
Maryland	11,124	7,119,400
Virginia	61,352	39,265,280
North Carolina	50,704	32,450,500
South Carolina	34,000	21,760,000
Georgia	58,000	37,120,000
Kentucky	37,680	24,115,200
Tennessee	45,600	29,183,000
Texas	274,356	175,587,840
Total	744,604	476,546,560
Land States.		
Ohio	39,964	25,575,960
Indiana	33,809	21,637,760
Michigan	56,451	36,128,640
Illinois	55,410	35,462,400
Wisconsin	53,924	34,511,360
Iowa	55,045	35,228,800
California	188,981	120,947,840
Minnesota	95,274	60,975,360
Florida	59,268	37,931,520
Alabama	50,722	32,462,080
Mississippi	47,156	30,679,040
Louisiana	41,346	26,461,440
Arkansas	52,198	33,406,720
Missouri	65,350	41,825,000
Total	978,429	626,194,570
District of Columbia	60	38,400
Territories embracing public lands.		
Kansas	125,283	80,821,120
Nebraska	343,438	219,160,320
Minnesota	81,968	52,454,400
Washington	103,071	122,565,440
New Mexico	256,309	164,737,779
Utah	220,196	140,925,440
Indian	67,020	42,892,800
Total territories	1,287,277	823,857,280
Total land surface	3,010,370	1,926,636,800

To which added water surfaces, lakes, rivers, etc., we have a surface of over 3,250,000 of square miles.

The aggregate area of the land States and Territories is upward of 1,450,000,000 acres.

	Miles.
Principal and guide meridians have been run and established to the extent of	7,439
Base lines to the extent of	4,819
Making an aggregate of	11,858
The other lines of the public surveys, townships and subdivisional from the commencement of operations to the present period, have been extended over	689,169
Equal to (acres)	441,067,905

The surveys have been completed in Ohio, Indiana, Illinois, Alabama, Mississippi, Michigan, Arkansas and Iowa, and nearly so in Missouri, Louisiana and Florida, excepting in the last named, the 'Everglades' in the southern peninsula.

The work of the year has been co-extensive with the funds appropriated, and includes public lands, confirmed private claims, Indian reservations, and boundaries between States and Territories. During that period there have been returned surveys equal to 35,888 lineal miles, or an area of 11,680,419.92 acres.

Cleveland and Mahoning Railroad.

The earnings of this road for the fiscal year ending December 31, 1860, were:

From passengers	$54,765 01
" freight	136,118 39
" coal	158,713 99
" mail, express, etc.	10,251 59
	$369,848 97

And the expenses were:

Repairs of track	$31,420 17	
" engines	11,632 26	
" cars	16,069 59	
" bridges, buildings, etc	6,088 93	
Running expenses	16,854 78	
Damages	551 88	
Station expenses	15,568 29	
Fuel	12,165 56	
All other expenses	21,494 03	
		131,845 49
Leaving net earnings		$238,003 48
First mortgage coupons	$58,122 50	
Second " "	42,353 50	
Third " "	2,800 00	
Interest	31,846 23	
Exchange	3,872 96	
Taxes	4,729 75	
		141,724 94
Balance, being net profit		$96,278 54
The increase in earnings over those of 1859, were		$84,708 41
With an increase in expenses of		28,987 29
Making the increase in net earnings		$55,720 52

The following is a comparative statement of the passengers and principal freight carried in 1859 and 1860:

	1859.	1860.	Increase.
No. of passengers	61,180	68,072	6,892
Tons of coal	102,255	168,770	66,515
Tons of Lake ore	26,095	45,992	19,897
Tons of native ore	4,995	12,224	7,269
Tons of limestone	1,050	2,748	1,698

In addition to which there have been transported of butter, cheese, pig and bar iron, nails and glass, 23,326 tons; and of rock oil, since August 1st, 1,705 bbls. Of the coal hauled, 133,695 tons were delivered at Cleveland and Newburg, and the balance at way stations east of Newburg.

The equipment consists of 12 engines, nine coal and three wood burners; 6 first-class passenger cars, 5 baggage and mail cars, and 251 freight, coal and construction cars. The number of miles run by all the trains was 230,461. The gross earnings per mile run, $1.60 48. The operating expenses per mile run, 57.02 cents. Cost of fuel per mile run, 5.3 cents. The operating expenses were 35.65 per cent. of the earnings, against 36.07 per cent. in 1859.

Surveys were commenced upon the line of this road in 1852, and the work let to contract in 1853. It was opened to Warren, 53 miles in July; to Girard, 62 miles in September, and to Youngstown, its present terminus, 67 miles in November, 1856. The net earnings since that time have been as follows:

1857	$153,777 91
1858	145,024 81
1859	182,282 95
1860	238,003 48

It was the original intention of this company to extend their road, via New Castle, Penn., to New Brighton, near Pittsburg; also, to connect at New Castle with a road to be constructed, thence to Blairsville, a point on the Pennsylvania Railroad, 53 miles east of Pittsburg. With the construction of the eastern portion of the line however, from New Castle to Blairsville, this company had no connection, a separate company having been organized for that purpose. Numerous causes have combined to prevent not only the construction of the projected lines from New Castle, but also the construction of their own road beyond Youngstown.

The actual cost of the road with all its appurtenances to that point, has been $2,628,742 71—or $39,234 96 per mile. This sum is arrived at by deducting from the amount carried to construction account in the annexed balance sheet, the sum of $139,576 62, being interest allowed and paid (mostly in stock) on payments of subscriptions to capital stock until Aug. 1, 1857. Even this sum is 65 per cent. more than the estimate of the engineer, and is attributable to the high price of labor and provisions which ruled in 1855–6, owing to the severe draught of 1854, and to the increased cost of moving much of the material beyond the anticipated price, causing the contractors to abandon their work, and obliging the company to re-let the same. This increased expense was met by a loan of the credit of its managers sufficient to finish the work to Youngstown. The floating debt thus created eventually reached the sum of $540,000. This has been somewhat reduced. The condition of the remainder, however, is such that in no probable event can the company be embarrassed, or subjected to sacrifice, by reason of it, as arrangements have been made whereby it can be carried during the pleasure of the managers at moderate rates of interest. The former managers are still individually liable for $95,463 86 of this sum, for which they are secured by a pledge of third mortgage bonds and the net income of the road. The company anticipate abundant means as soon as these bonds will command fair prices. Either source, it is thought, will soon be found adequate for providing the interest and sinking fund of the bonded debt. The condition of the bonded debt is given below. The bonds, amounting in the aggregate to $1,663,300, all bear interest at 7 per cent., thus requiring for interest upon the present funded debt per annum, $116,631; to this add amount sinking fund, $15,000, making together the sum of $131,431. The company has yet for sale of its Third Mortgage Bonds, $255,900. Assuming that these are all sold, and then the total bonded debt of the company will be $1,919,200, and require for the payment of interest and sinking fund, $149,344, leaving all above that sum of the net earnings to be carried to dividend account. The bonds yet on hand, if sold at the average rate of all the company's sales of bonds (which is 81 per cent.,) with the net income of the current year, will furnish an amount of money more than sufficient to retire the floating debt of the company.

The managers of this road and of the Pennsylvania and Ohio Canal, deeming it advisable to unite the two enterprises, this company has invested, through a trustee, $335,224 62 in the stock of the Canal Company. Two locomotives and fifty freight cars have been purchased the past year at a cost of $40,643 47. The road, buildings and equipment are in good condition. Most of the amount owing upon stock subscription is uncollectable; and of the amount that can be realized, but little can be expected until the extension of the road eastward.

In view of the difficulty in raising funds, subjecting the company to discount on bonds, and interest on floating debt, amounting to the sum of $374,676 17, and the large amount invested in locomotives, cars, shops and materials, amounting to $313,681 92, the managers flatter themselves that this exhibit will be satisfactory. The report concludes with the statement that the company have no adequate means to complete the road to New Brighton for the Pittsburg connection, but impresses on the managers of the company the importance of making that connection at the earliest possible opportunity. It is expected during the ensuing year to extinguish the floating debt, and that next year the road will be able to make satisfactory dividends on its stock. This result reflects great credit on the managers and officers of the road.

BALANCE SHEET.

Capital stock	$1,155,142 45
First mortgage bonds sold	850,000 00
Second " "	469,200 00
Do. deposited with C. C. & C.RR.Co.	30,000 00
Third mortg. bonds ($600,000) sold	344,100 00
Bills payable	175,287 71
Estate of Jacob Perkins	100,000 00
Sundry account	28,894 25
Profit and loss	178,396 18
	$3,341,020 59
Construction	$2,500,016 65
Equipment	268,302 68
Pennsylvania and Ohio Canal stock	235,224 62

President—DAVID TOD.

Directors—David Tod, Charles Smith, F. Kinsman, D. Baldwin, R. Hitchcock, Joseph Perkins, H. B. Perkins, James Magee, R. W. Cunningham.

Vice-Pres't and Sup't—CHAS. L. RHODES.

Sec. and Treasurer—O. M. BURKE.

Master Machinist—JOHN YOUNG.

Finances of Maryland.

The Comptroller of the Treasury of Maryland in a supplementary report of the finances of the State, says:

It appears that the liabilities of the State, on the first of October last, exceeded the amount in the Treasury by the sum of $45,016 54.

This is a moderate estimate, as there are other demands, such as special appropriations, which cannot be set out without the time necessary to an examination of the acts of Assembly.

There remained in the Treasury on the 31st December	$168,180 71
Add receipts on the 1st of January, 1861	5,500 00
Makes	$173,680 71
And there was disbursed on the day last named	114,028 07
The actual balance on the first of January, at the close of that day, was	$59,652 64

I am satisfied that the Treasury is in no condition to bear any extraordinary drain, and we shall be obliged to husband all our resources to meet the April interest on the public debt.

Commerce of the United States.

The annexed figures of the commerce of the United States for the year ending 30th June, 1860, are from the official reports in the Department:

IMPORTS FOR THE YEAR 1859-'60.

Dutiable goods	$279,872,327
Free goods	73,741,479
Specie and bullion	8,550,135
Total imports for the year	$362,163,941

EXPORTS FOR THE YEAR 1859-'60.

Domestic produce other than specie	$316,242,423	
Foreign produce and merchandise	17,333,634	
Domestic specie and bullion	$56,946,851	
Foreign specie and bullion	9,599,388	66,546,293
Total exports to foreign ports		$400,122,296

This shows a surplus of $38,000,000 of exports which, however, consisted entirely of specie. The merchandise and produce exported was $20,000,000 less than the amount imported. The exports of specie were unprecedented. The aggregate exports and imports were greater than for any previous year.

IMPORTS INTO THE UNITED STATES FROM FOREIGN PORTS.

Year ending June 30.	Dutiable.	Free goods.	Specie and Bullion.
1845	$95,106,724	$18,077,598	$4,070,242
1846	96,924,058	20,990,007	3,777,732
1847	104,773,002	17,651,346	24,121,289
1848	132,283,325	16,356,379	6,360,224
1849	125,479,774	15,726,425	6,651,240
1850	155,427,936	18,081,590	4,628,792
1851	191,118,345	19,652,995	5,453,592
1852	183,252,508	24,187,890	5,505,044
1853	236,595,113	27,182,152	4,201,382

Memphis and Ohio Railroad.

Bently D. Hassell, Esq., formerly Superintendent of the Jackson and Mississippi Railroad, and a man of much experience and capacity in railroading, has been appointed Superintendent of the Memphis and Ohio Railroad, in place of D. H. Doterer, resigned. We congratulate the Directory on obtaining the services of Mr. Hassell, who brings recommendations of the most satisfactory character, relating as well to his eminent capacity as to his high moral and social qualities, and doubt not that under his excellent management, the Memphis and Ohio Road will more than realize the most sanguine expectations of its friends.—*Memphis Bulletin.*

Railways in France.

The traffic receipts on 14 railways (new and old) for the first three months of 1860, amounted to 3,530,993*l.*, for the second three months to 3,908,951*l.*, and for the third three months to 4,432,273*l.* together on 5,762 miles 11,861,317*l.*, against 11,346,716*l.* on 5,577 miles, showing an increase of 524,201*l.* over the receipts of the corresponding period of 1859, and in the mileage of 185 miles. Of these receipts 1,518,261*l.* were upon 1,492 miles of new lines, against 1,338,470*l* on 1,311 miles, showing an increase of 179,791*l.* as compared with the receipts of the corresponding period of 1859, and in the mileage of 181 miles. The increase in the receipts on 4,269 miles in length of old lines amounted to 344,410*l.* over the corresponding period of 1859. The average receipts per kilometre on the old lines for the three quarters ending 30th September amounted to 1,507*l.*, against 1,474*l.*; and on the new lines the receipts averaged 671*l.*, against 669*l.* In the corresponding period of 1859. The increase in the length of the old lines was six kilometres, and in the length of the new lines 290 kilometres, making 184 miles as compared with the corresponding period of 1859. The rates and taxes, exclusive of the duty of 10 per cent. paid to Government, amounted in the aggre-

gate for the three quarters of the year to 624,-319*l.*, and for the corresponding period of 1859 to 634,146*l.*, showing a decrease of 9,827*l.*—*London Railway Times.*

Interest and Dividends.

The Western Transportation Company has declared a dividend of 20 per cent., payable the 15th of February and the 15th of March.

The Bank of the Republic has been instructed by the Governor of North Carolina to pay the interest on all the bonds of the State without regard to the late fraud in the Interior Department.

The interest due 1st inst. on the Cleveland and Mahoning first mortgage bonds will be paid by Ward, Campbell & Co.

It is stated that Missouri has determined to pay the coupons on all her bonds, without reference to those stolen at Washington. It is also stated from another source, that the Federal Government will be formally requested by Missouri to reinvest the Indian Trust Fund in Missouri Stocks to an amount equal to the stolen bonds simply as an act of good faith to Missouri, which has spared no exertions to maintain her State credit.

The interest coupons on the 2d mortgage bonds of 1861, of the Harlem Road, due 1st of February, will be paid at the office of the Treasurer.

The coupons on the bonds of the city of Memphis will be paid at the Merchant's Bank.

The State Treasurer of Pennsylvania is prepared to pay the semi-annual interest due on the 1st of February in coin, notwithstanding the suspension of specie payments by the banks. The amount will reach nearly half a million of dollars.

Messrs. G. S. Robbins & Son will pay the February coupons of the Keokuk, Fort Des Moines and Minnesota Railroad construction bonds.

The Delaware, Lackawanna and Western Railroad Company have decided to pay the balance of their income bonds of 1862 and 1867; and the same will be paid on presentation, at their office, No. 35 William street, with the interest due thereon.

Railways in Turkey.

The Turkish Government have granted a concession for the construction of an extensive system of Railways. The line now proposed to be formed from Constantinople to Belgrade, a distance of between four and five hundred miles. When completed it will establish a direct communication with the railway from Vienna to the shores of the Bosphorus, and an unbroken system will then exist between Calais, or Ostend, and Constantinople. The concession has been granted in favor of Mr. Thos. Page, C. E., the engineer under whom the new bridge at Westminister has been constructed. Although the necessary legal documents granting the privilege only arrived in this country a few days since, all the arrangements for immediately commencing the requisite surveys had been made in anticipation, and an efficient staff of surveyors were dispatched by the last steamer to Turkey to lay out the line. The detailed surveys will be pushed on as rapidly as possible to Belgrade, but it is intended to construct the railway in sections, the first to be taken in hand being that portion which lies between Constantinople and Adrianople. The Turkish Government have given a guarantee of 6 per cent. upon the capital to be expended, and in the hands of an engineer so thoroughly practical as Mr. Page there is no reason to fear but that the whole of the works will be completed within the time specified. Respecting the value to Turkey of a line which will place Constantinople in direct communication with the principal capitals and markets of Europe there cannot be two opinions, and the Government of the Sultan deserves every credit for the readiness with which they have given their consent to the undertaking, and for the many facilities they have afforded in the terms of the concession for the completion of so great and important a work.—*London Railway Times.*

James River and Kanawha Company.

The Governor of Virginia in his Message, recommends to the favorable attention of the Legislature the contract entered into by the James River and Kanawha Company with Monsieur Bellot Des Minieres, Brothers, & Co., for the sale of the Canal. Assurances which the Governor has received induce the confident belief in his mind that M. De Minieres, who is expected here in a short time, will come prepared to execute the contract on his part.

Finances of Louisiana.

The following is a statement of the finances of Louisiana:

Balance on hand Jan. 1, 1860	$1,200,325
Receipts for the year ending December 31, 1860, from all sources	2,369,262
	$3,569,558
Expenditures during same period	2,238,185
Balance on hand Dec. 31, 1860	$1,331,402
Divided as follows:	
General funds	$226,581
Current school fund	176,447
Internal improvement tax fund	112,880
Internal improvement fund	13,744

Net		$10,772 35

Farm Mortgages in Wisconsin.

The Governor, in his Message, made the following statement in regard to Farm Mortgages in this state:

There is a class of securities called Railroad Farm Mortgages, which are hanging over some of our best farms and are embarrassing a great majority of the best men in the State. The aggregate amount of these mortgages is estimated at about $5,000,000. They cover lands valued at least at $15,000,000. Between 5,000 and 6,000 men are involved in these peculiar liabilities. They were executed upon the pretence that they were to be used as collateral securities for loans of money made by the railroad companies. They were conceived in fraud, and sold or transferred in fraud, by the directors or agents of some of these companies. While some of these directors or agents were innocent of these deceptions upon the farmers, the men who controlled these financial operations were dishonest, and sought not a public benefit, or to aid public enterprise, but their own aggrandizement.

The State cannot afford to lose the labor and energy and enterprise of 5,000 of its citizens, nor can the State afford to suffer $15,000,000 of the earnings of these men to feed the hungry maw of a gigantic swindle. Every legitimate means, warranted by law and good faith, should be used for their relief. The railroad companies ought to be able to relieve these mortgages.

As a measure of relief, a new disposition of a portion of the grant of lands, made by Congress to the State, in trust for railroad purposes, and turned over by the State to the La Crosse and Milwaukee Railroad Company, might be made, with the consent of Congress. In case all that portion of the grant not sold to the St. Croix and Lake Superior Railroad Company, is not to be given to a new Company to carry out the designs of Congress, and under conditions which shall beyond contingency save the farm mortgagors, I suggest, for your consideration, a memorial to Congress, asking that the act making the grant to the State be so changed as to give the State absolute control of the same, so far as rights of private parties or companies have not become legally, permanently fixed. That relief granted by Congress—which would unquestionably be obtained if an energetic effort should be made for the purpose—the lands could be sold at some price, the minimum of which should be fixed by law, and the proceeds used to relieve the mortgagors directly, or to aid the companies, or their representatives, in relieving these farmers of such unconscionable burdens.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, February 2, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

New York and Erie Railroad.

This road was sold on the 28th inst., under process for foreclosure of the 5th mortgage, in pursuance of an agreement between all parties interested, for a re-organization of its affairs. The nominal amount bid was $220,000, being the amount of interest due on the 5th mortgage bonds. With the sale the title of the company is to be changed to that of the *Erie Railway*. Under the re-organization the unsecured bonds are to be converted into a seven per cent. preferred stock. The several mortgages are to maintain their relative positions. The over-due interest on these amounts to about $800,000, which is to be paid from the accruing earnings. For the common shares, new ones to an equal amount are to be issued. The financial condition of the new company, consequently, on the re-organization will stand about as follows:

Mortgage debt	$19,692,000
Preferred stock	7,860,000
Common stock	11,000,000

This company has had a great many vicissitudes. It will commence its new experience, with a financial position which, with good management, will render the repetition of its past misfortunes almost beyond the reach of possibility. The interest on the funded debt of the company, (after the payment of that already accrued,) will be only about $1,300,000 annually. The net earnings the past year were $1,827,000. The road ought to be able to pay, without difficulty, the interest on its funded debt and dividends on its preferred stock. The prices at which the common shares are selling shows that something even

is expected from these. They are now largely dealt in, in England, where a high opinion exists as to their value. The completion of the Long Dock will add largely to the income of the road —so will the Atlantic and Great Western Railroad, should it be completed.

In this connection we give a statement of the cost and earnings of the road from the opening of the first section to the present time. It will be observed that the cost of the road is some $2,000,000 *less* than its liabilities. For the whole period, the gross earnings have averaged very nearly 14 per cent. on the cost of the road, while the net earnings have equalled about 5 per cent.

STATEMENT of the cost; mileage; receipts from passengers; receipts from freight; expenses; net earnings and dividends of the New York and Erie Railroad from the date of its opening to the present time.

Minnesota and Pacific Railroad.

The Winona (Minnesota) *Republican* learns that a wealthy and responsible Eastern Company, now in possession of one of the leading thoroughfares in the country, propose and have contracted to take what is known as the Minnesota and Pacific Railroad, and put the same in running order, from St. Paul to St. Cloud, during the year 1861; and from St. Anthony and Minneapolis to the west end of Meeker county, and from St. Paul to Stillwater, before the close of the year 1862.

Central Southern Railroad.

We have the 5th annual report of this company, under date of October 1, 1860. At that time the tunnel, the only obstacle to the completion of the entire line from Nashville to the Memphis and Charleston Railroad at Decatur, was on the eve of completion. This work has since been accomplished, and the whole line is now in operation, forming very important and valuable connections south and west.

The earnings of the road (only partially completed) the past year were as follows:

1859.	Freight.	Passenger.	Total.
Aug., Sept. and Oct.	$187.34	576.05	763.39
November.....	301.80	411.60	713.40
December.....	609.66	616.00	1,225.66
January.....	872.03	756.25	1,628.29
February.....	2,196.68	1,127.95	3,324.63
March.....	1,688.51	1,326.15	3,014.66
April.....	1,328.87	1,517.76	2,846.63
May.....	1,061.07	1,996.83	3,057.90
June.....	706.90	2,075.81	2,782.71
July.....	553.70	2,077.42	2,632.12
August.....	522.40	2,005.41	2,527.81
September.....	791.84	2,669.40	3,461.24
	$10,821.80	17,156.63	27,978.43

Mail service, etc	1,988.45
Total earnings	$29,966.88
Expenditures	10,779.83
Net earnings	$19,187.05

The cost of the road up to the present time has been as follows:

Road bed, bridges, etc., etc	$497,016 15
Superstructure.....	348,523 57
Equipment, etc.....	58,133 44
Bridge over Elk River.....	54,564 11
State loan, interest and exchange....	86,620 39
Miscellaneous items.....	34,755 39
Unpaid subscriptions	56,956 12
Cash on hand	1,178 24
Total.....	$1,137,707 10

The receipts have been as follows:

Share capital.....	$244,346 83
Stock scrip issued.....	260,868 06
State loan.....	514,000 00
Transportation, net balance of	19,381 99
Bills and accounts payable.....	99,110 22
Total.....	$1,137,707 10

The connections made at Decatur with the Memphis and Charleston Railroad will open to Tennessee, the whole system of the railroads of the Gulf States. Upon the completion of the Central Railroad of Alabama, a direct line will be had to Mobile and Pensacola, making the Southern Central, the stem or trunk line, for roads radiating in every direction from its Southern terminns.

East Pennsylvania Railroad.

This business of the East Pennsylvania Road has fully met the anticipation of the projectors, although the connections have not yet been fully made. For the past four months the net earnings have paid the interest on the debt and left a surplus for a dividend fund on the stock. The floating debt is much reduced, and will be extinguished by the first of March. The contracts for the Reading and Columbia Road have been made, and the funds provided for building it. This will, be a valuable tributary to the East Pennsylvania.

Memphis and Little Rock Railroad.

The Legislature has passed a bill investing $100,000 of the five per cent. fund in the Memphis and Little Rock Railroad. This will put the work in such a forward condition as to secure its completion at no distant day.—*Little Rock Gazette.*

St. Louis, Alton and Chicago Railroad.

The report of the Receiver of this road to December 31, 1860, is as follows:

RECEIVED.

Earnings		$994,569 40
Less—		
Freight, etc., uncollected Dec. 31, 1860	$17,578 65	
Due from Post Office.....	7,300 00

Worcester and Nashua Railroad.

At the seventeenth annual meeting of this Company recently held in Worcester, the following board of Directors was chosen for the ensuing year: George T. Rice, S. Salisbury, Francis H. Dewey, Francis H. Kinnicutt, and Alexander H. Bullock, of Worcester: Alexander Dewitt of Oxford; Jacob Fisher of Lancaster; Thomas Chase of Nashua, and Asa F. Lawrence of Groton. At a subsequent meeting of the Directors, George T. Rice, Esq., was re-elected President, and T. W. Hammond, Clerk and Treasurer.

Samuel Woodward of Worcester, and Harvey F. Courser of Nashua, were chosen Auditors for he year ensuing.

The report of the Directors for the year ending Nov, 30, 1860, exhibits the gratifying fact that the net earnings over all expenses, were $96,509 16 or $12,918 92 more than in any previous year. Of the bonds of the Company, which became due May 1st last, $50,000 have been paid from the reserved earnings, and for the balance ($150,000) new bonds have been issued, payable at different periods, extending to May 1, 1866. To meet the payment of these bonds as they become due, it will be necessary to reserve annually from the earnings of the road $25,000; with that

object in view, $28,010 16 were reserved from the earnings of the past year, after paying to the stockholders two dividends amounting to $1.50 on a share. By pursuing that policy, the whole debt of the company will be paid in five years from the 1st day of May next, and regular dividends continued to stockholders during the time.

The report of the Superintendent George W. Bentley, Esq., states that the road-bed has been materially improved, and is now in a better condition than ever before. During the past year over nine miles of rails have been re-laid, over four miles of it with new iron. Within four years 31½ miles of rails have been re-laid, 12½ miles of it with new iron. To do this, 75,646 new cross-ties were required. Within the past year seven road bridges have been rebuilt. The road now has eleven engines, including the new coal burning engine, "Salisbury," purchased the past year. Three others also burn coal, and they run at less cost per mile for fuel than with wood. Thirteen freight cars and one baggage car have been rebuilt during the year, and two passenger cars thoroughly repaired.

Journal of Railroad Law.

DISTINCTION BETWEEN AN "INEVITABLE ACCIDENT" AND "AN ACT OF GOD." THE LATTER MUST BE NOT ONLY THE SOLE, BUT THE IMMEDIATE CAUSE OF LOSS TO EXONERATE THE CARRIER.

We stated in our last number one branch of the case of *Merrit vs. Earle*, in which was considered the question whether a contract to carry freight, entered into upon the Sabbath, was binding.

The same case involved the consideration of what constitutes an act of God, or an inevitable accident, which in the eye of the law will exonerate a carrier from liability.

It will be remembered that the action was brought to recover the value of two horses, which the plaintiff entrusted to the defendant as a common carrier to transport from Albany to New York, on board the steamboat Knickerbocker, which were lost upon the passage. It appeared that on Friday preceding the accident, a sudden and violent squall overtook a number of vessels then in the neighborhood of the Highlands, and one of the number not being able to shorten sail in time, was capsized and sunk. The defendant's steamer ran upon the masts of this sunken vessel, which stove in her bottom, and this was the occasion of the loss.

The defendant's counsel requested the Court to charge the jury that the fact that the loss was occasioned by inevitable accident, against which the defendant could not have guarded by the exercise of due diligence and precaution, discharged the defendant. This instruction the Justice refused to give, and ordered a verdict and judgment for the plaintiff, from which the defendant appealed. The following is the opinion of the General Term of the Supreme Court, to which the appeal was taken, bearing upon this point.

EMOTT J. Notwithstanding the language of some Judges and writers of high authority, I think there is a distinction between the "act of God" and "inevitable accident." The reason and ground of the severe rule which the law holds as to common carriers, is not to compel the exercise of due diligence and caution, nor is that the measure of his responsibility. On the contrary there are risks as was observed by Lord Mansfield, which no foresight of the carrier could avert, and losses which are not the consequence of any want of care or skill on his part, but which nevertheless he must make good. The law, for reasons of public policy, makes the carrier an insurer against all losses except such as are directly produced by divine interposition, or attacks by public foes. The rule is admitted to be severe, and to some extent arbitrary, but it has always been vindicated as founded in wisdom. The rule of a carrier's liability appears hard in other applications than to accidental lossess or destruction. As Lord Holt observes in *Lane vs. Cotton*, it seems hard that a poor carrier who is robbed on the road without any manner of default in him, should be answerable for all the goods he takes. Yet it would be more intolerable if it were not so, for the danger and temptation to combination with thieves and dishonest men. So in respect to losses by what might be called accidents and perils of the voyage. It must be observed that the carrier is entrusted absolutely with the goods he transports, and that very often, and it may be said generally, in the absence of their owner and of all human witnesses except himself or his servants. He is therefore held to insure them against every thing but two things, which, as Ch. J. Best remarks, it is supposed will be so well known to all the country where they happen that no person would be so rash as to attempt to prove that they had happened when they had not, viz: the act of God and the public enemies. There is a phrase sometimes used in speaking of the liability of carriers which is borrowed from the express exception commonly inserted in bills of lading—I mean the phrase "perils of the sea." But I apprehend it would not be safe to hold that this expression is syonymous with the act of God, or even with inevitable accident. Thus in *Smith vs. Scott* the term perils of the sea was held to apply to a case where the vessel was lost by being run down by another vessel, through the negligent management of the latter. The phrase would seem to import a danger resulting from the voyage, or the character of the transportation, and which the carrier could not have provided against by the exercise of all due care. The phrase "inevitable accident" goes a step farther, and applies to occurrences which no foresight or precaution of the carrier could prevent. But even this is not identical in meaning with the "act of God." That is an expression which excludes all human agency. It signifies the direct act of a providential cause; for in a wider sense every thing is the act of God, since nothing happens but by his permission. In the case of Trent Proprietors *vs.* Hood, Lord Mansfield laid down the distinction very expressly. That was a case of a loss by a vessel running on the anchor of another vessel which had no buoy to indicate its position. There was indeed an ingredient of negligence in the case since they should have looked for the anchor seeing the vessel. But Lord Mansfield observes, "the general principle is clear —The act of God is natural necessity, as winds and storms which arise from natural causes, and is distinct from inevitable accident."

The case of McArthur *vs.* Lears was as strong a case for the defendant as the present and in some points resembling it. The vessel was lost in attempting to enter the port of Erie. The master know that his course should range by the lights of two lighthouses. It was a dark night, snow falling, and a considerable wind. One of the beacons was not burning, through some neglect, and a light on board a steamer which had grounded in a previous gale of wind was easily mistaken for the beacon. This mistake occasioned the loss of the vessel, certainly without any fault of the mariners. And it may be added that the vessel whose lights deceived the master had been previously cast away by a violent gale which might properly have been called the "act of God." In that respect the case resembles this, because here the sloop whose mast entered the steamers bottom was sunk in a squall of wind, although not perhaps without fault in her crew. But it was held that there was too much admixture of human means to sustain the defense, under the rules of law.

Judge Parsons defines the "act of God as spoken of in the law of carriers to be something which operates without any aid or interference of man; and the learned American Editor of *Smith's leading cases*, holds the act of God to mean the extraordinary violence of nature. It is a corollary from these principles, and the cases in which they are found, that if the act of God is to excuse the carrier, it must be not only the sole but the immediate and not a remote cause of loss.

In the case at bar, it appears that on Friday before this occurrence, a sudden and violent squall overtook a number of vessels in this part of the Highlands, and one of the number not being able or ready to shorten sail with sufficient alacrity was capsized and sunk. The defendant's steamer ran upon the mast of this sunken vessel, which stove in her bottom, and she was cast away in consequence. The immediate cause, therefore, of the loss of the defendant's vessel, was her running upon this mast. She was not forced upon it by the wind or current, and although the wind which was the occasion of the sinking of the sloop was a natural force, and operated upon the sloop without any intervention of human means, yet that was but the remote cause of the steamer's loss. To produce this there must have been added the placing the sloop in the position in which she was overtaken by the wind. The wind was the act of God; but that did not sink, and would not have sunk the steamer. The sailing the sloop over that particular part of the river was the act of man, and without that, the defendant's steamboat would have sustained no harm. It was necessary that both these conditions should concur to cause the loss of the defendant's vessel. A loss occasioned by an obstruction in a river thus produced by mixed causes, and which is not the result of the operation of natural forces upon natural objects alone, as the shores or the bottom, is not in a logical or legal sense, the act of God. It may be inevitable by human care and skill, but it is not the consequence of agencies which are and were controlled by divine will and power alone.

We are of the opinion that the defendant is liable, upon the settled rule of the responsibility of carriers, and therefore the judgment from which he has appealed must be affirmed.

Covington and Lexington Railroad Bonds.

We learn that the suit of Income Bondholders against H. Vallett's third mortgage bonds, which was commenced last Summer, was decided at Lexington last week in favor of Mr. Vallett. The substance of the decision is, that by the showing of complainant's bill and evidence, there was no cause of action, and the court refused a rehearing of the

case. Whether or not the parties will take the case to the Court of Appeals has not been determined.

St. Louis and Iron Mountain Railroad.

The gross earnings of this road for the year ending October 1, 1860, were:

From passengers		$87,298 88
" freights		137,471 95
" mails		8,737 20
" rents, etc.		1,783 30
		$235,291 33

And the expenses were:

Repairs of road	$35,472 86	
" bridges	5,995 01	
" engines	17,948 90	
" cars	15,523 79	
" buildings	2,024 75	
" machinery	2,544 08	
General superintendence	10,584 60	
Fuel for engines	20,049 65	
Oil and waste	3,736 82	
Loss and damages	4,371 91	
Rent and taxes	11,131 09	
All other expenses	46,470 09	
		175,853 55
Net earnings		$59,437 78

—which has been appropriated to paying pressing debts, many small items of constructure, leaving a small amount to meet current liabilities. The report says:

At the beginning of the year, your board indulged in the hope of being able from an economical management of affairs, and from an increase of the business on the road, to contribute something towards reimbursing the State for the annual interest on State bonds issued to this Company. Larger extraordinary expenses for repairs of road bed, repairs and renewal of bridges and culverts, repairs of rolling stock, and a much less amount of business than we anticipated, as well as a considerable amount of floating debt to be provided for, have combined to disappoint us.

We can offer but little encouragement of the Company's ability to do more, from the earnings on the road, than pay current expenses and keep the road, bridges, rolling stock and machinery in good condition, while the business of the country is so depressed. When the business of that portion of the country tributary to St. Louis shall revive, it may be reasonable to expect that we can save something from our earnings to pay a portion of this interest. But the amount we can hope to pay under the most favorable circumstances, will be inconsiderable whilst the roads remain unfinished to a point on the Mississippi river that brings us in connection with the southern and southeastern systems of railroads. No doubt seems to be entertained of our ability to pay all interest on our bonded debt when the road is thus extended, and when a rich trade is opened to St. Louis, through this channel, with Tennessee, Mississippi, Arkansas and Texas. We earnestly hope that active operations for this extension are not to be delayed much longer. The people in Southeast Missouri are making earnest efforts to contribute materially to the extension. They are calling meetings to contribute materially to the extension. They are calling meetings in various localities, appointing committees to canvass the country and solicit subscriptions and causing preliminary surveys to be made on several routes. The route from near Indian Ford to Columbus has already been surveyed. A survey is now being made from same point to New Madrid by authority of people of that town. The people of Cape Girardeau have organized a new company, subscribed liberally, made surveys, and are making active exertions to build this extension from Pilot Knob via Cape Girardeau to Columbus. The people of Memphis and the several Tennessee railroad interests are not less awake to the importance of a railroad connection with St. Louis, by the way of Pilot Knob. A survey was made last winter by J. H. Morley Esq., late Chief Engineer of this company from Memphis to the Missouri State line, under the authority of the citizens of Memphis, who have given us repeated assurances that they will build the road from Memphis to our State line by the time we can reach the same point, if this route is finally determined on.

But this extension of the Iron Mountain Railroad cannot be built by local or private subscriptions alone. State aid in some shape is inevitably required to complete it. It is equally evident that the other main trunk roads must have aid from the State to insure their completion. But considering that any proposition for aid to the roads by a further loan of State credit will be greatly embarrassed by the constitutional limit put upon our State indebtedness, and that other propositions of relief are so numerous and varied—each one supported as it is by strong arguments and earnest advocates, and as strongly opposed by plausible reasoning—we regard it impracticable to propose, at this time, any plan of relief, but leave it to the wisdom of the Legislature to devise a mode by which the several roads may be completed, the credit of the State protected, and rights and interests of stockholders cared for.

We are, nevertheless, constrained to express the opinion that a convention of the friends of our railroads throughout the State, before the meeting of the Legislature, would be able to develop a scheme whereby these objects could be satisfactorily attained. * * * As we view the subject, every road in the system depends more or less on the growth and prosperity of St. Louis and the State at large for its full success. That prosperity is incomplete so long as any one of these roads remains unfinished. Any measure of relief, therefore, which is extended to any one road, in our judgment should, if possible, be granted to all the roads; so that the work to completion may go on simultaneously, while there is a large surplus of cheap labor in the country demanding employment.

The following, compiled from the balance sheet given in the report, and the various tables appended thereto, will show the position of the company's affairs to the date of the report, October 1, 1860:

Capital stock subscribed, $2,037,200, of which there has been paid	$1,970,537 50	
State of Missouri bonds	3,501,000 00	
Net earnings one year to Oct. 1, '59	87,093 68	
Gross do. do. '60	235,291 33	
Floating debt	43,989 13	
		$5,837,911 64
Graduation, masonry and bridges, including iron, etc.	$3,337,386 96	
Station buildings, engine houses, machine shops, machinery, etc.	178,749 57	
Land damages and real estate	148,992 62	
Contingent expenses and legal services	63,876 22	
Potosi Branch Railroad	67,555 35	
Rolling stock	340,369 70	
Engineering	157,149 81	
Discount and interest	1,225,868 28	
Transportation expenses one year to Oct. 1, 1860	175,853 55	
Assets, viz:—		
Am. Iron Co.'s bonds	$25,000 00	
City of Carondelet bonds	50,000 00	
Bills receivable	13,899 74	
Supplies for machine shop	10,488 42	
Fuel accounts on hand	20,755 76	
Sundry accounts	10,502 95	
Cash on hand	11,462 71	
	142,109 58	
		$5,837,911 64

The rolling stock, as a general thing, is in good order. It consists of 16 locomotives, 13 of which are in order for use; 8 first class and 2 second class passenger cars; 3 baggage, 17 box freight, 8 cattle, 154 platform, 30 gravel and 13 hand cars. The total number of miles run by locomotives with all trains was 343,827, at a cost per mile, including all expenses, of 72.12 per cent. The total number of tons moved was 69,128; the total number carried one mile, 3,915,078. The total number of passengers carried was 232,307, of which 5,969 were way, and 226,338 through passengers; the number carried one mile was 2,894,970.

The road is in good condition. The embankments, with few exceptions, are composed of solid material, and are easily kept in repair. The bridges are all in safe condition, and in a good state of preservation, with the exception of two lattice bridges which will soon require to be rebuilt. Of the amount expended for bridge repairs, $3,300 was for rebuilding the Cadet bridge burnt in October last; and $2,300 for rebuilding the north abutment of the bridge over the Joachim, which had been undermined by floods. The earnings for the past year show a small comparative decrease. The diminution in expenses was over $39,000; although the outlays for extraordinary repairs were quite large.

The directors and officers elected for the ensuing year are:

President and Treas'r—STEPHEN D. BARLOW.

Vice President—CARLOS S. GREELY.

Directors—Carlos S. Greely, Henry T. Blow, Daniel G. Taylor, Jules Valle, Stephen D. Barlow, George Partridge, Ferd. Gotischalk, Isadore Bush, John S. Oavender, Bernard Poepping, of Carondelet, S. C. Hunt, John Dean, of Potosi, James Lindsy, of Ironton.

Superintendent—JAMES A. FELPS.

Secretary and Auditor—ADDISON WARE.

THE NEW YORK CENTRAL R. R. CO.

TREASURER'S OFFICE, Albany, Jan. 19th, 1861.

THE Transfer Books of this Company will be closed at the close of business on Thursday, the thirty-first day of January instant, and will be re-opened on the morning of Friday, the twenty-second day of February next.

GILBERT L. WILSON,
414 Treasurer.

FOR SALE

1,500 TON, first quality English Rail, 52 lbs. to the lineal yard. The Iron will be sold in bond, or duty paid, at option of purchaser.

January 15th, 1861.

DUBUQUE & SIOUX CITY R. R. CO.

ELECTION NOTICE.

THE first election of directors of said company will be held at their office in Dubuque, Iowa, on Monday the 11th of February, 1861. The stock-books will be closed on the evening of 31st of January, until after the election.

412 JAMES M. M'KINLAY, Secretary.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.
Boston, Nov. 24, 1860. tf

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.		SHEET No		
1.	General Table for all Bases and all Slopes.	13.	for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.	14.	" 20 "	1½ to 1
3.	Base 12 ft. Slopes 1½ to 1	15.	" 24 "	¾ to 1
4.	" 14 " 1½ to 1	16.	" 24 "	1½ to 1
5.	" 15 " ¾ to 1	17.	" 25 "	1½ to 1
6.	" 15 " 1 to 1	18.	" 26 "	1½ to 1
7.	" 15 " 1½ to 1	19.	" 28 "	¾ to 1
8.	" 16 " ¾ to 1	20.	" 30 "	1 to 1
9	" 16 " 1 to 1	21.	" 30 "	1¼ to 1
10.	" 18 " ¾ to 1	22.	" 30 "	1½ to 1
11.	" 18 " ¾ to 1	23.	" 32 "	1 to 1
12.	" 18 " 1 to 1	24.	" 32 "	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

AGENTS FOR

Bauman & Co.'s Poco Metallic Paint.

FOR WOOD PAINTING.—It retains a beautiful lustre; kills knots and will protect it under any circumstances. It covers 6,000 square feet per hundred pounds, and will neither fade, blister, or wash, and a better fireproof than any other Paint, for it will stand a heat that will melt lead. It is proof against sea, air and storms.

Refer to JOHN LEISENRING, Sup't and Eng'r, Lehigh Coal and Navigation Co., Mauch Chunk, Pa.

FOR BRICK AND PLASTER.—It makes all the fanciful stone colors, and will cover 4,000 square feet per 100 pounds. When laid out in blocks, it is truly beautiful.

Refer to SEMPLE & BROTHER, Easton, Pa.

FOR SHIP AND BOAT PAINTING.—It hardens under water to the hardness of Iron, preventing the ravages of the wood-worm effectually. On deck it is impervious to water, expands and contracts with heat and cold, and we warrant it on the forecastle six months.

Refer to CAPTAIN MASON, Schooner 'Adolph Ugel,' Philadelphia.

FOR RAILROADS.—It preserves Bridges and Ties from dry or wet rot and freight cars from burning and leaking.

Refer to R. H. SAYER, Sup't and Eng'r, WM. KELLOG, Master of Repairs, Lehigh Valley Railroad, Bethlehem, Pa

A. G. BRODHEAD, Sup't and Eng'r, Beaver Meadows R. R., Mauch Chunk, Pa.

FOR ROOFING.—It covers 8,000 feet per 100 pounds, and may be used in the rain, as it never runs.

Refer to M. CULLOUGH & CO, HENRY BUCKWALTER, Philadelphia.

FOR IRON.—It will stand 300 deg. Fah. and gives satisfaction to all the Iron men in Philadelphia, on gas holders, steam boilers, Iron fronts and ornamental iron. It is equal to Red Lead, for steam and hot water joints.

Refer to J. W and J. F STARR, Camden, N J. MORRIS, TASKER & CO., MERRICK & SONS, Philadelphia.

FOR IRON FOUNDERS' PATTERNS.—Five parts by weight of it to one of gum shellac dissolved in alcohol, will make a covering more impervious to the damp sand or loam than shellac alone of equal consistency.

Refer to THE NOVELTY IRON WORKS, New York.

FOR STAINING.—Oak, Mahogany, Rosewood and Walnut Stains for Furniture, we warrant it equal to Turkish Umber. Its natural colors are Umber, Brown, Lake, Olive and Lead color, which may be combined in endless variety. We hope soon to have other colors much lighter

ANALYSIS.

DENNIS BAUMAN & CO.,
Parryville, Carbon County, Pa.

The following are the results of Analysis of your Poco Metallic Paint.—Peroxyde of Iron 55.84; Red Oxyde of Manganese, 1.65; Lime, 2.52, Magnesia 1.29; Alumina, 9.00; Silex, 29.70;—100 parts.

The Analysis proves that this paint is not likely to be altered in the slightest degree by ordinary atmospheric agents, such as sunlight, rain, cold, or heat. We therefore regard your Poco Metallic Paint as of the most durable character

NATIONAL FERTILIZER.

The attention of Agriculturists is requested to this ECONOMICAL and SUPERIOR **FERTILIZER.** It possesses all the good qualities of the best known manures, without any of the injurious effects produced by the over-active Ammonia in Guano and kindred FERTILIZERS, while its *price* is **less than one-half of the Peruvian** Guano. The various materials composing this Fertilizer, are so chemically combined, that they are gradually evolved by the heat and moisture of the earth, and furnish to the plant all the requirements for a **rapid and luxurious vegetation.**

[COPY.]

NEW YORK, Sept. 8, 1860.

I have used about one ton of the NATIONAL FERTILIZER manufactured under Dr. L. Harper's patent, on my sugar plantation in the Island of Cuba, and although tried upon very poor soil, realized a fine crop. I used it in the same way and in the SAME QUANTITY as I use Peruvian Guano. I can confidently recommend it as in every respect equal to Peruvian Guano for sugar cane.

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, February 9, 1861.

Tennessee and Coosa Railroad.

The line of this road extends from Gadsden, the northerly terminus of the Alabama and Tennessee Rivers Railroad, to Gunter's Landing, on the Tennessee River, which is also the southern terminus of the Winchester and Alabama Railroad. It is a difficult undertaking, crossing the southern prolongation of the Alleghanies, at a grade of 105 feet to the mile. The length of the road is about 36½ miles. The grading of the Northern Division, 21 miles, from Gunter's Landing to the Summit, is completed with the exception of two miles of heavy work. Of the Southern Division five miles remain to be graded, when the whole line will be ready for the rails.

The total cost of the road is estimated as follows:—

Graduation, masonry and bridges	$348,000
Superstructure, equipment, etc.	870,000
Total	$718,000

There has already been expended—

In graduation	$201,849
Right of way, etc.	13,568
Engineering expenses	10,650
Total	$225,467

The receipts of the Company from various sources since its organization have been as follows:

Individual stock	$30,393
Interest and exchange	1,642
Alabama 3 per cent. fund	254,421
Total	$286,457

The Company have $61,829 cash on hand, which, with the amount paid for graduation, etc., etc., equals the receipts.

To complete the preparation of the road bed for the rails, the company have their unexpended cash balance, $50,000 due from the State, and $20,000 due from stockholders, which will be ample means for this object. To provide the rails and equipment, the Company propose to issue mortgage bonds to the amount of $400,000, payable in 20 years and bearing 7 per cent. interest. They are also secured by 120,000 acres of land granted by the General Government, and for which patents have been received. These bonds are thus amply secured, and will undoubtedly find a market among the friends of the road, providing ample means for its speedy completion.

We copy the following from the Report of the Chief Engineer G. H. ARMS, Esq., in reference to the connections to be formed by the road.

The connection of North and South Alabama by rail, has been for many years an object of interest and desire with the people of this State; its importance and necessity has been felt by all. Your road completed, and the last and most difficult link will have been made towards accomplishing this object. The attainment of this alone, and the vast benefits which must accrue to your road from this connection, should urge the friends of your enterprise to prosecute it with all possible vigor and speed.

The great commercial emporium and cotton market of Mobile will then be in direct connection through your road with the entire northern portion of the State. A vast amount of traffic, which now seeks other channels, must then, in accordance with the fixed laws of trade and commerce, be directed to Mobile, and over your road.

You will be placed in connection with Selma, with Montgomery, and the system of railroads projected from that city, with Pensacola, and with every seaport on the Gulf; the people of North Alabama will not then be obliged to travel around their own State, and through a large portion of two sister States, to reach their own Capital. The barrier which Sand Mountain has interposed to the intercourse between these two sections of the States, will, by the completion of your road, be removed; the commerce and trade of the State, which has been so long trammeled, will be infused with new life, and your road will reap its full share of the benefits arising from it.

But this connection with Selma, Montgomery, Mobile and Pensacola, is but one of the many feeders which your road will have from the South, when completed. The Georgia Western Railroad is now being constructed from Atlanta, Ga., to or near Jacksonville, a point on the Ala. and Tenn. Rivers Railroad, a few miles south of your southern terminus. Atlanta is connected with Augusta by the Georgia Railroad, and from Augusta to Charleston by the South Carolina Railroad. These lines, together with the Tennessee River on the Northwest to Decatur, and the Memphis and Charleston road from Decatur to Memphis, form a connection so direct between Memphis and Charleston as to be almost an air line. When completed it will be the shortest and most direct line from Memphis to Atlanta, Augusta and Charleston, and, although not the Memphis and Charleston Railroad, it will be the Memphis and Charleston route.

From or near Jacksonville another road is being constructed, called the Savannah, Griffin and North Ala. R. R. This line connects you with Macon, Ga., and from Macon over the Georgia R. R. to Savannah; this is a direct and very important connection.

The Macon and Brunswick R. R. is also being built from Macon to Brunswick, with prospects of a speedy completion. You will thus see that you are placed in direct connection with three important Atlantic sea ports. The projectors of these enterprises all have for their object to make a connection between the Georgia and South Carolina seaboard and the "great North-west;" and in no other direct way can this be attained except over your road.

The North and South Alabama Railroad, the Opelika and Oxford railroad and the North-east and South-west railroads, are important connections to your road from the south and will all form powerful auxiliaries to its traffic.

Your connections on the north are not as yet so definitely determined as on the south. You have the Tennessee river connecting you in a distance of about sixty miles with Decatur, a point of some importance on the Memphis and Charleston Railroad. From Decatur the M. and C. Railroad connects you directly with Memphis, and with the Tenn. and Ala. Central Railroad with Nashville and the system of roads in operation from those cities. You are also connected by the Tennessee river with Chattanooga on the North east, intersecting at that point with the Nashville and Chattanooga Railroad to Nashville, and with the Virginia and Tennessee system of roads, leading directly to New York.

A Railroad has been chartered from Guntersville to Scottsboro or Larkinsville, on the M. and C. Railroad, but no surveys have yet been made. This will be an important connection, and when built will be the final link in the chain of roads connecting Mobile with Nashville.

A survey has been made for the extension of the Winchester and Alabama Railroad from the Alabama State line to Guntersville, via Huntsville. The original surveys of this road contemplated crossing the M. and C. Railroad near Brownsboro' on that road. Although the present proposed route via Huntsville increases somewhat the length of the line, yet it is believed by the friends of the enterprise that the advantages to be gained from the local business of Huntsville—a point where a large portion of the business and capital of North Alabama is concentrated—will more than balance the increase in distance.—The general direction of this road to Huntsville will be the same as your own, nearly North-west, and will carry out the connection before referred to between Charleston and Memphis.

The charter of the Savannah, Griffin and North Ala. Railroad Company, gives them the right to extend their line from Guntersville to Decatur; a survey was made a few years ago, but no steps have as yet been taken towards building the road.

There is do doubt but at no distant day these roads will all be built.

The officers of the company is at Guntersville, Ala. The officers and directors are as follows:

President—S. K. Rayburn.

Directors—James Lamar, W. H. Wiggs, G. S. Henderson, O. B. Cooper, Thos. Patterson, R. Nickles, G. Hughes, J. S. Bain.

Chief Engineer—Geo. H. Arms.

Sec. and Treasurer—Jas. H. Moore.

New Jersey Railroad and Transportation Company.

The following is an abstract of the report of this Company for the fiscal year ending December 31, 1860.

RECEIPTS.

From Passengers	$798,454 82
" Freight	101,619 20
" Mails, rents, express etc.	218,807 74
	$1,118,881 76

EXPENSES.

Maintaining railroad, bridges, and buildings	$78,848 36	
Repairs of Locomotives, cars, and machinery	54,399 65	
Fuel—cost and labor in preparing	65,960 30	
Operating road and transporting passengers and freight	230,295 67	
Office expenses, salaries, etc	13,657 08	
		448,191 06
		$670,720 70

Disbursed as follows, viz:

Interest on bonds	$41,050 00
Transit duty on passengers and freight	17,777 66
Taxes on capital stock	18,745 00
Dividends in cash, August and February	374,900 00
Profit and loss to surplus earnings	218,248 00
	$670,720 70

The number of passengers transported over the road during the year was as follows:

Over the whole line of the road	307,884½
Between Jersey City and Newark	1,306,226
" " " Elizabeth	225,759½
" " " Rahway	82,410
" " " N. Brunswick	86,762½
All intermediate places	824,070½
Total	2,833,113

The number of miles run by passenger, freight and other trains was 522,731.

The number of tons of goods, wares and merchandise transported over the road during the year was as follows:

Over the whole line of the road	1,587
Between Jersey City and Newark	45,016
" " " Elizabeth	4,174½
" " " Rahway	6,703½
" " " New Brunswick	13,621
All intermediate places	44,551
Total	115,653

GENERAL STATEMENT.

Capital stock		$3,749,000 00
Funded debt, [including $485,000, the cost of the property and privileges purchased of the Jersey Associates]		688,000 00
Profit and loss, being surplus earnings expended in the construction of the road, and in payment of the property stated below		716,069 43
Less amount paid for improved pivot draw for Hackensack Bridge, relaying road with new rails and other improvements	28,500 00	
		687,569 43
Dividend, 1st January, payable 1st February, 1861	187,450 00	
		$5,812,019 43

COST OF RAILROAD AND EQUIPMENT.

For graduation and masonry, bridges, superstructure, iron, passenger and freight stations, buildings and fixtures, engine and car houses, work-shops, machinery and fixtures, engineering, land, and land-damages		$3,589,030 87

Cash in bank and cash items on demand		62,423 15
		$5,812,019 43

John S. Darcy, *President.*

J. P. Jackson, *Vice Pres't and Gen'l Sup't.*

H J. Southmayd, *Treasurer.*

F. Wolcott Jackson, *Secretary.*

Old Colony and Fall River Railroad.

The annual meeting of this company was held in Boston on the 31st ult. The report of the directors show that the receipts for the fiscal year ending Nov. 30, 1860, have been:

From passengers	$428,958 51
" freight	226,471 79
	$655,430 30
The total expenses were	340,148 16
Leaving the net earnings	$315,282 14
The increase of receipts over the former year was	$8,674 78
Decrease in expenses	10,525 55
Increase in net earnings	$19,200 33
The balance of income on hand, after deducting dividend of January 1860	$567,321 08
Add net earnings for 1860	315,282 14
	$882,603 22
Deduct dividends July 1860, Jan. 1861	180,906 00
Leaves credit of earnings	$701,697 22

STATEMENT OF THE DEBT.

The debt of the company, Nov. 30, 1859, was:		
Bonds	$134,500 00	
Floating debt	60,900 00	—195,400 00
November 30, 1860:		
Bonds	$107,000 00	
Floating debt	76,500 00	—183,500 00
Decrease of indebtedness		$11,900 00
Stock on hand Nov. 30, 1860		$135,938 00
The amount of property not required for use is estimated at		204,240 00
The sinking fund consists of 3,601 shares Old Colony and Fall River Railroad stock, for investment, at cost		271,214 16

The Directors have again applied to the Legislature for leave to extend the road to Newport in Rhode Island.

Louisville and Nashville Railroad.

We have received the report of this company for the fiscal year ending September 30, 1860. From this we learn that the connection was made with Nashville the latter part of October, 1859, and that the cars commenced running through the 1st of November of that year. The financial condition of the company is brought down to the close of the fiscal year, excepting the earnings and operating expenses—these are given for September 1859, but not for September 1860, except the mail service on the main stem and Lebanon Branch. The report embraces two months (September and October, 1859.) during which there were thirty miles of staging, and ten months of through operations, and includes the operation of the Lebanon Branch which was completed to Lebanon, 87½ miles, and has been operated in connection with 30 miles of the main stem since November, 1857. The earnings during the period named are given in the report of the Superintendent of transportation as follows:

	Main Stem.	Lebanon Br.
From passengers	$336,077 46	$28,904 85
" freight	270,932 14	34,176 00
" express	17,371 24	3,056 85
" mails	21,258 33	3,750 00
	$645,639 17	$69,887 70
Earnings on main stem	645,639 17	
Total on main stem and branch	$715,526 87	
From rents	951 75	
Total earnings from all sources	$716,478 82	

The expenses during the same period have been:

Repairs of road	$112,432 13	
" engines	22,938 08	
" cars	19,264 70	
" bridges	9,067 45	
" buildings	3,825 43	
Train expenses	99,096 44	
Salaries	10,114 25	
Damages	7,811 10	
Fuel	40,334 92	
All other expenses	20,531 72	
		345,356 22
Net earnings		$371,122 60

being 51.80 per cent. of the gross earnings.

Accompanying the report of the Superintendent is a schedule showing classified articles carried northward and southward, both local and through. From this we learn that the local tonnage northward was 33,134; do. southward 27,216; the through tonnage northward was 1,103; do. southward, 16,486—making a total of 77,939. The mileage of local freight northward was 1,222,258;

do. southward, 1,849,527; the mileage of through freight northward was 202,872; do. southward, 8,055,864—making a total mileage of 6,330,521.

The number of through passengers carried northward was 9,485; do. southward, 7,785; the number of local passengers carried northward was 72,729; do. southward, 69,968—total passengers carried, 159,967. The total mileage of passengers northward was 4,463,157; do. southward, 4,118,249—total mileage of passengers 8,643,406.

The total number of miles run by engines during the yearwas 613,803.

The Memphis Branch was opened to Clarkesville in the latter part of September, 1860, and was put in operation a few days before the annual meeting of the Company on the 1st of October.—Thence to Paris, the work was being pushed vigorously forward by the Louisville, Memphis and Clarkesville Company. At the present time but 12 miles remain to be laid, and the prospect is that through connection with Memphis will be made early in the coming March.

The completion of the road and branches, including bridging, ballasting, etc., together with road repairs, repairs of motive power and rolling stock, and the construction of cars has been confided to Albert Fink, Esq., formerly in charge of the machinery department of the northern division of the road. His reports and exhibits give in detail all that has been done under his direction during the year, with the cost under each head; together with the estimated cost of completing and equipping the main stem, including one-half of the cost of 10½ miles double track from Nashville to the divergence of the Edgefield and Kentucky railroad. The latter company having under the provisions of their charter to construct the other half. The estimated expense is $762,500. It will also require the sum of $63,000 to fully complete the Lebanon Branch.

The accounts of the Main Stem and each of the branches are kept separate; but the stock for both branches was subscribed as stock in the Louisville and Nashville Railroad, and both branches, as well as the main stem were contracted for and constructed in the name of and under the direction of the president and directors. The eport says:

A consolidated statement is given of the expenditures on the Main Stem, and on the Lebanon and Memphis Branches up to the 30th of September, 1860, and the combined financial conditions of them on said day.

It appears from the reports of the first and second years' operation, the expenditures on the Main Stem to the 1st of Oct., 1853, were. $115,861 85

The third and fourth years no report appears.

The 5th year to Oct. 1st,	1856	$1,467,260	26
" 6th " "	1857	2,289,150	19
" 7th " "	1858	3,834,980	07
" 8th " "	1859	6,127,202	15
" present report "	1860	6,674,248	53

Thus the sum of $546,956 38 has been added to the construction during the last fiscal year. Of that amount the sum of $113,887 86 is for the Cumberland River Bridge, which was constructed under the superintendence of the Engineer of the Edgefield and Kentucky Railroad Company. The expenditure was made previous to the 1st of October, 1859, but the accounts were not in a condition to be entered upon our books. Deduct the sum of $113,887 86 from $546,956 38, leaves $433,068 52 as the expenditures for construction of the last fiscal year.

The sum required to complete the Main Stem with full equipment, including ballasting, bridging, water stations, way stations, fencing, etc., is estimated at $762,500, which added to the $6,674,248 53, expended to the 1st of October, 1860, will make the cost $7,436,748 53.

The Lebanon Branch was put under contract prior to the 1st of July, 1855, and it appears from the books there was expended to—

October 1st, 1855	$70,112	45
" 1856	372,321	75
" 1857	729,170	35
" 1858	905,201	72
" 1859	1,000,435	16
" 1860	1,007,736	13

The Memphis Branch was put under contract in December, 1858, and there was expended to—

October 1st, 1859	$121,753	08
" 1860	848,733	49

The next year will add to it the additional sums required to complete it which it is expected will not exceed the Engineer's estimate of $960,000, and interest and discount.

In keeping the accounts of the Main Stem and each of its Branches, the interest paid on money, borrowed and discount allowed on the sale of securities, has been charged to construction under the head of interest and discount, and credited with interest received.

Up to the 31st August, 1858, the interest on Lebanon Branch securities, etc., was charged to construction of the Branch. Since that period the interest has been paid out of the Branch earnings. Previous to the first of January, 1860, the interest paid on the securities, etc., of the Main Stem, was charged to construction. Since then, by order of the Board, the interest on securities and money borrowed has been paid out of the net earnings.

The excess of earnings over operating expenses and interest on the Main Stem has been carried to the credit of interest and discount, and amounts to the sum of $440,358 since the commencement of business on the road.

The excess of earnings on the Lebanon Branch over operating expenses and interest since the commencement of business upon it, is $14,557 26, and has been charged to the Main Stem.

An examination of the Secretary's Report as to the financial condition of the Main Stem and Lebanon Branch, makes it apparent that after paying the floating debt, the Company have no funds to meet the estimated cost of completing either the Main Stem or Branch, and must await the surplus earnings after paying expenses of operating and interest on the debt, or resort to a second mortgage. The President and Directors deem a second mortgage inexpedient for many reasons, and apprehend the surplus earnings will not furnish the means, after paying operating expenses and interest on the mortgage and other debts of the Company, fully to complete the road at as early a period as they might desire. There will be due $25,000 of the

Mort. Bonds of the Lebanon Br.	March 2, 1861
Same amount	March 2, 1862
Same amount	June 2, 1862
$50,000	June 2, 1863
$50,000	June 2, 1864

Payment of one per cent. into the State Treasury of Tennessee commences in 1864, on the amount of State Aid Bonds received from the State, to the sinking fund required by the charter for the redemption of the Tennessee State Aid Bonds. This will leave the surplus earnings under the control of the President and Directors, for the payment of any residue of the floating debt that may remain after applying the existing means, and to the completion of the road, until the 1st day of January, 1866, when the first instalment of the mortgage bonds of the Company on the Main Stem becomes due.

The gross earnings of the Main Stem and Lebanon Branch amounting to $716,478 82 the past year, with the addition the Memphis Branch may bring to the Main Stem, and its own earnings, with present prospects, cannot be estimated at more than $800,000 or $850,000 for the current year, but with good crops and southern connections we may fairly estimate $1,200,000 for future years.

Gross earnings to the amount of $100,000 per month, until January, 1866, will enable the Company to pay the operating expenses, interest on the debt, the Lebanon Branch income bonds as they mature, and the required sinking fund to the State of Tennessee, and any balance of the floating debt that may exist, and complete such parts of the road as may require the outlay; but should the earnings be much less, some of the estimated items for completing the road must be postponed.

The Company had upon the road 30 locomotives, eleven of which had been placed upon the road during the past year. In addition to which four coal burners were being built by the Schenectady Locomotive Works to be delivered in October and November last. Four freight engines had also been ordered from M. W. Baldwin & Co.

There had been built at the Company's shops at Louisville during the year, nine passenger, three baggage, sixty box, five caboose, and thirty-four flat cars. The rolling stock constisted of 20 passenger, 8 baggage cars, 145 box cars, 124 flats, and 178 other cars.

General Ledger Balance.

The office of the Company is at Louisville, Ky. The officers and directors are:

President—James Guthrie.

Directors—Thos. Quigley, H. D. Newcomb, Eugene Underwood, Jos. C. Guild, Jas. B. Wilder, Wm. Garvin, B. J. Adams, H. C. Seymour.

Secretary—Willis Ranney.

Sup't of Transportation—John B. Anderson.

Superintendent of Machinery and Road Department—Albert Fink.

☞ Governor Banks has arrived at Chicago and has entered upon his duties as Vice President of the Illinois Central Railroad.

Journal of Railroad Law.

TRANSPORTATION CONTRACTS; POWER OF COMPANIES TO ENTER INTO; BEYOND THEIR OWN ROUTES.

Among the many questions of law which the modern improvements or changes in the mode of conducting business are constantly presenting to the consideration of the courts, we find one of some novelty and interest recently considered by the Supreme Court of the State of Maine. The questions involved were whether a company organized in one State, had, under such organization, power to make contracts to convey passengers or merchandise beyond the limits of their own road, over the routes of other companies, to a distant place of destination; and, admitting that they had not such power under their charter, whether they would be permitted to set up such a defence against a person to whom they had held themselves out, as having such power, and thereby induced him to entrust his goods to them for transportation.

The action was brought by one Perkins against the Portland, Saco and Portsmouth Railroad Company, for the value of a quantity of furniture received by them for transportation. The goods were delivered to the station agent at Biddeford and were carried by the defendants to Portsmouth, and sent thence to Boston, by an arrangement between them and the Eastern Railroad Company by which the two corporations mutually conducted their business. The defendants did not appear to have had any care, nor to have exercised any control, directly, or indirectly over the property after it was delivered in Boston. From that place the furniture was forwarded from one point to another, by the different railroad or steamboat companies on the line, each paying previous freight and receiving it, with their own charges, of the next company; the goods were finally lost on board of a steamer on Lake Michigan.

The individual who received the goods was the general agent of the defendants, to contract for the transportation of passengers or merchandise from the Biddeford station.

The defendants were incorporated in 1837, with authority to construct a railroad from Portland to Portsmouth, and to exercise their corporate powers "for the transportation of persons, goods and property of all descriptions," and it was urged that the corporation being the creature of law, with no powers but those conferred by the charter, its agents could not bind it by any contract to transport persons or property except upon its own railroad.

It was contended that the company had no authority to become carriers on other routes, and that any agreement to do so, being beyond the scope of the corporate powers was void.

The following is the opinion of the Court upon the foregoing facts.

DAVIS, J.—It is quite clear that a common carrier, if a natural person, may contract to carry persons or property beyond his own line, and thus make the carriers, upon the connecting lines, his agents. In such case he is responsible for any loss or injury upon any part of the route.

Whether the same rule applies, and to the same extent, to corporations chartered as common carriers upon lines designated in the statutes, by which they are created, is not so clearly settled in this country. In England the law is well established, by a series of decisions, that the same rule applies to railway companies as to natural persons. And in either case, if common carriers receive goods marked to be delivered at a place beyond the limits of their own line, they undertake, *prima facie*, to carry the goods to their destination and are bound to do so, unless they limit their responsibility by express agreement or notice at the time their goods are received. In this county the rule is different. If a railway company receive goods marked for delivery at a place situated beyond the line of their own road, they are only bound, in the absence of any special contract, to transport and deliver them, according to the established usage of the business, to the carriers of the connecting line, to be forwarded to their ultimate destination. In all these cases it is admitted, or assumed, that a railroad company may, by a special contract, bind themselves to deliver merchandise beyond the line of their road, and in such a case they are bound as common carriers for the whole route. But in none of the English cases cited, except the last one, was any question raised in regard to the power of the company under their charter.

In that case this point was presented; and though the contract was to carry goods to a place beyond the realm, the company were held liable, on the ground that they held themselves out to the public as common carriers to that place, and were thereby estopped from denying it.

The same question was raised in this country in the case of Noyes *vs.* R. & R. Railroad Company, and it was held that a contract to send barges to a place not on the line of their railroad for a quantity of hay, and to transport it from that point over their road, was within the scope of the powers conferred by their charter. Redfield, C. J., the learned author of the treatise on railways, in delivering the opinion of the Court, says: "It may be true, in one sense, that this is extending the duties and powers of the company beyond the strictest interpretation of the words of the charter. But the time is now past, when as between the company and strangers, any such literal interpretation of the charter is attempted to be adhered to."

A different doctrine is held in Connecticut. In the case of Hood *vs.* N. Y. & N. H. Railroad, it was held that a contract to carry a passenger from New Haven to Farmington, by railroad, and thence to Collinsville by stage, was not binding on the company, on the ground that the company had no authority, by their charter, to make such a contract. But we are not aware that the doctrine has been carried to this extent in any other State.

We are satisfied that the better opinion both upon principle and authority is, that a railroad company may be bound by a special contract to carry persons or property beyond their own line. In granting the charter, all incidental powers which are necessary to the proper and profitable exercise of those which are specially enumerated, may be presumed to have been conferred by implication. The business of common carriers between different places in our country is intimately interwoven and complicated; and it is sometimes of great public convenience, if not of absolute necessity, that several combine their operations and thus transport passengers and merchandise by a mutual arrangement, over all their lines, upon one contract, for one price. The authority to do this may be regarded as one of the incidental powers granted by the charter. In such cases each company is liable for the whole distance.

We think that a company may be bound, even without an actual arrangement with connecting lines, if, by their agents, they hold themselves out to the public as common carriers beyond the limits of their own road. And if such agents so represent the company to the public, in such a manner, or for such a length of time, that the corporations may be presumed to know it, and therefore assent to it, the company will not be permitted to deny either their own authority or that of their agents; and, unless prohibited by statute, in express terms, or by implication, the company will be bound by their contracts. In the language of Redfield, C. J., "if the corporators acquiesce in the extension of the business of the company, even beyond the strict limits of the charter, and strangers are thereby induced to contract upon the faith of the authority of the agents of such company, the company are not at liberty to repudiate the authority of such agents when their transactions prove disastrous."

It only remains to apply these principles to the case before us.

The plaintiff relies upon a special contract to deliver his goods in Bloomington, in the State of Illinois. The place of delivery being far beyond the line of transit under the control of the defendants, it was not sufficient for the plaintiff to prove that the contract was made by one of their subordinate agents. The authority of such agents must be proved, or some facts established which will preclude the company from denying it.

This might be done by proof of express authority conferred upon the agent by the corporation, or by the directors. For even if the company had no authority by their charter to contract for the transportation of goods to places so remote, and could have been enjoined or restrained from doing it, by proper proceedings, they cannot plead such want of authority against persons so contracting with them. To do this would be taking advantage of their own wrong. But the evidence in this case fails to prove that the corporation undertook to confer any special authority upon the agent to make such contracts.

If there was no express authority conferred upon the agent, it might have been implied from a mutual arrangement for the carrying business among all the carriers between the point where the goods were received and the place of delivery. When such an arrangement actually exists, there is an implied authority on the part of the agents of each company to bind them all. But the evidence in this case is conclusive, that no such arrangement existed between the defendants and any other companies for the transportation of persons or property to any place beyond Boston.

Assuming that the agent had no actual authority, express or implied, to make such a contract with the plaintiff, are the company estopped from setting up such a defence?

It appears in evidence that this same agent had had charge of the business of the company at the Biddeford station for several years, and that he had been accustomed to making contracts similar to the one in suit, to deliver goods at various

places beyond the line of their own railroad, in this State, in Massachusetts, in Connecticut and in Canada. The nature of these contracts, a great number of which have been proved, is such that the manner in which the agent was doing business and representing the company to the public, must have been known to the directors, and to many of the corporators. By permitting this to be done, and retaining the agent in office, their assent may be presumed. And though this question of fact is not entirely free from doubt, a majority of the Court are of the opinion that strangers might well suppose that the agent was acting within the scope of his authority, and that the company are therefore estopped from denying it. According to the agreement of the parties, judgment must be entered for the plaintiff for the value of the goods at the place of delivery, less cost of transportation, he having paid no freight thereon.

Cape Cod Railroad.

The income of this road for the year ending November 30, 1860, was $123,386
And the expenditures 78,026

Leaving net earnings $45,360

The annual report shows a reduction during the year of funded debt of $21,600, and of floating debt, $29,941—an aggregate reduction of debt during the year of $49,540. The remaining debt is now less than $175,000. The cost and equipment of the road has been $1,031,625.

Interest and Dividends.

The Buffalo, New York and Erie Railroad Company has declared a stock dividend of 25 per cent. The net earnings of the last two years has been invested in rolling stock and improvements.

The New York Central Railroad Company has declared a semi-annual dividend of three per cent. on the capital stock, payable on the 20th instant, upon stock registered at New York, Boston or Albany, and on the 20th day of March next upon stocks registered at London. The transfer books, which are now closed, will be reopened at New York, Albany and Boston, on the morning of Friday, the 22d day of February instant.

Pacific Railroad.

We learn that this road is progressing, notwithstanding the general financial trouble. The heavy work in Jackson county continues to be energetically prosecuted, while the light work in that county has been unavoidably suspended for a brief period.

The work west of Sedalia, the present terminus of the road, as far as Warrensburg, a distance of thirty-one miles, is nearly ready for the ties, and thirteen miles west of the last named place is placed under contract.

The Southwest Branch is operated to Rolla daily, distant one hundred and four miles from St. Louis, and the road-bed nearly ready for the ties to the Little Piney, twelve miles from there, while the work on the heavy tunnel sections in Pulaski county is continued.

We learn that this is the policy of the Directors to continue the work, looking to some legislation for the road's entire completion.

The Company ordered some months since, four locomotives for the Southwest Branch, from the "Rogers Locomotive Works," and on yesterday two of them were landed on our levee. The Directors named them in compliment of some of the former and present officers. The "Robert Campbell" and "Geo. R. Taylor" are already here, while the "Wm. M. McPherson" and "Hudson E. Bridge," are on the way. Those here are pronounced the most perfect specimen of mechanism ever turned out from the celebrated "Rogers Works," and it is to be hoped that they severally may meet the expectations of the Company.—*St. Louis Republican.*

Nashville and North Western Railroad.

This company have recently withdrawn $180,000 in bonds for the section of 18 miles which has been graded. Tennessee appropriates $10,000 for every mile graded.

Cincinnati and Chicago Railroad.

It is expected that this line will be opened to Chicago by the 1st of March should the weather prove favorable.

Railroad Earnings.

The December report of the Receiver of the Cincinnati, Wilmington and Zanesville Railroad, gives the following:

Earnings from passenger trains		$6,347 99
" " freight "		10,252 41
		$16,600 40
Ordinary expenses	$12,257 08	
Extraordinary "	166 70	
New car	229 86	
		12,653 64
		$3,946 76
Received during December		$14,453 64
On hand December 1		17,469 55
Total		$31,923 19

The November report of the Receiver of the Central Ohio Railroad is as follows:

Balance from last report	$19,286 05
Receipts from earnings	69,501 57
	$88,787 62
Expenditures	42,523 03
	$46,264 59

The earnings of the Hudson River Railroad in January, 1861, were $223,157 37
In January, 1860 ..... 211,713 68

Increase $11,443 69

The earnings in January for the past four years have been as follows:

1858	$176,572 91	1860	$211,713 68
1859	192,161 14	1861	223,157 37

The traffic of the Great Western Railway of Canada for the week ending Jan'y 11, 1860, was as follows:

Passengers	$12,901 87
Freight and live stock	27,449 17
Mails and sundries	1,689 03
Total	$42,040 07
Corresponding week last year	34,791 15
Increase	$7,248 92

The receipts of the Grand Trunk Railway of Canada for the week ending Jan. 26,
were $47,092 48
Week ending Jan. 28, 1860 ..... 52,722 00

Decrease in 1861 ..... $5,629 52
Total traffic from July 1st, 1860 ... $2,008 285 71
Corresponding period previous year 1,566,949 66

Increase $441,336 05

The earnings of the Toledo and Wabash Railroad in January, 1861 were $58,339 33
January, 1860 ..... 43,511 18

Increase $18,828 15

The following is a statement of the earnings of the Buffalo, New-York and Erie Railroad for the month of January, 1861, compared with the earnings for the corresponding month of the previous year:

January, 1861 ..... $36,203 83
January, 1860 ..... 34,046 53

Increase $2,157 30

The earnings of the St. Louis, Alton and Chicago Railroad for January were:

Passengers	$25,915 10
Freight	50,961 81
Mails and Expenses	3,382 82
Total	$80,259 73
Corresponding period 1860	55,734 31
Increase in 1861	$24,525 42

The earnings of the Galena and Chicago Railroad for January, 1861, were $96,983 77
January, 1860 ..... 60,652 72

Increase $36,331 05

—Corrected earnings for the previous month $94,959 55.

The earnings of the Michigan Southern and Northern Indiana Railroad for January, 1861, were $133,694 69
January, 1860 ..... 131,466 55

Increase $7,228 14

The earnings of the Michigan Central Railroad in January, 1861, were $142,333 70
January, 1860 ..... 110,712 23

Increase $31,621 46

The earnings of the Cleveland and Toledo Railroad, in January, 1861, were $84,996 60
January, 1860 ..... 8,169 94

Increase $6,726 66

The following will show the earnings of this road in January for the past eight years:

January earning	1854	official	$41,516 19
"	1855	"	61,853 59
"	1856	"	75,336 96
"	1857	"	77,211 84
"	1858	"	65,211 43
"	1859	"	59 855 62
"	1860	"	78,169 94
"	1861	"	84,996 60

Showing a gain of over one hundred per cent. in seven years. The earnings of January, 1861, it will be seen, exceed by $9,660 the prosperous period of 1856.

The earnings of the Marietta and Cincinnati Railroad in January, 1861, were $40,873 77
January, 1860 ..... 30,913 46

Increase $9,960 31

The earnings by the Chicago Burlington and Quincy Railroad line in the month of January

were in	1860.	1861.	Increase.
Freight	$68,017 42	$97.573 00	$29.555 50
Passengers	33,360 05	30,164 28	* 3,195 77
Mails & Miscel	9,641 97	2,750 50	* 6,891 77
Total	$111,019 44	130,487 78	*19,463 34

* Decrease.

The earning of the Chicago and Northwestern Railroad in January, 1861, were $52,168 53
January, 1860 ..... 32,179 12

Increase in 1861 ..... $19,989 41

This road is now completed as far as Neenah, at the foot of Lake Winnebago, and the cars are making regular trips to that place. The track will reach Appleton, seven miles further, in a few days.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, February 9, 1861.

Camden and Amboy Railroad.

In the preparation of the work on the railroads of the United States, recently published by ourselves we were rigidly scrupulous in applying in all cases to proper sources for information. Our object was to present a record of facts, indifferent as to whether they might bear favorably or unfavorably upon the credit or reputation of the companies.—In other words to be a medium of information between them and the public. Any other plan or motive would destroy all the value of our labors. When we came to the Camden and Amboy Railroad, we sent a competent person to the Treasurer of the company to solicit a statement from him of the character obtained from others, our design being to have an uniform standard for the whole. All information, even as to the dates of the bonds issued, or of the amount of equipment in use on the road, was refused. With the assistance of such meagre reports as the company from time to time had published, and with such documents as we were able to find in the State archives at Trenton, we made out the best statement in our power. Printed slips of this statement were sent to the Treasurer, with a request that he would examine, and verify the same, and furnish us with the statement from the *General Ledger*, of the financial condition of the company, none having been published since 1840! Our slips were returned to us without any correction or reply. We hardly anticipated any other treatment, well knowing that the company acted upon the policy of concealing everything from the public for the better enjoyment of their *monopoly*, now so odious, that the only safety is a rigid silence and the suppression of all information as to its interior management. There are many reasons for this. The company are believed to be yearly using large sums for the manipulation of the Legislature and the news-

paper press of the State, and in this manner to have acquired a power, which completely overrides the popular will and the appropriate functions of Government. The company have another motive for concealing the amount of their earnings for the purpose of avoiding the tonnage and capitation tax paid to the State. If the estimate of the public as to the official integrity of the officers of this company is correct, they would not hesitate to take any steps that would benefit themselves, no matter what they might be. As an illustration that the published statements of the company do not represent its actual condition and operations, we have compiled the subjoined table from the statements made annually, on oath to the Legislature. From this table it appears that the total amount of dividends paid by the company since 1849 have been as follows:

Dividends paid in cash	$3,665,568
12 per cent. div. paid in 1853 in bonds.	360,000
20 " " " 1857 in stock.	600,000
25 " " " 1860 in stock*	949,600
Total dividends paid,	$5,575,168
The net earnings for the same period have been $4,259,499	
Balance of ear'gs Jan. 1, 1849 . 100,203	
	4,359,702
Dividends above net earnings	$1,215,466

If the company have declared dividends exceeding by $1,215,466, the reported net earnings sworn to by the officers of the company, where did the means come from, and how much of the same sort is left?

The increase of capital stock of the company has been chiefly from the stock dividend. The funded debt has increased since 1849, $4,406,524. This has been appropriated as follows:

Construction	$2,833,031
Belvidere Delaware Railroad	1,175,000
Dividends in Bonds	360,000
Subscription to Freehold and Jamesburg Railroad	100,000
	$4,468,031

This statement we submit to the people of New Jersey, and ask whether this company should not as a return for its monopoly make a fair, honest and lucid statement of its affairs? Upon such a basis, the Legislature can proceed in an intelligent manner. Concealments always proceed from consciousness of wrong doing. We adduce indisputable proofs that the sworn statements of the Company are *not* true. Should a sovereign State become party to the fraud by tolerating it, and in this way confessing its inability to cope with a giant and unscrupulous monopoly? Will it allow such a stain to rest upon it? Why should it not treat all its incorporated companies as does the State of New York, and as they live upon the people, compel them to tell how much they get, and what they do with their money? If everything is fair and above-board, let it be seen. If there be fraud and rascality, let us know that also. There is no danger that the Legislature will be unjust to any railroad. It is the duty of every man in New Jersey, who has a particle of manhood, to say to the Camden and Amboy Railroad Company: "Let us see how you stand and what you are doing." A refusal to answer should be taken as a confession of judgment against the company. This is the issue to make and if pertinaciously adhered to, will triumphantly carry the State against this odious monopoly.

* We assume the *net* earnings of 1860, were reserved to meet contingencies, as in 1849.

Cincinnati and Cumberland Gap Railroad.

A. G. Grower, Esq., engineer of the Lexington and Southern Kentucky Railroad Company, who was selected by the Southern Railroad Committee to collect information in relation to the various proposed routes, and the general topography of the country to be traversed, has performed this duty in a most satisfactory manner, and is now ready to report to the Committee. At an informal meeting of the Committee with Mr. Grower, on Saturday, we had an opportunity of inspecting a large and valuable map prepared under his direction, and embodying the information desired by the Committee. The map is 54 by 80 inches, and embraces the entire States of Kentucky and Tennessee, and parts of the adjoining States of Ohio, Virginia, North and South Carolinas, Georgia, Alabama, Mississippi, drawn to a scale of six miles to an inch. It contains the surveys and topography of the lines run by the several parties who having heretofore explored the country, with the view to the construction of railways, as follows: 1st, the route by Maj. McNiel, styled the old Charleston survey, from Lexington Ky., to Charleston, S. C. via Knoxville, Tenn.; 2d. a route surveyed in 1854, under the direction of M. B. Prichard, Esq., from Knoxville, Tenn., to Danville, Ky.; 3d, a route surveyed in 1852 and 1853, under direction of A. G. Grower, Esq., as a Southern continuation of the Kentucky Central Railroad; 4th, a route surveyed under the direction of Capt. Childs, from Nashville, Tenn., to Danville, Ky. The map also exhibits the various completed and proposed connections with Memphis, Chattanooga, and the systems of the different States lying north of Tennessee. We look upon the data now in the possession of the Committee as demonstrating the feasibility of the plan originally advocated by us—viz: a Great Southern trunk line to Chattanooga, with branches to Knoxville, Nashville and Memphis. Notwithstanding the present unpropitious condition of the political atmosphere, we hope to yet live to see the consummation of this most important work. With that once accomplished, the Kentucky Central Railroad becomes of more importance to Cincinnati than the united value of all the railway facilities she now possesses. Had this city and Southern interest united years ago in prosecuting this scheme to completion, a bond of *Union* would have been established which the schemes of demagogues could not have shaken—*Cincinnati Commercial.*

The Cincinnati Committee having this subject in charge speak in high terms of the manner in which Mr. Grower has performed his duties, and passed in his favor the following complimentary resolution.

Resolved, That the thanks of this Committee be tended to A. G. Grower, Esq., for his valuable services in procuring information and superintending the making of maps, &c., for the use of the Committee.

The construction of this proposed work, with peaceable times, would, we have no doubt be immediately commenced. It would prove an invaluable auxiliary to the trade of Cincinnati, and would do more for Kentucky than any work which could engage her attention.

Springfield, Mount Vernon and Pittsburg Railroad.

The road-bed, right of way and real estate of this company, extending from Springfield to Delaware, including the tools, machinery, shops and rolling stock, were sold at Sheriff's sale on the 29th ult. Frederick A. Lane, of this city, was the purchaser of the entire property for the first mortgage bondholders, at $100,000.

Toledo, Logansport and Burlington R. R.

Mr. Henry B. Plant has been appoined Superintendent, and Mr. J. V. H. Lott, Treasurer and General Freight and Ticket Agent of this road.

Illinois Central Railroad.

The sales of land by this Company in January were larger than in the same month of any previous year. The sales made are in small tracts, averaging less than 70 acres to each settler. Quite a colony of Germans have made purchases and the company have advices from Sweden of a party making up for a settlement on the company's lands, in the central part of the State, this Spring. The sales in January amount to $181,635 91, and the cash collected $72,273 44, Last year the sales in January were $39,386 81, and the cash collected $50,054 22.

The Erie Railway Company.

The annexed circular has been issued by the Trustees of the Erie Railroad, by which it will be seen that all parties who do not come into the new arrangement before the 29th of July next will be entirely cut off.

To the stockholders and unsecured and judgment creditors of the New York and Erie Railroad Co:

The entire property and franchises of this company were to day sold, on a judgment for foreclosure on the fifth mortgage, and were purchased by the undersigned, as Trustees for all the unsecured and judgment creditors and stockholders of the company. The contract creating us Trustees for that purpose was dated Oct. 22, 1859, and has been already executed, and the securities surrendered, by

Unsecured and judgment creditors, to the amount of..... $4,426,000
Stockholders, to the amount of 7,000,000

We are, by the terms of our bid, to pay for the possession of the road the whole amount of mortgage interest that is found to be in arrear when we make the payment, and we have the right to do this at any time before the 31st of December next, and must do it on that day, if not done before. We cannot state what that amount will be, because it is liable to be reduced by the application of a part of the net earnings of the road between now and then to its payment.

All unsecured creditors and stockholders becoming parties to the contract are liable to be assessed as follows:

1. One-eighth of one per cent. for expenses of the trust, payable absolutely when the new shares are issued, and not reimbursable.

2. A *pro rata* assessment of the amount necessary to be paid to the reference in order to complete the purchase payable at the same time, and reimbursable with interest, out of the first net earnings of the road. What this amount will be we cannot say: nor can we say whether the Directors of the Company, to whom we shall submit the question, will advise to make an assessment, or whether they will prefer to make a loan for the required amount.

We have obtained from the State of New York an act of incorporation of the stockholders and unsecured creditors of the Company, under the name of the Erie Railway, which will be organized as soon as circumstances permit. All such creditors and stockholders as surrender their bonds, debts, or certificates into the Trust, and pay the assessments levied, will become entitled to receive certificates of stock in said Erie Railway Company on its organization, as follows:

Holders of bonds of 1862, for the principal of their bonds and interest up to July 1, 1861, in preferred stock, bearing interest at the rate of 7 per cent. per annum when earned in the current year.

Holders of bonds of 1875, for the principal of their bonds and interest up to August 1, 1861, in like preferred stock.

Holders of bonds of 1871, for the principal of their bonds and interest up to August 1, 1861, in like preferred stock.

Holders of judgments against the company, for the amount of their judgment, with interest to January 28, 1861, the day of the sale, in such preferred stock.

Holders of other debts of the company, for the amount of their respective debts and interest to January 28, 1861, if the same bear interest, in like preferred stock.

The holders of the stock of the New York and Erie Railroad Company will be entitled to receive an amount of common stock in the Erie Railway Company equal to the amount of their present stock. Parties who do not come in before July 29, 1861, will be entirely cut off. We cannot say how long the books of the old company will be kept open, nor when the books of the new one will be opened. Due notice of this will be given. Meanwhile, we request all persons, wishing to become parties to the new company, to bring in their securities, as, in order to organize the new company, it is necessary to know the whole amount of the unsecured debt of the old company.

DUDLEY S. GREGORY,
J. C. BANCROFT DAVIS,
New York, Jan. 28, 1861. Trustees.

The Proposed Extension of the Baltimore and Ohio Railroad Across the Potomac.

John W. Garrett, Esq., President of the Baltimore and Ohio Railroad Company, has addressed a printed letter to the Chairman of the House Committee, in reference to a bill to authorize the Baltimore and Ohio Railroad Company to extend the Washington Branch of their road to the Potomac river and across the same, for the purpose of connecting with Southern railroads, and which, originally reported to the Senate, passed that body in an amended form on the 21st of December, and is now to be considered by the House.

Mr. Garrett expresses the willingness of the Company which he directs to engage in the work of completing so necessary a link in the great chain of railways connecting the North and South, if the original grant should be awarded it, but adds that his company, which is interested to the extent of only forty miles in the route, does not regard the grant as a boon, but rather in the light of a great public convenience, and it is unwilling, therefore, to accept it with the imposition of burdens in the shape of taxes upon its property within the District, or restrictions as to the character of the bridge to be constructed over the Potomac. The reputation of the Baltimore and Ohio Railroad Company should guarantee, he says that the work will be built in accordance with the best approved theories of engineering. Nor will the Company accept an act to be modified at the pleasure of Congress, which is a peculiarity of the amended bill.

Another objection to the original bill is thus alluded to and disposed of:

This company is aware that complaint has been made in the progress of the discussion upon this question, of the undue benefit accruing to the State of Maryland from travel on the Washington branch, by reason of the capitation tax imposed by Maryland upon travel on the road. This company certainly does not desire the continuance of the tax. It certainly operates with more severity upon the Baltimore and Ohio Railroad Company than upon the District of Columbia, which supplies a comparatively small amount of the travel to and from Washington.

But, although not in any way responsible for the legislation which the State of Maryland may have seen proper to adopt in relation to this subject, the company cannot forbear to say that the District of Columbia has no reason to complain of the State of Maryland. The whole tax derived by the State from passenger travel to and from Washington is but about $75,000 a year, while it has invested $7,136,000 in the Chesapeake and Ohio Canal; has lost an interest upon this investment the sum of $7,500,000, in all $14,636,000. and now every year experiences a further deficit of $428,000. And this expenditure has principally inured to the benefit of the District cities.—*Baltimore American.*

East Pennsylvania Railroad.

This company was chartered on the 9th of June, 1856. The construction of the road was commenced on the 11th of June, 1857; and completed on the 11th May, 1859. The road is 35 miles in length, extending from Reading to Allentown, at which point it forms a connection with the Lehigh Valley Railroad, and through that road, at Easton, with the Central Railroad of New Jersey. The East Pennsylvania Railroad is therefore a portion of a through line between Harrisburg and New York. The distances are: Harrisburg to Reading, via Lebanon Valley Railroad, 54 miles; Reading to Allentown, via East Pennsylvania Railroad, 35 miles; Allentown to Phillipsburg, opposite Easton, via Lehigh Valley Railroad, 16 miles; Phillipsburg, or Easton, to New York, via Central Railroad of New Jersey, 75 miles—the total distance via this route from Harrisburg to New York being 180 miles.

The annual meeting of the East Pennsylvania Railroad Company was held at their office in Reading, on the 14th ult., at which the annual report was read. From this we learn that the total earnings for the fiscal year ending November 30, 1860, were:

From passengers.....	$31,480 74
" freight	64,154 07
" mails, express, etc.....	3,239 38
Total	$98,874 19
Expenses for same time.....	50,362 23
Leaving net earnings	$48,511 96
Interest on funded debt	42,000 00
Leaving a balance of.....	$6,511 96

The funded debt of the company amounts to $600,000, and consists of first mortgage coupon bonds, bearing 7 per cent. interest, dated March 15, 1858, and payable, the principal March 1, 1888, and the interest semi-annually, 1st March and 1st September in New York and Reading. The sum of $15,000 is to be annually set apart for the purchase and cancellation of these bonds.

The cost of the road and equipment todate eq[illegible] of the report was $1,098,602 78. The report says:

To place the company in an independent position, clear of debt, and the road properly equipped, it will require about $100,000 over and above all the present resources. This will have to be raised by a second mortgage, or sale of stock. If by stock, then the stockholders will have to vote an increase of the capital which is now $500,000, and all disposed of except 185 shares.

The Temple Branch, connecting this road at Temple Station with the Reading Railroad at Tuckerton, is finished, and the amount expended for this purpose up to Nov. 30th, was $10,644 57. The whole cost of this Branch, including land damages, will not exceed $15,000. This branch was built to answer the purposes of the Allentown and Auburn road advocated at one time, with so much earnestness by the friends of that unfortunate project in Schuylkill county. As the people of that great coal region have now got, by the construction of this branch, all that could have been expected from the Allentown and Auburn Road, it is supposed that no one will ever be so foolish as to expend one dollar towards its completion.

During the year $51,990 69 were expended for locomotives and cars, in addition to the $40,816 62 previously laid out for this purpose; making the whole cost of rolling stock now on the road $92,807 81.

In March last the line was opened for the stock trade of the West, and on the 9th of the same

month, the first train of live stock passed over the road from Pittsburg and points beyond to New York. Since then and up to the 30th of Nov. last, 1,393 car loads, or about 13,854 tons of live stock have passed over the road.

With the exception of the stock business the company has been obliged to depend exclusively upon the local trade, and whilst this, at all times, is the safest, yet it is always very slow and tardy in developing, and hence, very discouraging to stockholders.

The iron ore trade is destined to be the great business of the road, and but for the effect of the unfortunate political troubles, causing many of the furnaces to blow out, the income from this source, for the past year would have been much greater.

During the year depots were built for the accommodation of passengers and freight at Allentown, Emaus and Bowers.

The road is in good condition, and nothing has been spared to keep the track and machinery in first rate order. The entire freedom from accident, from the beginning, speaks well for this policy, and at the same time reflects great credit upon the Superintendent, and all the officers and employees of the company.

The officers and directors for the ensuing year are:

President—Edward M. Clymer.

Directors—Edward K. Alburtis, Benj. Williamson, George W. McLean, Horatio Trexler, Edward Brooke, William H. Clymer, Charles H. Hunter, William H. Hiester.

Superintendent—L. C. Voorhees.

Treasurer—J. N. H. Fisher.

Virginia and Tennessee Railroad.

The nineteenth annual meeting of this Company was held at the hall of their depot in Lynchburg, Va., on the 12th of September last, at which the report of the directors and officers for the fiscal year ending June 30, 1860, was presented. From this we learn that the receipts from operations of the road, etc., during the year were:

From passengers	$346,329 73
" freight	336,942 67
" express freight	15,006 70
" mails	41,000 02
" rents	1,207 76
	$740,486 88

And the running expenses were:

Repairs of road	$102,520 05	
" bridges	8,675 91	
" locomotives	44,404 98	
" cars	86,209 53	
" buildings, etc.	8,748 93	
Train expenses	74,672 29	
Fuel	41,436 27	
Oil and waste	10,721 78	
Depot expenses	37,897 54	
Taxes	11,289 17	
Salaries	11,880 00	
Office expenses, insurance, etc.	5,072 89	
		392,523 34
Leaving a net balance of		$347,957 54

—or 46.99 per cent.

The receipts exceed those of the preceding year	$67,592 37
While the expenses have been reduced	1,606 10
Making the increase in net earnings	$69,198 47

Of the above increase in receipts, $12,976 56 was from freight; $49,070 from passengers; and $4,565.49 from express freights—the net gain being about five per cent. upon the cost of the road.

The net earnings after paying the annual interest upon the funded debt, leaves an equivalent to 4.84 per cent. on the capital stock of the Company.

There were transported over the Salt Works Branch, 12,329 tons of salt, plaster, etc., yielding $9,639 45. The same articles transported over the Main Stem to and from the Salt Works Branch, yielded $15,188 03—making a total of $24,817 48. These earnings are embraced in the preceding statement. The cost of maintaining and operating the branch during the year, exclusive of $14,967 04, the interest on its cost, amounted to $7,750.

The number of tons carried west amounted to 26,753; do., carried east, 41,263—making the total tonnage 68,016; being an increase of 8,862 tons over the previous year. The total number of tons transported one mile was 7,193,499. The tonnage per mile of road was 318½.

The number of passengers carried west was 56,742; do. carried east, 52,647—making a total of 109,389; of these, 32,166 were through, and 77,223 way passengers. The increase in passengers over the previous year was 13,226—of which, 3,449 was from through and 9,777 way passengers. The whole number carried one mile was 10,393,309. The number of passengers per mile of road was 512.

The Company have 39 locomotives, 15 of which are suitable for passenger service, 15 for freight, and the balance for light service; 18 first and 9 second class passenger cars, 14 mail and baggage cars, 285 freight and cattle cars, and 75 platform cars, with a full supply of hand, dirt and pole cars. There were purchased two first class and two second class passenger cars, one mail and baggage car and 30 freight cars. In addition to which a number of passenger and freight cars were built in the company shops.

The number of miles run by engines was 480,193. The mileage of passenger cars was 592,536; of mail and baggage cars 502,368; and of freight cars, 1,340,570.

The extraordinary expenses during the year, and which are not included in the running expenses, are for new engines, cars, buildings and telegraph, and amount to $82,751 32.

The value of the rolling stock, machinery, shop and road tools was $618,200; and of materials on hand $120,454 20.

The number of miles of road in operation is 213½. The receipts per mile of road were $3,468; the expenses, $1,838, and the net receipts, $1,630.

The receipts of the Company from all sources during the year, including $104,812 17 on hand at its commencement, were	$1,100,405 54
And the disbursements	1,022,226 62
Leaving as cash on hand	$78,178 92

The receipts from all sources from the organization of the Company were	$9,661,313 11
And the disbursements	9,583,134 19
	$78,178 92

The president, in his report, says:

Your main connections, both East and West, are now, with one exception, completed, and that one so nearly so as to be entirely available for passengers, and with a slight inconvenience for freight also.

One of the greatest difficulties has been the want of proper steam facilities from the junction of the Rails with tide-water to the Northern cities.

Reliable arrangements are now made from Norfolk, City Point, Richmond and Alexandria with side-wheel steamers and propellers, and in a short time a very desirable and important connection may also be made from York river.

It was not until after the close of the last fiscal year that a complete system of through arrangements have been arranged and agreed on, so as to admit of your competing successfully with the Northern and Southern routes for the tonnage of the West and Southwest.

All the parties in interest, with the exception of one, have fully agreed. Only a few details of a local character remain to be arranged so as to put it at once into successful operation.

During the progress of these arrangements the competition between the several main Northern lines running out from New York were so active and determined as to result (to them) in extreme low rates, and the consequence was that this route had to take lower figures than was desirable.—Nevertheless, it was deemed best to organize upon them and when the system was once inaugurated a change of rates could, when practicable, be easily effected upon the principles agreed on upon terms of equality. The directness of this route, of course, gives to it a shorter distance, and consequently, the aggregate rate common to all the routes would give to each line on this a larger *pro rata*.—Fortunately, however, while the through arrangements were being effected on this route, the competing routes referred to, met in convention for the purpose of establishing higher rates, and after agreeing upon general principles of operating, adjourned to meet in September to complete the agreement. The four lines referred to are desirous as your Board are informed, of a union of action with this route, upon a basis of a common aggregate between competing points, fixed at remunerative rates, giving the shipper a choice of routes, and each route to rely upon its natural advantages and facilities afforded.—This is what has been most desired by this route, and it is to be hoped that a full representation will be in attendance. An arrangement of this sort will doubtless inure to the benefit of all. The products of Tennessee and such other portions of the South and Southwest as may be diverted this way, as the import tonnage to these sections, form an important element of business for your road, a large portion of which may be moved with but very little, if any, addition to the organization and appointments necessary to be kept up for the local movements, and which cannot at all times give regular and full employment. Besides a current of traffic flowing along a line, directs attention to it and diffuses benefit generally, by inviting emigration and increasing the local traffic; thus stimulating productions, and thereby enhancing the value of property along the line. It is very apparently most essential, for of whatever may be the local capacity of the country through which your line runs, (and certainly with the proper appliances it is immense) nevertheless the developments so far has not afforded the means of full employment of a road of the capacity of yours, and cannot without the proper stimulant, which in a great measure you have under control, and the use of which would be of mutual benefit,

Your road occupies a position in the general system of improvements, which enables you to make it a trunk to an immense business; having at Lynchburg three lines of improvements delivering to it their entire travel and tonnage, and connecting at Cleveland, in Tennessee, there are various lines in operation and in progress of construction, bringing to it the business of a vast extent of country in Tennessee and part of Mississippi, Alabama and Georgia; whilst other connections in progress of construction more eastwardly, will when completed, add the travel of a large portion of Kentucky. Nevertheless, such is the relative position and direction of contending routes as to render great exertion on your part necessary to secure and retain these important advantages, and avoid being confined to comparatively local business. The result of a successful diversion of this distant and important trade (both

in character and amount) to the waters of the Chesapeake, would soon be a shipment thence direct to foreign markets instead of by the Northern cities, and the *angle of transit* which you now have to encounter would be avoided, and thus a control would be secured which could scarcely be counteracted.

DUBUQUE & SIOUX CITY R. R. CO.
ELECTION NOTICE.

THE first election of directors of said company will be held at their office in Dubuque, Iowa, on Monday the 11th of February, 1861. The stock-books will be closed on the evening of 31st of January, until after the election.

4t2 JAMES M. M'KINLAY, Secretary.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860. tf

THE NEW YORK CENTRAL R. R. CO.

TREASURER'S OFFICE, Albany, Jan. 19th, 1861.

THE Transfer Books of this Company will be closed at the close of business on Thursday, the thirty-first day of January instant, and will be re-opened on the morning of Friday, the twenty-second day of February next.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

12.	" 18	"	1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, February 16, 1861.

Illinois Central Railroad.

We give elsewhere the statement of this Company for the month of January, 1861, by which it will be seen that the gross earnings were $320,-024 17. These are the largest earnings ever made in a single month by this road. In January of last year they were $185,257 00, showing a gain of $134,767 17. This certainly is a most astonishing increase, and foreshadows what this great line will accomplish when the vast fertile country through which it passes becomes as populous and as well cultivated as the counties along the line of the Galena road. We learn that the earnings of the past show an increase over those of the previous year of sixty-seven per cent.. while the expense account has increased only ten per cent. This certainly is the highest possible compliment to the present managera of the oad.

There were forwarded over this road in January. 70,000 tons of freight. Among the prominent articles were: 147,062 bushels of wheat, 1,131,-630, bushels of corn, 133,945 bushels of oats, 28,892 barrels of flower, 2,634 barrels of whiskey, 12,232 barrels of pork, 1,841 barrels of lark, 1,234 tons of hay, 703 barrels of sugar, 3,189 hogsheads of sugar, 2,417 barrels of molasses, 3,787,590 pounds of dressed pork, 2,229 head of cattle, 13,-578 live hogs.

Central Railroad of New Jersey.

We have received an advance copy of the 14th annual report of this company for the fiscal year ending December 31, 1860. The earnings during that time were:

From passengers		$206,280 63
" merchandise		362,482 10
" coal		597,323 99
" mail, express, rents, etc.		19,761 14
		$1,185,847 86

And the expenses were:

Running expenses	$117,375 84	
Wood consumed	79,489 87	
Coal "	32,977 13	
Repairs of road	74,276 29	
" engines	35,628 51	
" cars	20,774 98	
" bridges, buildings, etc...	27,474 22	
Expense account	24,528 42	
Miscellaneous expenses,	11,806 13	
Ferry expenses	51,125 07	
		475,456 46
Leaving balance net earnings		$710,391 40

Disbursed as follows, viz:

Interest on bonds	$192,036 69	
Taxes to State	24,502 07	
Dividends, 10 per cent...	361,460 00	
		577,998 76
Balance, equal to 8½ per cent. on stock, carried to renewal fund		$132,392 64

This renewal fund has been debited as follows:

Expenditures of year on new track, new buildings, tools and other property charged off to cover depreciation in these acc'ts,	$22,840 38	
Expenditures of year on construction balanced by an equal amount of discount on second Mortgage Bonds withdrawn from construction	17,378 21	
		40,218 59
Balance to credit of renewal fund.		$92,174 05

A comparison of the gross earnings of the past with those of the previous year show an increase of $214,145 72
With an increase in expenses of..... 89,740 38

Making the increase in net earnings . $124,405 84

The receipts, expenses and net earnings have each increased about 22 per cent. The earnings from all sources show an advance—the passenger receipts, $19,053 31, or 10 per cent. The freight receipts, $25,847 64, or 8 per cent. The coal receipts, $164,901 67, or 15 per cent.

Of the increase in expenses, nearly one-half of the gross, or $43,169 42 is for repairs of road, equipment, etc. The increase in running expenses is $27,653 05; in consumption of fuel, $16,-134 30; and in general expenses, $3,261 87.

The following table, compiled from the annual reports to the Legislature, shows a gradual reduction in expenses, in eight years, from 57 per cent. of the gross receipts to 40 per cent., and a consequent increase in net earnings from 43 per cent. of the receipts to 60 per cent.

	Receipts.	Expenses.	Net Earnings.
1853..	$349,018	$197,629	$151,389, or 43 p. c.
1854..	378,145	197,349	180,796, or 48 "
1855..	393,729	208,856	184,873, or 47 "
1856..	553,479	258,308	295,171, or 53 "
1857..	682,314	340,502	341,812, or 51 "
1858..	836,934	345,614	491,320, or 58 "
1859..	971,702	385,716	585,986, or 61 "
1860..	1,185,848	475,457	710,391, or 60 "
Total.	$5,351,169	$2,409,431	$2,941,738, or 55 p. c.

Another table, giving a division of the working expenses among the three great leading classes of business, shows the following result:

Passenger expenses	$120,726 88
Merchandise "	156,149 67
Coal "	198,580 01
Total expenses as given above	$475,456 46

—from which it appears that the cost of operating the passenger trains has been 54½ per cent. of the gross receipts of merchandise trains, 43 per cent.; and of coal trains 33¼ per cent.

The report says:

As the number of passengers is yet small for the number of trains run, and as a considerable increase may reasonably be expected, it is probable that the per centage of cost of this branch of the transportation will be reduced. This will not hold good for merchandise, as the trains now carry full loads. The coal per centage shows much more favorably than either of the other classes; but it must be recollected that the Company own no cars, and the car-hire paid is deducted from the receipts; also, that wharves, station grounds, and tracks for the Scranton coal are furnished by the Delaware, Lackawanna and Western Railroad

Company, and allowance made for the same in the price of transportation. The result of the third is thus brought much nearer to a net return.

The average of the whole is 40 per cent., which for ordinary expenses is as high as those of any dividend-paying freight road ought to be. Depreciation, renewals, and extraordinary expenses, call for large sums annually, and in a series of years will require all that can be spared from net earnings after giving a fair return on the capital invested. If made with care, such tables annually furnished by our principal railroad companies, would supply the means of estimating the cost at which business could be transacted, now often totally wanting, and prevent ruinous competition by showing when the cost price was reached. It would also throw much light on railroad management, and assist materially in the development of that economy which has been found, since 1857, to have more to do with the prosperity of a company than a mere increase in business. The success of this Company is owing far more to this than to the prices obtained; for, in fact, the latter are very low. The average rece'pts have been,—for passenger trains per mile run, $1 48; for merchandise trains, $2 73; for coal trains, $1 58. Every passenger has averaged a little over 2 cents per mile; merchandise less than 3½ cents per ton per mile; coal 1½ cents per ton per mile.

The number of passengers carried during the year was 429,288—an increase of 23,349 over the previous year. The number of miles traveled by passengers was 9,433,056—equal to 123,470 through passengers.

The number of tons of merchandise carried was 151,378—an increase of 6,021. The number of tons carried one mile was 6,908,368—equal to 92,112 through tons.

The iron tonnage was 55,355—an increase of 12,294. The number of tons of iron carried one mile was 3,525,356—equal to 55,958 through tons.

The number of tons of coal carried was 854,769—being an increase of 215,819. The number of tons carried one mile was 46,615,764—equal to 739,933 through tons of 2,240 lbs. between Easton and Elizabethport. The increase in Lackawanna coal was 135,182 tons, and in Lehigh coal 80,629 tons. The coal tonnage over the road since its transportation was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.	Increase. Tons.
1856....	98,670	33,325	131,995	.....
1857....	209,950	84,841	294,791	162,796
1858....	417,726	122,923	540,649	245,858
1859....	455,681	183,277	638,958	98,309
1860....	590,863	263,906	854,769	215,811
Total..	1,772,890	688,272	2,461,162	

The number of miles run by passenger trains has been 152,518; by merchandise trains, 133,763: by coal trains, 376,476; by wood or gravel trains, 33,010: total miles run, 695,767—being an increase over the previous year of 140,895 miles. In addition to which the passenger trains have run 40,152 miles on the New Jersey railroad, between Jersey City and Elizabeth, drawn by the engines of that company.

The company own 38 engines, of which 24 are wood burners, 6 are soft-coal burners, and 8 are hard-coal burners. Of these engines, 28 are narrow gauge and 10 are broad gauge. Their condition is reported to be, 30 in good order, 5 in fair order, 2 wanting general repairs, and 1 in the shop for a new fire-box. Six of these engines have been placed on the road during the year. One more broad gauge hard-coal burner was ordered and will soon to be delivered. With the present business, 30 are required for daily use.

The equipment of cars is as follows: 19 first class and 2 second class passenger cars, 7 baggage and small cars, 68 house freight cars, 18 covered cattle cars, 1 open cattle cars, 6 caboose cars, 42 four wheel gravel cars, 10 dirt cars, 103 platform freight cars; and 1 wrecking car. All the cars are in good working order, or are being made so. None have been bought during the year; but as most of the older cars have been rebuilt in the company's shops during the past four years, and larger and better cars substituted, the value each year has been more than maintained.

The capital stock has been increased $1,218,000, principally by the conversion of second mortgage bonds under the privilege which expired June 30th last. It will be observed that $900,000 only of those bonds were extinguished. A much larger amount would have been presented and cancelled, but it was deemed advisable for the company to consolidate all their indebtedness under the two mortgages, by availing themselves of the willingness of the holders of the income bonds, wharf loans, and six per cent. loans, to exchange them for second mortgage bonds, without the privilege of conversion and on an equitable adjustment of interest. Through the agency of large bondholders, the exchange was effected without the bonds coming into the Company's hands; the claims thus acquired were surrendered; and, by virtue of a resolution of the stockholders at their annual meeting, an equal amount of stock was issued in place thereof.

On the first mortgage bonds, which became due the first day of August, the holders were allowed to extend $400,000 ten years to August 1st, 1870. the remaining $100,000, not being presented within the time limited, were paid at maturity, so as to leave the bonded debt just $2,000,000.

While the stock has been increased $1,218,000, the debt has been reduced $1,245,000, showing a reduction in the two combined of $27,000.

The interest accrued, but not yet payable, on the bonds, at the close of the year, namely, five months on the first mortgage, and two months on the second mortgage, has been included in the year's interest, and appears for the first time in the balance sheet as a debt. This is an extra charge on the year's earnings.

CONDENSED BALANCE SHEET.

The company's office is at 69 Wall St., New York. The officers and directors for the ensuing year are:

President—JOHN T. JOHNSTON.

Directors—John T. Johnston, John C. Green, William E. Dodge, Adam Norrie, William S. Wetmore, Benjamin Williamson, John O. Sterns, F. T. Frelinghuysen, Henry D. Maxwell.

Sec. and Treasurer—SAMUEL KNOX.

Sup't and Engineer—JOHN O. STERNS.

Assistant Sup't—JOSIAH O. STEARNS.

The Bergen Tunnel.

This great work was formally opened on the 6th inst. It was commenced in June, 1856, by J. H Mall contractor and S. S. Post chief engineer. The work was suspended October, 1857, during the crisis, for want of funds. It was again resumed in March 1859, under auspices of the enterprising capitalist E. A. Stephens, John P. Cumming contractor, and J. P. Kirkwood chief engineer. In June, 1860, the work was transferred to A. B. Seymour contractor, and Col. J. W. Allen, Bordentown, chief engineer, and John Houston superintending engineer, under whose hands the work is being completed. This tunnel shortens the Erie Railroad about one mile, and opens upon unoccupied ground on the Hudson river, owned by the company called "Long Dock Company of New Jersey." It is designed to run a ferry from this depot to Chambers street, New York, and will be the terminus of the Erie Road for passengers and freight.

The tunnel runs under Bergen hill, and directly under Hudson city. The main street of the city is directly over the tunnel, a considerable distance. There were eight shafts sunk, averaging about eighty feet. It is cut through solid rock a distance of 4,800 feet, its height is 23 feet, and width 28 feet. There are 520 feet of arching where the rock was deemed insecure. The trap rock is very hard, and weighs from 175 to 190 pounds to the square foot. The average number of men employed daily was about 700! During the progress of the work fifty-seven persons were killed, from accidents in the tunnel. The stone taken out was run down an inclined plane, and deposted in the river, to make foundations for suitable buildings of the Company.

Pittsburg and Connellsville Railroad.

We perceive, by the Baltimore papers, that the committee of the city council of that city, to whom was referred the recent application of this company for funds to aid in the completion of their road from its present terminus, to a connection with the Baltimore and Ohio Railroad at Cumberland, Md., has reported adversely to the application. The Connellsville road, to which favorable reference was made in the recent report of the Baltimore and Ohio Railroad Company, is destined to be, when finished, one of the most prolific feeders to the Baltimore and Ohio road of any that now pour freight into her lap. It is now completed to within 91 miles of Cumberland. Along this 91 miles the road has been located and some $200,000 expended at the Summit Tunnel, thirty-three miles from Cumberland. This tunnel is the only heavy work upon the whole line. The tunnel is 4,650 feet long and is finished within 250 feet. It is estimated that $3,500,000 will complete and equip the road.

Railroads and Finances of Tennessee.

In a recent communication to the Legislature, the Tennessee Comptroller writes thus emphatically in regard to the future payment of the interest on *all* Tennessee Bonds advanced to the Railways, upon which the State holds a first and only lien of $10,000 per mile, whether the same have been issued direct or by indorsement:

"The Edgefield and Kentucky, and the Winchester and Alabama, two short railroads, unfinished in their connections or to their original terminl, have failed to meet their January interest. They are now in the hands of receivers appointed by the Governor, for the benefit of the State. Under section 1,106 of the Code, I drew upon the Treasury to pay the interest for each of them—for the first, including exchange, $23,180 15; and for the last, also including exchange, $13,359 90. I have also been notified that the January interest has not been met upon the $350,000 of Memphis City Bonds indorsed by the State for the benefit of the Memphis and Little Rock Railroad. I have directed the interest upon them to be paid in the City of New York, interest and exchange amounting to $10,605.

If all the railroads in the State fail to meet their July interest, it is not presumed the Treasury would have the means to meet it; but, if so improbable a contingency occur, the State would take charge of the roads, and I should draw, under section 1,106, upon the Treasury, and the Bank of Tennessee, without doubt, would furnish the money, trusting to the Legislature in October to protect it and the honor of the State. The interest due next July, upon $12,193,000 of bonds loaned to railroads, will be $365,790, if to this be added the interest due them upon the $2,364,000 of bonds endorsed by the State for railroads, the whole amount would be $436,710. I have heard no apprehensions expressed that the longer and finished roads would fail to meet their interest, but should they do so, I do not doubt the state would promptly pay it."

The balance in the treasury, January 22d, according to the Comptroller's report was $43,140 17; amount due from collectors, $208,672 46; from county, circuit and chancery court clerks, $6,826 09; and the revenue due and reported for collection $89,171 59—making a total of $347,810 21. To which should be added the profits of the Bank of Tennessee, amounting to $244,529 13. Of these profits, however, but $30,391 31 were paid into the treasury, the balance being withheld, the bank alleging that $153,832 66 were bad and doubtful debts, contracted under a former administration of the bank, and that $60,305 08 were due to the bank as a credit, according to the late President's report made to the Legislature, Oct. 3, 1859. Assuming, however, that the bank will for the present year pay its dividends into the Treasury, and that the Legislatnre will not suspend the prompt collection of the revenue, and that the balances due will be paid, the ordinary revenue to be collected ought to meet the existing and current expenses of the State.

Interest and Dividends.

The Pennsylvania Coal Company have declared a dividend of 3½ per cent., payable on the 16th inst.

The Peoria and Bureau Valley Railroad Company have declared a semi-annual dividend of 4 per cent.

The Naugatuck Railroad Company have declared a semi-annual dividend of four per cent. on the capital stock, payable on the 15th inst.

Interest coupons on the second mortgage bonds and bonds of 1861, of the New York and Harlem Railroad Company, due Feb. 1, are being paid at the office of the Treasurer, corner of 4th Av. and 26th street.

Sunbury and Erie Railroad.

At the annual meeting of the stockholders of the Sunbury and Erie Railroad, recently, a report of last year's operations was read. The Company is now asking legislative authority to issue $5,000,000 of bonds, which, it is estimated, will realize 80 per cent. of their face, or $4,000,000. Of this there will be required to redeem

the scrip issued	$582,800
The floating debt of the Company	585,289
Balances due contractors, &c	572,116
To complete the road, as per estimate of the chief engineer	1,510,000
Land damages and incidental expenses say	100,000
Leaving applicable to rolling stock	649,794
Total	$4,000,000

Of the ability of the road to earn from the day it is finished, more than the interest on the 7 per cent. mortgage for one million of dollars, and the proposed six per cent. mortgage of five millions of dollars, amounting together to $370,000 per annum, the report says, there cannot be the slightest doubt.

Easton and Hamilton Railroad.

The annual meeting of this Company was held at Eaton, O., on the 4th inst., at which the following Board of Directors were chosen:

David Barnett, Daniel Beckel, John Carlisle, Lurton Dunham, John W. Erwin, Hugh M. Starr, Joseph Torrence, John C. Wright, Wm. Whiteside and Thos. H. Weasner. Some time since a committee of the stockholders, appointed to consult in regard to a capitalization scheme, recommended the appointment of a committee on the part of the stockholders, the bondholders and the floating debt creditors, to arrange a basis of capitallization. The meeting of stockholders, adopted the suggestion, and appointed, on their behalf, David Barnet, Joseph Torrence and John H. Hutton.

Illinois Central Railroad.

Mr. Arthur, the Superintendent, now shows from actual results that the ratio of net profits of working the Illinois Central is greatly increased upon large earnings. The January traffic, $326,862 80, was the largest ever earned by the road in a single month. The expenses were $132,092—less than forty-one per cent. The road carried one million five hundred and sixty-three thousand bushels of wheat, flour, corn and oats in January. Three-fourths of this grain was delivered at Cairo. The return freight is cotton, sugar and molasses.

Lehigh Navigation Coal Tonnage.

The coal shipped by the Lehigh Canal was distributed in these proportions:

	1860—tons.	1859—tons.
Passed into Del. Div. Canal	639,323	606,506
Passed over into Morris Canal at Easton	277,083	255,404
Deliv'd at way points on line	174,626	188,779
Total	1,091,082	1,050,689

Mahanoy and Broad Mountain Railroad.

The work upon this road, we understand is all under contract, and, on the heavier sections, the graduation is in vigorous progress on both sides of the Broad Mountain. It is the aim and purpose of the friends of this new outlet, to have it ready for opening for coal traffic, simultaneously with the completion of the East Mahanoy Tunnel, and the inauguration of that more northern route from the Mahanoy coal region.

☞R. F. Morley, Esq., the recent effecient Superintendent of the Alleghany Valley Railroad, has been elected President of the Company.

☞Under the new organization of the Kentucky Central Railroad, G. W. Fulton, Esq., has been elected Engineer and Superintendent of the road, to take effect on the 1st of March proximo.

Pennsylvania Railroad Company.

Office Pennsylvania R. R. Co.,
Philadelphia Feb. 4, 1861,

The Board of Directors, in conformity with the requirements of the charter, submit to the shareholders a statement of the affairs of the Company for the year 1860, accompanied by statements from the treasurer, comptroller and auditor, and the officers in immediate charge of the road and canals of the Company, which give in detail the operations of their respective departments.

It will be gratifying to the shareholders to learn that the increased cereal crops of the West and of our own State have not been without their influence upon the revenues of the Company. The monthly receipts have exhibited a continued excess over those of the previous year until December, when the derangement of the exchanges of the country, from political causes, seriously affected shipments both East and West, from the effects of which there has as yet been but a partial recovery. The interruptions to the flow of trade cannot but be regarded as temporary, to be followed by an increased traffic from the healthy demand that exists South and East for the produce of the West.

The following condensed statement exhibits the results of the operations of your road for the year 1860:

Earnings of the Company from the road:

From passengers	$1,453,992 77
" U. S. Mails	74,504 34
" expresses	75,120 00
" freights	4,191,783 97
" miscellaneous sources	137,300 40
	$5,932,701 48

Expenses of operating the road were:

Conducting transportation	$1,539,361 08	
Motive power	970,490 32	
Maintenance of road	783,163 81	
" cars	260,452 41	
General expenses	82,831 46	
		3,636,299 08
Net earnings of the road		$2,296,402 40

The number of additional trunk lines opened between the East and West, and the enlargement of those in existence during the past seven years, has given transportation capacity considerably in excess of the demands of the existing through traffic of the country. This has resulted in a severe competition between these rivals for the business of common points, which it has been found difficult to regulate upon principles that would insure to each its natural share of the traffic. Hence, rates of transportation have prevailed at times that have been unremunerative, and generally below what has heretofore been considered the minimum at which railway transportation could be maintained. Repeated efforts have been made by the contending parties to lessen the evils of this competition, and insure fair rates, and we feel gratified in that, though the object has not been fully accomplished, yet each successive meeting of the representatives of these interests has tended to diminish the difficulties that have surrounded the subject. One of these has been the vexed question of the proper difference to be allowed for transportation by rail and by water. A discrimination in rates in favor of the latter has been adopted by the trunk lines, which has been equally the subject of complaint upon the part of the Western steamboat and railroad interests This difference in favor of the steamboats was intended to cover insurance and their increased

time in delivery of freights. It is believed to act with as much justice to all interests as any general rule can be made to operate. If the Ohio river or lakes were at all times navigable, a different policy might be adopted.

The earnings of the road during 1859 were $5,362,355 21, showing an increase for the year past of $570,346 27. The increase of earnings from first class passengers is $27,818 64, and from the emigrants $5,261 70, giving an aggregate increase from passengers of $33,080 34. The total number carried during the year was 1,203,444, of which 1,191,613 were first class, and 11,831 emigrants, an increase in the former of 65,124, and of 1,070 in the latter. The mileage of passengers was 55,100,696 miles, or an average of 45.8 miles traveled by each passenger.

The freight earnings of the year exhibit an increase of $535,672 82 over those of 1859, the larger portion of which is due to the local business of the road, which increased 171,869 tons, while the addition to the through tonnage was but 42,147 tons.

The whole tonnage of the road during 1860 was 1,346,525 tons, exclusive of 124,597 tons of wood, coal, lumber and materials for the use of the Company, upon which no charge is made. Of this tonnage there was transported in the cars of the Company 296,885 tons of coal, and in the cars of individuals 226,838 tons, making the entire movement of coal 523,223 tons, an increase over 1859 of 101,598 tons.

The amount of coal delivered in Pittsburg during the year was 138,989 tons, being an additional delivery to that city of 38,687 tons, as compared with 1859.

The expenditures in the motive power department exceed those of last year $106,413 40, which is accounted for by the addition of four new locomotives, the increased mileage of trains (339,222 miles) over those of the past year, and the substitution of copper fire boxes, which experience has demonstrated to be more economical when the bituminous coal of the Pittsburg vein is used. The increased expenditure in conducting transportation has reached $206,320 08, the items of which are mainly such as are legitimately due to the increased business of the road.

To maintain the tracks in the most efficient condition the sum of $82,973 08 has been expended for iron rails, which, with the large renewal of cross-ties, labor on slides and washes caused by the heavy rains of last spring, have increased the maintenance of way expenses $112,063 62.

The maintenance of cars has been charged with the cost of building 25 new stock cars, to cover general depreciation of car equipment. The renewal of wheels and trucks of freight cars, owing to the active traffic on the road, has been unusually large. The increased expenditure under this head is $70,174 07 over that of 1859, while the value of the car stock has been materially improved.

The road superstructure exhibits an improved condition, and it is not anticipated that any extraordinary expenditures will be required for this account during 1861.

The completion of the second track between Lockport and Johnstown, 16.5 miles, would make a continuous double track from Pittsburg to Petersburg, in Huntingdon county. Of the distance from Philadelphia to Pittsburg, 356 miles, there remains at this time but 68 5-10 miles to complete the second track throughout the entire length of the road.

The new engine house and machine shops at Harrisburg will be ready for use by the first of April next, when a considerable saving in the motive power and transportation departments will be effected by simplifying the management of the road.

The increased coal trade from the Broad Top region, seeking an outlet at Port Richmond, has led to an arrangement for the building of 150 eight-wheeled, ten tons, coal cars by this Company, and the same number by the Reading Railroad Company, to be placed on the road and used exclusively in that trade during the present year. This plan, it is believed, will afford the necessary facilities required to develop this important and constantly increasing traffic.

Surveys for the extension of the road to the Delaware river were made in the early part of the year, and a location of a line from a point on the Westchester Railroad opposite the Almshouse to the intersection with the Philadelphia, Wilmington and Baltimore Railroad, was adopted by the Board. A contract was entered into with Messrs. Dillon and Atwood for the masonry of the bridge over the Schuylkill river, who pressed the work vigorously until the middle of December, when the severity of the weather compelled them to stop. At the time the work was suspended the western abutment and pier were nearly finished. The cost of the masonry, including the arches in the eastern approach, will not exceed $100,000. The iron superstructure will be constructed at the company's shops, and will consist of three spans of 180 feet each in the clear, the middle span supported on a pivot pier so as to afford two openings of 75 feet each in the clear, for the passage of vessels. The cost of the iron superstructure is estimated at $40,000.

It is expected that the line will be ready for use to the Delaware river, not later than the 1st of October next. The river front of the Powelton estate has been improved during the past year by the erection of a bulkhead along its entire extent. The accumulation from the ebb and flow of the tide, and the hauling of waste material from the vicinity, will, in the course of a few years, convert the hitherto unsightly and useless marsh into a valuable and productive property.

The earnings of the canals owned by the Company, for the year, 1860, were:

From the Eastern Division		$159,651 08
" Juniata Divisions		26,180 95
" Western "		16,003 57
" Miscellaneous receipts		7,530 23
		$209,365 83

The expenses of maintaining the canals for the same period were as follows:

For repairs, renewals and enlargement	$130,696 79	
For superintendence, collectors, lock tenders, weighmasters, stationery, etc.	24,063 84	
		154,760 63

Leaving the net earnings of the canals, $54,605 20

The increase in canal revenues over those of 1859, was $11,816 45, while the expenses were decreased $20,691 75, thus exhibiting an increase in the net earnings of 1860, of $32,508 20, as compared with the preceding year.

The amount of coal transported on the canals of the Company during the year 1860, was 514,009 tons, being a decrease of 1,357 tons on the amount transported in 1859, and the amount of lumber reached 126,494,299 feet, being an increase of 6,419,624 feet over the amount carried in the preceding year.

The canals purchased from the State were found to be in a much worse condition than their appearance indicated, and hence the expenditures incurred in their maintenance have been larger, and their net revenues consequently less, than we had reason to expect. The net profit of the Eastern or Susquehanna Division for the year was $65,525, and the loss upon the other portions of the canal $18,450 65. With the same amount of revenue, and the works in complete order, the profit on the Eastern Division should have been over $100,000.

The receipts from this portion of the canal are almost wholly derived from the coal and lumber traffic of the Susquehanna Valley, for which the recent completion of parallel railways to the source of this traffic has introduced serious competition. To meet this it seems to be essential that the cost of transit on the canals should be reduced by an increase of the depth of water to five feet, from the coal and lumber region to Columbia, and the locks lengthened to 180 feet by the addition of another chamber, to conform in dimensions with those between Columbia and tide-water. The whole line of canals, from the coal fields to tide-water, thus deepened and improved, would enable them to compete successfully with the railroads, and continue as profitable investments; otherwise they will scarcely remain self-sustaining. The Pennsylvania Railroad Company has already given their portion of the line the required depth of water, and is prepared to lengthen the locks whenever satisfied that the other companies will do the same.

There has been received from shareholders, in payment for the capital stock of the Company, up to January 1st, 1861		$13,261,960 00
And from loans, etc.		10,263,947 38
Mortgages and ground rents remaining on real estate purchases		299,363 84
Amount of bonds due the State of Pennsylvania for purchase of Main Line of Public Works		7,200,000 00
Balance of interest and dividends due to stockholders, and State tax on coupons and dividends unpaid		68,125 05
Balance to credit of contingent fund		352,138 85
Balance to credit of profit and loss, after deducting discount on 2nd mortgage bonds sold during the year		961,589 02
		$32,407,124 14

Which has been expended as follows:

Cost of road, including engineering, land damages, fencing, machine shops, engine houses, station and warehouse, car sheds, water stations, foremen and tool houses, and shop machinery, between Harrisburg and Pittsburg, and station and workhouses in the Philadelphia Division		$17,307,660 29
Less profit of road after paying interest to stockholders, up to November 1st, 1855, credited to cost of construction, as required by charter		589,185 79
Total		$16,718,483 50
Cost of Main Line of Public Works purchased from State of Pennsylvania		7,500,000 00
Cost of equipment of road, including locomotives, freight, road and passenger cars		3,065,284 44
Cost of real estate of Company		1,781,579 40
Cost of telegraph line		45,264 28
Extension of Pennsylvania R. R. to Steubenville & Pittsburg R. R.		5,214 09
Extension of Pennsylvania Railroad to Delaware river		30,616 87
Total cost of roads and canals belonging to the Company		$29,146,442 58
Amount of stock of the Pittsburg, Fort Wayne & Chicago R. R. Co.		816,050 00
Amount of bonds and stock of municipal and railroad corporations		158,494 80
Amount of bills and accounts receivable		895,833 01
Amount of sinking fund	$482,230	
Less this sum to be paid in instalments of $10,000 per month from income of road	83,375	
		393,855 00
Amount of fuel, materials on hand for shops, repairs of locomotives, cars, and maintenance of way		347,736 94
Balance in hands of agents		280,835 67
Balance in hands of Treasurer, December 31st, 1860		867,876 14
		$32,407,124 14

There has been charged during the year, to construction and equipment account, $781,802 69,

of which $221,106 36 has been for real estate at the Delaware terminus, Pittsburg, and along the line of the road. It is not proposed to lay any additional road superstructure this year, except what may be necessary to accommodate an increased business at stations, and the extension of the road to the Delaware river above the Navy Yard.

Under the authority of the act of the Legislature for the sale of the Main Line, this Company has leased the Harrisburg and Lancaster Railroad for the term of 999 years. The shareholders of that Company to receive semi-annual dividends of 3½ per cent. on $1,182,550 of capital stock, and the bondholders the interest upon $700,000, at 6 per cent. per annum, amounting in all to a semi-annual payment of $62,389 25. In addition to this there is to be paid to the Treasurer of that Company the sum of $2,000 per annum to continue the corporation and meet its necessary expenditures. This lease supercedes the contract entered into between the two Companies, April, 21, 1849, which proved to be an unfortunate one for the Pennsylvania Railroad Company, while the mode provided for adjusting rates under it has been a source of vexation to both parties. Its existence was always a source of great weakness in negotiations with the State authorities during their control of the Philadelphia and Columbia Railroad, in the entire dependence which its terms enforced upon the facilities offered by that road to reach this city. The contract was for the term of twenty years, leaving still over eight years for its fulfilment. The question for the Board to decide was whether it was the interest of this company to enter into a lease, which would save to it annually from thirty to sixty thousand dollars, during the existence of the old contract, or rely upon their ability to secure an equally good connection at the expiration of that period, upon more moderate terms. The Board has preferred a peaceable solution of the question, and in accepting the lease directed the trustees of the sinking fund to invest the present saving upon the old contract, until it would have terminated in such a manner as will finally result in the extinguishment of the stock of the Harrisburg and Lancaster Railroad Company. The lease gives the shareholders of that Company the right to convert their stock into shares of the Pennsylvania Railroad Company previous to 1871, each at par, and it is believed that this mode of absorbing the stock of the Harrisburg and Lancaster Company may be carried into effect, from the greater prospective intrinsic value of the stock of the Pennsylvania Railroad Company. The accumulation of the sinking fund proposed at the period for terminating the old contract, will probably amount to four hundred thousand dollars, which, judiciously applied, will soon purchase the entire stock, if it should not be converted into shares of the Pennsylvania Railroad Company.

The sinking fund established by the board for the redemption of the second mortgage bonds, with the accumulation of interest, now amounts to $532,491. An increase of this fund by the transfer to it of the stock and bonds held by the Company in the Pittsburg, Fort Wayne and Chicago, and other railroad Companies, would afford the means, if judiciously managed, for the reduction of this debt when it falls due to an amount which, with the first mortgage bonds, would not exceed on the whole line of the road twenty thousand dollars per mile. These assets, it is expected, will in a few years be worth the amount they cost the Company; but as they yield no direct revenue, their transfer to the sinking fund will not affect the usual sources from which the dividend to the stockholders has been made.

The continuance of an annual payment of $460,000, made last year to the State on account of principal and interest due for the purchase of the Main Line, from the profits of the road, will extinguish that debt by the year 1890.

By steadily pursuing a financial policy calculated to attain these objects, the entire debt of the Company in 1875 will be brought within the amount of its gross annual income—a condition of abundant safety to the shareholders, and which can be obtained without any interruption to your cash dividends. The means thus diverted from the net revenues of the Company can, whenever the amount will justify it, and the financial condition of the country will render the measure prudent, will be from time to time divided among the shareholders in stock.

Since your last annual meeting a plan for the reorganization of the Pittsburg, Fort Wayne and Chicago Railroad Company, whereby that road could be relieved of its embarrassments, has been agreed upon by the representatives of the various interests concerned. This agreement provides for a sale of the road, with all its appurtenances, under a decree of the United States Court, to which the trustees of the several mortgages are made parties. The road will be purchased by a committee appointed by the bondholders, who will operate the same until the election of a new Board of Directors. They will reorganize the Company, preserving the status of the existing interests as nearly as practicable. The holders of the first mortgage bonds of the several original Companies forming the consolidated line are to have a new first mortgage not exceeding $5,250,000 upon the whole line, to include the par value of their bonds, with interest added to January 1, 1862. The second mortgage and construction bonds of the different Companies are to be funded in a new second mortgage upon the whole line, not to exceed $5,100,000, including coupons to July 1, 1859. The coupons accruing after that period and the floating debt to be funded in a third mortgage limited to $2,000,000, bearing a contingent interest (equivalent to a preferred stock) not exceeding 7 per centum per annum. The original shareholders are to retain their full interest in the new Company.

Your Board of Directors, believing this arrangement will best secure the interests of this Company both as shareholders and creditors, have authorized the acceptance of these conditions.

The attention of the Board has been frequently directed to the importance of providing better accommodations for passengers at both Philadelphia and Pittsburg. The reasons for the delay in their erection, that has occurred in both cities, has been a desire to avoid the location of such expensive structures, which future developments may prove to have been injudicious. In Pittsburg the location has been dependent upon the construction of a more direct connection with Cincinnati, of the early completion of which there seems now to be but little doubt, if the present political difficulties of the country are arranged, while at Philadelphia the relative advantages of a site within the old city proper, and one on the west side of Schuylkill river, from which the cars will be taken by locomotive power, have been duly considered. The original decision of the directors was in favor of placing the station at the corner of twelfth and Market streets, but the facilities now enjoyed by the introduction of street railways for the speedy conveyance of passengers from a station west of the Schuylkill river to all parts of the city, has inclined the Board to reconsider their determination and locate it on the flats adjoining the Market street bridge, where the comparatively small value of the property will justify the expenditure necessary to bring the ground to the level of the railway. In view, however of the present financial condition of the country it is not deemed prudent to incur the outlay involved in so large an undertaking during the present year. The system practiced upon all American railways of permitting passengers to take their seats in trains without previous payment of fares, (a necessity imposed by the high price of capital required to meet the cost of inclosing all passenger stations, as in Europe,) has led to the employment of the train conductors as receiving agents, when the passenger has failed to procure his ticket before entering the cars. The temptation to appropriate to their own use receipts thus obtained, a practice to which it is difficult to apply adequate checks, has been found by most Companies too great for many of these conductors to resist. To ascertain whether such practices existed upon this road as had been reported, notwithstanding ineffectual attempts to discover them, a force of detectives was organized, who succeeded, after several months investigation, in obtaining convincing proof of such frauds and the names of the perpetrators, all of whom have been discharged from the service. The annual amount thus abstracted from the revenues of the Company, from politic considerations, was necessarily limited. The knowledge of the certain and effectual means adopted by the Company for the detection of these pilferings, which can at any time be put in force without the knowledge of the delinquent, will it is believed, prevent the recurrence of similar practices.

The melancholy duty has devolved upon the Board of announcing to you the decease of the Vice-President of the Company, William B. Foster, Jr., who passed from among us soon after your last annual meeting. In the performance of his duties he was always exact, but courteous and was highly esteemed for his many virtues as an officer and as a man.

The office of Vice-President has been filled by the appointment of Thomas A. Scott, Esq., late General Superintendent, whose long experience, sound judgment, and great energy of character, has recommended him to the Board as eminently fitted to fill the vacancy.

Enoch Lewis, Esq., a gentleman formerly engaged in the service of the Company as Chief Assistant Superintendent, and who had discharged the duties entrusted to him with much satisfaction to the Board of Directors, was chosen as Mr. Scott's successor. In closing this report the Board takes the opportunity to express their appreciation of the services of the officers and employees generally, to whom their acknowledgments are due for the favorable results obtained during the past year.

By order of the Board,

J. Edgar Thomson, *President.*

Thomas A. Scott, *Vice-President*

South Carolina Debt and Finances.

The official returns of the debt of South Carolina, September 30, 1860, is as follows:—

3 per cent. stock outstanding Oct. 1st, 1860		$ 44,078 63
6 per cent. stock outstanding, fire loan, 1838		385,807 02
5 per cent. bonds, fire loans, 1838		484,444 51
6 per cent. bonds, Blue Ridge R. R.		1,310,000 00
6 per cent. bonds new capitol		500,000 00
6 per cent. stock, new capitol, 1856		250,000 00
6 per cent. stock, new capitol, 1857		300,000 00
6 per cent. stock, new capitol 1858, on 1st Oc. 1859	$369,920	
Issued this year	30,080	400,000 00
6 per cent. stock, new capitol, 1859, issued this year		372,210 00
		$4,046,540 16

The amount due for surplus revenue is not included in the items of the public debt proper, as the general government has repeatedly borrowed money since it was divided among the States, without demanding payment, there is no probability that the State will be required to refund it. The amount is $1,051,422 09.

During the fiscal year the Bank of the State redeemed and canceled the following portions of the public debt:—

6 per cent. stock, fire loan, 1838	$342,524 55
3 per cent. State stock	15,199 39
5 per cent. Southwestern R. R. Bank.	500 00
	$358,223 94

The report of the Treasurer of the Lower Division shews that there was in favor of the State on the 1st of October, 1860, the sum of $1,889,093 35.

The Bank of the State passed to credit of sinking fund the balance of net profits for the fiscal year, amounting to $35,637 89, after retaining four various advances to the State, $95,595 37.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, February 16, 1861.

Share and Money Market.

With regard to the Share Market little can be said but to repeat the old story of the daily fluctuations reflecting the popular feeling in reference to political matters. The question of value hardly enters into the calculation. Such a state of things is very likely to continue till the inauguration of the President, when a more decided tendency in some direction may be expected. Prices are also very likely to be effected by the result of efforts now in progress for the reconciliation of our political difficulties. What this result is to be is as yet only a matter of conjecture.

In money matters there is much uneasiness felt lest our present anomalous position may create very serious disturbances abroad, particularly in England. Our exports continue on an unprecedented scale, while our imports are vastly reduced. The balance in our favor must be paid in gold. Here is a state of things hardly contemplated abroad, and for which no immediate remedy exists but in shipments of specie. Exchange, consequently has again fallen to a very low figure, so that we are likely to have at the same time a plethoria of gold, and suffer a very heavy loss in commercial operations. The uncertainty as to the degree of effect of this disturbing cause operates against any improvement in the Share Market, and discourages business operations.

Penn Haven and White Haven Railroad.

At the annual meeting of the stockholders of of the Penn Haven Railroad Company, held in Mauch Chunk, on the 28th ult., the following officers were elected for the ensuing year.

President—Asa Packer. Managers—Asa Packer, William H. Gatzmer, Robert Lockhart, R. F. Stockton, R. H. Sayre, John N. Hutchinson. Secretary and Treasurer—John N. Hutchinson.

Connecticut River Railroad.

The report of this company for the fiscal year ending Nov. 30, 1860, shows the earnings during that time to have been:

From passengers		$136,337 01
" freight		147,173 96
" mails, express, etc		13,585 11
		$297,096 08
And the expenses were:		
Repairs of road	$39,786 90	
" locomotives	12,281 86	
" cars	13,056 54	
" bridges, buildings, etc	4,674 64	
Train expenses	17,097 21	
Wood	17,341 74	
Oil and waste	2,183 28	
Station expenses	23,902 55	
All other expenses	13,313 03	
		143,637 78
Leaving net earnings		$153,458 30
Add profits on investments		9,168 60
Surplus December 1, 1859		84,664 46
Total net income		$247,291 36
Disbursed as follows:		
Interest	$14,064 77	
Rent of Ashuelot road, one year to Oct. 1, 1860	30,000 00	
Dividen's Feb. & Aug. 1860	127,288 00	
		171,352 77
Leaving a surplus of		$75,938 59
The increase in gross income over the previous year has been		$25,503 93
With an increase in expenses of		10,270 78
Making the increase in net earnings		$15,233 15

The past year having been one of universal prosperity, the company do not anticipate a corresponding increase in future years. In view however of the expiration of the lease of the Ashuelot road, it is believed that the stockholders may rely upon three per cent. semi-annual dividends in future, after making the required annual payments of $8,000 to the sinking fund.

The average number of men employed has been 182. The number of miles run by passenger trains, 111,886; by freight and other trains, 83,140—making the total miles run 195,026.

The number of passengers carried in the cars has been 320,801; the number carried one mile 4,115,557. The number of tons of merchandise carried, 117,460; the number carried one mile, 2,788,817.

The equipment of the road consists of 12 locomotives; 13 passenger, 6 baggage and 325 four wheel freight and gravel cars.

The length of the company's road is 50 miles, extending from Springfield, Mass., to South Vernon, Vt. The Chicopee branch, from Cabotville to Chicopee Falls, is 2.35 miles in length. The Ashuelot road, running from South Vernon to Keene, N. H., and which has been operated the past year by the Connecticut River Railroad Company, is 23 miles—making the total length of road operated by this company the past year 75.35 miles. The gross earnings per mile of road were $3,961 28; the gross earnings per mile run, $1.52; the total operating expenses per mile run, 73.6 cents; and the net earnings per mile run, 78.7 cents. The per centage of expenses to earnings being 48 per cent.

In September last the company commenced the erection of extensive repair shops at Springfield; those at Northampton having been found inadequate to the requirements of the road. Their total cost, including machinery, will be about $20,000, of which $2,506 18 has been expended. The balance of $8,210 now standing to the credit of surplus real estate will be applicable to these improvements, and the residue of their cost may be carried to the debit of income account, without interfering with the regular dividends. The report says:

The mortgage indebtedness of the company is 250,000 dollars. At the date of the last annual report, bonds to the amount of 72,500 dollars had been negotiated. Early the present year a favorable opportunity presented itself for disposing of the balance, which was accordingly done. So much of the indebtedness to the Western Railroad Sinking Fund as matured in 1862 was then taken up and canceled, leaving a debt of 65,000 dollars due that fund in 1863, for which the Commissioners decline to receive payment in advance. The money designed to meet this indebtedness has, therefore, been temporarily loaned upon collateral security.

The arrangement made in 1849, by which 3,075 shares of the capital of the company was constituted a preferred stock, and the holders thereof became entitled to four per cent. semi-annual dividends, terminated in August last. Prior to its expiration two extra dividends, together amounting to three per cent., were made upon the common stock, with a view to an equitable adjustment of the relations of the two classes of stockholders, before they should have entered upon the joint and equal proprietorship of the road.

The ten years lease of the Ashuelot Railroad expires on the 31st day of December instant. It is understood that the road will, in future, be operated by the Cheshire Railroad Company.

When the Ashuelot Road was entered upon under the present lease it became necessary to invest $21,841 42 in the purchase of additional equipment for use on that road. This sum has always stood in a special account on our books. The equipment may now be sold or appropriated for the use of our own road. In the latter case, its present value would be charged to the equipment account.

CONDENSED BALANCE SHEET.

Cost of road and equipment		$1,801,943 80
Ashuelot Railroad equipment		21,841 42
Material on hand		36,480 13
Suspense account		290 41
Ferry stock and real estate		2,898 32
Expended on account of new repair shops		2,506 18
Investments		85,000 00
Bills receivable		5,446 93
Cash balances due the company		39,817 79
In hands of pay master		6,555 74
Cash on hand and in bank		31,597 28
		$2,034,378 00
Capital stock		$1,591,100 00
Note due Jan. 1, 1861		5,000 00
Bonds due May 1, 1863		25,000 00
Bonds due November 1, 1863		40,000 00
Mortgage bonds due Sept. 1, 1878		250,000 00
Balance to credit of income account		75,938 56
Surplus real estate sales		8,210 10
Bills payable		21,405 72
Balances due by the company		16,785 93
Unclaimed dividends		937 66
		$2,034,378 00

The office of the company is at Springfield, Mass. The officers and directors for the ensuing year are:

President—D. L. HARRIS.

Directors—J. H. Butler, John Chase, E. A. Dana, C. W. Chapin, R. Mather, H. W. Clapp, I. M. Spelman, I. Sargent, and D. L. Harris.

Superintendent—W. B. BRINSMADE.

Treasurer—SETH HUNT.

Sandusky Mansfield and Newark Railroad.

The business of this road for the year 1860, as appears from the annual report of the President, was as follows:

Passengers	$75,539 49
Freight	94,568 60
Mail and Miscellaneous	15,826 29
Total	$185,934 38

The expenses for the same are given at $151,767 24; leaving a net, less the taxes, of $34,167 14.

The Texas and New Orleans Railroad.

We learn from the Houston *Telegraph* of the 19th ult., that the work on the Texas and New Orleans road, between Houston and Liberty, is progressing, and also upon the Eastern Texas from Beaumont to Sabine Pass. It can be but a few weeks now, says the same authority, before we shall be in connection with the Pass, and thence by a daily line of steamers with Berwick's Bay and New Orleans, shortening the time between Houston and New Orleans from twenty to thirty hours.

Railroad Earnings.

The net receipts of the Harlem Railroad for January are as follows:

January, 1860	$97,016 34
January, 1861	117,760 34
Increase	$20,744 00

The net receipts for the same month, for the last four years were as follows:

1858	$78,858 41
1859	99,858 97
1860	97,016 34
1861	117,760 34

The earnings of the New York and Erie Railroad for the month of January, were as follows:

January, 1861	$407,949 41
January, 1860	336,391 80
Increase	$71,557 61

The following is a statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of January, compared with the same period of last year, viz:

	1861.	1860.
From freight	$144,137 59	$78,729 80
" passengers	51,734 23	44,295 44
" express	2,700 00	2,600 00
" mails	7,825 00	7,825 00
" rent of road	7,083 33	5,892 67
" miscellaneous	284 25	607 96
Total	$213,764 40	$139,950 87
Increase	$73,813 54	

The traffic of the Great Western Railway of Canada for the week ending Feb'ry 1, 1861, was as follows:

Passengers	$12,022 26
Freight and live stock	25,854 65
Mails and sundries	1,401 09
Total	$39,278 00
Corresponding week last year	28,267 52
Increase	$11,010 48

The following is an abstract of the statement of the Receiver of the Pittsburg, Fort Wayne and Chicago Railroad for December, 1860:

To balance from November account	$166,839 05
Receipts during December	203,187 97
Total	$370,027 02
Expenditures	245,669 94
Cash on hand	$124,357 08

The ninth monthly report of the Receiver of the Ohio and Mississippi Railroad Company, for December, 1860, is as follows:

Balance from November account.		$4,327 30
RECEIPTS.		
From express freight of Nov.	$1,799 25	
" passengers prior to Dec.	10,645 51	
" freight " "	5,811 77	
		18,256 53

Paid on account of former arrearages	800 64	
Paid on account of November current expenses and construction work	50,493 04	
		62,009 85
Balance carried to January account ...		$8,368 15

The following is the Illinois Central Railroad Company's statement for January, 1861:

Land Department.

Acres Construction Lands sold.	8,645.18	for	$127,105 63
Acres Interest Fund L'ds sold	359.10	"	6,037 76
Acres Free Lands sold ..	3,379.71	"	48,492 55
Total sales during the month	12,383.99	for	$181,635 34
To which add Town Lot sales			902 40
Total of all			$182,538 34
Acres sold prev'sly (net sales).	1,260,273.46	for	16,147,983 91
Total	1,272,657.45	for	16,330,522 25
Construction Bonds canceled in January, 1861			$41,500 00
Construction Bonds canceled previously			1,746,500 00
			$1,788,500 00
Total cash receipts in January			$72,273 64
Total cash and bonds received to Jan. 31, 1861			4,267,671 56

NOTE.—Cash receipts in January, applicable to cancellation of Construction bonds, $41,333 96; applicable to Free Land fund, $3,519 70; applicable to Interest fund, $22,325 78. Miscellaneous accounts, 5,094 10. Total, $72,273 54.

Traffic Department.

Receipts from Passengers		$60,769 70
" Freight		245,092 75
" Mails		6,358 33
" Rent of road		5,636 30
" Other sources		2,167 00
Total receipts for January, 1861		$320,024 17
Do. do. 1860		185,257 00
Increase		$134,767 17

The earnings of the Housatonic Railroad Company for January were as follows:

January, 1860	$17,120 65
January, 1861	12,597 38
Decrease	$4,523 27

The decrease was nearly all in freight.

The earnings of the La Crosse and Milwaukee Railroad for January, 1860 and 1861, are as follows:

	1860.	1861.
Freight	$21,130 60	$36,931 44
Passengers	10,755 24	12,280 53
Miscellaneous	997 72	2,344 23
	$42,883 56	$51,556 20
Increase for January, 1861		$18,672 64

The January earnings of the New-York Central Railroad are unofficially stated at an increase of about $60,000 over the corresponding month of 1860. It is stated also that the February dividend left a surplus of more than $200,000 out of the net earnings of the six months ending February 1.

Journal of Railroad Law.

ACTION FOR DAMAGES: CONCURRENT NEGLIGENCE: WHAT CONSTITUTES PRUDENCE IN DIFFERENT EMERGENCIES.

The case of Curtis and Wife *vs.* The Western Railroad Company was an action to recover damages for an injury to plaintiff's wife by a collision which occurred on a railroad crossing in the city of Worcester, January 29, 1859.

The case consumed a week in the trial, and involved the examination of a large number of witnesses on both sides.

It appeared that the plaintiff and his wife in a carriage with six other persons were returning from a funeral at the Catholic Cemetery, and were driving at the rate of five or six miles an hour, when they were struck by the locomotive of the express train from Springfield to Worcester, which was proceeding at the rate of thirty miles an hour.

It was claimed on the part the plaintiff that the defendants were not in the exercise of ordinary care and prudence, *First*, because the Statute requisitions in reference to the ringing of the bell, &c., were not complied with; *Second*, that other suitable precautions were not taken by the defendants in running the train; *Third*, that the crossing at this particular location was not sufficiently guarded by gates, flagmen, &c.

At the time of the accident two of the occupants of the carriage were instantly killed, two others more or less injured, and the present female the plaintiff, had one arm broken and received as she claimed a severe spinal injury.

On the other hand it was claimed by the defendants that the plaintiff and the driver were not in the exercise of that care which the circumstances of the exposure required of prudent persons; that they drove upon the crossing without stopping to listen or look for the approaching train, and that the driver at the time of the accident was more or less intoxicated, having on the two previous nights been engaged in watching at an Irish wake.

The closing argument for the defence was made on Friday last by Mr. James D. Colt, and that for the plaintiff on Monday by Mr. Benj. P Butler.

AMES J. Commenced his charge by saying that the general rules of law bearing upon such cases are not complicated, and that there will be no serious difficulty in applying them. In order to be entitled to a verdict, the plaintiff, Mrs. Curtis, must prove two things—want of proper care on the part of the Corporation, and that she or the driver exercised ordinary and proper care—and that both of these are of equal importance. If she fails to prove either, she is not entitled to a verdict. The burden of proof is upon her to prove both propositions. By our Statutes, railroads may cross upon a level with our roads, subject to such penalties as may be deemed fit to ensure proper and due precaution for the safety of those passing. The duty, in fact, of the company, is to use ordinary care; what that is, is such care as a man of prudent habits would exercise in like cases; what is ordinary in one case would not be in another. The same care is not required in driving a steady farm horse, as would be required in managing a steam engine; they must employ competent and skilful engineers. The Judge then read what the law requires as necessary for care and safety, as to the number of brakemen, erection of sign-boards, time of ringing the bell, &c., &c. He then reviewed the evidence to show that the defendants had complied with the Statute regulations. Although as a general rule a party is not required to prove negative averments, yet in this case the burden is upon the plaintiffs to show that the defendants did not comply.

By statute a town may require other precautions than those enumerated in the statute. In view of the circumstances, the jury are to say whether the road should have adopted other precautions to constitute ordinary care. Have the defendants taken such precautions as the statutes require? Was the bell rung? Have they sounded the whistle? Though no law requires it, yet it is well known that is customary. Was the train running at such speed so that under that speed proper care was used? These are questions for the jury to find. If you get no light whatever from the evidence upon these points, then the plaintiffs have not proved their case. But it rarely happens that evidence is so equipoised, evidence apparently conflicting, may not upon examination prove so in fact. Negative evidence may not always be sufficient to overcome positive.

It is incumbent on the company to do all that the circumstances, the time, the locality require to constitute a reasonable and due case. The fact that the city of Worcester did not take any steps to put up a gate or require any further precaution upon the part of the corporation, is no argument whatever that due care was exercised by the road, or that further guards were not necessary.

The second proposition she is required to prove is that she exercised ordinary care, or rather that the driver exercised it. He then endeavored to illustrate ordinary care by showing that it is not such care as a timid person would exercise, but such as any of the jury would be supposed to exercise; such as men of common prudence would

have exercised in a like exigency. The exigency here is the risk of having one's life lost, not of getting a jar as running over a stone. The driver knew that there was a track here for he passed over it in the morning. Did he look about him and listen as he approached? What ought a man of ordinary prudence to have done, when he saw the train? Should he have stopped? These are questions for the jury. It is contended that he was intoxicated. That he was not intoxicated is not of itself, sufficient to show carelessness. Whether or not he was under the influence of liquor, the testimony is conflicting. He had been to a funeral, and had been, in accordance with the custom, sitting up a night or two with the corpse, but there is no evidence that he had been drinking. The jury could not so infer. Did his rashness or want of care contribute to the accident? His manner and demeanor after such an accident ought not be construed with that degree of scrutiny which it would in ordinary circumstances. Much of it might be attributed to the circmstances that had occurred. So in regard to his admissions. His agony and distress of mind and his wife dying by his side, these may account for what he said as well as what he did. If both parties are in fault, if each contributed to the casualty, the law does not undertake to show which is most to blame. If she shows that the cause of the accident was the sole fault of the road, then she is entitled to a verdict.

If the plaintiff has sustained her case, then you are to consider what amount of damages she is to have. She is to be made whole. She is to have indemnity for the harm she has suffered. The road is not to be punished. No example for other roads are to be made. If there are any permanent injuries, such are more serious, and require a higher compensation

The Jury rendered a verdict for the defendant.

THE DISABILITIES OF THE NEGRO; POWER OF COMPANIES TO MAKE DISCRIMINATING RULES IN REFERENCE TO PASSENGERS.

Whenever a superior and an inferior race are brought in contact, the peculiarities of each cannot fail to give rise to many embarrassing questions, as to the reciprocal duties and obligations, which the one may owe to the other.

The rights of the negro, and the antipathy with which he is generally regarded by our white citizens, have oftentimes been the subject of consideration in our Courts of Justice, and in whatever light moralists may be pleased to view their decisions, we believe that they have reflected in the main the common judgment of the community, and the law of the land. As bearing upon the rights of the colored race, the question as to the power of city railroad companies to make discriminating rules and regulations as to how and in what manner individuals of different classes shall be carried, and the propriety of the Courts interfering with such rules, has recently been considered in the case of Goines *vs.* McCandles by the District Court in Philadelphia.

The action was brought to recover damages for the expulsion of the plaintiff from one of the lines of passenger cars in the city of Philadelphia. The defendant relied for justification on a regulation of the company prohibiting the entrance of negroes into the body of the cars and confining them exclusively to the front platform. A verdict was taken for the plaintiff at the trial, for nominal damages, at the suggestion of the counsel on both sides, subject to the opinion of the Court on the legal point, whether the rule under which the plaintiff was expelled, was lawful and constituted a good defence for the act complained of in the declaration. The following is the opinion of the Court.

HARE J. A corporation created for the carriage of passengers, certainly cannot refuse arbitrarily to carry any man or any class of men, without laying itself open to an action for damages. It may, however, lay down rules for the comfort and convenience of those whom it is bound to carry, although to the exclusion of particular individuals, and of every individual who falls within the rule. What rules are proper, must necessarily be left to the discretion of the corporation in the first instance, who may say how, and in what manner, the means of conveyance which they provide, shall be used, subject to the control and supervision of the Courts of Justice, who ought to set aside any rule which is manifestly wrong or unreasonable. But as courts must decide in such cases without the aid of juries, in order to secure uniformity of decision, and enter upon complicated investigations of fact, for the purpose of obtaining the information necessary for their guidance, they should incline against interfering, unless they can see their way clearly, and feel sure in what their interference will end.

What we have to decide in this case, therefore, is not whether the law does, or should exclude negroes from passenger cars, nor yet whether they can be excluded from them consistently with the natural equity which should prevail between man and man, but whether when a passenger railroad company thinks it proper to exclude them, the law ought to intervene and compel their admittance; or should rather leave the question to be settled by time and the good sense and humanity of the community. And we obviously ought not to decide this question adversely to the defendant, nor overrule the regulation on which he relies for his justification of the negro, or in the views and feelings of the superior race by whom he is surrounded, to justify his exclusion, or which would render his admittance a source of danger and evil, rather than advantage. And here the regulation gives rise to a presumption, and furnishes an argument in its own favor, which should not be overlooked or disregarded. It is not alleged that the company were actuated by malicious or hostile feelings towards the plaintiff, and it is on the contrary, plain, that their motive for excluding him was a conviction that persons of his class could not be admitted, without causing persons of other classes to leave the cars or refuse to enter them. The interest of railway companies is *prima facie*, as much in favor of the admission of negroes as of white men, because negroes cannot be excluded without the loss of the price of their passage, and their decision that negroes shall be excluded, is consequently, an almost convincing proof that the question would be, and indeed, has been decided in the same way by the community at large. If further proof be needed of what is thought and felt generally on this subject, it may be found in the isolation of one race, and its exclusion from the society of the other, and in our theatres, our schools, our lecture rooms, our churches, and in fine, in all places where men congregate in public or private, for the transaction of business in common or for enjoyment. That this is no new feeling, will appear "on reference to the opinion of Chief Justice Gibson, in Hobbs *vs.* Fogg, where it is shown that negroes were treated in the earlier legislation of this State, as a race apart, who could not be trusted with the duty of providing for their own subsistance, and must be forced to work by imprisonment, and even by blows, that they were prohibited from mingling their blood in marriage with the whites, and were not freemen for political purposes, even when free from actual bondage. And the Chief Justice went on to hold that their condition remained so far unaltered by the act of emancipation passed in 1780, that they were not entitled to vote, under the constitution adopted in this State in 1790, although that privilege was conferred, by the express terms of that instrument on all freemen. The decision thus made was virtually ratified not long afterwards, as that which the people of this State meant should be the supreme laws if it was not so already, by the introduction of the word "white" before the word freemen, in the clause which gives and defines the power of voting, in our present constitution. Some may think that the sentiment thus shown unmistakeably, runs counter to the teachings of religion and philosophy, and others hope that it may be removed or mitigated by time, and the gradual advance of the negro in morals and civilization. The material question for the purpose of the present inquiry is, whether it can be disregarded with advantage to the community, and those who are its objects. Certainly the law ought not to move a hair's breadth from its course, nor sacrifice the rights of the humblest and most forlorn individual, in obedience to the caprice or will of the greater number; mere will being no fit basis for law, which should always be the enunciation of what is right and fit for the good of the whole, and not the expression or gratification of the wants and wishes of those who legislate. But when it becomes necessary to lay down rules for the government and association of men in public, public sentiment must be consulted with caution indeed, and not without some reluctance, but still consulted, as a necessary element, without which the problem cannot be solved correctly, or any permanent good attained in practice. And when a nation suffers as ours does, from the misfortune of having two races within its bosom, one dominant the other enslaved or subject, one long civilized, the other emerging from the shades of barbarism, and each indelibly marked by diversities of manners, color and physiognomy, there is much in the relation between them which must be left to the lessons of experience, and the tribunal of public opinion, which cannot be arbitrarily forced or hastened, without producing or augmenting repulsion and antipathy, and endangering a collision, which must necessarily prove disastrous to the weaker party.

In the belief, then, that the regulation now before us is a wise one, or if not wise, will work its own cure best when least molested, we enter judgment for the defendant on the point reserved at the trial for our decision.

Greenville and Miami Railroad.

This line is now in operation from Dayton, Ohio, to the State line in Union City, a distance of 47 miles. We learn that efforts are being made to extend it to Portand, Ind., a further distance of 19 miles. The road bed is all graded, and a comparatively small expense will be required to complete it to that point. When finished a rich section of country would be opened up, which would largely increase the business of the road to Dayton. The part already constructed has earned sufficient to pay the interest on the first mortgage bonds, and leave a handsome surplus.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring THE GREATEST STRENGTH IN THE SCREW THREAD and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them and will furnish samples and price list on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

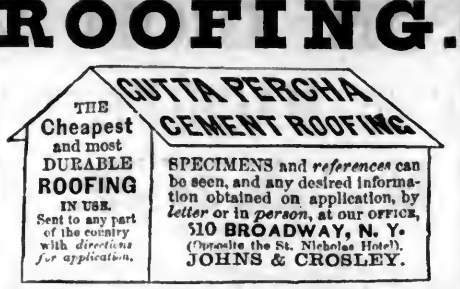
The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.



For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description eve issned, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	"	¾ to 1	17.	" 25	"	1½ to 1
6.	" 15	"	1 to 1	18.	" 26	"	1½ to 1
7.	" 15	"	1½ to 1	19.	" 28	"	¾ to 1
8.	" 16	"	¾ to 1	20.	" 30	"	1 to 1
9	" 16	"	1 to 1	21.	" 30	"	1½ to 1
10.	" 18	"	¾ to 1	22.	" 30	"	1½ to 1
11.	" 18	"	⅞ to 1	23.	" 32	"	1 to 1
12.	" 18	"	1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, February 23, 1861.

Sandusky, Mansfield and Newark Railroad.

The earnings of this company for the fiscal year ending December 31, 1860, were:

From Passengers		$75,539 49
" Freight		94,568 60
" Mails, express, etc.		15,826 29
Total		$185,934 38
And the expenses were:		
Conducting transportation	$43,665 00	
Maintenance of way	56,570 52	
Oil and fuel	14,140 58	
Stations	17,167 46	
Salaries and agencies	15,843 41	
Shops	2,269 61	
Advertising, etc.	1,110 66	
		151,767 24
Leaving as net earnings		$34,167 14

Compared with the previous year, the earnings show a decrease of $257 38. The increase in expenses was $6,947 52, and was in part occasioned by the unusual freshets of April last, which carried away, or seriously damaged, no less than sixteen bridges and culverts. Some of these have been rebuilt with substantial mason work, in the place of the light trestle work of which they were originally built.

Of this class is the one over the North Fork of the Licking river, which was rebuilt at an expense of $3,000, having a span of 140 feet. A new bridge, 203 feet long, has also been constructed over Owl Creek, near Fredericktown. Near Lexington, a new bridge; 186 feet in length, has been built across the Clear Fork of Mohican, and an embankment substituted for 207 feet of trestle. The total length of new bridging built in 1860 was 1,172 lineal feet.

Over ten miles of the track south of Mt. Vernon, have been entirely rebuilt, and thoroughly ballasted. During the year, 44,442 new ties have been put down. A new side-track of 400 feet has been constructed near the "Summit," south of Mansfield, and the "Sidings" at Sandusky, Monroeville, Shelby Junction, and Mansfield, have all been rebuilt, or have undergone repairs.

During the year there was laid up 1,308 perches of masonry; 60 tons of new iron were placed on the track; and 16 tons of new chairs and 6 tons of new spikes have been used.

A convenient and substantial depot for freight and passengers, 45 feet wide by 170 feet long, has been constructed at Sandusky, at a cost of $2,577 10. A turn-table has also been built at a cost of $750.

The receipts from all sources during the year were $195,580 99, and the disbursements were $192,826 06—leaving a balance in cash of $2,754 93. Included in these disbursements is $7,425 24 for taxes; $35 for interest on first mortgage bonds; $6,418 75 for interest on domestic bonds; and $16,872 in liquidation of domestic bonds *overdue.* This extinguishes all that class of bonds which became due July 25, 1858, except $300 which have not been presented. Another instalment of $25,000 became due July 1859, on which only $100 has been paid. The third instalment for a like sum matured in July last, no portion of which has been paid. The fourth instalment for a like sum matures in July next. In settlement with the receiver of the old Company, a balance of $31,600 was found to be due him. Of this, $11,600 has been paid in cash, and the balance in notes of the company of $5,000 each, which mature in April and October 1862 and 1863. The President in his report says:

The Board believe that it is alike the interest and the duty of this company to discharge these debts at the earliest date practicable. We have, again, to express our gratification that the holders of these *past due* obligations have, universally, exercised a generous forbearance towards us; in this, we think, they have consulted their best interest.

The Directors will here renew their regret that the income of the road has been inadequate to meet the interest on the company's mortgage bonds. The almost total destruction of the grain crops of 1859 left us no hope of paying the January or July coupons of 1860; but it was hoped that the earnings of the last six months would enable us to pay a half year's interest on the 1st inst. In this we have been disappointed. The earnings for August, September and October were *fair*, but much below our expectations. The almost total prostration of business since the middle of November has so far diminished our income that it has been little more than sufficient to defray current expenses. In the present deranged state of trade, we can hardly expect any considerable increase of receipts until after the opening of Lake navigation next spring. Only a slight portion of last year's liberal harvests has yet been brought to market—much the larger share is believed to be still in the hands of the producers, and we can but hope that next spring's prices may be such as to induce the holder to market their surplus freely, and thereby largely increase our traffic. If our expectations in this behalf are realized, we confidently rely our ability to pay a half year's interest the ensuing summer.

GENERAL STATEMENT.

Capital stock issued		$806,520 19
Capital stock, due receiver		42,250 00
1st mortgage bonds		1,290,000 00
Domestic bonds old series		75,200 00
" " new "		20,000 00
Funded coupons—bills payable, special		105,509 78
Profit and loss		222,831 92
Bills payable		1,208 81
Sundry accounts		25,355 76
		$2,588,876 46
Railway property		$2,309,125 13
Coupons, 1st mortgage bonds		122,751 06
do. do. funded		105,509 78
do. domestic bonds		18,141 00
do. do. over due		3,506 99
Stock on hand		11,926 14
Sundry accounts		15 161 43
Cash on hand		2,754 93
		$2,588,876 46

The office of the company is at Sandusky, Ohio.

The officers and directors for the ensuing year are:

President—Wm. Dubbin.

Directors—Wm. Durbin, Wm. P. Chapman, John W. Sprague, Samuel M. Robinson, Robt. McComb, H. P. Warden, Jas. E. Woodbridge, Jerome Buchingham, and Jas. Lyon.

Treasurer—W. P. Chapman.

Assistant Sup't—Jas. H. Stewart.

Secretary—John W. Sprague.

Central Railroad and Banking Company of Georgia.

We have received the report of this Company for the fiscal year ending November 30, 1860, from which we learn that the earnings of the road during that time were:

From up freight (westward)		$668,048 00
" down freight (eastward)		659,961 13
" through passengers		103,986 06
" way "		174,495 85
" passengers on Gordon & Eatonton Railroad		21,358 92
" U. S. Mails		36,450 00
" passenger train and express freight		39,597 98
" incidental, storage, etc.		11,127 07
		$1,715,025 01

The expenses for operating the road were:

Transportation expenses	$230,734 86	
Maintenance of motive power	227,916 45	
Maintenance of cars	109,533 92	
Damage	10,905 06	
Repairs of road, bridges, culverts and buildings.	242,002 29	
All other ordinary expenses	21,890 46	
Extraordinary expenses	107,467 18	
		950,450 22
Leaving actual net earnings		$764,574 79

Compared with the previous year, the gross earnings show an increase of $81,077 17
With an increase in expenditures of 156,106 76
Making the decrease in net earnings $75,029 59

The increase in expenditures is attributable to the increased price of labor and materials, and the increase in the number of trains run. Two new passenger and two new freight engines were purchased during the year; one freight engine had been finished, and another nearly so, in the company's shops, and materials for two other engines paid for. The total amount expended for these new machines was $53,939 93—of which, $45,080 93, has been charged to maintenance of motive power, and $8,859 to tools and machinery. There have also been built in the company's shops, 85 freight cars, at a cost of $40,000. These two items will satisfactorily account for increased expenditures for motive power and cars. In addition to which, two Ericsson engines for pumping water have been purchased, one wind mill erected for same purpose, three iron cisterns put up, and pipes, hydrants, etc., completed—all of which is included in the ordinary expenditures for working the road.

The extraordinary expenditures are given above at $107,467 18—of this sum, $23,398 was expended for passenger house and sewer at Savannah; 8,935 89 for freight house at same place; $25,521 74 for new bridge and trestle across Ogeechee canal at Savannah; $11,887 12 for new tools and machinery in shops; $9,119 61 for freight house, offices and shops at Macon; and the balance for other permanent improvements upon the line of the road.

The company have 59 locomotives, nearly all of which were in good running order; 22 first class passenger, 6 second class passenger and baggage, 4 mail, 14 baggage and package, 3 express, 23 conductor's, and 657 cars for freight, etc.—making a total of 729, an increase over the previous year of 65.

During the year, 413,314 bales of cotton have passed over the road—an increase over the previous year of 23,126 bales.

The number of miles run by passenger trains has been 325,432, by freight trains, 554,036—total miles run, 879,468. The earnings per mile run were $1 95, the expenses $1 08, the net earnings 87 cents.

The cash receipts from Road and Bank have been as follows:

From Road		$1,696,998 52
From Bank		113,371 10
		$1,810,369 62

Disposed of as follows:

Railroad expenditures	$950,450 22	
Bank "	17,569 36	
Dividends declared	458,340 00	
Interest on 7 per ct. b'ds	6,959 24	
		1,433,318 82
Carried to reserved fund		$377,050 80

The reserved fund now amounts to $1,015,028 96, and the appropriation of $120,000 for depot buildings, etc., remains untouched.

General Statement.

The office of the Company is at Savannah, Ga. The officers and directors for the ensuing year are:

President—R. R. Cuyler.

Directors—R. R. Cuyler, Andrew Low, John R. Wilder, D. H. Baldwin, John W. Anderson, Thos. Purse, F. G. Dana, Geo. L. Cope, Octavus Cohen.

Superintendent—G. W. Adams.

Treasurer—J. A. Courvoisie.

Cashier of Bank—Geo. A. Cuyler

Coal Burning on the Central Railroad of New Jersey.

We gave last week an abstract of the annual report of this company. Below we give the "*Report on Coal Burning*," prepared by John O. Sterns, Esq., Superintendent of the road, which accompanies the report of the directors. He says:

From the year 1838, when the first engine was placed upon the road, to 1846, when the present Company was organized, Southern and New Jersey yellow pine-wood was used exclusively for fuel; except for about six months in 1841, when bituminous coal was used. From 1846 to 1853, Southern pine-wood continued to be exclusively used by the Company as a fuel. From 1853 to 1857, oak wood obtained upon the line of the road was exclusively used. From 1857 to 1861, oak wood was still the principal fuel, but anthracite and bituminous coals have also been used to generate steam upon such engines as were designed for that use. From April 1st, 1858, to January 1st, 1861, is the period from which I propose to make comparisons of the Company's experience in different kinds of fuel.

The Company have, at the present time, thirty-eight engines, six of which have been altered from burning wood to burning bituminous coal, twenty-four that burn wood, and eight that burn anthracite coal having been constructed for that purpose. During the last two years and nine months the wood engines have run 1,353,909 miles, the anthracite coal engines 165,585 miles and the bituminous coal engines 112,757 miles—being a total of 1,632,251 miles.

The Essex was the first anthracite coal-burning engine owned by the Company, It was placed upon the road in 1856, and was built at the Taunton Locomotive Company's shops as an experimental machine. The boiler was of the Dimpfel plan. The fire-box and fire-surface arrangements were defective, causing a failure, although it ran 11,000 miles, principally upon passenger trains. No reliability could be placed upon its performance. The engine was rebuilt in 1859, and the boiler was replaced by a new one. It has since run 29,000 miles, principally upon passenger trains, averaging 56 miles to a ton of coal consumed. By averaging the wood consumed by five engines, of about the same capacity as the Essex, and running upon similar trains, their average has been 54 miles to a cord of wood, which, rated at $5 per cord of wood, and three dollars per ton of coal, makes a difference of cost of 4 cents per mile in favor of coal.

The next two anthracite engines were built by the New Jersey Locomotive Company at Paterson, namely, the Middlesex and Union, and were put upon the road in 1858. The Middlesex has six driving wheels, four feet in diameter, and seventeen by twenty-four inch cylinders, and has run upon coal trains 24,377 miles, and averaged 23 miles to a ton of coal consumed. The Union has four driving wheels, four feet in diameter, sixteen by twenty-two inch cylinders, has run 40,000 miles upon coal trains, and has averaged 25 miles to a ton of coal consumed. We have no wood engine similar to the Middlesex to compare with it. In comparison to the New Market, North Branch, and Clarksville engines, of about the same capacity, and doing the same kind of service, all having the same size cylinders and wheels, the fuel for the Union was about 4 cents less per mile run than it was for the wood engines.

The next anthracite engines were built by Danforth, Cooke & Co., in 1859, namely the Somerset and Hudson, and both have six driving wheels, four feet in diameter, and seventeen by twenty-four inch cylinders. The Somerset has run upon coal trains 22,500 miles, averaging 21 miles to a ton of coal. The Hudson has run upon coal trains 24,600 miles, averaging 22 miles to a ton of coal. We have no wood engine similar to these with which to compare them.

The next anthracite engines, namely, the Bergen, built by the New Jersey Locomotive Company, and the Hunterdon and Warren, built by the Rogers Locomotive Company, were placed upon the road in 1860. They each have four driving wheels, four feet in diameter, and sixteen by twenty-four inch cylinders, and are all upon coal trains. The Bergen has run 9,700 miles, and averaged 31.3 miles to a ton of coal. The Hunterdon has run 9,100 miles, and averaged 29.3 mies, to a ton of coal. The Warren has run 7,600 miles, and averaged 32.4 miles to a ton of coal. The three engines have run 26,400 miles, at an average of 31 miles to one ton of coal; which, at $3 per ton, makes the cost of fuel per mile run 9.7 cents. For comparison with these, I take three wood-burning engines, about equal as to capacity, having the same number and size of driving wheels, and the cylinders averaging about the same, and also doing about the same kind of service; but the average of the latter is for two years and nine months, while the anthracite engines have run but a few months. The wood engines have run 188,000 miles, averaging 28.8 miles to a cord of wood. Rated at $5 per cord, this makes the cost per mile run 17.3 cents, or the cost of wood 7.6 cents more per mile run than the cost of coal, for the three compared coal engines. The latter being new and in perfect order, and having run but a few months, I think that 7 cents per mile could be relied upon as a fair basis of difference in fuel.

In comparing the difference of cost between the use of bituminous coal and wood, I rate the wood at $5 per cord, and the coal at $5 per ton. I find that in using bituminous coal as fuel, in the different engines built for wood but altered for that purpose, the cost per mile run has varied materially, being from 1 to 7 cents less per mile than the cost of fuel used by similar engines still burning wood. The cost of fuel of the Ashbury, before it was altered to burn coal, was 20.3 cents per mile run; and with coal, since altered, 16.3 cents per mile run. The cost of fuel of the Craneville, before it was altered, was 17 cents per mile run, and with coal, since altered, 16 cents per mile run.

The difference of cost in the two Swinburne engines has been 7 cents per mile in favor of the one burning bituminous coal, the two engines being alike as to capacity in every particular, except that the cylinder of the one burning coal is one inch in diameter less than the one burning wood.

I think the average difference in the experience of the company thus far, has been a saving of fuel by the use of bituminous coal of about 3 cents per mile run.

To arrive at the comparative difference in the cost of the different kinds of fuel to be hereafter used, will require more experience in the use of coal, and engines for generating steam, than the company now have. While their experience in engines and wood consumption has not been unlimited, still they have paid particular attention to economy in the consumption of wood for the past three years. The engines have been fitted with all approved improvements, and the most experienced engineers have been employed, at large salaries, with the object of economizing the fuel, and the consumption shows a large reduction over former years, more especially for the first two years. For the past year there has been no improvement over the preceding years. The wood consumed for the last three years has cost the company about 14 cents per mile run. For the four years preceding it cost a fraction over 15 cents per mile run. The engines used in the first four years were not as well adapted for the services they performed as those in use for the past three years, and a larger proportion of them were inferior and not as economical in the consumption of fuel, and of the last three years they have also more uniformly drawn full loads; so that it is reasonable to presume, that no material further reduction will ever be made in the quantity of consumption or in the cost of wood; while the company can, by further experience and improvements upon anthracite coal-burning engines, and by their engineers having more experience in its use, anticipate great improvements in the use of anthracite coal as to quantity, without much fear of its cost increasing.

All our anthracite coal-burning engines except the last three, namely, the Bergen, Hunterdon, and Warren, have been constructed in accordance with the views of the builders; although suggestions were made by our master mechanic to some of them, and adopted as the size and arrangements of the fire-boxes. I do not consider any of them as perfect or medium coal-burners. The Bergen, Hunterdon, and Warren were constructed as to the fire-boxes upon Milholland's plan, and are as perfect coal-burners as any machines that we know of; but they have only run a few months, and consequently we cannot determine the difference in cost between good machines using wood and good machines using anthracite coal. The actual cost is not to be determined merely by the cost of fuel, but by the cost of the fuel and cost of repairs to the engines for several years. The cost of repairs of our anthracite engines, except the Bergen, Huntingdon, and Warren, has been very large, double the amount it was upon our wood engines; but some of them are very heavy and draw large loads, which reduces the cost per ton. The expenses have not been caused wholly by burning coal, but partly from imperfect work in their construction.

If the three comparatively perfect anthracite engines make a saving in fuel of 7 cents per mile run, over three equally good wood engines, the difference in cost of repairs cannot exceed 3 cents per mile run, leaving a net saving of 4 cents per mile run by substituting anthracite coal for wood, and would have saved the company over $20,000 the last year, if all their freight trains had been drawn by good anthracite coal burning engines.

From our present experience, I am satisfied there is a saving by using bituminous coal instead of wood, and that it is expedient to alter several more of our wood-burning freight engines to burn bituminous coal, especially as the change is easily and cheaply made; and that there is a very large saving in using anthracite coal instead of wood to generate steam. What actual amount can be saved, time and further experience will alone determine.

East Indian Railroad.

The Brahminee bridge is one of the largest structures on the newly opened portion of the railway between Cynthia and Rajmohal. It consists of 9 iron girders of 60 feet span and 7 brick arches, of 30 feet span each. The total length from abutment to abutment is 950 feet. The height from the bottom of the foundations to rail level is about 40 feet, and the height of rail level above the bed of the river is about 30 feet. This bridge was originally intended to consist of 24 semi-circular brick arches, the river piers to be founded on undersunk wells. The foundations of both abutments and two land piers were got in in accordance with this design; but the difficulty of obtaining a sufficieny of bricks within a reasonable time (owing to a scarcity of fuel, all of which had to be carted from Raneegunge, a distance of about 70 miles) induced a modification of the orginal design. This was therefore altered to a substitution of iron girders for brick arches. The undersunk well foundations were also dispensed with, as it was found during prosecution of the works that, by the employment of Appold's centrifugal pumps, worked by portable engines, the water could be kept under, so as to admit of the sand being excavated and the piers founded upon the clay. This turned out to be a more expeditious and satisfactory method than the slow and tedious process of well-sinking, in our opinion a rather questionable idea for general adoption in the construction of foundations in this country. The whole of the river piers were got in to above flood level in one season by the employment of four Appold's pumps, worked by four small portable agricultural engines, whereas it is doubtful whether otherwise the wells would have been completed in two seasons. The bridge is the highest on the line between Calcutta and Rajmehal. Its great height gives it a light and airy appearance, and altogether the structure forms one of the most attractive engineering features on the newly opened line. The work was carried on under the superintendence of Mr. Perry, district engineer, ably assisted by Mr. Powell, engineer resident, and who, we have been informed, has since joined the Government service, and has been selected to construct the large bridge on the Grand Trunk road over the Barruckur river. We have no doubt Mr. Powell's energetic and vigorous supervision will soon become apparent on his new undertaking, and that this great work, which has long been almost standing still from some cause or other, will be rapidly completed, with credit to himself and to the complete satisfaction of the Government of India.—*Calcutta Engineer.*

New York Central Railroad.

Gilbert L. Wilson, Esq., Treasurer of the New York Central Railroad Company, has issued the following notice:

The following regulations in reference to the transfer of stock and the issuing of Stock Certificates in this company, will take effect on the re-opening of the transfer books, on Friday, the 22d day of February inst.

First—The full name and place of residence of every person to whom stock is transferred, must be stated in the instrument of transfer, and in the Stock Certificate corresponding therewith. In case of transfers to firms, the name of the firm, and the place where its business is conducted, must be stated.

Second—In every application to transfer stock, by virtue of a power of attorney, the power must be filled up, dated and signed, so as to be a complete instrument before a transfer is permitted under it. No transfer is to be allowed under an open or defective power.

Third—If a certificate is presented in which there has been an alteration, interlineation or erasure, the application to transfer the stock represented by such certificate must be declined and the applicant referred to this office.

Journal of Railroad Law.

OMNIBUS ROUTES AND CITY RAILROADS; RULE OF DAMAGES FOR NOT PURCHASING PROPERTY AS REQUIRED BY ACT OF INCORPORATION.

The case of Moore & Company *vs.* the Greene & Coates st. Passenger Railway Company grew out of a refusal on the part of the defendants to purchase the property of the line of omnibuses running for a part of their route on Greene and Coates street, as required by their act of incorporation passed April 12th, 1858.

The defendants were invested with power "to construct a passenger railway, beginning at Oak street running west along Green street to Twenty-second street, thence northwestwardly along Twenty-second street to Coates street; thence northwestwardly along Coates street, with a double track, to the river Schuylkill; thence eastwardly along Coates street to the place of beginning."

The same act contains this provision: "And the said company, before commencing to use said streets, shall purchase at the option of the owners, the stock of horses, omnibuses, sleighs and harness owned and used upon said streets at the time of commencing the said road, at a price to be assessed in the following manner: The said owners shall choose *one* disinterested person, and the

company shall choose a *second* person, and the two, thus chosen, shall choose a *third*, who together shall be disinterested persons, and shall appraise such stock, and the value thus arrived at, shall be binding and final."

The plaintiffs set forth that they were owners of a line of omnibuses, for the transportation of passengers, on Green street, running from Twelfth street to Twenty-second street in the city of Philadelphia, and used a stock of omnibuses, horses, sleighs and harness, for the purpose of carrying on said business—that the defendant constructed the railway on the prescribed route—that the plaintiffs gave notice to the defendants that it was their option that the defendants should purchase the stock of omnibuses, etc., and ascertain the price to be paid in the mode pointed out by the Act of Assembly—that for this purpose the plaintiffs appointed an appraiser on their part, "yet the defendants, not regarding their duty, did refuse and still refuse to appoint an appraiser according to the terms of the Act of Assembly."

The principal facts stated in the declaration were admitted or clearly proved, and it appears that after the defendants refused to join in the appraisement, the plaintiffs ran their omnibuses on the old route for nearly a year; subsequently they instituted this action.

The real controversy was narrowed to the questions:

1st. Whether the line of omnibuses, etc., belonging to the plaintiffs, was included in the terms of the Act of Assembly.

2nd. Whether the fact that the plaintiffs, after the refusal of the defendants to join in the appraisement, continued to run their omnibuses on the route which they had previously used, was a waver or bar to the action.

3rd. In what manner the damages should be termined.

The larger portion of the route of the omnibuses was upon the street *not* on the line of the railway. The omnibuses diverged from Green street at its point of junction with Twelfth street. The course was then southward on Twelfth street to Chesnut street, down Chesnut street to Fourth street, and thence southward on Fourth street to Walnut street, and down Walnut to the Merchants' Exchange. About two-thirds of the distance traveled by the omnibuses was not on the line of the railway. The interference or competition between the parties was, therefore, but on *one-third* part of the omnibus route.

The action was brought in the District Court, Philadelphia. The following is the decision of the Court.

STROUD, J.—After much consideration, we do not see that this circumstance stands in the way of the plaintiffs' recovery. A few words would have rendered the meaning of the Legislature free from doubt, if it was intended to make any distinction between the plaintiffs' line of omnibuses, which passed over a portion of the railway, and other lines which ran completely on Green and Coates streets, and on these only; and as the defendants were the party who applied for the grant of the railway—were the party to be benefitted by it, we think it is not an inequitable rule to construe the Act most strongly against the company. We decide, therefore, that the plaintiffs' line of omnibuses were embraced by the terms of the Act of Assembly. That the cause of action was complete on the refusal of the defendant to concur in making the appraisement.

It is very desirable, wherever it can be safely done, to adopt a fixed rule for the ascertainment of damages in a particular case. And in general, in actions *ex contractu*, this is practicable.

The present, although not strictly an action of this description, bears so close a resemblance to one, that it is not distinguishable in principle. The Act of Assembly provides, that if the plaintiffs should elect to sell their horses, etc., to the defendants, the defendants should become the purchaser, at a price to be ascertained by appraisers.

The plaintiffs made such an election, and communicated to the defendants that they had done so, and requested the defendants to co-operate with them in determining the price to be paid in the mode prescribed by the Act of Assembly. The defendants denied their obligation to buy, and refused to participate in the appointment of appraisers.

On this refusal several courses were opened to the plaintiffs: 1st, They might have *tendered* the horses, etc., to the defendants, and whether accepted or not, an action could have been brought, immediately, on which they would have been entitled to recover the whole value of the things tendered. 2nd, Or the plaintiffs might have sold the whole either at public or private sale, and sued for the difference, if any, between such value as they should show on the trial, to be the proper one, and the sum which should be obtained at the public or private sale. The sale should, in such case, be as promptly made as, under the circumstances, could be reasonably effected. All necessary expenses incurred in such sale might also, I apprehend, be recovered. 3rd, Or, the plaintiffs, without making either a tender or a re-sale, might have brought suit for damages on the mere breach of contract by refusal to join in the appraisement.

The two last modes rest upon the same principle, and cannot be properly classed as two remedies—the only difference between them being in the facility of proving the damages. Where there has been a prompt sale, the difference between the proceeds of this and the consideration agreed upon in the contract, is usually a fair measure of the damage, and this is readily shown. When there has been no sale, but the property has been retained, the difficulty of proving the damage to the seller is, ordinarily, very great. Indeed, except where there has been a *fall* in the market, intervening the original sale and the time of the breach, the damage must be little more than nominal.

In the case before us, the plaintiffs did not *tender* the horses, &c., to the defendants, nor resort to a resale within a *reasonable* period. They are to be regarded therefore, as having *elected*, after the breach had occurred by defendants' refusal to join in the appraisement, to retain all the property constituting the omnibus line, and seek redress by what, for convenience, I have designated the *third* kind of remedy.

The plaintiffs examined many witnesses, who alleged that they were competent judges of the value of horses, omnibuses, &c., and who testified that they had full knowledge of the age, size, appearance and properties of the several horses which were owned by the plaintiffs and had been driven to the omnibuses, and knew also the condition of the omnibuses, sleighs and harness. They gave evidence of what the omnibuses when *new* were worth, and of their depreciated value by the introduction of the railway cars. A *new* omnibus was said to be worth at least $600—and after the introduction of the railway cars, the highest value placed upon one which had been used but a few years and was in good condition, (a description which applies to the plaintiffs' stock,) was $100.

The witnesses agreed, generally, in fixing a high value upon the *horses*. They were said to be superior to those in any other omnibus line in the city. But no one undertook to say that the substitution of cars, for omnibuses had contributed to lessen the price of a horse suited for an omnibus. There was no reason to believe from the evidence that horses of this description would not command as high a price for the one service as the other. The same remark may be made in respect to the *harness*, and no particular attention was bestowed upon the sleighs.

The line of omnibuses consisted of *twelve*, most of which were three years old, and there were upwards of *fifty* horses, and many sets of harness.

The jury have awarded $15,648. There was no evidence to justify such a verdict, and nothing in the charge to account for so great an excess as it exhibits. Unless, therefore, the parties can agree upon a proper reduction, it will be necessary to grant a new trial.

Comparative Fuel Statement.

The following comparative statement of the cost of fuel for hauling one ton of freight one mile, on several of the leading railways of New England, for the years 1859 and 1860, deduced from the Legislative Reports, will be found interesting. Ten passengers are reckoned as equivalent to one ton of freight.

	1859. Tons hauled one mile.	1860. Tons hauled one mile.	1859. mills. Cost of fuel.	1860. mills. Cost of fuel.
Boston and Lowell	8,532,475	8,821,219	4.75	4.13
Boston and Maine	9,942,671	11,084,960	6.89	6.93
Boston and Worcester	14,675,811	15,117,079	5.63	4.75
Boston and Providence	9,485,781	9,877,378	4.36	3.82
Fitchburg Railway	11,381,712	10,476,891	4.10	8.52
Old Colony and Fall River	8,497,468	8,718,064	5.15	3.36
Western Railway	35,858,285	40,896,325	4.48	3.86
Providence and Worcester	5,061,721	6,139,594	3.73	2.82
Norwich and Worcester	5,986,895	6,240,977	4.49	4.78
Worcester and Nashua	2,514,202	2,774,007	3.20	7.35
Totals and averages	111,931,461	125,146,484	5.42	4.26

The table shows a reduction in all but two cases, and some very considerable reductions too. The Providence and Worcester road leads off this year, as last; this is a very crooked railway, and its equated mileage would, we believe, show more resistance per mile for grades and curves, than most roads in these parts, excepting the Western railway. The standard of comparison assumed in the table is good, being the cost of

hauling the unit of weight over the unit of length, (one ton one mile.) But even this is not quite a fair standard, nor can we get a standard in actual practice which shall be perfectly just; because, even supposing that we have the relative work done on two roads, for a common unit of fuel, the cost of that unit may be, and generally is, different on the two roads; and supposing that we have the tons hauled per unit of cost on each road, the unit of fuel again for that cost will vary. A road in Massachusetts, for example, may burn coal at $6 00 per ton, while a road in Maine may have to pay $7 00 per ton, or $5 00 per cord for wood. Supposing that with these prices coal is the cheapest in Maine, and that a ton of coal does just as much work in Maine as in Massachusetts, still the cost per mile, or even per ton per mile, in the latter State, might appear to show a better performance than in the former, while such should not be the case. When we have the lbs. of coal used per ton per equated mile, upon two or more roads, then we shall have exact data for comparison of performances, no matter what the cost per ton per mile may be. But the table above is valuable and interesting. Let us make, however, a few more comparisons. To show the effect of the cost of fuel upon the apparent relative performances, we have for the following roads divided the miles run by the dollars spent for fuel.

MILES RUN PER DOLLAR FOR FUEL.

Boston and Lowell	10.54
Boston and Maine	8.62
Boston and Worcester	7.27
Boston and Providence	10.20
Fitchburg Railway	9.20
Old Colony and Fall River	14.09
Western Railway	6.30
Providence and Worcester	12.77
Norwich and Worcester	9.80
Worcester and Nashua	10.79

The above, of course, is a rough statement, because the load hauled is left out. Below, again, we give something a little more definite, viz, the lbs. of coal used per ton hauled one mile. [Wood is reduced to coal by calling one cord of wood equal to one half a ton of coal.]

Providence and Worcester	1.17
Old Colony and Fall River	1.21
Boston and Providence	1.34

The three roads standing in the same order of economy as in the table at first above given. It will not seem strange that the Old Colony Railway should run 14.09 miles per dollar, against 12.77 on the Providence and Worcester Road, while the relative lbs. per ton per mile are, O. C. & F. R. 1.21 and P. and W. 1.17, when we come to divide the tons hauled one mile, by the miles run: it is thus found that while the Old Colony hauls 21.1 tons one mile per mile run, the Providence and Worcester hauls 27.7 tons one mile per mile run. This explains why, with coal at the same price, the Providence and Worcester Road, though running cheaper per ton per mile than the Old Colony and Fall River, runs less miles per dollar. Its mileage is more profitable.—*Am. R.. W. Times.*

Railroad Earnings.

The January earnings of the Macon and Western Railroad were:

1861	$34,903 34
1860	36,520 49
Decrease	$1,617 15

The traffic of the Great Western Railway of Canada for the week ending Feb'ry 8, 1861, was as follows:

Passengers	$9,463 50
Freight and live stock	23,574 86
Mails and sundries	1,274 26
Total	$34,312 62
Corresponding week last year	31,958 52
Increase	$2,354 10

The following shows the business of the Philadelphia and Reading Railroad Company for the month of January, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$105,474 30	$96,168 50
" " merch'dise	32,080 40	41,502 01
" " travel, etc.	23,551 45	25,880 34
Total	$161,106 15	$163,550 85
Transportation, roadway, dumpage, renewal fund, and all charges	102,678 88	109,375 80
Net profit for the m'th,	$58,427 27	$54,175 05
Profit for the previous month	128,412 46	108,315 53
Total profit for 2 mos.	$186,839 83	$162,490 58

The revenue of the Baltimore and Ohio Railroad for January was as follows:

MAIN STEM.		
From Passengers	$35,600 29	
" Tonnage	205,374 57	
" Mails	7,933 33	
" Express	6,199 09	
		$255,107 28
WASHINGTON BRANCH.		
From Passengers	$24,877 81	
" Tonnage	6,498 96	
" Mails	900 00	
" Express	1,188 57	
		33,465 34
N. W. VIRGINIA BRANCH.		
From Passengers	$3,304 94	
" Tonnage	17,569 85	
" Mails	866 66	
		21,741 45

Summary of Revenue for Jan., 1860 *and* 1861.

	1860.	1861.
Main stem	$227,347 57	$255,107 28
Washington Branch	35,748 25	35,465 34
N. W. Virginia Railroad	15,298 53	21,741 45
Totals	$278,394 35	$310,314 07
Increase		$31,919 72

The financial year of the Company commences with October. Comparing the revenue of the present with that of the past fiscal year, the following result is shown:

	1859-'60.	1860-'61.
October	$411,148 27	$485,662 55
November	421,259 92	429,093 44
December	345,952 09	327,081 18
January	278,394 35	310,314 07
	$1,456,754 63	$1,552,154 24
		1,456,754 63
Increase present fiscal year		$95,399 61

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 2, were $18,353 69
Week ending Feb. 4, 1860 53,529 08
Decrease in 1861 $5,175 39
Total traffic from July 1st, 1860 $2,056,639 40
Corresponding period previous year 1,620,478 74
Increase $436,160 66

The following are the earnings of the Great Western Railway of Canada for the week ending January 25, 1860:

Passengers	$11,614 98
Freight and live stock	30,707 63
Mails and sundries	1,437 46
Total	$43,760 08
Corresponding week of last year	30,007 10
Increase	$13,752 98

Annexed is an abstract of the receiver of the Cleveland and Pittsburg Railroad from Oct. 6, to Dec. 27, 1860:

To net assets in hands of Receiver, Oct. 6, as per last quarterly statement		$92,804
To sundry accounts since taken into account from the books of the Company		174 03
To gross earnings from Sept. 1, 1860, to Nov. 30, 1860—three months:		
Freight	$184,666 54	
Passengers	97,969 79	
Miscellaneous	15,362 29	297,998 62
Total		$390,977 12
Operating expenses from Sept. 1, 1860, to Nov. 30, 1860—three months	$160,007 65	
Mortgage interest	$27,495 00	
Interest and exchange	1,329 20	
		48,884 20
Lease from F. W. and C. R. R.		21,249 90
Buildings and construction account		6,112 82
Judgment in favor of M. W. Baldwin & Co.		10,300 00
Net assets in hands of Receiver		144,422 46
Total		$390,977 12

The statement of assets and liabilities in the hands of the Receiver is as follows:

ASSETS.	
Machinery, tools, etc.	$34,620 51
Materials for repairs	27,049 71
Fuel on hand	3,408 50
Bills receivable	15,906 07
Station agents, railroads, and personal accounts	68,948 46
Cash on hand	6,880 93
Total	$156,814 18
LIABILITIES.	
Bills payable	$12,397 72
Net assets	$144,222 46

The earnings and running expenses of the road during the three months are shown by the report to have been as follows:

Gross earnings	$297,998 62
Operating expenses	160,007 65
Net earnings	$137,990 97

The running expenses of the road were about $52⅔ of the gross earnings.

The following were the earnings of the Cincinnati, Hamilton and Dayton Railroad for January, 1861, compared with January, 1860:

January, 1861	$54,621 14
" 1860	47,736 30
Increase, 1860	$6,884 84

The January earnings of the Chicago and Rock Island Railroad were as follows:

Jannary, 1861	$80,655
" 1860	70,555
Increase	$10,100

American Railroad Journal.

Saturday, February 23, 1861.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The fluctuations in the Share Market the past week have been inconsiderable, there having been no startling political intelligence, if we except the inauguration of the President of the "Confederated States." This checked an advancing tendency in the market. The news we are daily receiving from Washington exerts no perceptible influence. We cannot expect a decided tendency in any direction till political matters take a more decided turn.

The Money Market presents no new features, except an increasing abundance. Exchange is slightly better, but shipments of produce continue on a large scale, with very small imports, rendering probable renewed imports of gold. Its excessive accumulation in our banks is one of the most unpromising features of the times, as it tends to embarrass the countries from which we receive it, while it exerts no tendency to relieve us of our financial embarrassments. At the present time we exhibit several curious anomalies, an almost entire stagnation of trade, with excessive exportations, which are largely paid for in gold, which is accumulating in our banks to an unprecedented amount. Such a condition of things is the millennium of the bullionist, but by no means of commercial prosperity.

Macon and Brunswick Railroad.

At the annual meeting of the Stockholders of this company, the following officers were elected for the ensuing year:

President—Hon. A. E. COCHRAN.
Directors—B. F. Ross, T. R. Bloom, Henry Bunn, L. N. Whittle, Geo. Walker, and J. T. Blain.
Sec. and Treasurer—ARTHUR DICKINSON.
Chief Engineer—A. N. ROGERS.

Illinois Central Railroad.

We have the report of this company for the past year which, in many respects, is the most favorable exhibit ever presented by this company. It has at least reached a point where the payment of interest on the debt of the company ceases to be a tax upon its capital or lands. The amount of annual interest will not exceed $1,050,000. The net earnings the past year were $856,630; the increase of net traffic for the first month of the present year over the past was $141,000. The landed property of the company, therefore, can hereafter be devoted to the payment of the debts of the company. The prospect of a large business for the coming year is very favorable. The State is full of produce, for which a good demand exists to the North and South.

In reference to the landed property of the company, we copy the following extract from the report:

LANDED PROPERTY:—It is ten years since the act of Congress conferred upon the State of Illinois the grant of lands. In 1852 Mr. Robert Rantoul, with marked ability, presented to his co-directors and the public, his views of the effect upon the population and resources of Illinois, by the construction of this railway, and the consequent advance in the value of property. Mr. Rantoul predicted that the census of 1860, would show over 1,700,000 population in Illinois, and that lands in twelve to fourteen years would command $12.00 per acre. The reasoning was conclusive to his associates, in face of the fact that Illinois counted at that period only 850,000 souls, with a space covering nearly 20,000 square miles, in the centre of the State, nearly destitute of population, and that upwards of eleven millions of acres of lands in the State, were offered for sale by the Government, at $1.25 per acre. At a later day, the Directors had to contend with prejudices in regard to the health of the prairie country, and the general conviction that the Government lands in Illinois, and the States west of it, would for one generation at least, at $1.25 per acre, prevent any prairie lands destitute of fuel, reaching such extravagant values. The great extent of the lands of the North-western Territory, was apparently the strongest argument against the fulfillment of Mr. Rantoul's prediction, and one which time alone could solve. The Illinois prairies have proved to be perfectly healthy, and the supply of coal and wood is ample. The pioneer has gone beyond Illinois to Kansas and Nebraska, and has discovered practically, the limit of avnilable land for agricultural purposes. Those elevated arid regions, dry in summer and cold in winter, are too near the great desert of almost perpetual drought. The Government surveys and meterological observations, render it certain that the limit of good lands between the thirty-seventh and forty-second parallels has been reached, and that the annual outpouring of the Eastern States will settle upon the lands of Illinois and Iowa. The most important crop, that of Indian Corn, is uncertain in the States north of these; and every season, farmers move down from Minnesota and Wisconsin, to the milder and more genial climate of Illinois. So long as Missouri and Kentucky continue Slave States, the lands in those States will not compete with the lands of Illinois, and this State will stand in relation to Missouri, as Ohio has for many years in relation to Kentucky, absorbing the emigration, and the value of land will increase in direct ratio with the gain in population. The census of 1860 shows 1,729,000, population in Illinois—nearly one-third of the entire gain in population of the six North-western States within the last ten years is within her borders. The value of land has quadrupled in these ten years—the tide of emigration to Illinois is constant, and with fifty per cent. more added to the population, it seems demonstrated, that land will double in value. Hence, I infer, that the unsold half of our lands will, during the present ten years, command nearly double the amount realized for the first half, and to secure this, I would suggest the policy of gradually advancing the price, without however, reserving a single acre from sale. After deducting upwards of one million of dollars of sales made in 1855, upon which parties have failed to respond to their engagements, our net sales are 1,260,273.46 acres at an average of $12.67 per acre,= $15,995,380. Of this $15,995,380 upwards of twenty-five per cent., or $4,195,398 have been collected in cash. The average of $12.67 includes the earlier sales at six to nine dollars per acre. Every acre sold for settlement, adds to the value of the remainder; and I estimate the ultimate proceeds of our lands as follows:

Acres.				
1,260,273 sold at...	$12.67			15,995,380
	Town Lots			152,603
200,000 to be sold.	$13..	$2,600,000		
200,000 " "	15..	3,000,000		
200,000 " "	16..	3,200,000		
200,000 " "	18..	3,600,000		
200,000 " "	20..	4,000,000		
100,000 " "	25..	2,500,000		
100,000 " "	30..	3,000,000		
100,000 " "	40..	4,000,000		
34,727 " "	50..	1,736,350		27,636,350
2,595,000				$43,784,333

The Land Notes in possession of the company on the 31st December were $12,598,083, and the sales the present year promise to exceed the aggregate sales of *the three preceding years*. This will be more clearly shown at the date of the Shareholders meeting, and if at that time our present hopes are sustained by the actual sales during the first five months this year, the Shareholders can determine the policy to pursue upon the assumption that, at the close of this year, the land notes will exceed the Funded Debt.

The collections by the Land Department in 1860 were $780,097, of this amount $428,000 was invested in the Construction Bonds under the engagement with the Bondholders that an amount corresponding to the principal of Construction Notes collected shall be applied to taking up these Bonds. The balance, after deducting expenses of the Department, was disbursed for interest. If the amount of interest upon the debt is this year derived from the net traffic it is obvious that the Shareholders will have to their credit the surplus collections beyond the amount invested in Bonds, in addition to the reduction of the debt by the cancellation of Bonds during the year.

The total number of acres of land sold have been 1,268,273, leaving unsold, 1,334,727. The gross amount of all sales have been $16,147,983. The company have now on hand notes to the amount of $12,598,083.

The earnings of this road for the past year was as follows:

From passengers	$846,693 06
" freight	1,623,711 22
" miscellaneous sources.....	194,444 39
" Peoria and Oquawka Railroad.	56,742 57

1860..	27,195,391	704	846,693	1,623,711	251,186	2,721,590	1,870,960	850,630
	$139,013,397	4,147	$5,348,363	$5,532,069	$1,297,552	$13,177,984	$9,562,099	$3,607,885

☞ The New London, Willimantic, and Palmer Railroad has been appraised, under an order of the Court, at $170,000, or about 34 cents on a dollar.

Nashville and Northwestern Railroad.

We learn from the Memphis *Appeal* that a passenger and freight train is running daily on forty miles of the Western Division of the North-Western Railroad, and that there is every prospect of making the connection of the Memphis and Ohio Railroad at McKenzie's by the 1st of March next, making the distance fifty-one miles from the Mississippi river.

Lehigh Valley Railroad.

At the annual meeting of the stockholders of the Lehigh Valley Railroad Company held in Philadelphia, on the 14th ult., the following officers were elected for the ensuing year:

President—J. G. Fell. Managers—Asa Packer, William H. Gatzmer, John J. Johnston, R. F. Stockton, Elisha A. Packer, David Barnet. Secretary and Treasurer.—John N. Hutchinson.

Cresson Railroad.

The Pittsburg *Post* says the contract for laying the superstructure and iron on the Ebensburg and Cresson Railroad was awarded to Phil ip Collins, Esq., who was also the contractor for the grading of the road. Under the supervision of this gentleman we feel confident that the work will be pushed to a speedy completion. The road is expected to be ready for the running of cars by the first of June.

Philadelphia, Wilmington and Baltimore Railroad.

The following is a condensed statement of the financial condition of this Company at the close of the fiscal year October 31, 1860:

Cost of road, including Susquehanna bridge		$6,830,516 03
Port Deposit Branch Railroad		109,514 70
Terminus on the Delaware river		56,944 31
Stock owned by the Company		744,425 00
Real estate, including a portion of the Susquehanna bridge, and Port Deposit Branch Railroad.	$250,693 79	
Less taken to assets, as the value of property not required for the purposes of the road	205,650 00	45,043 79
Assets, viz:		
Real estate subject to sale	$205,650 00	
Stock and other securities	139,396 25	
Current accounts	27,954 55	
Bills receivable	97,627 65	
Materials on hand, including wood lands	62,815 69	
Cash	90,977 16	624,421 30
Advances, viz:		
To Southwark R. R. Co.	32,992 56	
To Delaware R. R. Co.	19,075 57	
To Junction and Breakwater Railroad Co.	1,308 73	53,376 86
		$8,464,241 99
Capital stock		$5,600,000 00
Mortgage loan due July 1, 1860		300 00
" " " July 1, 1884		2,300,000 00
Improvement bonds due May 1, 1863		119,000 00
Mortgage on real estate		40,000 00
Ground rents		10,000 00
Sinking fund for the mortgage loan due July 1, 1884—proportion for 10 months		33,333 33
Current liabilities		140,918 30
Balance of revenue Oct 31, 1860		220,690 36
		$8,464,241 99

The gross earnings during the year, including the earnings of the New Castle and Frenchtown line, were $1,236,597 94

And the expenditures were:

Repairs of road	$60,822 47	
" Bridges	15,125 13	
" Locomotives	24,164 99	
" Cars	17,927 79	
" Buildings, fences, etc	27,344 04	
Train expenses	123,873 57	
Taxes and insurance	13,269 44	
Ferries	38,759 48	
Rents	8,169 34	
Fuel	29,079 80	
Oil, waste, etc	7,296 90	
Telegraph	4,743 70	
All other ordinary expenses	70,531 42	
New equipment, buildings, track, bridges, etc.	104,633 50	
Expenses of operating New Castle & Frenchtown line	14,837 41	
Taxes and loans to the State of Delaware and New Castle County	11,833 33	
Add loss in operating Delaware Railroad	42,472 44	
		624,885 75
		$6,11,712 19
Interest on bonded debt, ground rents, etc., less interest received		140,000 00
Leaving net earnings		$471,712 19
Dividends, April and October, 6½ per cent.		364,000 00
Surplus		$107,712 19
Appropriated to the sinking fund		33,333 33
Leaving an actual surplus of		$74,378 86

—over all expenditure, interest, dividends, loss on Delaware Railroad, and appropriation to sinking fund.

In reference to the "loss on the Delaware Railroad," Mr. Felton says:

As there has been each year since we have been connected with the Delaware Railroad, a misapprehension of our true financial relations with the same, it is but an act of justice to ourselves, to make the following statement:

All the expenses incurred in operating and maintaining that road, and interest on rolling stock, which is owned by the Philadelphia, Wilmington and Baltimore Railroad Company, together with the interest paid on its bonds, and the dividends, are charged to it, and the earnings due to the road itself credited. The balance is struck, without any reference to the business brought by the Delaware Railroad to our road, and that balance is counted the loss in operating it. While there is, therefore, nominally a loss thus considered, we must remember, that this road contributes to our road, a large amount of both freight and passenger business; that it collects this business by retail, and delivers it over to us by wholesale, at New Castle Junction and Wilmington; thus increasing the load of the trains on the main line, without increasing the number run. Now this extra business, thus contributed, is a valuable element in our revenue. In order to see fairly what its value is, we will look a little into its details.

During the year, we have received for carrying freight to and from the Delaware Railroad over our own road		$44,932 76
For passengers		48,139 88
For mails and miscellaneous		3,178 76
Total increase of earnings on our own road from the business to and from the Delaware Railroad		$96,251 40

The per centage of expenditures to earnings, including new work and improvements, and extra work on our own road, for the year has been 45 $\frac{5}{10}$ per cent. If we charge the business from the Delaware Railroad with the same ratio for expenses, there will remain a net profit to us from this business of $52,071 71. Deduct from this the loss in operating the Delaware Railroad, $42,472 44, and there remains to us an absolute profit for the year of $9,599 27.

It will therefore be seen, at a glance, that we have suffered no pecuniary loss from our connection with the Delaware Railroad, even in this view. But it has not cost us so large a per centage, to do the business coming from and going to that road, as the average of the business of our own road, because the business from and to the Delaware Railroad has only loaded our regular trains, and has not involved the running of an increased number of trains. If, therefore, the business of the Delaware Railroad remains as now, we are, and shall be, better off from our connection with it than we should be without it. The earnings o. the last year, however, are no criterion for the future. The peach crop of Delaware, was entirely cut off, and the corn crop, was only about one-half the usual average.

The company own 30 locomotives, of which 8 are used on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater Railroads; 60 first class passenger, 3 second class, 2 sleeping, 16 baggage, 7 platform for crates, 1 paymaster, 4 express, 460 freight and 61 road cars—making a total of 614.

We omit such portions of the report as have been previously referred to. In reference to the "railroad connections," Mr. Felton says:

Since our last annual report, the Orange and Alexandria Railroad, has been extended to Lynchburg, and the Mississippi Central Railroad, has been finished; also the road from Charleston to Savannah. There is now a continuous track with the exception of a Ferry at the Susquehanna, and at Washington, from Philadelphia to New Orleans. This with other roads North, forms a South-Western Line from Portland, in Maine, to New Orleans. It is by far the shortest railroad route, between these points, and will, when perfected, by some arrangements now making, be the great thoroughfare, for the North-east and South-west travel. A bill has been reported in both Houses of Congress and has passed the Senate, allowing the Washington Branch of the Baltimore and Ohio Railroad, to extend its track to, and across the Potomac, so as to connect by all rail, with the Orange and Alexandria Railroad, and also by a Branch track, with the Potomac boats, running to Acquia Creek, on the Southern Atlantic Line. This will open up by the most convenient and the shortest line, a very extended and rich country, which will be tributary to our road, in both freight and passenger business, and we may thence expect a large accession to our revenue. Our extreme Southern railroad connections, are being improved and extended, and must have an important influence in increasing the intercourse, between the North and the South.

Our Western connections have been very much improved, within the last year, and we have largely increased our business from that source. Large amounts of produce from the West, and large numbers of cattle, now seek the route of the Baltimore and Ohio Railroad, and our road, to Philadelphia and New York. With a proper understanding between the great lines West, this business would be lucrative to all. As it now is, all work for less than a reasonable compensation. Competition has become so strong, through the intervention of numerous agents and runners, employed by each of the conflicting lines, that the profits of all are far less, than the patrons would willingly pay, and the expenses of transacting the business, are very much heavier than they should

be. It is hoped that further experience will teach all the managers of these lines, so to consolidate and arrange their business, as to greatly diminish their expenses, and increase their profits. Our road is so situated, as to grades, and straight lines, that we can work as cheaply as any one—but we feel, that we, in common with all others running west, have received a compensation very inadequate for the services rendered. The rates are now, however, better than they have been for some time past.

The contract system is still extensively practiced on the road, and the company are gradually extending it into nearly all the departments of service. The work is better and more cheaply done, and with more regularity and safety, and has largely contributed to the success of the road.

The officers and directors elected for 1861, are:

President—SAMUEL M. FELTON.

Directors—Moncure Robinson, Wm. Lyttleton Savage, John A. Duncan, Jesse Lane, Joseph Bringhurst, Frederick A. Curtis, John C. Groome, J. I. Cohen, Jr., Thomas Kelso, Columbus O'Donnell, Enoch Pratt, Wm. W. Corcoran, Edward Austin.

Sec. and Treasurer—ALFRED HORNER.

Nashville and Chattanooga Railroad.

The earnings of this road for the year ending November 30, 1860, were:

From passengers		$346,463 05
" freight		347,217 97
" mails, etc.		40,437 80
		$734,118 82

Disbursed as follows viz:

Expenses of operat'g road	$396,734 66	
New buildings, new track, ballast, interest and exchange, etc.	54,892 15	
Interest on funded debt	95,730 00	
Dividends, 6 per cent	123,443 36	
		670,800 17
Leaving a surplus of		$63,318 65

The bonded debt and stock of the company, which, together, may be taken as constituting its capital, is as follows:

Capital stock		$2,056,543 64
Bonded debt	$1,813,000	
Less cancelled by sinking fund	82,000	
		1,731,000 00
Entire stock and bonded debt		$3,787,543 64

—of which the company owns and now holds:

State bonds	$132,000 00
State endorsed company bond	59,000 00
Land one-half shares company stock.	15,512 50
	$206,512 50

Combination Live Stock and Merchandise Car.

We have on previous occasions noticed the superior qualities of a combination live stock and merchandise car, built some time since by the Michigan Central Railroad. A number of our western roads have already built and are preparing to build cars after the same style; and we now learn that the Boston and Worcester Railroad Company has borrowed one of the Central's cars for a model. It will leave here to day for Boston, loaded with a premium lot of dressed hogs, of which we have already made mention. We understand that the car will be taken over roads whose gauge does not correspond with the Michigan Central on trucks prepared expressly for the occasion. We also learn that the New York Central and a number of other eastern roads are preparing to build cars after this model.—*Chicago Times.*

Boston and Providence Railway.

The miles run, coal burned, and detail of the locomotive fuel performance upon the above road, for the year ending November 30, 1860, have been as below:

Pounds of coal used by passenger trains.	7,029,799
Miles run by passenger trains	247,425
Lbs. per mile by passenger trains	28.41
Pounds used by freight trains	5,046,128
Miles run by freight trains	126,820
Lbs. per mile by freight trains	39.79
Total lbs. of coal used	12,075,928
Total number of miles run	374,245
Lbs. per mile for all trains	32.26
Average cost per mile run for fuel, cents	8.31

In all cases, 4 per cent. is added to the actual coal used in the engines, for waste in handling.

Pittsburg and Connellsville Railroad.

The following statement will show the financial condition of this company, at the close of their last fiscal year, October 31, 1860:

RECEIPTS, viz:

Payments on capital stock		$1,755,825 87
Real estate bonds due 1868 and 1883		100,000 00
Baltimore City loan due 1886		1,000,000 00
First mortgage construction bonds on Turtle Creek Division		400,000 00
Bills payable		52,648 26
Due on open accounts		15,221 05
Receipts from transportation department during the year	$106,650 17	
Total payments	51,637 81	
		55,012 36
		$3,378,707 54

EXPENDITURES, viz:

Preliminary surveys		$8,965 47
Graduation, masonry, bridges, etc.		826,834 54
Superstructure		551,715 02
Right of way		79,805 06
Real estate		184,408 69
Station buildings		31,593 76
Rolling stock		81,135 80
Engineering expenses		111,198 23
General expenses		87,099 92
Discount on city and county bonds		320,300 02
" 1st mortgage construction bonds, T. C. Division		7,775 00
" Baltimore City inscribed stock		91,468 30
Commissions on collections, etc.		12,689 70
Sinking fund, Baltimore loan		12,000 00
Coupons city and county bonds		253,336 56
" 1st mort. bonds T. C. Division,		2,571 00
Interest on Balt. City Inc. stock		11,714 22
" on floating debt		217,155 32
" on stock		14,172 16
Securities on hand and hypothecated		302,525 39
Debts due the company		161,608 13
Cash		8,635 25
		$3,378,707 54

The total earnings of the road during the year were:

From Passengers	$28,604 38
" Freight	48,345 86
" Mails, shop work, etc.	3,602 57
	$80,552 81

The total expenses were:

Maintenance of motive power	$19,091 86	
Conducting transportation.	17,713 60	
Maintenance of way	10,822 06	
" cars	3,234 70	
		50,862 22
Difference		$29,690 59

The revenue of the preceding year was $57,838 36—showing an increase of $22,714 45, or 40 per cent. To maintain the road and machinery and conduct the transportation in 1859 cost $43,370 83—showing an increase of $7,491 39. In 1859, the earnings were $8,951 54 in excess of those of 1858.

The entire receipts of the company during the past year have been $86,396 75; and the current expenditures $59,511 55—leaving $21,041 26 as the clear income for the year, which has been used partly in payment of claims on account of real estate and right of way, partly in paying for the section of road connecting this road with the Fayette County Railroad, east of Connellsville, and the remainder on new machinery and buildings. The entire net portion has thus been expended to improve the value of the company's property.

In 1856, the floating debt of the Company was $788,863; in 1857, $513,403; in 1858, $211,729; in 1859, $175,550; in 1860, it was $67,869—showing that $107,681 34 has been paid during the year, and the remainder is supported by securities which will ultimately redeem it entirely.

During the year, $184,000 of Alleghany County bonds have been made available at the legal rate of sale for the liquidation of the part of the debt to which they were collateral. The bonds of the borough of Connellsville have been disposed of to that borough; by means of which a part of the floating debt has been paid. A similar arrangement, it is expected, will shortly be made with the borough of McKeesport. No further means of consequence have been realized from the suspended stock subscriptions.

The expenditure during the year for construction, etc., have been $14,175 44 on the western and $721.62 on the eastern divisions of the road. Upon the Turtle Creek division, $142,800 have been expended in the bonds secured upon that division, and $2,300 in bonds and $13,869 86 in cash for right of way and real estate; $2,794 50 in cash for engineering and superintendence, and $840 in cash for account of improving depot in Pittsburg. Since the organization of the Company in 1846, the total expenditures for construction, etc., have been $1,866,691 10—of which $1,464,016 25 has been spent upon the western, $218,925 28 upon the eastern, and $183,749 57 upon the Turtle Creek divisions.

In addition to the ordinary expenses for maintaining and operating the road, there have been laid out under the head of construction and equipment, $7,003 43. In the construction of about a mile of new road immediately east of Connellsville, and necessarily to a connection with the Fayette County Railroad, the company has also paid $7,504 24 to that company, which has been liquidated out of the receipts from that new connection—thus making $14,507 66 expended upon permanent addition to the road and its machinery.

The Fayette County road was opened to Uniontown Jan. 1, 1860, and has since been in successful operation. It is a valuable extension of this road to that borough, which is beginning to feel the reviving influence of this new route to its trade.

The company have 7 locomotives; 4 passenger, 3 baggage and mail and 59 freight and dump cars.

The number of miles run by engines was 113,775—an increase of 16,751 miles over the previous

year. The number of passengers carried was 73,526; the number carried one mile was 939,875. The number of tons of freight carried was 51,641.

The number of shares of stock is 42,860; amount paid in bonds as cash, $1,450,000; paid in cash, $182,525 87; total payments, $1,755,825 87; balance due, $393,041 13; total amount $2,148,867.

The amount of bonds issued was $4,056,000; amount canceled, $1,206,000; amount sold $2,452,800—leaving on hand or hypothecated $397,200. The net proceeds of bonds sold were $2,033,256 68.

The new road between Pittsburg and Turtle Creek was progressing towards completion, with every prospect of its being opened early in the spring to the company's depot in the city.

The office of the company is in Pittsburg, Pa. The officers are:

President—BENJ. H. LATROBE.

Secretary and Treas'r—ALEX. H. RUSSELL.

Superintendent—HENRY BLACKSTONE.

NEW YORK

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring THE GREATEST STRENGTH IN THE SCREW THREAD, and making a Nut **SUPERIOR TO ANY** made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them and will furnish samples and price list on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete and Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in light barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

BLASTING,
Also for MILITARY and NAVAL Purposes.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

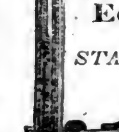
In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.
COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.



On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.

I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description ever issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft. Slopes		1½ to 1	15.	" 24 "		¾ to 1
4.	" 14 "		1½ to 1	16.	" 24 "		1½ to 1
5.	" 15 "		¾ to 1	17.	" 25 "		1½ to 1
6.	" 15 "		1 to 1	18.	" 26 "		1½ to 1
7.	" 15 "		1½ to 1	19.	" 28 "		¾ to 1
8.	" 16 "		¾ to 1	20.	" 30 "		1 to 1
9	" 16 "		1 to 1	21.	" 30 "		1¼ to 1
10.	" 18 "		¼ to 1	22.	" 30 "		1½ to 1
11.	" 18 "		¾ to 1	23.	" 32 "		1 to 1
12.	" 18 "		1 to 1	24.	" 32 "		1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Western (Mass.) Railroad.

This company was chartered February 15th, 1833, and the work of construction commenced in 1837. In that, and the two following years, the whole line was placed under contract. The Eastern division, 62.6 miles, from Worcester to the Connecticut river, was opened October 1st, 1839. The Western division, from the Connecticut river to Albany, was opened, as follows, viz: from the boundary line of New York to Pittsfield, May 4, 1841; from Springfield to Chester Factories, May 24, 1841; from Pittsfield to the Summit, August 9, 1841; and from Chester Factories to the Summit, September 13, 1841. The trains first passed over the whole road, October 4, 1841. The bridge across the Connecticut river was completed July 4, 1841. That portion of the line lying within the State of New York, 38 miles, was constructed under the charter of the Albany and West Stockbridge Railroad Company of New York, granted in 1836. The construction of this road was commenced in 1838, and the first division, from Albany to Chatham Four Corners, was opened December 24, 1840; the second, from Chatham Four Corners to West Stockbridge, September 12, 1842. In the meantime, a portion of the line of the Hudson and Berkshire road was used to form the through line to Albany. The road was constructed by the Western Railroad Company, to which it is leased for 50 years, the period of its charter, and for any renewal of the same. Toward the construction of this road, the city of Albany subscribed $1,000,000 to its capital stock, paying for the same in its bonds. By the terms of the subscription, the stock taken by the city and which constitutes its entire share capital, is held by the city as collateral security for its bonds. The Western Company agree to pay the principal of these, and on their payment, the road becomes its property. On the 30th January, 1846, the Western Company leased the Pittsfield and North Adams Railroad for 30 years from its completion, at an annual rental of 6 per cent. on its cost, with the privilege at the expiration of the lease of becoming its purchaser, or of renewing the lease for 99 years at 5 per cent. upon its cost. The cost of the road was abont $450,000, upon which dividends have been paid. Its net earnings, until the past year, have averaged a little less than the rent paid. It was opened for its whole length December 1, 1846. The Western Railroad Company became the purchasers, November 21, 1854, of the Hudson and Berkshire Railroad, extending from Hudson to the boundary line of Massachusetts, a distance of 31 miles. This road now forms a part of the Western, and both are operated as one line. Its location in another State requires the maintenance of a separate organization. Its cost to the Western Company has been $196,839. Since its organization, its name has been changed to that of the Hudson & Boston. For a full statement of the cost, mileage, earnings, expenses, dividends, etc., etc., of the above roads, from commencement, see "POOR'S *History of Railroads and Canals of the United States*" published at the office of this paper.

We have received the report of the directors of the Western Railroad, for the financial year ending November 30th, 1860. From this we learn that the income of the company has been—

From freight	$1,101,118 64
" passengers	690,991 87
" mails and other sources	89,240 21
	$1,881,350 72

And the expenses have been—

Transportation expenses	$462,711 57	
Repairs of roadway	273,696 45	
" engines	63,446 06	
" cars	97,530 15	
" buildings, ferry, etc.	43,104 23	
New rolling stock to cover depreciation	32,000 00	
General expenses	20,607 84	
		993,096 30
Net balance of income		$888,254 42

From this deduct—

Interest on State loans and exchanges	$348,223 24	
One per cent. to sinking fund	50,000 00	
Eight per cent. dividends	412,000 00	
		810,223 24
Surplus, carried to contingent fund		$78,031 18
Add balance of do. Nov. 30, 1859		321,843 95
Gain from Pittsfield and North Adams Railroad		769 20
Total of contingent fund Nov. 30, 1860,		$400,644 33

The earnings of the Pittsfield and North Adams Railroad were $49,169 99; and the expenses, $21,400 79—leaving net earnings $27,769 20; out of which two dividends of 3 per cent. each were paid, amounting to $27,000—and the balance 769 20 carried to Western Railroad account as above.

A comparison of the earnings and expenses of the past with those of the previous year show an excess of $114,282 in the former, and $56,176 in the latter.

The equipment of the road consists of 19 passenger and 53 freight locomotives; 39 first class, and 8 second class passenger cars, 12 baggage, 796 box, 261 platform, 80 gravel and 46 hand cars. Also, 54 236ths of 18 passenger and 7 baggage cars of the New York and Boston Express Line.

The number of miles run by passenger trains was 359,564; by freight trains, 701,455, by all other trains, 53,072—total miles run 1,114,091.

The number of passengers carried in the cars was 617,882; number carried one mile, 25,852,-612; number carried one mile to and from other roads, 17,089,312. The number of tons of merchandise carried in the cars was 505,547; number carried one mile, 43,311,064; number carried one mile to and from other roads, 29,095,625. Average rate of speed adopted for passenger trains, 30 miles per hour; for accommodation trains, 22 and 28 miles; for freight trains, 15 miles.

It will be seen by the annexed statement that the total cost of the Western Railroad, including the Albany and West Stockbridge, and the Hudson and Boston and West Stockbridge Railroads, with the equipment, has been $11,029,079 41. The funded debt has been increased during the year $144,000; while the floating debt of $208.725 68 has been entirely paid off. The company has assets in addition to the cost of the road, amounting to $629,931 72, less dividends, accrued interest, etc., $298,425 42—leaving $331,506 30. The value of the sinking fund is $2,281,633 65. The total funded debt is $6,296,520.

Treasurer—STEPHEN FAIRBANKS.

Superintendent—HENRY GRAY.

First Shipment of Gas to London.

The Philadelphia *United States Gazette*, of the 5th ult., thus notices an enterprise in which Mr. D. H. Williams of that city, is now engaged. It says:

"We saw yesterday at the passenger station of the Pennsylvania Railroad, at Eleventh and Market sts., a number of wrought iron cylindrical vessels, which we were informed contained compressed gas. Upon further inquiry we learned that Mr. Williams, who had fitted up the cars on the Pennsylvania Central Railroad for burning gas, had also taken a contract from Hathaway & Leach of this city, for fitting out a number of cars to be used on the street railways in London. These cylinders had been sent to the railroad work shops in Altoona, to be filled with gas by means of the company's apparatus there; so that before long we may expect to hear of American street railway cars in London, lighted with gas made at the foot of the Alleghany mountains."

Main Trunk Railroad.

At the annual meeting of the Stockholders of the Atlantic and Gulf Railroad, held at Milledgeville on the 11th ult., the following gentlemen were elected Directors for the ensuing year: John Scriven, W. B. Hodgson, J. Stoddard, Hiram Roberts, W. H. Wiltberger, A. T. McIntyre, C. J. Munnerlyn, and F. G. Arnett.

At a subsequent meeting of the Board, Maj. John Screven was unanimously elected President, and D. Macdonald, Secretary and Treasurer.

Boston and Worcester Railroad.

This road is 44.63 miles in length, extending from Boston to Worcester. The branches are: Brookline branch, Boston to Brookline, 1.55 miles; Newton Lower Falls branch, West Newton to Falls, 1.25 miles; Saxonville branch, Natick to Saxonville, 3.87 miles; Milford branch, Framingham to Milford, 11.97 miles; Framingham branch, Framingham to Framingham Centre, 2.00 miles; Millbury branch, Grafton to Millbury, 3.00 miles.—Total length of branches 23.64.—Total length of main line and branches 68.26 miles. Second track and sidings on same 59.13 miles. To which add Agricultural railroad, Framingham Centre to Northboro', leased and operated by this Company, 14.00 miles—making the length of road in equivalent single track operated by the Company, 141.39 miles.

This company was chartered June 23, 1831; the work of construction was commenced in August 1832, and the road completed in sections as follows: from Boston to Newton 9 miles, April 16th; to Needham, 13½ miles, July 3d; to Hopkinton (now Ashland), 24 miles, September 20th; and to Westboro', 32 miles, Nov. 15th, 1834. On the 3d July, 1835, the entire line to Worcester was completed. The double track was completed in 1843. The Millbury and Saxonville branches were opened in 1846; the Newton Lower Falls, the Milford, and the Brookline, in 1847; and the Framingham in 1849. The Agricultural branch is leased for 20 years from December 1, 1855, at an annual rental of one-third of the gross earnings of the branch, and of the joint earnings of the two roads on traffic originating or terminating on the branch, excluding Framingham Centre Station—the receipts so accruing not to exceed 6 per cent. on the cost of the road. The Boston and Worcester Company however, agreed to pay absolutely 6 per cent. on the share capital of the branch not exceeding $60,000. The amount paid the past year is stated at $15,563 20.

The charter of the Boston and Worcester Company was the first in the State which expressly authorized the use of the locomotive; and the locomotive was used for the first time in New-England upon this road as the motive power for passenger trains. The charter provided that no other road leading in the same direction should be built within a distance of five miles from its route, and also that the State might purchase the road after 30 years from its completion, on paying the cost of construction, and such sums in addition thereto as would be equal to dividends of 10 per cent. annually on such cost. With this limitation, the charter is perpetual.

We have received the report of this Company for the fiscal year ending November 30, 1860, which was presented at the annual meeting of the stockholders, held in Boston on the 6th ult. The income of the year is thus given:

From passengers		$559,020 67
" Freight		451,543 44
" Rents		17,794 79
" Mails		14,892 84
" Interest		2,421 27
		$1,045,683 01
The total expenditures for working the road were	$546,133 35	
Total amount paid on account of new location at Brighton, which is now completed, including two new iron bridges	26,968 25	
Total loss on machine shop, engine house, tools and engines by fire, $55,049 77, less amount of insurance $21,752 49	33,297 28	
		606,398 88
Net income		$439,284 13
Deduct dividend—8 per cent		360,000 00
Leaving a surplus of		$79,284 13

The earnings have been $21,387 72, and the expenses $9,412 *less* than the preceding year. The funded debt of $500,000, due July 1, 1860, has been paid. The company has now no funded debt. The floating debt is stated at $47,584 47—an increase during the past year of $17,988 99. The total cost of road and equipment has been $4,738,441 70—an increase during the past year of $9,861 37. The amount of assets or property held by the corporation in addition to the cost of the road is $589,125 20—being a decrease of $433,807. The total share capital, authorized and paid in, is $4,500,000.

The number of miles run by passenger trains has been 340,844; by freight trains, 177,798; by other trains, 7,352—total miles run, 525,954. The number of passengers carried in the cars has been 1,601,013; do. carried one mile, 24,979,294; do. carried one mile to and from other roads, 8,074,-224. The number of tons of merchandise carried in the cars was 352,999; do. carried one mile, 12,619,150; do. carried one mile to and from other roads, 9,196,560. The average rate of speed adopted for passenger trains is 33 miles per hour; accommodation trains, 25 miles; for special trains 21 miles; and for freight trains 11 miles. The estimated weight in tons of passenger cars, not including passengers, hauled one mile has been 14,-337,670; do. freight trains, not including freight, 18,445,259. The income from *local* business has been as follows:

From passengers	$359,980 39
" freight	195,818 65
Total for local business	$555,799 04

The total number of passengers carried on the branch roads, including the Agricultural, was 594,613; do. to and from Boston, 387,409. The total number of tons of freight carried on do. 61,-430; do. to and from Boston, 45,396. The total gross earnings of all the branches were $70,607 22; and the expenses, $64,566 65—netting, exclusive of rent or interest, $6,040 57. The gross earnings on main road, on branch business, was $151,608,-

05; the net earnings on do. $72,464 60. The net profit on total business was $76,515 17.

The following table will show the length, cost and business of each branch separately:

	Length in miles.	Cost.	Branch earnings.	Main road earnings from bran's.
Millbury.....	3.	$43,263	$ 856	$8,828
Milford	11.966	327,618	33,668	62,634
Saxonville.....	3.867	81,131	2,407	12,972
Newton, L. F...	1.251	39,350	2,275	11,847
Brookline	1.553	60,301	13,216	20,387
Framingham...	1.998	49,081	945	9,669
Agricultural ...	14.	300,000	17,240	25,271

The company have 30 locomotives, of which 13 are coal, and 17 wood-burners; 7 of the coal-burners are used exclusively for freight, and 6 for passengers. All of the engines are in running order, and excepting 2 used for switching, are of good quality, and most of them in good condition.

The stock of passenger cars consists of 49 eight-wheel first class, 44-236ths of the 18 first class cars running between Boston and New York, 2-5ths of the 2 first class cars, of 16 wheels each running between Boston and the Norwich Steamers, also 1-5th of the iron car built at the expense of the Boston roads as an experiment. Of freight cars the company have 272 eight-wheel, and 23 four-wheel—equal to 567 four-wheel cars.

It will be seen that the cost of the road and branches, (not including the Agricultural) is $238,441 70 in excess of the assessments on capital stock, amounting to $4,500,000. It is proposed to reduce the construction account to this sum, without authority to increase it, except by a vote of the stockholders.

The following is a general statement of the financial condition of the company, November 30, 1860.

Assessments for capital.....	$4,500,000 00

New York and Erie Railroad.

SECOND MORTGAGE BONDS.

New York, Feb. 21, 1861.

Messrs. JOS. WALKER, URIAH J. SMITH, and WILLIAM T. HOOKER. } Trustees.

GENTLEMEN: Pursuant to the provisions of the Act of the Legislature of this State, relating to the foreclosure and sale of the New York and Erie Railroad Company, and as Trustees for the unsecured Bondholders and Stockholders, we have purchased the property of that company, subject to all the mortgages thereon; and it is now desirable, for the purpose of securing the interests of all concerned, and saving expense and litigation, to withdraw it as soon as possible from the custody of the Courts, and to place it in the hands of the new Corporation, authorized by that law which will assume the payment of all the mortgage bonds and the interest thereon as accruing. The legal proceedings already taken in this State and the State of Pennsylvania on the mortgage under which you are Trustees, and on each of the latter mortgages, as well as the terms under which we have purchased the property, have, in the fullest manner and in language, approved by your counsel, recognized and adjudicated your mortgage as a valid and subsisting security in the order of its priority, to remain such for securing the payment of the $4,000,000 of bonds issued thereunder, with interest. The adequacy of this security is so fully recognized by the public, that the Second Mortgage Bonds are now sought for investment, and can be readily sold in the market at par.

This result having been secured, we assume that there can be no necessity of advantage in continuing the proceedings in the foreclosure suit commenced by you, or the Receivership of the property, provided such of the Second Mortgage Bondholders as desire to receive the amount due on their bonds are enabled to receive it at once, and such of them as prefer to extend the time of payment, can be enabled to make such extension. A large number (we think a large majority) of the bondholders prefer the latter course, and to have their bonds extended for a period of twenty years. To meet this wish, the company, before the sale, arranged for issuing coupon sheets on the entire issue, and over one-fourth of the four millions of dollars of bonds have already been extended. The extensions are rapidly going on; parties desiring the bonds as an investment are ready to pay par for all such as the holders wish to have the money for, and the bonds so purchased will be then extended.

In view of these facts, it seems to us apparent that your bondholders will be much better situated when all these bonds are extended so as to be due at the same time, and the interests of all thereby harmonized; and as many of the bondholders whom you represent are not fully informed of the facts, we have thought it proper to request you to inform them that the above arrangements have been perfected so that they can on the coming first of March, extend their bonds for twenty years, or receive par for them, besides the interest, as they may elect. The extensions will be made, or the money paid on or before the first of March, at the office of the Receiver, where the interest is payable. If any parties prefer to register their bonds, such registry can be made at the same time and place. We are, gentlemen, your obedient servants,

D. S. GREGORY,
J. C. BANCROFT DAVIS, } Trustees.

NEW YORK, Feb. 21, 1861.

To the holders of the Second Mortgage Bonds of the New York and Erie Railroad Company:

The undersigned Trustees of the Second Mortgage of the New York and Erie Railroad Company being informed by the foregoing letter that arrangements have been perfected to enable the holders of the bonds secured by that mortgage to extend them, or to receive the amount due thereon, as they may prefer, hereby call the attention of the bondholders to the announcement thus made, and request that they will promptly elect whether to extend their bonds in the manner proposed and specified in the above letter, or will accept the amount due upon them. The priority of the Second Mortgage over all the subsequent securities of the company, and its legal validity having been adjudicated in the proceedings taken by us for its foreclosure, and the opportunity and option being now offered as above for extending the bonds for twenty years with the same security, or for receiving the amount due, the further prosecution of the foreclosure proceedings will be unnecessary so soon as the bondholders shall have availed themselves of the alternatives thus presented—extension or acceptance of the amount due. Immediate action on the part of the bondholders is desirable, to relieve the property from the expense of further legal proceedings. The 1st of March next being the day of the payment of the semi-annual interest, it is hoped that the bonds will be then presented at the office of the Receiver for such disposition as the holders may elect.

JOSEPH WALKER,
URIAH J. SMITH,
W. T. HOOKER } Trustees.

The following is the new order of registration and form of indorsement of extension:

By this indorsement, made by the New York and Erie Railroad Company, upon this bond and its acceptance by the holder, it is mutually agreed that the principal hereof shall not be due or payable until the 1st of September, 1879; unless default is made in payment of interest on the same for sixty days after presentation of the proper coupons, which (extending to said date) said company has attached and promised to pay; but on such default, the principal will thereupon be due and payable. The mortgage to secure this bond remains unimpaired, and no part of this contract shall be so construed as to affect its priority or validity.

This registered bond is hereby made payable only to ———, or his registered assigns, or the duly constituted authority of either, and is transferable only on the books of the company, its successors or assigns, the acknowledgment thereof by the company to be indorsed hereunder. The current accruing interest is to be paid to whoever shall be the registered holder hereof ten days next preceding the maturity of such interest, or to his duly constituted authority.

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending February 15, 1860:

Passengers	$12,614 38
Freight and live stock	27,325 53
Mails and sundries	1,287 21
Total	$51,227 12
Corresponding week of last year.....	32,087 35
Increase	$19,139 77

Detroit and Milwaukee Railroad Company.

The holders of the first mortgage 7 per cent., and second mortgage 8 per cent. bonds of the Detroit and Milwaukee Railway Company are hereby notified that a mortgage has been executed by the Detroit and Milwaukee Railroad Company to Alexander Hamilton Sibley, Charles John Brydges and Richard Irvin, Trustees, giving additional security for the payment of five coupons, due May 15 and Nov. 15, 1860. May 15 and Nov. 15, 1861, and May 15, 1862. Holders of the said coupons can avail themselves of the privilege of this mortgage and receive bonds in exchange therefor by presenting them at the office of A. H. Sibley, Managing Trustee, No. 22 Pine st., New York, at the office of the Detroit and Milwaukee Railroad Company in Detroit, or at the office of the Great Western Railway Company, in London, England. Printed copies of the mortgage will be furnished to any bondholders at either of the places above mentioned on application.

Census of the United States for 1860.

STATEMENT showing the area of the several States and Territories in the United States, with the number of inhabitants at the several enumerations of 1840, 1850 and 1860, with the increase of population in each State and Territory for the last three decades, and the per centage of such increase.

Grand total of the United States	3,024,535	17,063,353	23,191,876	31,648,888	4,202,651	6,028,523	8,457,012	32.67	35.87	36.46

The following table shows the population in the United States for the decade just closed, compared with the enumerations of 1840 and 1850, and the ratio of increase for the three periods. The total increase since 1850, has been 8,457,412, and the ratio of increase upon the population of 1850, 36.46 per cent.

It may be interesting to go back to the first census, and trace the progress of population to the present time. By the census of 1790, it was 3,929,827; 1800, 5,305,925—ratio of increase 35 per cent.; 1810, 7,239,814—ratio of increase 36.5 per cent.; 1820, 9,638,131—ratio of increase 33.1 per cent.; 1830, 12,866,020—ratio of increase 33.5 per cent.; 1840, 17,069,453—ratio of increase 32.7 per cent.; 1850, 23,191,876—ratio of increase 35.8 per cent.; in 1860, 31,648,888—ratio of increase, 36.46 per cent.

The ratio of increase this last decade is greater than any previous one. This is owing to immigrations from foreign countries. It is remarkable that the ratio of increase should not be diminished with the increase in the aggregate numbers. There is considerable difference in the ratio of increase North and South. This is also due to immigration, which tends chiefly to the Northern States.

The Slave population of the United States, at the several enumerations was as follows: In 1790, 697,897; in 1800, 893,041; in 1810, 1,191,364; in 1820, 1,538,038; in 1830, 2,009,043; in 1840, 2,487,455; in 1850, 3,204,313; in 1860, 3,999,353. The ratio of increase of Slaves the past decade was about 2.3 per cent. The increase of whites in the Southern States was about 32 per cent. At present we have been able to obtain only the enumeration of inhabitants. That of the productions and material interests of the Country are not yet published, and will not be for some time to come. As far as given, the returns are of great interest, and strikingly illustrate the advance of the country for the past 10 years.

The total area of the United States is 3,024,545 square miles. The population to the square mile for the whole country consequently is 10.46 per cent. A very large proportion of it as yet is almost entirely uninhabited. The most densely-inhabited State is Massachusetts, which has a population of 171 to the square mile, New York has 81; Pennsylvania, 63; Ohio 59. The number to the square mile in all the Northern States, including California and Oregon, is 22.34. In the Southern States it is 13.91.

The representative population of the Northern States is its whole population—that of the South 10,834,573, two-fifths of its slaves being deducted. The number of representatives in the next Congress from each section will be: 149 from the North, and 84 from the South.

The following is a statement showing the absolute Free and Slave Populations in the Slave States at the last three enumerations.

States	Free Population. 1840.	1850.	1860.	Slave Population. 1840.	1850.	1860.

Albany City Finances.

The following is a synopsis of the annual report of the Finance Committee, submitted to the Common Council of the city of Albany, on the 25th ult:

Aggregate receipts of the year		$448,418 58
Balance in Treasury Nov. 1st, 1859		24,210 31
Total resources		$472,628 89
The disbursement for the same year were	$423,276 93	
Balance on hand Nov. 1st, 1860	49,351 96	472,628 89

The following table exhibits the details concerning the city bonded debt, contracted prior to May 1st, 1848—not including, however, the loan of the Western Railroad Corporation:

	5 per ct.	6 per ct.	7 per ct.	Total.
Bonds when payable on demand	$.....	$4,350	$1,500	$5,850
1861	.....	20,000	.....	20,000
1862	.....	20,000	.....	20,000
1864	50,000	.....	.....	50,000
1865	.....	100,000	.....	100,000
1867	.....	20,000	.....	20,000
1868	.....	20,000	.....	20,000
1869	.....	10,000	.....	10,000
1870	21,000	.....	.....	21,000
1871	20,000	.....	.....	20,000
1872	20,000	.....	.....	20,000
1873	20,000	.....	.....	20,000
1874	19,000	.....	.....	19,000
1876	.....	75,000	.....	75,000
	$150,000	$269,850	$1,500	$420,850

In addition to the above debt, the city bonds are extant for $300,000, loaned to the Albany Northern Railroad Co., and payable May 1st, 1879, with interest at 6 per cent.

Also $850,000 bonds, for the water debt, bearing 6 per cent interest. These bonds mature as follows:—

1870	$15,000
1871	285,000
1872	50,000
1876	250,000
1881	250,000
	$850,000

The interest on these bonds is paid out of the receipts for water rates, and a sinking fund, to which an annual appropriation of $5,000 is made, is provided, to meet deficiencies and aid in liquidating the bonds.

A recapitulation shows the city debt thus;

City debt proper	$429,850
Loan to Alb. Northern Railroad Co.	300,000
Water debt	850,000
	$1,570,850

Beside the foregoing, the city in $1840--'41 issued its bonds for one million dollars, to the Western Railroad Corporation. These bonds bear 6 per cent. interest, which always has been, and, no doubt, will continue to be, promptly paid by the Corporation to which they were loaned. The principal of these bonds mature thus:

July 1st, 1866	$250,000
" 1870	300,000
" 1871	200,000
" 1876	250,000
	$1,000,000

To provide for the payment of which, the said Corporation make annual contributions to a Sinking Fund. On the 30 Nov., 1860, this sinking Fund amounted to $649,050 61. The amount applied and in hand applicable to the payment of the water debt, is $58,584 70. It is believed that the annual tax appropriation of $10,000, together with the other ordinary receipts of the General debt Sinking Fund will be sufficient to retrieve the $20,000 city bonds maturing July 1st, 1861. The $20,000 falling due in 1862 will likely be met in the same manner.

The N. Y. Central Railroad Company are indebted to the city as follows: $125,000, payable in 1864, with interest, semi-annually, at 5 per cent., and $125,000 additional, maturing in 1864, without interest. The conditions existing concerning this last sum are such that its receipts cannot be fully relied upon by the city to meet its own obligations. The said Company have the privilege of retaining the amount indefinitely by paying 5 per cent. interest thereon; or they can return the property, for the purchase of which the said debt was contracted, to the city and thereby discharge the debt.

Detroit and Milwaukee Railway.

Offices of the Great Western Railway of Canada.
126, Gresham House, Old Broad street,
London, E.C., January 9th, 1861.

Sir.—since the arrival of Mr. Brydges in England, the whole question of the present position of the Detroit and Milwaukee Railway Company has been fully considered by the board of the Great Western Railway of Canada.

The board has come to the determination to recommend their Shareholders to agree to the reorganization of the Detroit and Milwaukee Company on the following conditions, it being of great and undoubted importance to all the interests concerned that a speedy settlement should be made:

1st. That all the coupons on the first and second mortgage bonds of the Detroit and Milwaukee Company, up to and including 15th May, 1862, be funded and exchanged for bonds bearing 7 per cent, interest, maturing on 1st January, 1866, to enable the Company to use the net earnings of the line for paying certain of the debts of the Company, ordered by the Court to be paid in cash. The interest on these deferred bonds will be paid half-yearly in cash.

2nd. That the amount of the Great Western Company's foreclosed mortgages, with interest up to the date of the sale of the road, 24th October, 1860, be converted into preference shares, to be secured by a third mortgage (subject only to the priority of the first and second original mortgages) on the entire line, to carry interest up to 7 per cent. per annum out of the net earnings of the line.

3d. That a fourth mortgage, subject to the above, be created, to secure a further issue of preference shares, also bearing interest up to 7 per cent. per annum, to an amount equal to the floating debt of the Company—the holders of which shall be entitled to receive such stock at par in payment of their claims.

4th. That under the circumstances of the case, after the payment of the sums ordered by the Court to be paid in cash, the interest upon the two above-mentioned classes of preference shares up to 31st December 1864, be paid equally *pro rata* out of the net earnings of the line, after paying interest on the two prior mortgages.

After 31st December, 1864, interest upon the different classes of securities to be paid in the order of their legal priorities.

5th. That the ordinary Shareholders shall receive ordinary shares in the new Company, to the extent of 20 per cent. of the par value of their old shares.

The Directors of the Great Western Railway of Canada believe the above arrangement to offer the best prospect of restoring the Detroit and Milwaukee railroad as a commercial property, and recommend the concurrence of those first and second bondholders who have not yet joined in it, to be given in the annexed form as soon as possible.

The concurrence of holders to the amount of upwards of 1,000,000 dollars of these bonds, has already been obtained, and I need hardly remind you that unless the consent of the first and second bondholders is assured the Directors of the Great Western Railway of Canada cannot undertake to recommend the arrangement proposed to their own Proprietors.

I am therefore instructed to beg the favor of your immediate reply and decision in the enclosed form.

I am, Sir, your obedient servent,
Brackstone Baker, Secretary.

P.S. I annex a general statement of accounts of the Detroit and Milwaukee Railway to December 31st, 1859; also revenue accounts for six months ending June 30th, 1860, and for five months ending November 30th, 1860.

The Trade and Commerce of Toledo.

The Toledo *Blade* contains a full and comprehensive statement of the trade of that city for the year 1860. In reference to grain, it is shown that the receipts have been more than double what they were in 1859, being 14,504,903 bushels, against 7,250,000 bushels. The statement for 1860 is as follows:

Flour to wheat, bushels	3,602,585
Wheat, bushels	5,272,698
Total flour and wheat	8,875,275
Corn, bush	5,333,751
Oats, bush	137,538
Barley, bush	122,382
Rye, bush	35,957
Grand total	14,504,903

This would place Toledo second only to Chicago among Western cities as a receiving point, the comparative receipts at Chicago, Toledo, Milwaukee and Detroit being as follows:

Chicago	35,691,701 bushels.
Toledo	14,504,903 "
Milwaukee	11,040,488 "
Detroit	7,075,415 "

American Railroad Journal.

Saturday, March 2, 1861.

Share and Money Market.

The week ends with the most favorable prospects for the adjustment of our political differences than have presented themselves since the Presidential election. The compromise conference have united in recommending propositions as the basis of composition, while Congress has initiated the steps for amending the constitution of the United States so that

"No amendment shall be made to the constitution which will authorize or give Congress power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or servitude by the laws of said State."

This proposition which is now to be submitted to the States, is likely to be widely accepted till it is seen what the action of the States is to be. Under these influences, the stock market to-day, (Thursday,) is most buoyant, showing an advance of from one to three per cent. Should the measure now appear to be generally acquiesced in, there is good prospect that business matters will soon regain their wonted activity. At any rate, the prospect ahead is very favorable, both for an improvement in the stock market and for easy rates of money. The decided advance in the recent Government loan has had a most favorable influence ininspiring confidence in, and contributing to the improvement of, other securities.

The advance on the prices of yesterday were as follows:

1¼ per cent. in New York Central.
1 per cent. in Erie.
1¾ per cent. in Hudson River.
1 per cent. in Harlem preferred.
1½ per cent. in Reading.
1 per cent. in Michigan Central.
¼ per cent. in Michigan Southern Guaranteed.
1½ per cent. in Illinois Central.
1 per cent. in Galena and Chicago.
1½ per cent. in Cleveland and Toledo.

2 per cent. in Chicago and Rock Island.
3 per cent. in Chicago, Burlington and Quincy.
1¼ per cent. in Pacific Mail.
2 per cent. in Tennessee Sixes.
3½ per cent. in Missouri Sixes.
3 per cent. Virginia Sixes.
1½ per cent. in Federal six per cent. Stock.

The State stocks closed as follows:

	Bid.	Asked.
Missouri 6's	69¾	70
Tennessee 6's	76½	76¾
Virginia 6's	80½	81
California 7's	87	88
North Carolina 6's	82½	83
Indiana 5's	82	85
Indiana 2½ per cents	60	61

Ohio 6's, 1870 and 1875	—	103
Ohio 6's, 1886	106	109
Illinois stocks	100	—

The Government new loan touched 94½@94¾, the Coupon Fives of 1865, 90.

The Late Richard H. Winslow.

This gentleman, so well known in the business circles of this city, and for many years a leading mind in the great movement that covered our country with railways, died at his residence at Westport, Connecticut, on the 14th ult. He was born at Albany, about 55 years ago, and was a direct descendant of Governor Winslow of Plymouth Colony. He came to New York about 30 years since and immediately went into business in Wall street. His prominence, however, as a public man commenced with the great railway era of the country, which almost immediately followed the discovery of California. On the 1st of January, 1849, he formed a copartnership with J. F. D. Lanier, Esq., many years a resident of the West and who brought to the firm not only all the qualities that can command affection and respect, but a very wide and intimate knowledge of the public men, and the wants and resources of the West. Mr. Lanier brought with him the first Western Railroad Bond ever offered in this market, and the firm soon turned its attention to the negotiation of this kind of securities. At that time, Western railroads hardly existed even in idea. There were no precedents to inspire confidence, or to guide in framing a system or plan for presenting these enterprises to the public. Before anything could be accomplished, a favorable opinion had to be created, a formidable undertaking where monetary co-operation was to be secured. For this office Mr. Winslow was peculiarly fitted. He was a man whose earnest convictions and great energy seldom failed to impress his own views upon all with whom he came in contact. The commencement made by the firm, however, was in a very small way. It was compelled to take a portion of loans offered, and divide the balance among a very limited circle, the firm even in such cases being frequently called upon to guaranty prompt payment of interest on the loans. The bonds of the Madison and Indianapolis Railroad were first brought out, followed by those of the Little Miami, Columbus & Xenia, Cleveland Columbus & Cincinnati, Lake Shore and other Western railroads. The immediate success of these works fully vindicated the representations made in reference to them, and realized large profits to the purchasers of their securities. Thenceforward the operations of this firm were distinguished rather for their magnitude than for the difficulties to be surmounted. For several years nearly every loan brought upon the market was proffered it, securing to it a selection of the best offered. In a short time, its operations extended to almost every State in the Union where railroads were in progress, and a very long list of our best paying projects might be named, for the construction of which this firm were instrumental in securing the means. So thoroughly had this firm become established in public confidence, that, in the years of 1852, 1853 and 1854, it was no unusual affair for it to make negotiations equaling $1,000,000 in a single day, while sales varying $100,000 to $500,000 a day were of common occurrence. In 1852, the firm was enlarged by the addition to it of Mr. James Winslow, brother of the deceased.

Considering the immense number of securities negotiated, the firm was very fortunate in the enterprises selected. This was in a great measure due to Mr. Lanier, whose thorough and intimate acquaintance with the West enabled him to fore see with great accuracy the works likely to be successful. Nearly all the securities negotiated have had their interest promptly paid, while many of them rank among the very first class. This firm were also the first to introduce *County* bonds of the State of Ohio upon this market, and negotiated the greater portion of these, which are still regarded as one among the most reliable Western securities.

After 1854, the firm gradually withdrew from railway negotiations and confined itself almost entirely to banking, in which it transacted a large business. About 18 months since Mr. Winslow retired from it on account of his health which continued steadily to decline till his decease.

What these gentlemen actually accomplished, however, is to be looked for in the *results*, rather than in the magnitude of their operations. The credit they early established for Western securities, spread till it extended over the whole of Europe as well as of this country. The capital of both was freely proffered to our enterprises. A similar spectacle was never seen. Railroads were commenced simultaneously in every part of the Union, and in the decade just closed 25,000 miles were constructed. In one or two years, 4,000 miles were opened each year. The whole system sprang as if by magic into existence, stretching from Quebec in Canada, to New Orleans, 2,500 miles apart, and from the eastern part of Maine to the eastern part of Kansas, penetrating every portion of our wide domain. The whole of Europe has yet hardly constructed the extent of mileage constructed in the United States within the past 10 years.

The commerce of a country like the United States is mainly a creation of its public works, as these are essential to give a commercial value to the products of the interior. A person who provides the means for the construction of a railroad is a public benefactor. Its results are the measure of good he has accomplished. But such persons are often the unseen spring in the mechanism, while the one who superintends the execution of a single piece of the work, becomes the conspicuous object. But for the former, the latter could have had no function or name. Now if we take the results that followed the efforts of the pioneers in the great railway movement, we shall have nothing in history to compare with it. In the Western States, where this has been the most conspicuous, there are now 10,500 miles of railroad, constructed at a cost of $400,000,000, carrying freight to the amount of 7,500,000 tons annually, and having a value of at least $500,000,000. The population of these States increased from 4,721,554 in 1850 to 7,797,528 in 1860, or at the rate of about 70 per cent. Their wealth has increased in threefold ratio. First class cities have sprung into existence, and the whole face of the country presents the scene of a numerous, active and thriving population with a vast commerce, nearly all the creation of its public works.

In the Eastern States the most striking effect of these works is seen in the progress in population and commerce of the city of New York. The population of this city and its environs has increased from 645,000, in 1850, to 1,155,000, in 1860. Its exports, in 1850, were $47,580,357; in 1859, $146,683,450. Its imports, in 1850, were $116,667,558; in 1859, $229,408,130. Its wealth, in the same time has more than trebled. This advance is the real measure of the results of the construction of Western railroads, as New York has reaped the same advantage as if each had been constructed for its particular benefit.

Such results, the firm of which Mr. Winslow was an active member, were greatly instrumental in achieving, and it is proper that the occasion of his decease should not be passed by without a reference to them, and which are certainly the proudest monument ever erected to the memory of man.

Interest and Dividends.

The semi-annual interest on the second and third mortgage bonds of the New York and Erie Railroad Company, due March 1st, will be paid on presentation at the office of the Receiver, in Erie Place, New York.

The coupons on Jersey County, Ills., bonds, due March 1st, will be paid on presentation at the office of M. K. Jesup & Co., 44 Exchange Place.

The Lykens Valley Railroad and Coal Company have declared a dividend of 6 per cent., payable on and after the 4th inst., at the offices of the Company, 13 William st., N. Y., and 2 South Seventh st., Philadelphia.

The Oswego and Syracuse Railroad Company declared a semi-annual dividend of 3 per cent. on the 20th ult., payable in New York at the Howard Insurance Company. In Albany and Troy at the New York State Bank. In Utica at the Oneida Bank. In Syracuse at the Bank of Syracuse. All others at the Lake Ontario Bank, Oswego. Dividends not called for within 30 days will be paid at the office of the Treasurer only.

The coupons due March 1st, on the Bonds of the Raritan and Delaware Bay Railroad Company, will be paid at the office of the Company, No. 191 Fulton st.

The Southwestern Railroad Company of Georgia have declared a dividend of 4 per cent. out of the earnings of the past six months.

The interest coupons due March 1 on the bonds of the Saratoga and Whitehall Railroad will be paid at the Bank of the State of New York.

The interest on the bonds of the New York and Flushing Railroad Company, due March 1, will be paid at the Seventh Ward Bank, on presentation of the coupons.

Housatonic Railroad.

The receipts of this road for the year ending December 31, 1860, were as follows:

From freight		$196,306 68
" Passengers		101,417 74
" Mail, exp's, rent, wharfage, etc	21,382 08	
		$319,106 68
Expenses	166,635 32	
Balance		$152,471 36

Disbursed as follows:

State, Town, and City Taxes	$1,327 72	
Rent of Berkshire road	42,000 00	
Rent of Stockbridge and Pittsfield road	31,409 00	
Rent of West Stockbridge road	696 72	
Coupon Interest	10,500 00	
Interest on old bonds and loans exchange, &c	7,049 97	
Suspense, and other accounts, deemed valueless	2,979 02	95,962 43
Surplus to credit of profit and loss		$56,508 93

Western (Mass.) Railroad.

At a meeting of the stockholders of this corporation, recently held in Boston, the President was inquired of as to the ability of the road to meet its bonded debt, when due, and he replied that there would be funds enough to pay the Albany (city) bonds ($1,000,000), when the first bonds ($250,000) became due in 1866; and if a portion of the income devoted to the payment of these bonds should then be diverted to the sinking funds for Massachusetts bonds, the company would also be able to pay them at maturity; and without such diversion of income the deficiency would not exceed $500,000. He stated that the road had purchased $300,000 of the Massachusetts bonds, which were now in the office of the State Treasurer, and which the directors would endeavor to have canceled, that no improper use could be made of them.—*Albany Statesman.*

Hannibal and St. Joseph Railroad.

The earnings, expenses and net earnings of this road for the fiscal year ending August 31, 1860, were as follows:

1859–'60.	Earnings.	Expenses.	Net earnin's.
September	$74,223.80	$33,593.45	$40,630.35
October	80,212,60	30,745.38	49,467.22
November	80,809.68	32,606.92	48,202.76
December	55,017.31	39,632.08	15,385.23
January	43,021.08	26,349.34	16,671.74
February	50,071.55	34,394.78	19,636.77
March	113,460.42	46,263.71	67,196.71
April	130,308.00	53,617.84	76,690.16
May	104,849.70	49,079.39	55,770.31
June	81,102.15	41,838.89	39,213.26
July	69,697.26	47,969.16	21,728.10
August	75,082.95	38,392.76	36,690.19
Total	$961,856.50	$474,523.70	$487,332.80

The gross and net receipts have been less than the earnings by $23,120 21. The following is the statement:

Passenger receipts		$469,625 25
Freight receipts		418,134 00
Miscellaneous receipts		50,976 94
Total		$938,736 19
Payments on account of operating expenses, and amount due on pay rolls, &c., at end of last year		$528,256 14
Payments on acc't of last year steam'rs		18,154 38
Paym'ts for materials more than used.		17,005 71
Amount standing against Missouri River boats (uncollected freight bills, expenses, &c.)		46,868 36
Cost of sundry assets on hand		8,477 41
Payments against interest		298,368 49
Cash to balance		20,605 60
Total		$938,736 19

The road was opened through to St. Joseph, Feb. 13, 1859; the average length which had been in operation from the middle of the previous November was about 170 miles.

The gross and net earnings for 9½ months, ending August 31, 1860, compare as follows:

	Gross earnings.	Net earnings.
9½ months, year ending Aug. 31, 1859	$449,278 51	$232,312 99
Year end'g Aug. 31, 1860	961,856 50	487,332 80
Increase	$512,577 59	$255,019 81

The total sales of land by the company to August 31, 1860, are as follows:

	No. of acres.	Av. price per acre.	Amount.
Pre-emption sales	1,889.64	$2 50	$ 4,742 10
Sales for cash and bonds other than pre-emption	10,322.60	12 16	125,576 03
Short credit sales	902.34	8 09	7,301 03
Long credit sales	18,993.63	10 77	204,700 68
Total	32,108.21	$10 66	$342,301 84

Town Lots sold up to August 31, 1860.

	Number.	Av. price.	Amount.
Lots sold	90	$75 54	$6,799 00

The sales of land for the year amounted to $199,846 25. The report says:

The experience of the past season does not alter our opinion that the State of Missouri, being from its climate and soil suited to a greater variety of productions than the States either north or south of it, will be more steady in its average results than the other Western States.

We are glad to confirm our last report, that the people along the Missouri River above and below St. Joseph, are showing a more decided appreciation of the value of our line, as compared with that furnished by the steamers upon the river. When our road was first opened we understood that there were nearly eighty steamers in the trade of that river, and nearly fifty were engaged in business there at the beginning of the year 1860, which closed with only ten in the trade. The association under which the steamers were for many years run upon that river has ceased to exist, broken up by the large losses incurred in an attempt to keep up a regular line over a route requiring from a week to ten days (according to the state of the water), against the route via the road, requiring but a little over 24 hours for the journey. We think, therefore, that our prospects for more uniform and satisfactory rates from that part of our business have very much improved.

The treasurer's report shows the construction account to amount to $12,364,134 27. The liabilities of the company September 1, 1860, were:—

Bonds of the State of Missouri, 6 per cent. maturing 1873, 1876		$1,500,000 00
Bonds of the State of Missouri, 6 per cent., maturing 1886, 1887		1,500,000 00
Plain b'ds, 7 per cent. maturing 1870		11,000 00
Land mortgage bonds, 7 per cent., maturing 1881		5,000,000 00
Convertible bonds, 7 per cent., maturing 1883		1,360,000 00
Second mortgage bonds, 7 per cent. maturing 1889		1,200,000 00
Bills payable, etc		156,643 35
Received from stockholders full paid 17,187 shares	$1,718,700 00	
Ditto part paid 1,813 shares	64,186 00	1,782,886 00
		$12,510,529 35
Less assets reported by fiscal agency:		
Cash	$16,517 04	
Bills and acc'ts receiv'le	45,878 04	
Buchanan County bonds, taken in payment for stock subscribed by the county	11,000 00	
Marion County bonds, taken as above	73,000 00	146,395 08
		$12,364,134 27

Alabama and Tennessee Rivers Railroad.

The Talladega (Ala.) *Watchtower*, of the 30th ult., says: Tracklaying was resumed on the Alabama and Tennessee Rivers Railroad some weeks since, and the track is now completed about four miles above town. The iron will now be extended without interruption we presume, until the road is completed to its northern terminus.

Rock Island Bridge.

By the following table it will be seen that the Rock Island Bridge has carried 192,555 passengers, which, at the low rate of 10 cents each, would amount to $19,255 50; 284,833 tons of freight, which, at the very lowest price for ferriage and handling, would cost $1 per ton, making $284,833, or a grand total on freight and passengers of $304,088 50:

Statement showing Passengers, Loaded Freight Cars, and pounds of Freight passing over, and Boats and Rafts passing through, the Draw of the Railroad Bridge, to June 30, 1860.

Journal of Railroad Law.

COUNTY BONDS NOT NEGOTIABLE INSTRUMENTS; ILLEGAL SALE OF, BY THE NORTHWESTERN RAILROAD COMPANY; RIGHTS OF SUBSEQUENT PURCHASERS.

The nature of bonds as to their negotiable or non negotiable character, involves, not only the value of an immense amount of property, but the rights of parties who are engaged in buying, selling, or in any manner transferring them. Their character in this respect was recently considered by the Supreme Court of Pennsylvania in the case of Daniel Diamond *vs.* the county of Lawrence; and the court held contrary to English and American decisions that such instruments are not negotiable, and, therefore, that parties purchasing, take them with all the conditions or equities which may have existed between the original holder and the maker.

In this case the plaintiff claimed a judgment for the amount of a coupon accompanying bond No. 56 issued by the county to the Northwestern Railroad Company, in part payment of the county's subscription to the stock of said company, which bond and coupon the company transferred to a contractor for work done on their road, and by several successive transfers the said bond and coupon came into the hands of the plaintiff for a valuable consideration.

But on the 5th of June, 1857, before the Company had transferred this bond, the county of Lawrence filed her bill in equity in the Supreme Court of Pennsylvania against the Railroad Company praying for an injunction upon the company against any disposition of the bonds of the county and for a decree that said bonds be delivered up for cancellation. The subpœna was issued and served before the company parted with this bond. On the fourth of March, 1859, the Supreme Court made a decree in this suit to the effect that the entire subscription of $200,000 on the part of the county to the stock of the Company be, and the same was thereby, annulled and set aside, without prejudice, however, to any right, which third persons had lawfully acquired as purchasers of the bonds issued; and it was further decreed that the company should restore to the county the $200,000 of bonds that remained on hand, and pay to the county $198,000 in satisfaction of the bonds they had sold and transferred. The pleadings and proofs in the case exhibited irregularities in the making of the subscription. The court held that the subscription was valid, but that the sale of the bonds was void, because sold for 64 cents on the dollar in violation of the act of Assembly under which they were issued. It was on this ground, the illegal sale of the bonds below par, that the decree was founded.

The following is the opinion of the Court.

WOODWARD, J.—It is manifest that the bond now in suit was transferred by the company in contempt of the authority of this Court. After the service of the subpœna in the equity suit, the company had no authority, under any pretence whatever, to part with a bond. The directors, who were the governors of the company, were trustees of the stockholders. One of the largest of the stockholders came into court on the equity side, and complained of fraudulent mismanagement of the corporation, of the illegal issue of the bonds to the company, and of the illegal disposition of a portion of them by the company.

Of our right to take jurisdiction of such a case there can be no question. That our jurisdiction attached from the moment the subpœna was awarded, is equally clear. Though no special or preliminary injunction was issued, it is apparent that if the company could, after service of subpœna, go on and sell bonds, they might defeat our jurisdiction altogether. I am not now speaking of the right of a purchaser from them, but only of their right to sell, and, under the circumstances of the case, we hold that the sale of bonds, after service of the subpœna in equity, and before final decree, was an attempt to remove the subject of litigation beyond our jurisdiction, and so a contempt.

Now, as to the purchaser. Whether the purchaser of bond No. 56, is within the saving clause of the decree, depends upon the question whether he is to be affected with notice of the equity suit. He, and all under whom he claims, purchased after the institution of that suit. Were their rights lawfully acquired? * * * *

The American cases, which have limited and qualified the doctrine of *lis pendens* as here stated, will be found collected in a note to page 385 of Adam's Equity. The most material of these cases is French *vs.* the Loyal Company, where it was held that the doctrine of *lis pendens* can only affect a purchaser from the party to the suit of the subject of controversy. This is a very material limitation, and would, if it were followed, save the plaintiff's case.

But considering the peculiarities of this case, and especially the extraordinary notoriety which attended the equity suit against the railroad company, we think the rule is applicable here without that limitation. And, according to the rule, the suit was notice to all the world, of all the facts alleged in the pleadings, so that this plaintiff stands in no better situation for enforcing the bond against the county than the company themselves would stand. If we would not compel the county to pay the coupons to the company, for the reasons to be found in that suit, for the same reasons we will not compel them to pay the plaintiff.

It is argued that the bonds and coupons are negotiable instruments, and, therefore, that this defence, like all others, is excluded. We have said, on several former occasions, that we will not treat bonds like these as negotiable securities. On this ground we stand alone. All the courts, American and English, are against us. Be it so. We are not insensible to the importance of this fact, nor are we wanting in deference to the learning and wisdom of the judges who differ from us. But we are a Pennsylvania tribunal, sitting in judgment on an occasional, and extraordinary security for money created under Pennsylvania statutes. We know the history of these municipal and county bonds—how the Legislature, yielding to popular excitements about railroads, authorized their issue—how grand juries, and county commissioners, and city officers, were moulded to the purposes of speculators—how recklessly railroad officers abused the overwrought confidence of the public, and what burdens of debt and taxation have resulted to the people. A moneyed security was created and thrown upon the market by this paroxysm of the public mind, and the question is, how shall the judicial mind regard it?

According to the law merchant, the purchaser of negotiable paper takes it discharged of all equities betwixt the original parties, but the law merchant is a branch of the common law that is founded in the usages of trade and business among merchants. It is not a temporary, local, statutory system, but a permanent and universal jurisprudence, having no root in any statute; the same thing substantially, all over the civilized world, and its uniformity essential to the maintenance of the commerce of the world.

Why should these bonds be referred to *that* system of jurisprudence? They are temporary, and will never be repeated again whilst the world stands. They are local in their origin, issued by counties, cities and boroughs here in Pennsylvania, not for ordinary indebtedness, nor for purposes which belong naturally to such municipalities, and they are rendered lawful only by a special and extraordinary exercise of legislative omnipotence. Unlike bills of exchange, they do not grow up out of the daily business of mankind, but are creatures of statute law. They generally recite on their face, or refer to, the authority by which they exist. They are called by the Legislature "certificates of loans or bonds"—never notes or bills. They always wear a broad plain impress of a seal which is the only test of their authority, and which, added to a bill of exchange, would instantly destroy its commercial character the world over. The only point of resemblance between them and bills of exchange is, that both are payable to bearer, but let it be remembered, that any sealed instrument for money may be made to a particular payee "or bearer," whilst no negotiable instrument can be made under seal. It may be added that the constitution of Pennsylvania has been so amended as to forbid a future issue of such bonds—a provision which nobody ever regarded as a blow at commercial paper. These are distinctions which justify any court in refusing to treat bonds of this nature as commercial paper. But it is said the rights of innocent purchasers cannot be protected unless these

tinctions be disregarded. I reply the rights of innocent tax-payers cannot be protected if they are. No man can go over the history of these bonds and fail to see that there are two parties involved, both of whom are worthy of the regards of the judicial eye. On the one hand, there are the purchasers who have invested their money, generally at a large discount, but on the faith that the people whose representatives have issued the bond will see to its redemption—and on the other, there are the people whose representatives have hurried them thoughtlessly into oppressive indebtedness, without an equivalent. Now, if equal justice is to be administered to both parties, no narrow and technical grounds can be assumed, and certainly the bond must not be treated as a bill of exchange. Nor can the coupon, for it is part of the same instrument, and is not of itself a complete contract.

What then is equal justice both to purchasers and people in respect of these bonds? Seeing that the people, at the least, *permitted* their accredited agents to issue them, and that *some* consideration was received for them in the stock subscribed, and in the progress of the work, there is reason in holding them bound to pay so much money on each bond as it brought into the treasury of the company. That money, whether honestly applied to the work or not, was honestly paid in, for the purpose of being so applied. For that money, when it falls due, and for the interest as it accrues, the country would seem, on all principles of equity and fair dealing, to be justly liable to the holder of the bond. But the holder ought not to have more than that money, because he, or others whom he claims, purchased the bond of the company in violation of the only law which ever legalized the bond. It was forbidden to be sold under par, and all purchasers were bound to take notice of this. Generally, second and third, and more remote purchasers, pay less for such securities than the first purchaser from the company. So that when we give them the amount the first purchaser paid, they have nothing to complain of, except that the speculation turns out not quite as large as was intended.

This, then, is our ground—enforcement of the bond to the extent of the money it actually brought the company, but no entanglements of communities in the meshes of commercial law, for the purpose of holding them liable beyond this extent. We intimated in Thomas' case, that this would be our ground when a case was presented in proper shape, and though no case has yet been presented, we have stood firmly against the tendency of the judicial mind, everywhere else, to treat these special and peculiar securities as bills of exchange. And we have maintained this position perseveringly, in order that we may the better administer even-handed justice to both parties.

This explanation of our position is necessary, as showing why we allow the rule of *lis pendens*, its natural and legal operation in this case. Diamond did not buy mercantile paper, but a *bond*—a bond that was the subject of a pending suit in equity, and, therefore, he purchased it with notice of all the facts of that record.

But the statement of our position on the above the question, bears a more direct relation to one of questions now before us. It is made a part of the case that the bonds were sold at 64 cents on the dollar, contrary to the Act of Assembly, and one of the questions submitted is, whether the plaintiff, if entitled to a judgment at all, would be entitled to a judgment for more than the bond sold for. We decide that he is entitled to no judgment, because of the *lis pendens*—but that if he could recover at all, he could recover only the amount for which the company sold the bond.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT, Sup't.

Boston, Nov. 24, 1860 tf

HUFTY'S

ENGINEERS, ARCHITECTS AND DRAFTSMEN'S

STATIONERY EMPORIUM.

WHATMAN'S TURKEY MILL DRAWING PAPER, Tracing Paper, Plan and Profile, Protractors, Drawing Pins, Faber's, Jackson's, and other makers' Pencils; Field, Level and Memorandum Books of various patterns, Mathematical Instruments, Tape-lines, Mouth Glue, Cross Section paper, Triangles, Label Brushes, Gum Bands, Maiden Gum, Red Tape, Ink, Inkstands and Sand, Water Colors, Pallets, Patent Binders for letters, Portfolios, etc.,

OIL! OIL!

PEASE'S

IMPROVED ENGINE and SIGNAL OIL,

FOR

RAILROADS, STEAMERS, PROPELLERS,

AND FOR EVERY CLASS OF

MACHINERY AND BURNING.

PRACTICAL TESTS, by Engineers and Machinists, of Thousands of Gallons, PROVE this Oil to be **superior** for **Burning**, and **TWENTY-FIVE** per cent. more **durable** than Sperm Oil, for Lubricating, and the **only** Oil that is in all cases **reliable**, that will keep bearings **cool**, and

WILL NOT GUM.

In no case has it failed to meet the approval of the consumer.

The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor

F. S. PEASE, 61 Main st., BUFFALO.

Reliable orders filled for any part of the United States or Europe.

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring THE GREATEST STRENGTH IN THE SCREW THREAD, and making a Nut SUPERIOR TO ANY made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them and will furnish samples and price list on application.

CEMENTS.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 43

ROSENDALE HYDRAULIC CEMENT.

THE GOMEZ NEW PATENT ELECTRIC SAFETY FUSE TRAIN.

In its use it saves an immense amount of drilling and will accomplish ten times more work than the old fashion Powder Fuse or Galvanic Battery can possibly do.

For further information apply to the Commissioners of Central Park, New York, where it is extensively used.

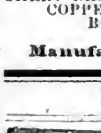
E. GOMEZ,
Office 89 Bleecker and 180 Mercer st., New York.

Communicated by Major W. H. BELL, Major of Ordnance, to Colonel H. K. CRAIG, Chief of Ordnance, by order of Hon. JOHN B. FLOYD, Secretary of War.

WASHINGTON ARSENAL, December 10th, 1857.

COLONEL H. K. CRAIG, CHIEF OF ORDNANCE, Washington, D. C.

On the whole, this Train is considered a very great improvement over the old train of powder or match, and is susceptible of ranges of application to military and civil purposes or cases, far wider, more important, more numerous and useful, than the old train now in use could ever be applied to.



I am, sir, most respectfully, your obd't servant,
W. H. BELL, Major of Ordnance.

HISTORY

OF THE

RAILROADS

AND

CANALS

OF THE

UNITED STATES

OF AMERICA

EXHIBITING THEIR

Progress, Cost, Revenues, Expenditures

AND

PRESENT CONDITION.

By HENRY V. POOR, Esq.,

Editor of the 'AMERICAN RAILROAD JOURNAL.

Illustrated by large and elegant Maps.

THIS work, which is the first of its description eve issued, and which traces the history of AMERICAN RAILROADS AND CANALS through their varying fortunes from the earliest period to the present day, has been written under peculiarly favorable circumstances, whether in relation to editorial experience, or the possession of the material necessary for the proper illustration of the subject, and on these accounts claims a reliability as to facts and deductions which under other auspices could not have been obtained. It is based principally on official reports published from year to year, and which for the past THIRTY YEARS have been accumulating in the office of the AMERICAN RAILROAD JOURNAL. To collate these, and present the essential facts relating to each enterprise, has required patient research and persistent labor. The result has been more successful than could have been anticipated under any circumstances—the general history, the progress of construction, the financial movements and the business operations of every road and canal in the United States being given in detail, the aggregate of all summed up and the averages deduced. The present condition of each work is elaborately set forth in full descriptions of property, share capital, bonds and other evidences of debt, etc., etc.; and the several departments of the subject are so carefully classified and arranged that comparison is rendered easy. The publishers, indeed, have no hesitation in presenting the work to all interested in internal improvements as complete and accurate in every respect—one that in reviewing the past lays the foundation for the future, and which is indispensable alike to the merchant, the banker, the contractor, and indeed to all who invest capital in railroads or canals.

The work will consist of THREE volumes royal 8vo, and be illustrated with a series of large **MAPS** specially drawn to accompany these volumes.

The **first** volume, embracing the States of MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE and MARYLAND, **is now ready for delivery.**

The **second** and **third** volumes, the one embracing the WESTERN, and the other the SOUTHERN STATES, are now being prepared and will be issued at an early date.

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Delaware, Lackawanna and Western Railroad.

From the annual report of the Directors of this Company for the fiscal year ending December 31, 1860, we learn that the revenue derived from the several branches of the transportation department was as follows, viz:

From Transportation of coal	$1,730,186 51
" " " Merchandise	289,321 12
" " " Exp. freight.	8,494 78
" " " Mails	9,615 89
" " " Passengers	126,333 68
" Storage, rents, telegraph, etc.	1,480 37
" Use of locomotives	12,044 77
" Use of cars	13,859 45
Total	$2,191,336 52
Expenses (a fraction less than 40 per cent	874,647 92
Profit	$1,316,688 60
The earnings of this department, for 1859, were	1,062,446 30
Increase 24 per cent	$254,252 30

The number of tons of coal on hand December 31, 1859, was 46,113 02
Received by the Company from lands owned and leased by them 570,685 06
Purchased from other parties 509,542 04

1,126,340 12
Of which there was sold and delivered 1,058,883 17

Leaving on hand Dec. 31, 1860 67,456 15

The coal moved in 1860, was more than 80,000 tons in excess of the estimate contained in the last annual report; and was an increase of 250,792 tons over the quantity for 1859.

The value of coal on hand Deccember 31, 1859, was $154,410 90
Amount paid for running and purchase of coal, transportation to market, and all other expenses of coal department in 1860 3,445,244 80

$3,599,655 70
Amount received for coal sold and rents in 1860 $3,181,888 91
Value of coal on hand December 31, 1860. 211,214 85

3,993,103 76
Loss $206,551 94

Nothing is here allowed for the coal mined from the lands owned by the Company; and the freight is calculated at 2 cts. per ton per mile over the Company's own road, and what is actually paid on connecting roads, with a charge on the latter for the use of engines and cars.

The total capital stock is 106,867 shares, equal to $5,343,350, on which $5,189,147 33 has been paid.

The expenditures on construction account (exclusive of Warren Railroad) during the year 1860, amounted to $234,258 06—of which $42,600 has been transferred to the debit of renewal fund.

The equipment consisted of 74 locomotives; 17 passenger, 5 baggage and express, 379 freight, 4,014 coal, and 24 wreck, caboose and derrick cars.

The amount expended on the Warren Railroad during the year has been $106,963 11
Previously expended 1,596,585 49

$1,703,548 60

For the expenditures made on this road, this company receive an equal amount of the capital stock of the Warren Railroad Company.

The vessel property has been increased by the purchase of three new coal barges at a cost of $12,660 97. The property in this department now consists of 18 barges and 1 schooner.

In pursuance of the provisions contained in the 1st mortgage bonds of 1875 (Eastern Extension), a sinking fund for their redemption was commenced in April, 1860, and $57,000 of the said bonds have been purchased and canceled for that account. There is nearly enough on hand for the requirements of April, 1861. Measures having been taken to redeem the Income Bonds of the company at par, the Sinking Fund heretofore opened to retire them has been closed.

INCOME ACCOUNT.

The balance to the credit of this account, 31st December, 1859, was.		$598,529 25
Deduct amount of bad debts accrued since opening of road to 31st December, 1859, heretofore standing in suspense account, and now charged off as losses		40,551 68
		$557,977 57
Add:—		
Profit in transportation department	$1,316,688 60	
Profit on bonds retired in Sinking Fund (closed), including interest accrued thereon	28,823 19	
Interest on Warren R. R. stock (other than that in renewal fund)	6,755 91

OFFICERS FOR 1861.

President—CHRISTOPHER R. ROBERT.

Vice-President—DRAKE MILLS.

Managers—Drake Mills, John J. Phelps, William E. Dodge, Moses Taylor, George Bulkley, George W. Scranton, John I. Blair, Henry Young, Charles H. Marshall, Samuel L. Mitchill, Rufus R. Graves, Lowell Holbrook, Simeon B. Chittenden, Samuel Wetmore.

Treasurer and Secretary—ANDREW J. ODELL.

Vicksburg, Shreveport and Texas Railroad.

The Monroe, La., *Register*, of January 31 thus announces the opening of this road to that place :

It is with infinite pleasure we announce the arrival of the through train from Vicksburg to this place on Sunday last. Yes, it is an unquestionable fact, the cars have arrived and the citizens of Monroe and vicinity are now living within a few hours ride of Vicksburg and New Orleans. The train left De Sota at 11 A. M. and arrived here at 5 P. M. The honors of the occasion were celebrated in a most appropriate manner at the residence of the Hon. John Ray, one of the fathers of the road. The gentlemen who accompanied the train inform us, that everything worked admirably and that nothing occurred on the trip calculated to beget the slightest distrust of the capacity of the road. The entire working of the concern, from beginning to end, is pronounced good, very good. We hail the happy event as one of abiding interest to the citizens of all North Louisiana and Eastern Texas, and from the bottom of our heart, we wish the enterprise every possible success.—The directors and officers of the road are entitled to and have the people's most cordial congratulations.

New Brunswick and Canada Railway and Land Company.

REPORT OF THE LONDON DIRECTORS.

Referring to the offers mentioned in the last half-yearly report, your Directors have the satisfaction of informing the proprietors that they have succeeded in obtaining a contract, guaranteed by sureties, with Messrs. Walker, Johnstone and Co., for the completion of the line—payments to be made in the debentures of the Company. Mr. Osburn was subsequently instructed to employ the money with which he had been furnished on his leaving England (£15,000) in the payment of the most pressing liabilities, and your Directors have also raised and remitted to him a further sum of £10,000 for the same purpose. With these amounts, Mr. Osburn has paid off liabilities in the shape of judgment debts, overdue contractors, certificates, wages, &c., to the extent of about £23,000, and has expended the remainder in such necessary repairs to the finished portion of the railway aa were most urgently required. Mr. Osburn was also instructed to make most careful examination and inquiry as to the position of the Company's affairs in the province, and the actual amount of liabilities existing there. From his report it appears that debts still remain to be liquidated to the extent of about £24,000. The liquidation of these liabilities is of the utmost importance, not only because it is a condition in the contract with Messrs. Walker and Co. that all the Company's debts in the province should be paid, but also to prevent the creditors proceeding to a sale (already threatened) of the Company's property, the damaging effect of which it would be impossible to overrate. In addition to this sum of £24,000, rails must be procured for the last section of 25 miles, repairs on the constructed portion of the line, and engagements in this country provided for; and for these purposes £80,000 will be required—making a total to be raised of £104,000. Your Directors have negotiated in many quarters with a view to procure at least a portion of this sum on loan, for a term of years, but hitherto without success. The contractors have several hundred men employed upon the works; and it is reported that, from the judicious arrangements made by them, their operations may be continued without serious interruption during the winter, notwithstanding the severe frosts incidental to that climate. Your Directors have appointed Mr. Osburn, manager and engineer-in-chief, thereby dispensing with the services of Mr. Julius Thompson, manager, and Mr. Buck, the engineer. This arrangement is more economical and at the same time tends to greater efficiency, as it is found that, at any rate during construction, it is of great importance to combine, in one person, the office of engineer and manager. Your Directors have received a proposal from Messrs. Walker, Johnstone and Co., to lease the railway for one year from its final completion at a rental of £9,600, payable in monthly sums of £800 each on the first day of each month. Messrs. Walker and Co., have further offered, pending the completion of the railway, to lease the constructed portion of the line, being the first 65 miles from St. Andrews, at the rate of $100 per month—a rate which, on opening the additional 10 miles to Eel River, they propose to increase to £250 per month. Your Directors have not thought it for the interests of the Company to accept these proposals. Should, however, it be deemed expedient to entertain the plan of leasing the railway for a limited period, they are of opinion that a more remunerative offer would be forthcoming. Your Directors have sent out bills, to be laid before the legislature of New Brunswick, consolidating the Company's acts of parliament and relieving the Company from all questions as to its title to the land and the direction and period of completion of the line of railway and the branch to the Ledge. Your Directors have also sent out a bill empowering the New Brunswick Government to grant a guarantee of £30,000 a year in the event of the Company extending the railway to the Canadian boundary; and this, if met by a similar guarantee from the Canadian Legislature, and would constitute a permanent subsidy for an extension to join the Grand Trunk Railway on the St. Lawrence. Your Directors cannot conclude this report, without urging upon the Shareholders this absolute necessity of immediately raising the sum above referred to, or at least the amount requisite to give validity to the contract with Messrs. Walker and Co. as the very existence of the Company is dependent upon such a course being forthwith adopted. Since this report has been in preparation, your Directors have received an official communication from Mr. Tilley, the provincial secretary, to the effect that the New Brunswick Government are prepared to transfer to this Company a further grant of 30,000 acres of land, "upon certain conditions, which will be communicated at an early date." A resolution will be proposed to you for holding the half-yearly meetings in the months of February and August, instead of January and July, as at present—an arrangement that will give more time for the receipt of returns from New Brunswick, and enable the half-yearly accounts to be accurately closed to 30th June and 31st December respectively. Your Directors regret to announce that Mr. Tegg has been compelled, from ill-health, to resign his seat on the board. The Directors retiring from office, on this occasion are Mr. Wickham and Mr. Edwards, who severally offer themselves for re-election. Mr. Howden, the retiring auditor, also offers a continuance of his services.

Canal Tolls, Trade and Tonnage.

ANNUAL REPORT OF THE AUDITOR.

The Auditor of the Canal Department, in accordance with the requirements of the statutes submits to the Legislature the Annual Report of the tolls, trade and tonnage of the Canals of this State during the season of navigation for the year 1860; and all the matters which are required to be presented to the Legislature are fully and particularly set forth in the annexed tables.

The additional table and comparative statements which will be found embodied in this report, have been carefully compiled from official documents in the Auditor's possession, in order to show, as far as practicable, a comprehensive view of the trade and tonnage, as well by the canals as the railroad lines, between the great lakes and the Hudson River and New York.

The whole amount of tolls received was as follows:—

Toll on boats and passengers		$199,479
" products of the forest.	$657,624	
" animals	13,039	
" vegetable food	1,574,390	
" other agricultural products	1,348	
" manufactures	87,956	
" merchandise	223,885	
" other articles	251,876	
		2,810,118
		$3,009,597

The whole amount of tonnage transported on the canals during the last season was as follows:

Products of the forest		1,509,977
Products of animals	19,882	
Vegetable food	1,659,158	
Other agricultural products	3,714	
		1,682,754
Manufactures		268,759
Merchandise		250,360
Other articles		938,364
		4,650,214

The value of such tonnage is as follows:—

Products of the forest		$10,654,710
Products of animals	$5,030,067	
Vegetable food	49,710,838	
Other agricultural products	1,098,072	
		55,838,977
Manufactures		8,113,177
Merchandise		84,252,425
Other articles		11,989,909
		$170,849,198

The total movement of freight, or number of tons carried one mile, during the last season of navigation was as follows:—

Products of the forest		238,130,849
Products of animals	3,084,416	
Vegetable food	380,061,374	
Other agricultural products	464,000	
		383,609,790
Manufactures		28,019,208
Merchandise		55,971,250
Other articles		103,793,499
		809,524,596

The whole amount of tonnage arrived at tide-water by way of Erie Canal, from Western States and Canada, during the last season of navigation, was 1,896,975 tons. The whole amount of tonnage arrived at tide-water, the product of this State, during the same period, was 379,086 tons.

The whole number of barrels of flour arriving at tide-water through the Canals, during the last season of navigation, was 1,240,908

The whole number of bushels of wheat arriving during the same period was 19,204,000, which turned into flour, calculating five bushels to the barrel, would make 3,840,800

Total in barrels 5,081,708

The whole number of bushels of corn arriving at tide-water during the same period was 14,430,857. The total number of new boats registered during the last year was 403, with a total tonnage of 48,355, making an average tonnage of 120.

The whole number of lockages at Alexander's lock, for the season, was 32,439, and the greatest number of lockages at any one lock was 35,490, at lock 32, Fort Plain.

Comparing the season of 1859 with that o 1860, it shows an increase in revenue of $1,285,652, and an increase in tonnage of 868,530, divided among the different classes of articles as follows:—

Products of the forest	decrease	32,058
Products of animals	"	16,269
Other agricultural products	"	3,264
Manufactures	"	30,662
		82,253
Vegetable food	increase	885,503
Merchandise	"	39,178
Other articles	"	26,102
		950,783
		868,530

The increase in lockages at Alexander's lock is 12,165.

In flour and wheat, comprised in the returns of vegetable food, there has been an increase of tonnage the past year of 495,358, and an increase of tolls of $543,144. In corn and oats there has been an increase during the same period of 395,424 tons, and an increase of tolls of $448,402. Under the head of "Products of the forest" there was an increase in tonnage upon shingles, boards and scantling, as compared with 1859, of 8,941, and a decreased tonnage upon timber, staves and wood of 37,846 tons, and a decrease in pot and pearl ashes of 3,362. Under the head of "Other articles" there was an increase in the tonnage of mineral coal for the same period of 48,420, and a decrease in sundries of 23,990 tons.

The whole number of bushels of barley transported on the canals in 1859 was 3,564,541

The whole number of bushels transported in 1860 was 3,814,416

Showing an increase in 1860 of 249,875

The following comparative statement shows the number of tons of each class of property carried on the canals during the season of navigation in the year 1860, and on all the railroads in the State from the 1st of October, 1859, to the 30th of September, 1860, inclusive. Compared with 1859, the canal tonnage has increased 868,530, and the railroad tonnage 882,490. The canal tonnage is not duplicated by reshipments or shifting cargoes to be reoleared; the railroad tonnage is duplicated to a very considerable extent. All the New York Central Railroad tonnage, received from and delivered to its connecting lines, is duplicated, and the same remark is applicable to the New York and Erie Railroad and its connections. The tonnage of the railroads was largely in excess of the canals in the "Products of animals," "Other agricultural products," "Manufactures," and "Merchandise":—

	Products of the forest	Product of animals	Vegetable food	Other agricultural products	Manufactures	Merchandise	Other articles	Total tons carried	
Tons of each class carried on the canals.	1,509,977	19,882	1,659,158	3,714	268,759	250,360	938,364	4,650,214	
Tons of each class carried on all the railroads.	373,424	895,619	1,103,640	148,219	511,916	783,811	930,244	4,741,773	
Total tons of each class carried on the canals and railroads.	1,883,401	915,401	2,762,798	146,933	780,675	1,034,171	1,868,608	9,391,987	

The whole number of tons carried one mile on the canals was 809,524,596, and on the railways 564,050,505. Compared with 1859, the mileage on the canals has increased 264,896,649, and that of the railroads 180,625,064. The increase on the canals, compared with 1859, in vegetable food was 885,503 tons; on the railroads 337,223. The tonnage on the railways and canals in merchandise has increased on both. The aggregate of this increase in 81,557 tons.

The Pennsylvania and Sunbury and Erie Railroads.

The State Senate has passed the bill to commute the tonnage tax on the Pennsylvania Railroad, and also the bill to change the title of, and extend relief to, the Sunbury and Erie Railroad. They now each require only the signature of the Goverpor to perfect them as laws, which it is understood they will receive with little delay. As the result of the removal of the tonnage tax we hope to see freight forwarded from Chicago and landed on the Delaware wharves here without breaking bulk, and at lower freight charges than it can be carried by any rival line. The relief

granted to the Sunbury and Erie Railroad will, it is understood, enable the Company to carry it to completion within a year, or a year and a half at most, and to the entire amount of its business, much or little, will our city be advantaged.—*Philadelphia Commercial List, March* 2, 1861.

Railways in the British Colonies.

As a meeting of the Institute of Civil Engineers, recently held in London, an interesting account was given of the progress made in the construction of railways at the Cape of Good Hope, New South Wales, Victoria, South Australia, etc.

At the Cape of Good Hope, a line of railway had been commenced, designed to run from Cape Town, through Stellenbosch, to the Paarl and Wellington, a distance of about 58 miles, the first section of which was nearly completed and would shortly be opened.

The Australian railways, with the exception of two or three short lines near Melbourne, all belong to the government, and have been carried out by means of loans.

The railways in progress in New South Wales were the Great Southern, the Great Western and the Great Northern. The Southern or main trunk line from Sidney, ultimately intended to join the Victorian system of railways at the river Murray, had been opened as far as Campbelltown, a distance of 34 miles. Up to Paramatta, 13½ miles, there were two lines of way, and beyond, only a single line. A further length of 20 miles, as far as Picton, was expected to be completed in a few months. The cost of the double line, including rolling stock and machinery, and workshops at the terminus, had amounted to upwards of £40,000 a mile, and of the single line about £10,000 a mile. Trial surveys had been made, and estimates prepared of the cost of extending this line to Goulburn, from which it appeared that the natural difficulties were such as would necessitate an expenditure greatly in excess of that hitherto incurred. The Western, starting from the Southern, 1½ mile west of Paramatta, was opened as far as Blacktown, on the Windsor road, a distance of 8 miles, in August last. The cost had averaged about £10,500 a mile of single line. The works were now in progress up to Penrith, a further distance of 12 miles. This line was at present proposed to be carried out to Bathurst and extensive surveys and explorations had been made of the country between the Hawkesbury and that place, including the valley of the Grose, in order to discover a practicable route by which to pass the range of the Blue Mountains. The Northern Railway started from Newcastle, about 60 miles north of Sidney, between which places there was steamship communication daily. The line was opened two years ago to East Maitland, and subsequently to West Maitland, a distance of 20 miles; and in August last to Lochinvar, a further length of 8 miles. From Lochinvar to Singleton, 23 miles, the works would be finished in the middle of 1861. The expenditure had amounted to about £12,000 a mile of single line. The country was under survey beyond as far as Muswellbrook, 70 miles. It abounded in minerals, particularly in coal, from which all the Australian colonies, as well as India and China, might be supplied.

In Victoria, the railways now open were the Geelong and Melbourne, a single line, forty miles long, passing through a level country, in connection with which there were extensive piers and wharves at Williamstown, the port of Melbourne. Also the Suburban Railways, which had been constructed by private companies, in whose hands they still remained. These were: 1, Melbourne and St. Kilda; 2, St. Kilda and Brighton; 3, Melbourne to Richmond, Hawthorne and Brighton; and 4, Melbourne and Hobson's Bay, a double line, three miles in length. The great lines to the interior were: 1, Melbourne and Mount Alexander, to Castlemaine, Sandhurst and Echuca, on the river Murray, a length of 152 miles. The main line had been opened to Sunbury, 22 miles, and also the branch to Williamstown. The portion of the line from Sunbury to Woodend, 28 miles, was expected to be finished early next year. 2, Geelong and Ballarat, a length of 53 miles, of which no part was yet open. The estimated cost of these two lines, both of which would consist of a double way, was seven millions (upwards of £34,000 a mile), of which three millions sterling had been already raised and expended. With respect to the general character of the country, it was described as rising regularly from the coast to the dividing range—with the exception of one sudden step of 300 feet—to a height of about 2,000 feet in 40 miles. There were occasional chasms, or ravines, 100 to 500 ft. in depth, and 660 to 3,300 feet in width, through which the water falling on the higher ranges was discharged with impetuous velocity. But there was a total absence of those great leading valleys which were found in England. The larger rivers, creeks, and ravines had been crossed generally by viaducts constructed with abutments and piers of bluestone masonry, and wrought iron superstructures. The permanent way was of the most substantial character, consisting of a double-headed rail, weighing 80 lbs. per yard, finished, and laid in chairs in the ordinary way, on native timber sleepers.

In South Australia, a double line of railway, from Port Adelaide to Adelaide, a distance of 3½ miles, had been opened for three or four years, and a single line from thence to Gawler, 29 miles, for two years and a-half. From Gawler to Kapunda, 16 miles, the line was opened this year. It was proposed to extend this line northwards.

☞Parties requiring the professional services of a thoroughly competent engineer, will please address W. G. Wheaton, Esq., C. E., Peoria Ill. From a long practical experience as Civil Engineer, and the Chief of several railroads in the North-West, he feels competent to undertake and successfully carry through any and all branches of the profession in railroad engineering. Companies wanting a permanent engineer, or preliminary surveys, reports, estimate, plans or specifications, can be accommodated. Also, older companies in need of an engineer to re-construct and keep in repair their road will do well to employ him. His references are Hon. Wm. Ogden, President C. & N. W. R. R. Co., Chicago, Ill.; Henry Farnam, Esq., President C. & R. I, R. R. Co., Chicago, Ill.; John B. Turner, Esq., Ex-President G. & C. U. R. R. Co., Chicago, Ill.; John Van Nortwick, President C. B. & Q. R. R. Co., Batavia, Ill.; Isaac Underhill, Ex-President P. & H. R. R. Co., Peoria, Ill.; Thos. C. Durant, Esq., C. & R. I. R. R. Office, 13 William Street, New York.

Liabilities of Railroads for Cattle Killed in the State of Delaware.

An important decision, involving the rights and liabilities of railway companies, and the owners of cattle killed by trains when on the track, has just been made by Chief Justice Gilpin, of the State of Delaware. Four main points were made by the learned judge, and were established by his decision as the law of his particular jurisdiction, to wit:

1. That a railroad company, legally chartered, has the unobstructed right of way over its own road.

2. That it cannot be held in damages for any loss which owners of cattle may sustain if their cattle are killed or injured while upon the track, and when due diligence and caution are observed on the part of those in charge of the train to prevent said destruction or injury.

3. That the company is not bound to fence in the lands or farms along the line of road merely for the sake of keeping cattle off the track; but that it is the duty of owners of cattle to see that such cattle do not interfere with and obstruct the passage of trains, and thus become trespassers.

4. That persons who suffer their animals to roam at large upon the track, to the detriment of the travel by obstructing the road, are liable in a suit for trespass thereof.

Bombay, Baroda and Central India Railway.

The second section (45½ miles in length) was completed on 1st January for public traffic, and its formal opening by Sir George Clark, the Governor of Bombay, was appointed to take place about the 17th of that month, making 81¼ miles open for traffic between Surat and Baroda. There is, however, at present a break in the line, where the Nerbudda river crosses it at right angles, over which the traffic is now conveyed by ferry-boats; but, as the works on the Nerbudda bridge are progressing with great rapidity, it is expected that this gap in the line will be filled up on 1st May next by the completion of that magnificent iron bridge of 60 spans and 3,750 feet in length, being the most difficult work on the line. There are 15 intermediate stations on the 81¼ miles between Surat and Baroda; the district being very populous, it is expected that the traffic will be very considerable. On 1st February, 1860, the first section (29 miles in length) was opened for traffic from Amrolee to Unklesur, a district between the Taptee and Nerbudda rivers. On the completion of the Taptee bridge (of 32 spans) in the latter end of last November, the first section was extended across the Taptee to Surat at one end, and to the bank of the Nerbudda at the other end, thus adding 6¾ miles to it, and making the length then opened 35¾ miles. The Taptee bridge is about 2,000 feet in length, crossing a strong tidal river, and having alluvial foundations. The piers are constructed of iron screw piles and diagonal bracing, the superstructure consisting of wrought-iron girders. This bridge was opened for traffic within one year from the first commencement of its erection, including a delay of four months during the monsoon. It should be mentioned that immediately after the opening of this bridge and the additional 6¾ miles, the average traffic per mile on the 29 miles was doubled over the whole length of the 35¾ miles. The additional 45½ miles opened on 1st ult., make in all 81¼ miles opened to that date. It is expected that 14 additional miles, from Baroda to the Mhye river, will be opened for traffic in the course of next month, making 95 miles. The sanction of the Government having been given to the resumption of the works, which were suspended by them on the portion of the line from Surat to Bombay, it is also confidently expected that a further section of 40 miles from Surat to Bulsur will be opened for traffic in June next, making together a continuous line 136 miles in length, passing all the way through the best cotton district of India.—*London Railway Times.*

Current Prices of Metals.

[Furnished to *Herapath's Railway Journal*, by Messrs TRUEMAN & FRY, Metal Brokers of London and Liverpool.]

Illinois Central Railroad.--Locomotive Department.

The machinery on this road seems to have been maintained and run during the past year, with a good degree of economy, as will be seen by reference to the following abstract, furnished us by S. J. Hayes, Esq., Superintendent of Machinery on the road:

Total number of engines	112
Number of miles run by passenger trains	926,843
" " freight trains	1,124,562
" " construction and wood trains	386,417
" " all the trains	2,437,822
Bbls. waste used	31,429
Gallons oil	21,114
Cords of wood used	46,576
Tons coal and coke used	16,490
Wages paid firemen and engineers	$96,623
Cost of repairs	148,502
Value of oil, tallow and waste used	19,160
Value of wood and coal used	212,009
Cleaning engines	15,477
Total cost of maintaining and running machinery	$491,773
Average cost of wood and coal per mile run.	8.70
" " oil, waste and tallow "	.78
Wages of firemen and engineers per mile	3.96
Cost of repairs per mile	6.10
" cleaning engine per mile	.63
Total cost per mile of running and maintaining machinery	20.17
Average miles to pint of oil	14.43
" " cord of wood	41.35
" " ton of coal	34.25

Items.

A survey is being made for the extension of the Buffalo, New York & Erie Railroad to Elmira, from Corning.

The State of Illinois has passed a law to pay $184,376 91 to old contractors on the Illinois and Michigan Canal, being the loss on exchange upon bonds sold in London when the canal was built.

An application has been made to the New Jersey Legislature to authorize the laying of rails on the plank road between Newark and Hoboken, for a horse railway.

A bill appropriating half a million of dollars from the State Treasury in aid of the construction of the Albany and Susquehanna Railroad, has passed the Senate of New York.

The temporary loan of $35,000 of Ohio State stocks will be paid by the Commissioners at the Ohio State agency, No. 25 William Street.

Railroad Earnings.

The following are the earnings of the Great Western Railway of Canada for the week ending February 22, 1860:

Passengers	$13,265 48
Freight and live stock	25,475 45
Mails and sundries	1,293 26
Total	$40,034 20
Corresponding week of last year	33,411 64
Increase	$6,622 56

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 9,

were	$40,470 86
Week ending Feb. 11, 1860	50,733 72
Decrease in 1861	$10,262 86
Total traffic from July 1st, 1860	$2,097,110 26
Corresponding period previous year	1,671,212 46
Increase	$425,897 80

During greater part of the week trains were entirely stopped by intense cold and snow storms.

The receipts of the Grand Trunk Railway of Canada for the week ending February 16th, 1861,

were	$42,226 95
Corresponding week, 1860	50,926 14
Increase	$8,699 20
Tot. traffic from July 1, 1860, to date,	$2,139,337 20
Corresponding period, 1859	1,722,138 60
Increase	$417,198 60

Traffic still interrupted by snow storms.

The earnings of the Cleveland and Toledo Railroad for February, 1861 were

	$75,690
February 1860	67,321
Increase	$8,459

The earnings of the Galena and Chicago railroad for February, 1861, were

	$77,079 15
February 1860	62,698 19
Gain	$14,380 96

The earnings of the Hudson river railroad for

February, 1861, were	$205,342 69
February, 1860	209,422 63
Decrease	$4,079 94

One working day less this year than last.

Earnings in February for the last four years:

1858	$163,837 27
1859	190,588 94
1860	209,422 63
1861	205,342 69

The following is a statement of the earnings of the Buffalo, New York, and Erie Railroad for the month of February, 1861, as compared with the earnings for the corresponding month of the previous year:

February, 1861	$39,249 03
February, 1860	35,117 74
Increase	$4,071 29

The Michigan Central Railroad earned in February, 1861 $119,783 97
February, 1860 107,748 86
Increase $12,005 11

The earnings of the Chicago and Rock Island Railroad in February, 1861 were $64,105
February 1860 66,510
Decrease $2,495

The earnings of the St. Louis, Alton and Chicago Railroad in February 1860, were:

Passengers	$22,193 87
Freight	48,326 70
Mails and express	3,278 37
Total	$73,793 94
February, 1860	55,113 13
Increase in 1861	$18,680 81

The receipts of the Grand Trunk Railway of Canada for the week ending Feb'y 23,

were	$54,306 81
Corresponding week last year	55,691 48
Decrease	$1,384 67
Total traffic from July 1, 1860	$2,193,644 01
Corresponding previous year	1,777,830 08
Increase	$415,813 93

Traffic still interrupted by drifting snow.

The earnings by the Chicago, Burlington and Quincy Railroad Line in the month of February were in

	1860.	1861.
Freight	$70,758 10	$77,198 00
Passengers	30,925 68	29,659 19
Mails and miscellaneous	16,172 78	2,766 80
Total	$117,856 62	$109,623 99
Decrease		$8,232 63

The earnings of the Chicago and Northwestern Railroad for February, 1861, were $47,747 72
February, 1860 32,179 12
Increase, 1861 $15,568 60

The earnings of the Toledo and Wabash Railroad in February, 1861, were $46,842 61
February, 1860 42,063 53
Increase $3,779 08

Railways in New Brunswick.

We see it stated in the New Brunswick papers that the European and North American Railway has been completed from St. John to Shediac, on the Gulf of St. Lawrence, a distance of 110 miles. There is a road already built from Truro to Halifax, N. S., more than half the distance from Halifax to the boundary of New Brunswick. The work on the European and North American road has been prosecuted amid many obstacles and discouragements, and its completion to the Gulf of St. Lawrence will be of great benefit to the fine agricultural and mineral lands through which it passes. We hope the day is not far distant when the original project of pushing the line through from Bangor to the boundary of New Brunswick will be completed. The New Brunswick people it is said, are willing to build their portion of the road to the line whenever they can be assured that the portion of the road lying in the State of Maine will be built.

We see in the St. John papers that the Board of Engineers, in finishing up their work on the road, made Robert Jardine, Esq., the Chairman of the Railway Commissioners, a beautiful present as a token of their regard and esteem. Mr. Jardine was one of the original projectors of the enterprise, and was one of the representatives of New Brunswick at the great Railway Convention in Portland in 1850. It is owing in no small degree to his wisdom and energy, and untiring devotion to the work, that this great enterprise has thus far succeeded.—*Boston Journal.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*
